SURFACE MINING AND RECLAMATION PLAN
RIVERBEND SAND AND GRAVEL PROJECT

1.0 PROJECT INFORMATION

1.1 Purpose and Scope

This application is submitted in accordance with the Regulations for Surface Mining and Reclamation in All Districts, Section 858 of the Fresno County Zoning Ordinance (FCZO), the Surface Mining and Reclamation Act (SMARA), and associated SMARA regulations adopted by the State Mining and Geology Board (SMGB) (CCR Sections 3500-3800).

Riverbend Sand and Gravel, LLC (Riverbend) is applying for a Conditional Use Permit (CUP) to mine construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. The proposed Project Site, located approximately 1.5 miles southeast of the City of Sanger, includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E and includes approximately 619 acres of an approximately 833 acre site located immediately east and north of the Kings River (Exhibits A and B). The remaining 214 acres of the property, including all the existing riparian habitat along the Kings River, are excluded from the project. The project site is relatively flat and is currently in orchards and vineyards. The Hanke Ditch is piped and runs through the eastern portion of the project site north of Goodfellow Avenue and is an open ditch along the east side of the project site south of Goodfellow Avenue.

Mining is anticipated to occur to a depth of approximately 100 feet below natural ground surface. A "wet mining" method is proposed utilizing an electric dragline that does not require dewatering of the excavation. The mined aggregate would be processed at an on-site processing plant located north of Goodfellow Avenue with an anticipated annual process rate of 1.6 million tons and proposed annual sales of approximately 1.25 million tons. The processed material will be used by a Ready-Mix Concrete (RMC) plant (150,000 cubic yards/year) and a Hot Mix Asphalt (HMA) concrete plant (250,000 tons/year) located on-site or sold to outside customers. Access to the project site is proposed from Goodfellow Avenue approximately 1/2 mile west of Riverbend Avenue. The facility will also include periodic use of a portable plant to recycle concrete and asphalt debris (including imported) into Crushed Miscellaneous Base (CMB) (100,000 tons/year) and Recycled Asphalt Product (RAP) (25,000 tons/year). RAP will facilitate use of recycled asphalt in HMA mix designs. Operations are anticipated to ramp-up over a five year period with initial sales in 2015 to be 350,000 tons, sales in 2017 to be 700,000 tons and full operations in 2019 at sales of 1.25 million tons. Operations are expected be on-going for at least 75 years.

1.4 Size and Legal Description

The project site includes 619 acres as shown on Exhibit C including all or portions of the properties as identified in Section 1.3.

The legal description of the above properties is contained in Appendix B.

1.5 Vicinity Map

The project vicinity is shown on Exhibit B.

1.6 Map of the Subject Property Including Boundaries and Topographic Details of the Land

Exhibit C shows the boundaries and topographic details of the project site

1.7 Objectives of Project

The following are Riverbend's objectives for this project:

a. Provide a reliable and sustainable, local source of high quality aggregate to help meet the current and long-term demand (75 years) for construction materials in Fresno County.
b. Create additional, long-term supply of local aggregate reserves.
c. Utilize aggregate reserves from property already designated by the state and county as MRZ-2 (Mineral Resource Zone containing mineral resources of regional significance, i.e. sand and gravel).
d. Utilize high quality aggregate resources that meet the California Department of Transportation's specifications for use in Portland Cement Concrete (PCC) and Asphaltic Concrete (AC) which aggregate is important for quality infrastructure growth and maintenance because of its versatility, value, and relative scarcity.

e. Provide an additional local source of construction aggregate with enough annual sales capacity (1.25 million tons) to encourage a healthy competitive market.
f. Obtain aggregate resources with access to an efficient local road network and State Highway system.
g. Obtain aggregate resources unconfined by a restrictive conservation easement.
h. Create a project that would not require dewatering of groundwater.
i. Create an environmentally sound project that would balance the recovery of the aggregate resource with the protection of other resources including wildlife habitat, groundwater, surface water, and air quality.
j. Create a project that will return a significant amount of mined land back to farming.
k. Create local quality jobs, while also benefiting local downstream businesses and creating an enhanced tax revenue to the county.

1.8 Demand for Aggregate

Construction aggregate is essential to the needs of modern society, providing material for the construction and maintenance of infrastructure such as roadways, dams, canals, buildings and other parts of California's infrastructure. Construction aggregates are the very cornerstone of today's built environment and the core building component for schools, hospitals, houses, commercial and industrial buildings. Public works projects comprise 43% of aggregate consumption (John Parish, State Geologist, CalCIMA Conference, March 2007). Aggregate is a key component in most buildings including homes, schools, hospitals and shopping centers.

As part of the infrastructure State bonds approved in 2006, Caltrans is scheduled to deliver historic amounts of highway construction in the next few years. A tremendous amount of aggregate is required to supply the projects that support the State's transportation infrastructure and the need for new aggregate sources. As part of *Go California*, a mobility action plan designed to decrease congestion, improve travel times and increase safety, Will Kempton, Director of Caltrans, expressed concern about the availability and pricing of aggregate (Letter Regarding Aggregate Shortage in California, Will Kempton, Caltrans, February 27, 2006). Caltrans' statewide strategy is to work with communities in securing adequate industry capacity for California's needs.

In California, the supply and demand for aggregate resources are tracked by the California State Department of Conservation's California Geological Survey (CGS). The CGS regularly analyzes the supply and demand of aggregate resources in California, and publishes reports indicating the past consumption and anticipated future demand for regional aggregate supplies. The various regions studied throughout the State are market areas referred to as "Production-Consumption Regions." The Project is in the Fresno Production-Consumption (P-C) Region, which services the needs of portions of central and eastern Fresno County and portions of southern Madera County. According to the California Department of Finance, population in the region is expected to nearly double in the next 50 years from 1,083,705 in 2010 to 1,989,331 in 2060.

The CGS report titled *Aggregate Availability in California – Map Sheet 52* (updated 2012) uses the Department of Finance future population estimates and historical per capita consumption to estimate future aggregate demand. Map Sheet 52 indicates that the P-C Region's projected 50-year aggregate demand as of January 1, 2011, was approximately 435 million tons (MT). Existing permitted reserves at that time was indicated to be 46 MT. However, that estimate did not include the 63 MT approved for the Sanger-Centerville Expansion (Vulcan Materials Company) in 2007 or the 50 MT approved for the Madera Quarry (Shimmick Construction) in Madera County in 2010. In 2012, the Carmelita Mine and Reclamation project (Colony Land Company) was

approved for 85 MT. Those three projects added 198 MT (net finished aggregate product) of permitted reserves to the P-C Region. Without adjusting for reserves consumed since January 1, 2011 total permitted reserves in the P-C region would be 244 MT.

In 2010, Map Sheet 52 indicated that the P-C Region consumed approximately 6.0 MT per year (MT/y). At that consumption rate for the four-year period from 2011 through 2014 approximately 24 MT of permitted reserves would have been consumed leaving 220 MT of permitted reserves at the beginning of 2015, or approximately 50% of the region's 50-year aggregate demand.

The Riverbend Project, if approved, would add 70 MT increasing the permitted aggregate reserves to 290 MT, or 67 % of the 50-year demand. If the proposed Austin Quarry project in Madera County is approved, it would add 250 MT. Total permitted reserves in the region would then be 540 MT.

Future consumption of permitted reserves is affected by the maximum annual sales permitted for each site and annual consumption rates as described in the following two scenarios.

Table 1 shows the existing permitted aggregate operations in the Fresno P-C Region, assuming Austin Quarry and Riverbend were both permitted. If Austin and Riverbend were both approved, annual permitted sales would be 10.4 MT per year (MT/y). (Central Valley RM & River Rock annual sales are not included in the total since their permits expire in 2015 and 2016 respectively.)

Table 1
Maximum Permitted and Proposed Annual Aggregate Sales: Fresno P-C Region

Operation	Maximum Annual Sales Permitted (million tons)
Cent. Valley RM (Sante Fe)[1]	Negligible
River Rock (Vulcan)[2]	Negligible
Rockfield (Cemex)[3]	1.0
Kings River (CMI)[4]	1.0
Sanger (Vulcan)[5]	2.5
Madera Quarry[6]	0.9
Carmelita[7]	1.25
Austin Quarry[8]	2.5
Riverbend[8]	1.25
Total	**10.4**[9]

1. Permit expires in 2015
2. Permit expires in 2016
3. Permit expires in 2023
4. Permit expires in 2043
5. Reserves depleted in 2059
6. Reserves depleted in 50 years
7. Not yet operational
8. Proposed
9. CVRM & River Rock not included since their permits expire in 2015 and 2016 respectively.

Assuming that Carmelita, Riverbend and Austin Quarry are fully operational in 2015 and that annual sales would equal the permitted annual sales, aggregate consumption in the next 50 years

would be as follows (not all mine projects are permitted so this assumption assumes a maximum reserve scenario):

- 2023 (in 8 years): Rockfield permit expires, 83 MT would be consumed, and annual permitted sales would drop to 9.4 MT.
- 2043 in (29 years): CMI permit expires, an additional 188 MT would be consumed and annual permitted sales would drop to 8.4 MT.
- 2060 (in 45 years): Sanger reserves would be depleted, an additional 143 MT would be consumed and annual permitted sales would drop to 5.9 MT.
- 2065 (in 50 years): Madera Quarry's reserves would be depleted, an additional 30 MT would be consumed and annual permitted sales would drop to 5.0 MT.

Total consumption for the next 50 years would be 444 MT or 9 MT more than the 435 MT projected in Map Sheet 52. The remaining permitted reserves would be 96 MT. However, at the annual consumption rate of 11 MT/y in 50 years, as estimated by Map Sheet 52, there would be less than 9 years of reserves remaining.

It should be noted that the 50-year demand is simply a measuring tool and not a limit. In a healthy supply and demand market, having more than 50 years of permitted reserves would provide more sources for aggregate products and should result in more competitive pricing for the consuming public.

In order to meet the required specifications for the broad range aggregate products needed in the construction materials market, there needs to be a suitable balance of available rock and sand, roughly in the 50% rock/50% sand ratio. However, it appears that future market supply in the region may hit an imbalance with far more rock in supply than sand. This imbalance is primarily based on greater hard rock resources being developed and permitted than that of alluvial deposits which contain natural sand resources as well as rock. If the proposed Austin Quarry project in Madera County is approved, 300 MT (Madera Quarry 50 MT + Austin Quarry 250 MT), or 55% of the 546 MT of the region's reserves, would be from hard rock quarries, creating an imbalance in the rock to sand regional production. Technology allows for the production of sand from rock; however this process is more expensive than the washing and processing of natural sand. Manufactured sand is not the desired product by the local Ready-Mix Concrete (RMC) producers or users. Producers of RMC have traditionally paid more and travelled great distances for natural concrete sand than manufactured sand because it flows better, is easier to pump and in some cases requires less cement than manufactured sand. With 55% of the local operations being rock reserves, natural occurring sand from the alluvial deposit on the Riverbend site on the Kings River will be critical to meet the sand demand for the region, including the demand of governmental agencies like Caltrans and the Fresno County Department of Public Works.

1.9 Aggregate Cost

Transportation plays a major role in the cost of aggregate to the consumer. Aggregate is a low-unit-value, high-bulk-weight commodity, and it must be obtained from nearby sources to minimize both the dollar cost to the aggregate consumer and other environmental and economic costs associated with transportation. If nearby sources do not exist, then transportation costs will significantly increase the cost of the aggregate by the time it reaches the consumer. For straight hauls with minimal traffic, the price of aggregate increases about 15 cents per ton for every mile that it is hauled from the plant. Currently, transporting aggregate a distance of 30 miles will increase the FOB price by about $4.50 per ton. For example, to construct one mile of six-lane

interstate highway requires about 113,505 tons of aggregate. Transporting this amount of aggregate 30 miles adds $510,000 to the base cost of the material. Transporting aggregate from distant sources also results in increased fuel consumption, air pollution, traffic congestion, and road maintenance. Moreover, transportation cost is the principal constraint defining the market area for an aggregate mining operation.

Permitting and expansion of additional construction aggregate supply sources provides significant benefits and cost savings. (*Construction Aggregate Supply Limitations, Estimates of Economic Impact,* Caltrans, February 2006). Those benefits include:

- A reduction in emissions from trucks with the reduction in truck miles of travel for hauling aggregates;
- Shorter hauling distance reducing aggregate-truck miles of travel and the cost of the materials;
- Reduction of pavement deterioration from fewer truck miles traveled;
- Reduction in project delays due to lack of aggregate supply in the area, which leads to increased project costs; and
- Reduction in aggregate-related truck miles of travel would also reduce traffic congestion and potentially reduce traffic accidents on roads

1.10 Aggregate Quality and Use

The California Department of Conservation (DOC) classifies areas of known important mineral commodities, referred to as Mineral Resource Zones (MRZ), so that these areas may be given land use consideration by local agencies in their general plan preparation process. DOC classified most of the Kings River Resource Area as MRZ-2 (including the Riverbend Project site), indicating that significant mineral deposits (i.e., sand and gravel) of regional or statewide significance are present, or there is a high likelihood for their presence.

In 1988, the State published SMARA Designation Report No. 8 (DR-8), which designated the Kings River Resource Area, including the Project site, as having construction grade aggregate deposits that are of regional significance (*Designation of Regionally Significant Construction Aggregate Resources in the Fresno Production Consumption Region, SMARA Designation Report #8,* DOC and DMG, July 1988).

The highest quality aggregate is that which meets the California Department of Transportation's specifications for use in Portland Cement Concrete (PCC). Forming 80 to 95% of the material volume in the mix, aggregate provides the bulk and strength to PCC and AC.

The material specifications for PCC and AC aggregate are more restrictive than specifications for other applications such as Class II base, subbase, and fill. These restrictive specifications for use as PCC or AC aggregate make such acceptable deposits the scarcest and most valuable aggregate resources. Aggregate produced from such deposits can be, and commonly is, used in applications other than concrete. PCC and AC-grade aggregate deposits are of major importance when planning for future availability of aggregate commodities because of their versatility, value, and relative scarcity. (CGS, 2006) The aggregate deposits in the Kings River MRZ-2 zone, where Riverbend is located, qualify for use both as PCC or AC aggregate making it one of the most important and most valuable aggregate sites in Fresno County.

1.11 Environmental Costs of Aggregates

A local source of aggregates has both direct and indirect impacts on the environment. The indirect impacts include changes in the environmental costs of hauling aggregates and possible changes in the level of construction activity. The most likely effect of permitting a local aggregate site is to reduce the truck miles used for aggregate hauling, which is an environmental benefit, whereas the change in construction activity induced by permitting a site is likely to be extremely small. (*Working Paper No. 994: A Note on the Environmental Costs of Aggregates*, Peter Bereck, California Agricultural Experiment Station, Giannini Foundation of Agricultural Economics, January 2005)

Distance matters since transportation plays a major role in the cost of aggregate to the consumer. Aggregate is a low-unit-value, high-bulk-weight commodity, and it must be obtained from nearby sources to minimize both the dollar cost to the aggregate consumer and other environmental and economic costs associated with transportation. If nearby sources do not exist, then transportation costs will significantly increase the cost of the aggregate by the time it reaches the consumer. Transporting aggregate from distant sources also results in increased fuel consumption, air pollution, traffic congestion, and road maintenance. Moreover, transportation cost is the principal constraint defining the market area for an aggregate mining operation.

2.0 ENVIRONMENTAL DATA

2.1 Environmental Setting

2.1.1 Existing Land Use

The project site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. The Hanke Ditch is piped and runs through the eastern portion of the project site north of Goodfellow Avenue and is an open ditch along the east side of the project site south of Goodfellow Avenue. Riparian habitat is located along the Kings River outside the western and southern edges of the project site. Exhibit B includes an aerial photo of the project site and vicinity and Appendix C includes photos of the existing conditions.

There are several existing farmhouses and outbuildings on the project site (Exhibit C). These structures will be removed in accordance with appropriate regulations prior to mining each particular phase where the structures are located.

Surrounding land use includes an aggregate operation (Central Valley Ready-Mix) to the north and an aggregate operation to the east and southeast (Calaveras Materials Inc.). Large-lot, low-density rural residences, ranches, agriculture and farms are located to the east and to the west and south across the Kings River. Stone fruit orchards with several farm residences are located on the northwest corner of Goodfellow Avenue and Riverbend Avenue between the northern and southern parts of the project site. The City of Sanger is located approximately 1.5 miles northwest of the project site.

2.1.2 Mineral Resource Zone

In 1986, the State of California included the project site in the classification of the aggregate resources in Kings River area as MRZ-2 (Mineral Resource Zone containing mineral resources, i.e. sand and gravel) [*Mineral Land Classification: Aggregate Materials in the Fresno Production-Consumption Region, Special Report 158*, Judy Wiedenheft Cole and David Fuller, California Department of Conservation (DOC) and Division of Mines and Geology (DMG), 1986]. Fresno County incorporated the MRZ-2 classification into the Mineral Resources Unit of the Open Space/Conservation Element of the General Plan in 1987.

In 1988, the State also designated this site as having construction grade aggregate deposits that are of regional significance (*Designation of Regionally Significant Construction Aggregate Resources in the Fresno Production Consumption Region, SMARA Designation Report #8,* DOC and DMG, July 1988). SMARA requires that a lead agency's land-use decisions involving the designated area be made in accordance with its mineral resource management policies, and that the lead agency consider the importance of the mineral resource to the region as a whole and not just the lead agency's area of jurisdiction.

2.1.3 General Plan

The following Fresno County General Plan policies apply to the project:

a. Agricultural and Land Use Element

   Policy LU-A.4 "The County shall require that the recovery of mineral resources and the exploration and extraction of oil and natural gas in areas designated Agriculture comply with the Mineral Resources Unit of the Open Space and Conservation Element. (See Section OS-G)"

		Initial Release

The Kings River Regional Plan designates the land use for the project site as Agriculture. The recovery of mineral resources from lands designated Agriculture is permitted by the above policy. The project is also consistent with the Mineral Resources Unit of the Open Space and Conservation Element as discussed below.

b. River Influence Areas

Policy LU-C.1: The County shall regulate land use along the Kings River in accordance with policies of the Kings River Regional Plan.

The project is consistent with the Kings River Regional Plan as discussed below.

Policy LU-C.5: The County may allow the extraction of rock, sand and gravel resources along the Kings River consistent with the Kings River Regional Plan policies and Section OS-C, Mineral Resources, of the Open Space and Conservation Element. (See Policy OS-C.11.)

The project is consistent with the Kings River Regional Plan and Section OS-C, Mineral Resources, of the Open Space and Conservation Element as discussed below.

c. Kings River Regional Plan

The following policies apply to the project.

Policy 4.05: The recovery of mineral resources in all zone districts will occur under the appropriate location and operational standards specified in the Mineral Resources Unit of the Open Space and Conservation Element of the Fresno County General Plan. [Note: Replaced by Mineral Resources Section of the Open Space and Conservation Element in the 2000 General Plan].

The project is consistent with the Mineral Resources Section of the Open Space and Conservation Element as discussed below.

Policy 8.01: Sand and gravel operations should be encouraged in appropriate locations and should meet all Standards of Section 306-06 (Mineral Resources) of the General Plan. [Note: Replaced by Mineral Resources Section of the Open Space and Conservation Element in the 2000 General Plan].

See discussion under Policy OS-C.2 below.

d. Mineral Resources Section of the Open Space and Conservation Element

The introduction to Mineral Resources section states, "Aggregate and petroleum are the county's most significant extractive resources and play an important role in maintaining the county's overall economy.

The combined annual impact of the construction and aggregates industries in Fresno County in 2003 was $4.4 billion. (*Construction & Aggregates in Fresno County, An Economic Analysis of the Construction and Aggregates Industries in Fresno County*, Sharon Prager and Randy Evans, October 2003)

Policy OS-C.2: The County shall not permit land uses incompatible with mineral resource recovery within areas designated as Mineral Resource Zone 2 (MRZ-2). (See Figures 7-9, 7-10, and 7-11 in Fresno County General Plan Background Report.)

Policy OS-C.2 preserves MRZ-2 properties, which includes the project site, for mineral resource recovery.

Policy OS-C.3: The County shall require that the operation and reclamation of surface mines be consistent with the State Surface Mining and Reclamation Act (SMARA) and special zoning ordinance provisions.

This mining and reclamation plan has been prepared in accordance with SMARA and Section 858 of the FCZO.

Policy OS-C.5: The County shall require reclamation of all surface mines consistent with SMARA and the County's implementing ordinance.

This mining and reclamation plan has been prepared in accordance with SMARA and Section 858 of the FCZO.

2.1.4 Zoning

The project site is zoned "AL-20" Limited Agriculture, 20 acre minimum parcel size. Surface mining operations and related facilities and activities are permitted in AL-20 district subject to a CUP and the provisions of Section 858 of the FCZO.

2.1.5 Williamson Act

Approximately 88 acres of the project site (Phases 8A and 8B) are currently subject to a Williamson Act contract (AP-6322). At least 10 years prior to the scheduled mining of Phases 8A and 8B a Notice of Non-renewal will be filed with Fresno County. By the time Phases 8A and 8B are ready to be mined the Williamson Act contract will have expired.

2.1.6 Vegetation Types and Condition

The project site is currently in walnut and olive orchards and grape vineyards. All the riparian habitat which is located along the Kings River on the western and southern edges of the project site will be avoided. (*Biological Resources Evaluation* (BRE), *Riverbend Sand and Gravel Project, Fresno County, California*, Buada Associates; John Stebbins, Consulting Botanist; LSA Associates, January 2013)

2.1.7 Soil Types and Condition

Native surface soils on the project site as noted below and as shown on Exhibit D are primarily Grangeville soils as shown on maps #63 and #73 of and as described in the *Soil Survey of Eastern Fresno Area, California*, USDA, Soil Conservation Service (October 1971).

Dello loamy sand (Dm): Capability unit III, Storie Index rating 58

Dello sand loam (Dn): Capability unit III, Storie Index rating 65

2.1.8 Groundwater

Groundwater conditions were analyzed in the groundwater study prepared for the Project Site (*Groundwater Conditions at the Riverbend Sand and Gravel Project, Fresno County, California,* Kenneth D. Schmidt & Associates (KDSA), December 2013; and *Groundwater Conditions Addendum,* KDSA, May 2014)).

a. Elevation

Groundwater levels in the Project Area range from 16 to 20 feet below the ground surface (bgs).

b. Quantity and Quality

The alluvial deposits at the Project Site are highly productive. Yields of many irrigation wells in the area range from 500 to 2,000 gallons per minute (gpm).

The main sources of recharge to groundwater in the vicinity are deep percolation from irrigation return flow, seepage from the Hanke Ditch, Kings River, and Cameron Slough, and groundwater inflow from the north. The main sources of groundwater discharge are pumping and groundwater outflow to the south, including to the Kings River during low river stages.

There are 4 domestic wells and 4 active irrigation wells on the Project Site (Exhibit C). In addition five 70-foot deep groundwater monitoring wells have been installed on the property. Groundwater levels since December 2010 have ranged from 8 to 22 feet. The direction of groundwater flow has been south-southwest. The base of the useable aquifer in the vicinity ranges from 500 to more than 800 feet.

The on-site irrigation wells are used to supplement the Hanke Ditch surface water supply as described below.

2.1.9 Surface Water

a. Surface Water

The Kings River, located along the western boundary of the project site is the predominant surface water feature in the area (Exhibit C). All of the project site is in the Kings River Water District. Most of the irrigation water (95%) used at the project site has come from the Hanke Ditch, which passes along the eastside of the project site. In the northern portion of the project site the Hanke Ditch has been piped. A pump is also used to divert water to the site from the Kings River for about 5 acres of grapes. The river pump can also be used to supplement the Hanke Ditch supply. The District has delivered an average of 3.5 to 4.0 acre-feet per acre per year of water to the site. For the current irrigated land at the project site (619 acres), this would total about 2,170 to 2,480

acre-feet per year. Current consumptive water use for irrigation is estimated to be 1,630 acre-feet per year. (KDSA, December 2013)

b. Flooding

The project site is setback at least 50-feet from the 100-year floodway as mapped by FEMA (Regulatory Floodway) and the Designated Floodway as mapped by Central Valley Flood Protection Board. The FEMA floodplain maps indicate that portions of the project site are within the mapped 100-year floodplain. However, review of the existing topography indicates that much of the area mapped by FEMA as floodplain on the Project site is no longer within the current 100-year floodplain (*Riverbend Sand and Gravel Hydraulic Flood Analysis*, Chang Consultants, February 2014).

2.1.10 Biological Resources

The BRE was prepared for the Biological Study Area (BSA), totaling 833 acres. The BSA consisting of the property controlled by Riverbend, on which the 619-acre Project Site (i.e., the area to be mined) is proposed (Buada; Stebbins; LSA, July 2013; LSA, Jan 2014; LSA April 2014). Plant surveys and biological surveys were conducted. The BRE determined that no native habitats exist on the Project Site and that the mining/reclamation project will avoid impacts to the native plant communities all of which occur outside of the Project Area. These communities are considered sensitive habitats because they support a high diversity of wildlife species. By avoiding all of the existing native habitats outside of the project boundary, the native wildlife in the area will continue to have habitat available for foraging, shelter, and breeding activities during all phases of mining.

The following is an overview of the presence of special status species on the site.

a. Special Status Species

Valley Elderberry Longhorn Beetle: The Valley elderberry longhorn beetle (VELB) (*Desmocerus californicus dimorphus*), a federally threatened (FT) species, occurs only in the Central Valley of California. The Mexican elderberry (*Sambucus mexicana*), which is the habitat of the VELB, is located adjacent the Project Site. In October 2012, the United State Fish & Wildlife Service (USFWS) formally proposed the rule to delist the VELB (Federal Register Volume 77, Number 191, Pages 60237-60276). The project avoids all the elderberry shrubs. In addition, mining-related activities, including access and maintenance roads, will not occur any closer to existing elderberry plants than current farming activities.

Swainson's Hawk: The Swainson's hawk (*Buteo swainsoni*) is a State threatened species. It has no formal federal status. The mixed riparian forest community could provide suitable nesting habitat for Swainson's hawk. However, the other communities in the BSA, specifically the vineyards and orchards, are not suitable foraging habitat for this species.

Sanford's Arrowhead: Sanford's arrowhead (*Sagittaria sanfordii*), a California Native Plant Society List 1B plant, was observed in the northernmost of the two ponded areas within the wetland associated with the mixed riparian forest located adjacent to, but outside of the Project Site.

Pacific Pond Turtle: The Pacific pond turtle (*Actinemys marmorata*) is a California Species of Special Concern. The riverine habitat in the Kings River and the ponded areas associated with the wetlands within the mixed riparian forest community near the north end of the BSA provide suitable aquatic habitat for Pacific pond turtle. However, the adjacent uplands in the BSA, which are predominantly vineyards and orchards and includes the entirety of the Project Site (i.e., the area to be mined), are not

suitable nesting habitat for this species. Based on this information, there is moderate potential for Pacific pond turtle to occur in the BSA, but outside of the Project Site.

b. Sensitive Habitats

Great Valley Mixed Riparian Forest: Approximately 40.5 acres of Great Valley mixed riparian forest is located as a narrow, almost solid band of vegetation along the eastern edge of the Kings River adjacent to, but outside of the Project Site.

Riverine: The riverine community in the BSA, totaling 20.3 acres, consists of the active channel of the Kings River (excluding extensive area of riparian vegetation). The active channel consists primarily of open water, but occasional gravel bars, either unvegetated or with scattered vegetation, also occur. All of the riverine community is outside of the Project Site.

2.1.11 Cultural Resources

A cultural resources study was prepared for the project site and the surrounding property owned or controlled by Riverbend, but not included in the project (*Cultural Resources Studies for the Riverbend Sand and Gravel Project, Fresno County, California,* Applied Earthworks, Inc., June 2012). Prehistoric archaeological sites or features were encountered or recorded within the study area but not within the project area. Since the project avoids these sites, including a 50-foot exclusion zone, no further action was recommended.

2.2 Geologic Description

2.2.1 General Geologic Setting

The project site is within the Great Valley geologic province, lying between the Coast Ranges province and the Sierra Nevada province. The Great Valley province is characterized by relatively flat-lying alluvial sediments formed by the coalescence of successive alluvial fans derived from the Sierra Nevada and Coast ranges. The Kings River deposits were derived from the Sierra Nevada.

Granitic rock types compose the majority of clast types within the Kings River fan with the majority of the remainder of the deposit composed of quartzite, fine-grained basaltic volcanics, and fine-grained metavolcanics. The Kings River is geomorphologically similar to the San Joaquin River, except that it has a broader floodplain and a thicker section of recent sand and gravel. Unlike the San Joaquin River deposits, a persistent underlying clay layer has not been reported in existing aggregate operations on the Kings River. No materials deleterious to the production of quality aggregate have been found in the Kings River deposits. (DOC and DMG, 1986)

2.2.2 Detailed Geologic Description

Relatively coarse-grained deposits of the ancestral Kings River are generally predominant in the subsurface above a depth of about 200 to 220 feet. These deposits are primarily sand, gravel, and cobbles, and have been termed the Quaternary Older Alluvium. Some interlayered clay and silt layers are also present, but these are generally thin and discontinuous. Clay is also intermixed with the coarse-grained deposits in some depth intervals. Because of the overall lack of thick continuous clay layers above a depth of about 220 feet, one aquifer is generally considered to be present in the vicinity.

Crystalline rock or bedrock is not known to have been encountered by wells in the vicinity. Based on information from Sanger, Reedley, and the Great Western School (south of Reedley Airport), where

deeper test holes and supply wells have been drilled, the top of the bedrock in the vicinity of the project site is expected to be below a depth of 700 feet. (KDSA, December 2013)

3.0 MINE PLAN

The mine plan (Exhibit E) is designed to preserve all existing riparian habitat along the Kings River and to protect the 100-year Floodway. Setbacks include the following:

- 100 feet from the top of the Kings River bank, or 50 feet from the FEMA Regulatory Floodway or Designated Floodway; or 50 feet from the dripline of riparian vegetation or mature oak tree; whichever is greater;
- 100 feet from the public right-of-way; and
- 25 feet from other property lines.

The project site will be mined in phases. Farming operations will continue on all phases not being mined or reclaimed.

Topsoil will be removed prior to mining each phase and stored separately for later use as final cover for reclaimed farmland and final slopes of ponds. Overburden will be removed and stored for later use as fill or transported directly to fill the phases to be reclaimed as farmland.

The phases will be excavated by an electric-powered dragline with cut slopes of 2:1 (horizontal to vertical) to a maximum depth of approximately 100 feet below natural ground surface. Blasting will not be used. For the phases that will be reclaimed to farmland, 40 foot wide undisturbed (not mined) levees will separate those phases from the phases to be reclaimed as riparian and open water wildlife habitat.

Mined aggregate will be initially transported to the processing plant by off-road haul trucks for approximately one year. Subsequently, mined aggregate will be transported to the plant by electric-powered field conveyors.

As previously described an aggregate mining and processing site adjacent to the project site, i.e. to the east and southeast of Riverbend proposed Phases 6A, 6B and 7, currently operates under Fresno County CUP 3052. In the future operators of CUP 3052 may be interested in an agreement with Riverbend to mine Phases 6A, 6B and 7 and process the excavated material at the CUP 3052 plant. If such an agreement were made, and if CUP 3052 were amended to import material from the Riverbend site, the aggregate in the Riverbend proposed Phases 6A, 6B and 7 would be excavated by an electric dragline and transported to the CUP 3052 plant by overland conveyor for processing in the same manner as if it was mined by Riverbend and conveyed to the Riverbend aggregate plant.

A Mine and Reclamation Plan Summary is shown in Table 2.

3.1 Site Plans

3.1.1 Existing and Proposed Roads, Including Ingress-Egress Roads and On-Site Roads

Existing farm roads are shown on Exhibit C. The proposed ingress-egress road is shown on Exhibit E. The access road to the plant site will be from Goodfellow Avenue approximately one-half mile west of Riverbend Avenue. The first 100 feet of the proposed, access road will be paved with asphalt and will be at least 24 feet wide in accordance with Standard H.6, Section 858 FCZO. In addition, the main access roads to the plant site, ready-mix concrete plant and asphalt plant will be paved with asphalt.

Access to the mining phases south of Goodfellow Avenue will be via a tunnel to be constructed under Goodfellow Avenue (Exhibit E). The tunnel will be constructed prior to overburden removal on those phases.

9	52	2081	Riparian & Open Water Habitat	2090
Total	619			

[1] Dates are estimates only. Actual excavation and reclamation dates will vary with permit approval date, market demand and actual depth and volume of marketable

[2] Gross acres, includes farm roads.

[3] Actual final reclamation of each phase will depend on the volume and availability of overburden and process fines occurring on site.

[4] To be used for portable plant during mining of plant site (Phase 9)

LEGEND

- PROPERTY BOUNDARY
- PROJECT BOUNDARY
- PHASE BOUNDARY
- DESIGNATED FLOODWAY
- FEMA REGULATORY FLOODWAY
- VISUAL SOUND BERM (HEIGHT PER PLAN)
- ORCHARD LIKE VISUAL SCREEN

GENERAL NOTES:

1. AGGREGATE TO BE EXCAVATED BY ELECTRIC DRAGLINE AND TRANSPORTED TO PROCESSING PLANT BY LAND CONVEYOR.
2. TECHNOLOGICAL IMPROVEMENTS AND CHANGES ENCOUNTERED IN MINING CONDITIONS MAY DICTATE CHANGES IN MINING METHODS.
3. SLOPES WILL BE MINED AT 2:1 (H:V).
4. EXCAVATION DEPTHS ARE BASED ON THE ESTIMATED DEPTH OF THE AGGREGATE RESOURCE.
5. NO EXCAVATION WITHIN:
   - 25 FT OF ANY PROPERTY LINE
   - 100 FT OF ANY PUBLIC RIGHT-OF-WAY
   - 100 FEET FROM THE TOP OF THE KINGS RIVER BANK, OR 100 FEET FROM THE DESIGNATED FLOODWAY OR THE DRIPLINE OF RIPARIAN VEGETATION OR MATURE OAK TREE, WHICHEVER IS GREATER.
6. NO STOCKPILES OF SOIL OR OVERBURDEN WILL BE PLACED CLOSER THAN 25 FT OF ANY PROPERTY LINE EXCEPT FOR THE VISUAL SOUND BERMS.
7. LOCATION OF TOPSOIL STOCKPILES IS TYPICAL. SINCE RECLAMATION WILL PROCEED CONCURRENT WITH MINING, TOPSOIL STOCKPILES WILL ROTATE WITH EACH AREA MINED.

Table 2
Mine and Reclamation Plan Summary

Item/Activity	Description[1]
Mining Acres	Approximately 619 acres
Mining Method	Topsoil and overburden removal by scrapers. Wet mining of aggregate by electric dragline. Explosives will not be used.
Mining Depth	Approximately 100 feet below natural ground surface level
Processing	Aggregate processing plant, hot-mix asphalt plant, ready-mix concrete plant, portable plant to recycle concrete and asphalt debris (including imported)
Estimate Aggregate Volume	90 million tons
Estimated Total Sales	70 million tons
Annual Processed Volume	1.6 million tons
Annual Sales Volume	1.25 million tons
Estimated Annual Sales Per Plant[2]	
Aggregate	765,000 Tons
Hot Mix Asphalt	250,000 Tons
Ready-Mix Conrete	150,000 Cubic Yards
Concrete and Asphalt Recycling	25,000 Tons
Depth to Groundwater	15-20 feet below natural ground surface level
Reclamation End uses	
Reclaimed Farmland[3]	Approximately 268 acres
Open Space, Riparian and Open Water Habitat[3]	Approximately 351 acres
Project Life	Approximately 75 years

1. All values are approximate
2. Typical mix of products. Actual sales mix will vary based on demand. The requested otal annual sales of aggregate products is 1.25 million tons
3. Actual final reclamation and areal extent of each end use will depend on the volume and availability of overburden and process fines suitable for use as fill occurring on site.

3.1.2 Processing and Storage Areas

Processing and storage areas, including locations of equipment, structures, and facilities are centrally located in accordance with standard H.23, Section 858 FCZO (Exhibit E).

3.1.3 Setbacks, Screening, Fencing, Gates, Parking, and Signs

a. Setbacks and Avoided Areas

The following setbacks and avoided areas are shown on Exhibit E.

Excavation: No excavation of material or overburden will take place within:

- 100 feet from the top of the Kings River bank (Standards H.16 and H.25c, Section 858 FCZO) or 50 feet from the FEMA Regulatory Floodway or Designated Floodway; or 50 feet from the dripline of riparian vegetation or mature oak tree (Standard H.25c, Section 858 FCZO); whichever is greater;
- 100 feet from the public right-of-way (Standard H.1, Section 858 FCZO); and

- 25 feet from other property lines (Standard H.1, Section 858 FCZO)

Stockpiles: No stockpiled soil or material will be placed closer than 25 feet from any property boundary (Standard H.2, Section 858 FCZO) except visual/sound berms. (See Section 3.1.3b)

Native Woodlands, Riparian and Wildlife Habitat: In accordance with standard H.25c, Section 858 FCZO, all existing riparian habitat along the river is excluded from the project and is to remain as open space (Exhibit E). Only areas which are in agriculture or farming related activities, including access and maintenance roads, are included within the project boundaries to be mined or disturbed by mining related activities. Mining-related activities, including access and maintenance roads, will not occur any closer than current farming activities to existing habitat along the river.

b. Berms and Vegetated Screens

Since all the existing riparian vegetation along the entire Kings River frontage will be retained views of the project site from the Kings River and from across the Kings River will be screened. Several design measures included in the project will screen potential views of the mining and processing operation. These include installation of 8 to 10-foot-high vegetated berms and orchard-like vegetated visual screens along what would otherwise be the most visible portions of the project site.

Screening of the site will be achieved by the construction of several berms and orchard-like vegetated screens as shown on Exhibit E. The berms include a 10 foot high, vegetated earthen berm adjacent to Riverbend Avenue, an 8-foot high vegetated earthen berm south of Goodfellow Avenue adjacent to Phases 6A and 6B; and a 10-foot high, vegetated earthen berm along the west side of the plant site. Overburden and topsoil will be used to construct the berms. The berm west of the plant site will be constructed prior to operating the plant during nighttime hours. The berms along Riverbend and Goodfellow will be constructed prior to removal of overburden the area of the phases within 900 feet of the nearest residence to be screened. (Standard H.25a, Section 858 FCZO).

The berms will be planted with evergreen trees that will grow at least 15' high in two (2) staggered rows with one row on top of the berm in accordance with standard H.5, Section 858 FCZO as shown on Exhibit E and simulated in *Visual Impact Assessment for the Riverbend Sand and Gravel Project*, RGP Planning and Development Services, November 2012. Irrigation will be provided. The open area along the Kings River where portions of the plant site would be visible from the Kings River was recently planted with redwood trees (Standard H.11, Section 858 FCZO).

The orchard-like screens along Goodfellow Avenue as shown on Exhibit E will be planted prior to overburden removal in the adjacent phases. The tree species will be evergreen trees (e.g. olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening..

Views of the project site from the Kings River range from non-existent to a narrow glimpse of the westernmost edge of the project site due to the presence of the existing mature oak woodland and riparian vegetation occurring along the banks of the river. Redwood trees have been recently planted along the one narrow, visible location west of the proposed plant site. View opportunities from the river are also limited by the fact that the elevation of the river is at least five to six feet below the grade of the project site. Consequently, there is no clear line-of-sight to the entire property from the river, and views of the project site are mostly limited to the orchards and vineyards that are located immediately adjacent to the bank of the river.

The proposed vegetated berm west of the plant site will screen views of the majority of the proposed plant site from along the river. In addition, all visible plant facilities will be painted with a neutral-tone color to blend with the surrounding landscape and vegetation. However, the dragline will be visible at times from the Kings River because it is too tall to be entirely screened from view. The visual character of the potentially visible portions of the dragline contrasts with the natural form, line and texture of the surrounding environment. The dragline will be painted with a neutral-tone color to blend with the surrounding landscape and vegetation. Nonetheless, this impact will not cause a dominant and/or permanent change in the visual quality of the area. The dragline will be visible only during excavations in the phases nearest the river.

Seven residences are located east of the project site across Riverbend Avenue and one residence is located north of the Project site across Goodfellow Avenue. The proposed vegetated berm will screen views of the majority of the project site. However, due to the height of the dragline it will be visible at times because it is too tall to be entirely screened from view. The dragline will be painted with a neutral-tone color to blend with the surrounding landscape and vegetation. Nonetheless, this impact will not cause a dominant and/or permanent change in the visual quality of the area. The dragline will be visible only during excavations in the phases nearest the residence. The Visual Study prepared for the project indicates that visual impacts to residences along Riverbend and Goodfellow Avenues are considered less than significant (RGP, November 2012).

One residence across the river just southeast of the south portion of the project site is located within the potential viewshed because its property is elevated above the project site. However project activities will not be visible at this location because of the height and density of the oak woodland, riparian vegetation and non-native landscape trees already provide a natural visual screen between the residence and the project site.

The visual study prepared for the project indicates that with the above-described screening the visual impact is considered to be less than significant (RGP, November 2012).

c. Light and Glare

The issue of light and glare is typically associated with excessively bright nighttime lighting that crosses over property lines and illuminates off-site yards or bedroom windows. It is also associated with the condition that occurs when excessive nighttime lighting creates a "skyglow" effect.

Operations during the time of year when daylight hours are shorter, or for any nighttime operations, would require lighting to provide a safe operating environment. For nighttime lighting high pressure sodium and/or cut-off fixtures (or equivalent IDA-approved fixtures) will be used instead of mercury-vapor fixtures for any required nighttime lighting of the dragline and the processing facilities. The lighting will also be designed to confine illumination to the project site, and/or to areas that do not include light-sensitive uses. By utilizing the proposed lighting the project is not anticipated to produce any potentially significant impacts from light and glare (RGP, November 2012).

d. Fencing, Gates

The perimeter of the property along Riverbend and Goodfellow Avenues is fenced with six (6) foot high, wire, ranch fencing in accordance with standard H.4, Section 858 FCZO. In accordance with Standard H.6, Section 858 FCZO, the entrance gate will at least twenty-four (24) feet wide (Exhibit E).

e. Parking

The proposed 53 acre plant site will have sufficient parking for employees, customers, service/delivery vehicles as well as company and outside operated trucks (Exhibit E).

f. Signs

Signs will be placed at the entrance road to identify the processing plant in accordance with County signage regulations.

3.1.4 Phasing

Mining will be conducted in 14 sequential phases (Exhibit E). The timing of the phasing and scheduling shown in Table 3 are rough estimates only. Actual excavation may occur sooner or later depending on the actual volume of material available in each phase and market conditions over time.

Table 3
Estimated Mining and Reclamation Schedule[1]

Phase	Acres[2] (Approx)	Commence Excavation	Reclamation Type[3]	Complete Reclamation
1A	23	2015	Farmland	2028
1B	18	2019	Farmland	2032
2A	27	2025	Farmland[4]	2043/2090
2B	27	2022	Riparian & Open Water Habitat	2026
3A	67	2028	Farmland	2054
3B	68	2034	Farmland	2090
4A	38	2040	Riparian & Open Water Habitat	2050
4B	29	2045	Riparian & Open Water Habitat	2053
5	37	2050	Riparian & Open Water Habitat	2090
6A	34	2054	Farmland	2069
6B	31	2058	Farmland	2083
7	80	2062	Riparian & Open Water Habitat	2072
8A	44	2068	Riparian & Open Water Habitat	2077
8B	44	2075	Riparian & Open Water Habitat	2083
9	52	2081	Riparian & Open Water Habitat	2090
Total	**619**			

[1] Dates are estimates only. Actual excavation and reclamation dates will vary with permit approval date, market demand and actual depth and volume of marketable material.

[2] Gross acres, includes farm roads.

[3] Actual final reclamation of each phase will depend on the volume and availability of overburden and process fines occurring on site.

[4] To be used for portable plant during mining of plant site (Phase 9)

3.1.5 Cross Sections

Cross-sections (typical) defining planned slopes, extent of overburden, extent of sand and gravel deposits, and water table are shown on Exhibit E.

Cut and final slopes will be 2:1 (horizontal:vertical) (Standard H.3. Section 858 FCZO).

3.2 Routes Between the Property and the Nearest Arterial

The project has direct access to E Goodfellow Avenue as shown on Exhibit E. Goodfellow Avenue is classified as a collector with connections to arterials at Academy Avenue, McCall Avenue and Central Avenue (west of Temperance) and to State Route 180 via McCall Avenue and State Route 99 via Central Avenue.

3.3 Anticipated Quantity and Type of Minerals

Total production is estimated to be approximately 90 million tons with total sales estimated to be approximately 70 million tons, depending on the quality and marketability of the reserves.

3.4 Statement of Operations:

3.4.1 Commencement of Operations

Operations will begin upon approval of this Conditional Use Permit, Surface Mining and Reclamation Plan, the acceptance of Financial Assurances and all other necessary approvals.

3.4.2 Hours and Days of Operation

Aggregate operations are proposed to occur five days a week for approximately 250 days a year. Ready-mix concrete and asphalt plant operations are proposed to operate six days a week for approximately 275 days a year (partial days on Saturdays). Typical hours are shown on Table 4, Typical Hours and Days of Operation. However, mining and processing hours, including nighttime hours, will vary during different seasons of the year to comply with California's "Flex Your Hours" program by utilizing electricity during off-peak hours, to the extent feasible. Loading of material onto to trucks during nighttime hours is proposed to support major public road projects that are required to be completed during night hours or on weekends to avoid traffic conflicts. In addition asphaltic oil, cement and other supplies may be delivered during nighttime hours.

Table 4
TYPICAL HOURS AND DAYS OF OPERATION

Activity	Proposed Hours[1,2]
Excavation and Aggregate Processing	7:00 am - 7:00 pm, Weekdays
Loading and Aggregate Trucking[3]	6:00 am - 9:00 pm, Weekdays
Asphalt and Ready-Mixed Concrete Plants[4]	4:00 am-6:00pm, Weekdays, May-Oct 5:30 am-6:00pm, Weekdays, Nov-Apr 7:00 am-2:00pm, Saturdays

[1] Maintenance of mobile and plant equipment extend beyond these hours.
[2] During periods of public emergency and or major public road projects affecting the health and safety of the community, continuous 24 hours a day operations may be required.
[3] Major public road projects may be required to be completed during night hours or on weekends to avoid traffic conflicts. Such projects may require loading operations beyond the hours and days of operation shown.
[4] Asphaltic oil, cement and other supplies may be delivered during nighttime hours.

3.4.3 Estimated Production

The aggregate processing plant will have an anticipated annual process rate of 1.6 million tons and proposed annual sales of construction aggregate products (rock, sand and gravel) produced by the plant of approximately 1.25 million tons. The aggregate products will be produced to supply a Ready-Mix Concrete (RMC) plant (150,000 cubic yards/year) and a Hot Mix Asphalt (HMA) concrete plant (250,000 tons/year) located on-site or sold to outside customers. The facility will also include periodic use of a portable plant to recycle concrete and asphalt debris (including imported) into Crushed Miscellaneous Base (CMB) (100,000 tons/year) and Recycled Asphalt Product (RAP) (25,000 tons/year). RAP will facilitate use of recycled asphalt in HMA mix designs. Operations are anticipated to ramp-up over a five year period with initial sales in 2015 to be 350,000 tons, sales in 2017 to be 700,000 tons and full operations in 2019 at sales of 1.25 million tons.

3.4.4 Traffic

The estimated hourly vehicle trips (one-way trips) associated with the project at average and peak sales are shown on Table 5, Estimated Daily Project Trip Generation. The majority (95%) of truck traffic will travel west on Goodfellow Avenue which changes to Central Avenue at just east of Newmark Avenue. Other smaller amounts of traffic (4%) are estimated to travel east on Goodfellow towards Reedley and eastern Fresno County, north on Academy Avenue to the city of Sanger (2%) and south on Academy (5%) to the cities of Fowler, Selma and Kingsburg. Project traffic past Academy Avenue (88%) is estimated to split at McCall Avenue with 86% going north on McCall Avenue to access SR 180, the central and northern parts of Fresno, the city of Clovis and continuing west to Freeway 99 to access the southern and western portions of the city of Fresno. The remaining 2% would travel west on Central to Freeway 99. A traffic study prepared for the project details projected traffic impacts (*Traffic Impact Analysis, Riverbend Sand and Gravel Project, Fresno County, California,* VRPA Technologies, Inc., July 2014).

3.4.5 Number of Employees

The number of employees fluctuates with seasonal demand. The average number of employees during peak season will be approximately 38.

3.4.6 Anticipated Duration of Operation

Operations are expected to continue approximately 75 years depending on varying market conditions.

3.4.7 Maximum Anticipated Depth of Mining

The aggregate deposit has no consistent bottom or top elevation and can change significantly in very short, lateral distances. The maximum anticipated depth is estimated to be 100 feet from natural ground surface.

3.4.8 Method of Extraction

A "wet mining" method is proposed utilizing an electric dragline that does not require dewatering of the excavation. Explosives will not be used.

a. Topsoil

There is an approximately two feet thick layer of topsoil. Topsoil will be removed as a separate layer from each phase primarily by using wheel tractor-scrapers that transport it, spread it at previously excavated phases for use as the final cover for reclamation or stored separately for later use in

reclamation. If conditions become more difficult or access constraints prevent the use of scrapers, a hydraulic excavator, bulldozer, or front-end loader and haul trucks may be used to remove topsoil. Under typical conditions, topsoil removal will take place approximately one year ahead of mining therefore allowing agricultural use of the land to continue as long as possible (Standard H.25a, Section 858 FCZO).

Table 5
Estimated Daily Project Trip Generation[1]
Annual Aggregate Sales[2] of 1.25 Million Tons

Assumptions

1. Actual mix of products and trucks will vary with market-driven sales
2. Aggregate sales includes aggregate for on-site asphalt and ready-mix plants
3. Trip = one-way trip (i.e. 1 load = 2 trips)
4. 250 working days/yr for aggregate & asphalt, 275 working days/yr for ready-mix concrete
5. Peak hrly sales of each product determined by hrly loading capacity of each plant and mobile loading equipment (loaders) available. 1.25 loader to load aggregate and asphalt trucks. 0.75 loader to feed HMA and RMC plants.
6. PM peak trips are negligible. Almost all trips in the aggregate related industry occur before 3:00 pm.
7. Aggregate, asphalt, recycle 25 tons/load
8. 1.65 tons agg/cy, avg 8.0 cy/load, peak 9.5 cy/load
9. Liquid asphalt & cement 27 tons/load
10. 0.05 tons of liquid asphalt/ton of asphalt
11. 0.235 tons cement/cy
12. 4.1 lbs/gal propane, delivered by 12,165 gal (25 ton) tanker, = fuel for 4,679 tons of asphalt at avg 2.6 gals/ton of asphalt
13. Engineer's estimate, delivered by 8,000 gal tanker
14. 28 Employees (aggregate & asphalt 18, ready-mix concrete 10)
15. 38 Employees (aggregate & asphalt 18, ready-mix concrete 20)

However, the operation may require topsoil for construction of the vegetated visual/sound berms. Topsoil that cannot be used right away will be stockpiled separately from subsoil Topsoil that cannot be used right away will be stockpiled separately from subsoil overburden. Stockpiled topsoil will be planted with a vegetation cover or will be protected by other equally effective means if necessary to prevent water and wind erosion.

b. Overburden

Overburden is the material directly beneath the topsoil and overlying the sand and gravel deposit. Overburden is approximately 15 to 22 feet thick. Overburden will be removed from the area to be mined primarily by using wheel tractor-scrapers. The overburden will be used to construct the screening berms, to fill the phases to be reclaimed as farmland, to shape the pond edges of the excavated phases to be reclaimed to ponds and riparian habitat as shown in the Reclamation Plan (Exhibit F) or will be stored separately for later use in reclamation. Overburden removal will occur on an estimated annual equivalent of one month per year utilizing conventional scrapers.

c. Aggregate

An electric dragline will be used to mine aggregate to depths of approximately 100 feet deep. A dragline is an electric-powered excavating machine with a long, straight boom from which an open-mouthed bucket is suspended by a cable (Appendix C). The boom is used to cast the bucket away from itself and then down beneath the water to the bottom of the excavation. The bucket is pulled back toward the machine with another cable, loading the bucket with aggregate. The bucket is then hoisted up and the excavated material is stockpiled in windrows to drain. After the stockpiled material has drained, a diesel-powered loader will transport the material to an electric-powered scalping screen which will separate oversized rock to be screened and crushed by a field crusher before the material is transported by overland conveyor to the plant.

3.4.9 Use of Explosives

Explosives will not be used.

3.4.10 Method of Transport

Mined aggregate will initially be transported to the processing plant by off-road trucks for approximately one year. Other than the first year of operation material will be transported by overland conveyors to the plant for further processing. Thereafter haul trucks will only be used for aggregate material transport during occasional repairs of overland conveyors.

3.4.11 Method of Processing

a. Scalping Screen and Field Crusher

As described above, after the stockpiled material has drained a diesel-powered loader will transport the excavated material to an electric-powered scalping screen which will separate oversized rock to be crushed by a field crusher before the material is transported by overland conveyor to the plant.

b. Aggregate Processing Plant

The processing plant will typically be divided into a primary plant, secondary plant and wash plant. The plant will be operated from a control tower.

Primary Plant: The primary plant will screen and separate sand from larger materials. Sand will be classified into different construction grade materials and stockpiled. Water will be introduced to wash fines from the excavated material. The fines will be sent to a wash plant. The remaining larger sized materials will be crushed and the combination of crushed rock and sand will be conveyed to the secondary plant for further processing. Customer trucks will be loaded with finished products by front-end loaders.

Secondary Plant: The secondary plant will utilize additional screening and washing equipment and crushers to create different construction grade materials. Finished products will be stockpiled and used by the on-site ready-mix-concrete and asphalt plants or sold directly to outside customers. Customer trucks will be loaded with finished products by front-end loaders.

Wash Plant: Fines from the excavated material and fines recovered from crushing will be sent to the wash plant where a fines recovery system will separate the fines from the water eliminating the need for settling ponds. The fines will be screened and the marketable products will be stockpiled. The non-marketable fines will be stockpiled for later use as fill in the reclamation of certain phases of the project back to farmland. Recovered water will be recycled back to the aggregate plant as process water.

b. Asphalt Batch Plant

Sand and crushed rock from the aggregate processing plant will be screened, dried and heated in a natural gas or propane-fired dryer/burner and mixed with liquid asphaltic cement to produce asphalt. Liquid asphaltic cement will be imported by truck and stored in above-ground tanks. The emissions from the dryer/burner will be ducted to a baghouse. The hot mixed asphalt concrete may be discharged directly into trucks from the mixer or conveyed to storage silos for discharge into trucks at a later time. Operation of the plant will be controlled from a control room.

At the end of each production day excess asphalt remaining in the plant will be stockpiled. This material will periodically be recycled for blending with fresh asphalt concrete. A Recycled Asphalt Pavement System or RAP system may be added to the asphalt plant. RAP would be blended with new asphaltic concrete.

c. Ready-Mix Concrete Plant

Sand and gravel from the aggregate plant and cement (imported by truck and stored in silos) will be weighed and deposited directly into the mixer truck drum. Baghouses will control dust emissions. Water will be added to the truck and the concrete will be mixed during transportation to the job site. Return concrete (concrete which is unused at the jobsite and returned to the site in the ready-mix trucks) will be stockpiled for later recycling into miscellaneous road base. Operation of the plant will be controlled from a control room.

The concrete plant will include a system to recycle water that is used to rinse out ready-mix concrete trucks. At least once a day, the mixer on each truck will be washed out and the wash water will be deposited into a series of concrete-lined holding basins. After solids are settled out, water will be recycled to the concrete plant for reuse in concrete. Residual sediment in the holding basins will be mixed with base rock for use in road base.

d. Portable Concrete and Asphalt Recycle Plant

A portable recycle plant (operating under a portable air permit) will be periodically brought in to recycle excess asphalt produced at the asphalt plant and stockpiled return concrete. The recycle plant will also recycle concrete and asphalt pavement imported to the site from construction demolition or road rebuilding sites. Asphalt or concrete to be recycled will be fed through a crusher(s), screens and conveyors and stockpiled. The recycled concrete will be sold as miscellaneous road base. The crushing of asphalt debris and stockpiled, unsold HMA will be recycled as RAP and later blended with fresh asphalt concrete. Recycling old concrete and asphalt reduces the volume of fill in local landfills and helps extend the available aggregate reserves in Fresno County.

e. Portable Aggregate Plant

The plant site will be mined last. Material from plant site will be processed by a portable plant located on Phase 2B, which will have been filled with overburden and processing fines. The portable plant will utilize relocated components of the original processing plant or will be a separate portable processing plant.

3.4.12 Equipment

a. Excavation Equipment

Excavation equipment includes the following:

Dragline: A dragline is an electric-powered excavating machine with a long straight boom from which an open-mouthed bucket is suspended by a cable. The boom is used to cast the bucket away from itself and then down beneath the water to the bottom of the excavation. Mining depths for a dragline vary. The bucket is pulled back towards the machine with another cable, loading the bucket with aggregate. The bucket is then hoisted up and the material is stockpiled for transport to the plant.

Front-End Loader: A Front-end loader is a rubber-tired, diesel-powered machine with a bucket attached to the front. A loader will be used to transport and load aggregate from the windrows into trucks or onto the screen and field crusher.

Screen and Field Crusher: As described above, an electric screen and field crusher will be required to screen and crush oversized rock before the excavated material is transferred by a loader to the land conveyor.

b. Aggregate Plant

Equipment and supporting facilities for the aggregate plant will include, but will not be limited to: front-end loaders, water trucks, conveyors, screens, screening towers, crushers, washers, sand cyclones, sand screws, sand/aggregate truck loadout bins, pollution control equipment, dewatering equipment and tanks, recycle water pumps, computer control tower, a maintenance shop, parts storage building, quality control lab, fuel tanks and other accessory equipment and buildings.

c. Hot-Mix Asphalt Plant

Equipment and supporting facilities for the HMA plant will include, but will not be limited to: front-end loaders, aggregate storage bunkers, conveyors, elevators, burner/dryer, storage silos, dust silo, pollution control equipment, storage tanks, control tower, shop and other accessory equipment.

d. Ready-Mix Concrete Plant

Equipment and supporting facilities for the RMC plant will include, but will not be limited to: front-end loaders, ground aggregate storage bins, conveyors, batch plant, cement silos, pollution control equipment, storage buildings, batch office, water reclaimer and other accessory equipment.

e. Portable Concrete and Asphalt Recycle Plant

Equipment for the diesel and electric powered, portable recycle plant will include, but will not be limited to: front-end loaders, crushers, screens and conveyors.

f. Portable Aggregate Plant

Equipment for the electric-powered, portable aggregate plant will include, but will not be limited to: front-loaders, crushers, screens, sand screws and conveyors.

g. Topsoil and Overburden Removal Equipment

Removal of topsoil and overburden will be accomplished primarily with scrapers with the use of water trucks to minimize dust.

h. Haul Trucks

Mined aggregate will initially be transported to the processing plant by off-road trucks for approximately one year. Haul trucks will subsequently only be used for aggregate material transport during occasional repairs of overland conveyors.

i. Conveyors

Other than the first year of operation material will be transported by overland conveyors to the plant for further processing.

j. Import and Export Trucking

Aggregate and asphalt products will be hauled off-site by outside trucking firms. The ready-mix concrete operation includes ready-mix trucks which will be stored on-site. Other outside concrete or trucking companies may purchase ready-mix concrete and transport it in their own trucks. Independent trucking firms will import cement, asphaltic cement, fuel and construction materials. Concrete and asphalt pavement from construction demolition or road rebuilding sites will be imported to the site for recycling by outside trucking firms (see Section 3.4.11e)

k. Other Materials and Supplies

Diesel fuel for use by mobile equipment will be imported and stored in a double-walled tank or in containment. Gasoline for use by the plant pickup trucks will be imported and stored in a double-walled tank or in containment. Products needed to service the mobile equipment such as gear and lube oil, transmission fluid and various other products will be imported and stored at or near the maintenance shop.

3.4.13 Operating Practices to Minimize Noise, Vibration, Dust and Odor

a. Noise

The major on-site noise sources would be the aggregate processing; HMA, RMC, and recycle plants; excavation activities; and mobile equipment. The Noise Study prepared for the project detailed noise impacts and mitigation measures required to satisfy the daytime and nighttime median (L50) noise standards of Fresno County at the nearest residences (*Environmental Noise Assessment, Riverbend Sand and Gravel Project, Fresno County, California*, Bollard Acoustical Consultants, April 2014). The project includes the following Noise Control design features:

- The HMA plant will be equipped with an exhaust stack silencer.
- The main aggregate plant will be equipped with urethane screens on the elevated screen decks and heavy urethane or rubberized liners on the hoppers and chutes.
- All mobile equipment will be equipped with noise suppressor mufflers in compliance with all applicable local, state, and federal laws and regulations.
- Smart backup alarms will be utilized and adjusted to ambient noise levels. Strobe lights will replace audible back-up alarms during non-daylight working hours subject to Mine, Safety and Health Administration (MSHA) approval.
- Electric dragline excavation operations within 1,000 feet of an existing residence will be conducted such that the dragline boom is facing the nearest residences, thereby providing greater separation between those residences and the dragline motors/fans, and orienting the cooling fan outlet (which is the loudest dragline noise source and located on the opposite side of the dragline than the boom) away from those residences.
- The reference sound levels associated with dragline operation will be verified through noise level measurements immediately upon commencement of dragline operations at the Project site. In the event that actual noise emissions of the dragline exceed the assumptions contained within this analysis, additional noise control measures shall be implemented. Those measures could include replacing fan motors with variable drive motors and/or installation of cooling air inlet and/or exhaust silencers directly to the dragline as required to satisfy the Fresno County Noise Ordinance standards.
- Excavation activities using the proposed dragline will be limited to daytime hours unless it can be demonstrated through on-site noise measurements that such activities could occur during nighttime hours without exceeding the project standards of significance at nearby residences.
- A 10'-foot high, vegetated earthen berm will be constructed along the west side of the plant site.
- Prior to mining within 900 feet of residences 3, 4, 5, 7, 9 & 10 along Riverbend Avenue, the proposed 10-foot tall vegetated earthen berm will be constructed near the western edge of the proposed 100-foot excavation setback(See Figure 2 for berm location) .
- Prior to mining within 900 feet of Residence 13, a 8-foot tall, vegetated berm will be constructed near the southern edge of the proposed 100-foot excavation setback along the South side of Goodfellow from Riverbend Avenue to 2000 feet West of Riverbend Avenue(See Figure 2 for berm location) .
- Nighttime excavation within 1,000 feet of Residence 8 will not occur concurrently with nighttime operation of the aggregate plant unless it can be demonstrated through noise level measurements that combined nighttime excavation and aggregate plant operations would not exceed 45 dBA L50 at Residence 8.
- Following construction of the berms along Riverbend and Goodfellow Avenues, to the maximum extent possible, excavation activities within 500 feet of an existing residence located adjacent to those roadways shall start on the portion of the pit furthest from the nearest residences, progressing below grade in the direction of those residences. In this way, mining activities may be visually and acoustically shielded as the mining equipment moves towards the potentially impacted residences.

- The recycle plant operation will be limited to daytime hours (7 a.m. to 10 p.m.).

b. Vibration

The project is not expected to produce any significant vibration at acoustically sensitive receivers in the project vicinity. This is due to the type of equipment which will be used at the site, the planned extraction methods (no blasting), and the relatively large distances between the project operations and potential receivers.

c. Dust

An Air Quality Impact Analysis and a Health Risk Assessment prepared for the project detail project impacts (*Emission Inventory and Air Quality Impact Analysis, Riverbend Sand and Gravel Project, Fresno County, California*, Dudek, October 2013) (*Health Risk and Odor Assessment Riverbend, Sand and Gravel Project, Fresno County, California*, Dudek, October 2013, and *Supplemental Health Risk Assessment Riverbend, Sand and Gravel Project, Fresno County, California*, Dudek, October 2013).

The existing farm operations generate dust and emissions from the following: ground disturbance, e.g. plowing and disking, etc.; operation of farm equipment, e.g. tractors, farm and produce haul trucks, pickers. etc.; application of herbicides, fertilizers and insecticides; and harvesting.

Permits to Operate

The proposed aggregate, concrete and asphalt plants will obtain Authorities to Construct and operate in accordance with Permits to Operate from the San Joaquin Valley Air Pollution Control District (SJVAPCD).The aggregate mine and associated aggregate plant, asphalt plant, concrete plant, and recycling facilities would operate in compliance with applicable air quality regulations. The equipment will utilize Best Available Control Technology (BACT) and include the following features.

- The aggregate processing plant will be equipped with water sprays at key emissions points. Crushers and screens in the aggregate processing plant will be controlled by baghouses or another technology that the SJVAPCD determines would achieve equivalent effectiveness when BACT is applied during New Source Review (NSR).
- The HMA plant will be equipped with a baghouse for the aggregate dryer/batch tower and a fiberbed filter (or equivalent) for the storage silos and truck loadout. Odorous emissions (primarily VOCs and semi-volatile organic compounds (SVOCs)) from asphaltic cement will be minimized by circulation of mixing drum vapors to the dryer burner before discharge, and the fiberbed filters.
- The RMC plant will be equipped with baghouses to control fugitive emissions from silos and truck loadout and will utilize water sprays at sand and gravel transfer points as necessary.

Diesel Emissions Control

Diesel engines will comply with applicable state regulations (i.e. air toxic control measures, ATCMs) and include the following features:

- Off-road equipment with registration numbers assigned by CARB, establishment of an idling policy, and limiting idle time to less than five minutes (13 CCR §2449).

- Mined aggregate will be initially transported to the processing plant by off-road haul trucks for approximately one year. Subsequently, mined aggregate would be transported to the plant by electric-powered conveyors.
- An electric-powered dragline will be used after overburden is removed from each mining phase. This eliminates diesel engine emissions that would otherwise occur from a diesel dragline or other diesel excavation equipment and enables "wet mining" methods which reduce fugitive dust.

Fugitive Dust Control

A fugitive emission control plan would be implemented to comply with SJVAPCD Regulation VIII, "Fugitive PM10 Prohibition" and would include the following measures:

- Excavated material will contain approximately 10% natural moisture from having been excavated below the groundwater level.
- Prior to removal of topsoil and overburden, the area will be irrigated or sprayed by water trucks if removal occurs during the dry season.
- A water truck will be utilized to wet down the haul road from the mining area to the plant site as necessary to meet SJVAPCD fugitive dust requirements.
- A water truck will be utilized to wash fugitive dust from the access road and the paved portion of the plant road.
- Records demonstrating compliance with fugitive dust requirements will be maintained for those days that a control measure was implemented and include the type of control measure(s) used, the location and extent of coverage, the date, the amount, and frequency of dust suppressant applied (Section 6.2, Rule 8011)
- Visible dust emissions will be limited to 20% opacity for a period or periods aggregating more than three (3) minutes in any one (1) hour and comply with the conditions for stabilized surface areas (Section 5.0, Rule 8021; Section 5.0, Rule 8031).
- Disturbed areas that are greater than 0.5 acres in size and which remain inactive for seven (7) days will be stabilized(Section 5.2, Rule 8021).
- Stockpile surfaces will be stabilized(Section 5.0, Rule 8031).
- A stabilized surface will be maintained on the unpaved mine haul road (Section 5.2, Rule 8021).
- During high wind conditions, excavation and other earthmoving activities that disturb the soil will cease whenever visible dust emissions exceed 20% opacity. Continue operation of water trucks/control devices when activities cease, unless unsafe to do so. (Section 5.4, Rule 8021).
- Dust palliatives, such as lignin sulfonate or magnesium chloride, will be applied to unpaved plant roads and surfaces.
- Unauthorized vehicle disturbance of open areas will be prevented by posting signs or installing physical barriers such as fences, gates, posts, and/or other appropriate barriers to effectively prevent access to the area(s) (Section 5.0, Rule 8051).
- Unpaved vehicle and/or equipment parking areas, fueling and services areas, and stockpile areas will be maintained in a stabilized condition (Section 5.0, Rule 8071).
- The plant access road and a portion of the plant road in the vicinity of the asphalt and concrete plants will be paved.
- Materials accumulated on paved interior roads shall be removed with sufficient frequency, but not less frequently than once per workday, to prevent carryout and trackout onto paved public roads (Section 5.9.3, Rule 8041).
- A wheel washer will be installed after the scales to prevent trackout to the public highway.
- Visible mud or dirt deposited onto public adjacent paved roads will be prevented or cleaned up at the end of the work day (Section 5.1, Rule 8041).

- Facilities and signs will be provided directing drivers to level with six inches of freeboard, wet, and/or cover loads (Section 5.0, Rule 8031).

d. Odor

Diesel exhaust from mobile equipment/vehicles and air emissions from the asphalt plant associated with the Proposed Project will contain quantities of odorous substances. The asphalt plant will incorporate modern technology designed to minimize odorous emissions including an exhaust filter system and a blue smoke filter system to capture gases created during truck loading and will recirculate the exhaust into the burner combustion zone to reduce concentrations of odorous organic compounds. Given the rural nature of the project site location it is not anticipated that any objectionable odors affecting a substantial number of people could result from the project. Based on experience with similar facilities in Fresno County, it is not likely that any odors originating from the batch plant would cause a nuisance or rise to the level of a potentially significant odor source (*Health Risk and Odor Assessment*, Dudek, October 2013).

e. Light and Glare

The issue of light and glare is typically associated with excessively bright nighttime lighting that crosses over property lines and illuminates off-site yards or bedroom windows. It is also associated with the condition that occurs when excessive nighttime lighting creates a "skyglow" effect.

As previously described, operations will occur primarily during daylight hours. Operations during the time of year when daylight hours are shorter, or for any nighttime operations will require lighting to provide a safe operating environment. For nighttime lighting high pressure sodium and/or cut-off fixtures (or equivalent IDA-approved fixtures) will be used instead of mercury-vapor fixtures for any required nighttime lighting of the dragline and the processing facilities. The lighting will also be designed to confine illumination to the project site, and/or to areas that do not include light-sensitive uses. By utilizing the proposed lighting the project is not anticipated to produce any potentially significant impacts from light and glare (RGP, November 2012).

3.4.14 Quantity and Quality of Water Required

The buried pipeline portion of the Hanke Ditch is proposed to be relocated next to Riverbend Avenue as an open ditch (Exhibit E). Existing farmland and reclaimed farmland will continue to be irrigated primarily with surface water pumped from the Hanke Ditch. On-site irrigation wells and the Kings River pump will continue to be used to supplement the surface water supply from the Hanke Ditch.

Dewatering will not be utilized for the proposed mining operations. Process water used for the operation will include water to wash the mined aggregate (90 % of which will be recycled), water used for dust control, water used in the ready-mix concrete plant and water for domestic use (Appendix E). Process water will pumped from groundwater at a rate of approximately 160,000 gallons per day. The total annual net (consumptive) water use for processing is estimated to be approximately 180 acre-feet (AF/yr).

Current consumptive water use to irrigate the 619 acres that are proposed to be mined is estimated to be 1,630 AF/yr. The Water Supply Assessment prepared for this project in accordance with SB 610 (*Water Supply Assessment for the Riverbend Sand and Gravel Project*, KDSA, October 2012) concludes that the consumptive use in 20 years would be about 1,440 AF/yr which is less than the present condition (includes process water used for the aggregate operation, farmland not yet mined, reclaimed farmland, vegetated berms, orchard-like screens, riparian vegetation around the reclaimed ponds and evaporation

from the reclaimed ponds). The amount of surface water applied would be about 1,670 AF/yr. Because this value exceeds the consumptive use, a positive water balance would be maintained. The Water Supply Assessment further concludes that due to the large saturated thickness of the aquifer at or near the Project Site the groundwater supply will be more than adequate to support the project for 20 years.

3.4.15 Flooding

As previously indicated the FEMA flood maps indicate that portions of the project site are within the mapped 100-year floodplain. However, review of the existing topography indicates that much of the currently mapped area is no longer within the 100-year floodplain.

The phases to be reclaimed to farmland will be filled back to the original grade resulting in no change to the floodplain. The phases reclaimed back to ponds will actually increase the flood-holding capacity in those phases because the water surface in the ponds will be 15-20' below the original grade of the land.

3.4.16 Storm Water and Drainage

Chang Consultants prepared the *Riverbend Surface Water and Drainage Plan,* August 2013. The overall approach for managing stormwater runoff for the Project is summarized as follows:

a. Stormwater runoff from existing farmland upslope of the proposed mining phases will be conveyed in separate swales to avoid commingling with active project area runoff.

b. Farmland runoff that does not yet pass through active Project areas will continue to drain along existing drainage patterns.

c. Stormwater runoff from the processing plant site will be captured by a retention basin and recycled within the processing plant site.

d. Direct precipitation within active mining phases and on their 3-foot high perimeter safety berms will be retained within the pits. The safety berms will provide additional isolation of mining area runoff from farmland runoff.

e. The existing and proposed areas east and west of the proposed north-south plant access road will not contribute runoff to the road. Runoff on the 50-foot wide road will be contained within the road and conveyed south to Goodfellow Avenue. Roadway runoff will be treated in accordance with the SWPPP.

f. Stormwater runoff in mining haul roads will be conveyed within the inverted roadway section or in edge swales separated from the farmland runoff swales. Roadway runoff will be treated in accordance with the SWPPP.

g. Post-reclamation stormwater runoff will either be captured by the open water ponds resulting from the mining pits (i.e. direct precipitation within the ponds and pond banks) or revert to current conditions in the backfill areas. Runoff from backfill areas that are reused as farmland will not be allowed to commingle with the open water ponds.

3.4.17 Liquid or Solid Waste to be Produced

Fines recovered from the aggregate processing will be used as fill to reclaim portions of the site back to farmland. Domestic sewage will be handled by conventional septic systems and serviced as necessary by

commercial septic services. Solid waste, e.g. parts packaging, paper, etc., will be deposited in dumpsters for pickup and disposal by a licensed solid waste disposal company.

3.4.18 Methods Employed to Prevent Pollution of Surface and/or Groundwater

a. Pollution Control Programs: Pollution control programs will include: Storm Water Pollution Prevention Program, Hazardous Materials Business Plan, a Spill Prevention Control and Countermeasure Plan, Employee Training, Record Keeping, Preventative Maintenance and Best Management Practices.

b. Equipment and Vehicle Parking/Storage Areas: These areas will be graded to prevent storm water run-off to surface water or into the groundwater.

c. Vehicle Maintenance and Repair: Mobile vehicles will be maintained and repaired in a covered shop or on paved surfaces. Such areas will be designed to collect pollutants. All pollutants will then be disposed of in accordance with local, state, and federal regulations. Inspection and maintenance programs will be established to ensure that vehicles are operating properly and leaks are prevented to the extent feasible.

d. Excavation Equipment: Excavation equipment will be maintained and repaired at the excavation phases. All pollutants will be managed in accordance with local, State and Federal regulations to prevent pollutants from entering surface or groundwater.

e. Vehicle and Equipment Fueling: Vehicles will be fueled on concrete pads next to the fueling areas. The fueling areas will be designed to handle storm water in accordance with local, state, and federal regulations. Fuel will be stored in double-wall concrete tanks or in containment in accordance with EPA regulations.

f. Vehicle and Equipment Washing and Steam Cleaning: Vehicle washing will take place in specific paved areas adjacent to the shop that will drain to holding ponds, a concrete lined sump or holding tank to prevent storm water run-off to surface or groundwater. Steam cleaning will take place on concrete or hard surface pads or in the enclosed shop, which will be designed to collect pollutants. Such pollutants will then disposed of in accordance with local, state and federal regulations.

g. Waste Handling and Disposal: Wastes from the facility will be stored in designated containers adjacent to the shop in the containment area and/or within the shop and disposed of in accordance with local, state, and federal regulations.

h. Outdoor Loading and Unloading of Materials: All loading and unloading of materials will take place in designated areas that will be graded and designed to prevent storm water run-off from entering the river.

i. Outdoor Container Storage of Liquids: All containers containing potentially hazardous materials will be stored in containment areas engineered in accordance with the Spill Prevention Control and Counter-Measure Plan.

j. Outdoor Process Equipment Operations and Maintenance: An inspection and maintenance program will be established to ensure that equipment is operating properly and leaks are prevented to the extent feasible.

k. Outdoor Storage of Raw Materials, Products and By Products: The processing site will be graded to prevent drainage and storm water runoff from raw materials, products and by-products from entering the river.

l. Containment of Erodible Areas: All erodible surfaces within the plant areas will be graded to prevent storm water run-off to the river.

m. Sediment: The site will be graded to prevent sediment from the stockpiles or the excavation areas from entering the Kings River.

n. Agricultural Surface Water Runoff: Temporary berms will be placed between the created ponds and farmland to prevent agricultural surface water runoff from entering the lakes.

3.4.19 Slope Stability

Tetra Tech BAS prepared the *Geotechnical Review of Quarry Slope Stability & Geologic Hazards*, August 2013 and the *Slope Stability Considerations Addendum to Geotechnical Review of Quarry Slope Stability & Geologic Hazards*, April 2014. The calculated factors of safety indicate that the proposed slopes (cut slopes of 2:1 (horizontal to vertical) to a maximum depth of approximately 100 feet below natural ground surface) will be suitably stable against gross failure for the anticipated long term conditions, including the effects of seismic shaking.

3.4.20 Disposal Methods for Tailing and Other Mining Waste

Fines recovered from the aggregate processing will be used as fill to reclaim portions of the site back to farmland.

3.4.21 Compliance With Mining and Reclamation Standards

Please refer to Section 4.1.8.

4.0 RECLAMATION PLAN

4.1 Planned Reclamation

4.1.1 Proposed End Use

The reclamation plan (Exhibit F) is designed to return as much land as possible back to farmland. Approximately 268 acres, or 43% of the project site, are to be reclaimed as farmland in this manner. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, approximately 351 acres, or 57 % of the project site, will be reclaimed to riparian and open water wildlife habitat.

4.1.2 Notification of All Owners of a Possessory Interest in the Land of the Proposed Use.

Copies of the reclamation plan have been provided to the underlying property owner. Letter of Agreement from the property owner is contained in Appendix B.

4.1.3 Manner in Which Reclamation, Adequate for the Proposed Use, Will Be Accomplished

The reclamation plan (Exhibit F) is designed to return as much land as possible back to farmland. Overburden together with processing fines will be used to fill selected phases. The filled phases will be topped with several feet of topsoil and reclaimed back to farmland to approximate original grade. The reclaimed lands would be returned to agricultural lands of equal or better quality of that currently existing on the site. Approximately 268 acres are anticipated to be reclaimed as farmland in this manner as shown in Table 6.

For the remaining phases where there is not sufficient overburden and processing fines to fill the phases a series of deep-water ponds will be created. Cut slopes above the water line will be covered with several feet of topsoil, seeded with erosion control grasses and planted with native riparian vegetation pursuant to the Revegetation Guidelines prepared for the project (*Revegetation Guidelines, Riverbend Sand and Gravel Project, Fresno County, California*, Buada Associates and John Stebbins, Consulting Botanist, October 2012). Reclamation of these phases will create approximately 351 acres of riparian (33 acres) and open water (318 acres) wildlife habitat.

Table 6
Reclaimed End Uses

Use	Approximate Acres
Farmland	268
Riparian Habitat	33
Open Water Habitat	318
Total	619

a. Control of Contaminants and Disposal of Mining Waste

Please refer to Section 3.4.20

b. Rehabilitation of Affected Streambed Channels and Streambanks

c.

No streambed channels and streambanks will be disturbed by the project..

Exhibit G
Insert Revised Reclamation Plan

4.1.4 Schedule for the Completion of Surface Mining

Mining and reclamation is estimated to be completed in 75 years from initiation of the project. The reclamation schedule is shown on Table 3, Section 3.1.4 and Exhibit F.

4.1.5 Phasing Plan for Reclamation Activities and Schedule for Completion

Reclamation phasing is depicted in Exhibit F and consists of 14 phases. The phasing schedule is shown on Table 3, Section 3.1.4. For each of the phases to be reclaimed as farmland, farming will resume within two years after the phase has been filled in the manner described in Section 4.1.3. For each of the phases to be reclaimed as open water and riparian habitat the phases will be reclaimed within two years of the completion of mining in that phase in the manner described in Section 4.1.3. Reclamation in this manner assures concurrency of reclamation with mining.

4.1.6 Effect On Future On-Site Mining and Mining in the Surrounding Area

Implementation of the proposed reclamation will have no effect on the ability to mine other areas designated as containing "Regionally Significant Construction Aggregate Resources" pursuant to SMARA Section 2790 (see Section 2.1.2d).

4.1.7 Measures to Protect Public Health and Safety

The perimeter of the property will be fenced with minimum four (4) foot high, ranch fencing consisting of metal T-posts and at least three (3) strands of barbed wire in accordance with Section 858 H.4 of the FCZO.

4.1.8 Compliance with Fresno County Surface Mining and Reclamation Standards (Section 858-H)

a. No extraction of material or overburden shall be permitted within twenty-five (25) feet of any property boundary or within fifty (50) feet of a boundary contiguous with a public road right-of-way or recorded residential subdivision. (Standard H.1)

   Please refer to Section 3.1.3a.

b. No stockpiled soil or material shall be placed closer than twenty-five (25) feet from a property boundary. (Standard H.2)

   Please refer to Section 3.1.3a.

c. No production from an open pit shall create a slope steeper than 2:1 within fifty (50) feet of a property boundary nor steeper than 1½:1 elsewhere on the property, except steeper slopes may be created in the conduct of extraction for limited periods of time prior to grading the slope to its reclamation configuration, and slopes of 1:1 may be maintained five (5) feet below the lowest water table on the property, experienced in the preceding three (3) years. (Standard H.3)

   Please refer to Section 3.1.5.

d. Security fencing four (4) feet in height consisting of not less than three (3) strands of barbed wire, or an approved equivalent, shall be placed along any property line abutting a public right-of-way and around any extraction area where slopes steeper than two (2) feet horizontal to one (1) foot vertical

are maintained. Such interior fencing will not be required where exterior fencing surrounds the property. (Standard H.4)

Please refer to Section 3.1.3d

e. Screening of the site shall be achieved by planting trees of a variety approved by the Director along all property lines adjacent to a public road right-of-way or a recorded residential subdivision. Adequate screening can generally be achieved with evergreen trees planted in two (2) staggered rows, with twenty (20) feet between the rows and between the trees in each row. As an alternative, oleanders or shrubs of a similar size and density may be planted in the same pattern at ten (10) foot intervals. The plant species and planting plan and timetable shall be designated in the Mining and Reclamation Plan. All required plants shall be maintained in a good horticultural manner. In areas where it is found that the planting of trees or shrubs will not achieve the desired screening effect due to soil conditions, the Director may approve an alternate method of screening consisting of meandering dirt berms of sufficient height to screen the site. (Standard H.5)

Please refer to Section 3.1.3b.

f. The first one hundred (100) feet of access road(s) intersecting with a County maintained road shall be surfaced in a manner approved by the Board and shall not exceed a two (2) percent grade and shall have a width of not less than twenty-four (24) feet. (Standard H.6)

Please refer to Section 3.1.1.

g. Where an access road intersects a County Maintained road, it shall be improved with a driveway approach constructed to Fresno County Standards. (Standard H.7)

Please refer to Section 3.1.1.

h. All interior roads within the site shall be maintained so as to control the creation of dust. (Standard H.8)

Please refer to Sections 3.4.13c.

i. Traffic control and warning signs shall be installed as required by the Commission at the intersection of all private roads with public roads. The placement, size, and wording of these signs shall be approved by the Director. (Standard H.9)

A stop sign will be installed at the intersection of the site entrance road to E Goodfellow Avenue.

j. When the plan calls for resoiling, coarse hard mine waste shall be leveled and covered with a layer of finer material or weathered waste. A soil layer shall then be placed on this prepared surface. Surface mine operators who do not salvage soil during the initial operations shall attempt, where feasible, to upgrade remaining materials. The use of soil conditioners, mulches, or imported topsoil shall be considered where revegetation is part of the Mining and Reclamation Plan and where such measures appear necessary. It is not justified; however, to denude adjacent areas of their soil, for any such denuded areas must in turn be reclaimed. (Standard H.10)

Please refer to Section 3.4.8a.

k. The species selected for revegetation shall be those with good survival characteristics for the topography, resoiling characteristics, and climate of the mined area. The operator shall provide a schedule and methodology for monitoring vegetation and replacing vegetation should the Department determine that replacement is necessary. (Standard H.11)

Please refer to Section 4.1.9c.

l. Additional vegetative planting may be required in the interest of erosion control. (Standard H.12)

Please refer to Section 4.1.9c.

m. Grading and revegetation shall be designed to minimize erosion and to convey surface runoff to natural drainage courses or interior basins designed for water storage. Basins that will store water during periods of surface runoff shall be designed to prevent erosion of spillways when these basins have outlet to lower ground. (Standard H.13)

Please refer to Section 3.4.16 and 3.4.18.

n. Stockpiles of overburden and minerals shall be managed to minimize water and wind erosion. (Standard H.14)

Please refer to Section 3.4.13c.

o. Erosion control facilities such as settling basins, ditches, stream bank stabilization, and dikes shall be constructed and maintained where necessary to control erosion. (Standard H.15)

Please refer to Section 3.4. 16 and3.4.18.

p. Extraction operations adjacent to any flowing stream shall be separated from the stream by closed dikes. No extractions within the stream will be permitted. (Standard H.16)

Please refer to Section 3.4.18.

q. All water utilized in the plant operation shall be disposed of behind a closed dike so that it will not cause impairment of water in any stream. (Standard H.17)

Please refer to Section 3.4.18.

r. Operations shall be conducted to substantially prevent siltation of groundwater recharge areas. (Standard H.18)

Please refer to Section 3.1.18.

s. Settling ponds or basins shall be constructed to prevent potential sedimentation of streams at operations where they will provide a significant benefit to water quality. (Standard H.19)

No settling ponds are proposed. Please refer to Section 3.4.11b.

t. Good operating practices shall at all times be utilized to minimize noise, vibration, dust and unsightliness. In reviewing a proposal the Planning Commission shall consider: (Standard H.20)

Please refer to operating practices to reduce noise in Section 3.4.13a.
Please refer to operating practices to reduce vibration in Section 3.4.13b.
Please refer to operating practices to reduce dust in Section 3.4.13c.
Please refer to operation practices to reduce unsightliness in Section 3.1.3b. In addition, the dragline, and all visible plant facilities will be painted with an neutral-tone color to blend with the surrounding landscape and vegetation.

1. The location of the processing plant. (Standard H.20a)

   Please refer to Section 3.1.2 and Exhibit E.

2. The location where unused equipment will be stored. (Standard H.20b)

   Please refer to Section 3.1.2 and Exhibit E.

3. Proposals for the removal of all structures, metallic equipment, debris, or objects upon conclusion of the extraction operations. (Standard H.20c)

   The permanent plant, including equipment, foundations, associated utilities and stockpiles will be removed during the mining of phase 9. Septic systems will be removed in accordance with Fresno County standards. Buildings and associated utilities that may be adaptable to end uses may be left. Interior roads are to be left for access purposes.

u. Operating hours may be limited to designated periods except during periods of public emergency affecting the health and welfare of the community requiring continuous operation. (Standard H.21)

   Please refer to Section 3.4.2 and Table 4.

v. Any night lighting established on the property shall be arranged and controlled so as not to illuminate public rights-of-way or adjacent properties. (Standard H.22)

   Please refer to Section 3.4.13e.

w. Processing and storage yards shall be centrally located on the site whenever possible. (Standard H.23)

   Please refer to Section 3.1.2 and Exhibit E.

x. All surface mining operations and reclamation activities shall be conducted consistent with all policies of the Noise Element of the Fresno County General Plan. (Standard H.24)

   Please refer to Section 3.4.13a.

y. The Department shall consider the potentially adverse environmental effects of surface mining operations and will generally require that: (Standard H.25)

   1. Disturbances of vegetation and overburden in advance of mining activities be minimized. (Standard H.25a)

      Please refer to Section 3.4.8a & b.

1. Sufficient topsoil be saved to perform site reclamation in accordance with the Mining and Reclamation Plan. (Standard H.25b)

   Please refer to Section 3.4.8a.

2. All reasonable and practical measures be taken to protect the habitat of fish and wildlife. (Standard H.25c)

   Please refer to Sections 3.1.3a and 4.1.9a.

3. Temporary stream or watershed diversion be restored. (Standard H.25d)

   No temporary stream or watershed diversion is proposed.

4. Permanent piles or dumps of mine waste rock and overburden be stabilized and not restrict the natural drainage without suitable provisions for diversion and toxic materials be removed or confined to control leaching. (Standard H.25e)

   No permanent piles of waste rock or overburden are anticipated.

z. Reclamation of mined lands shall be implemented in conformance with applicable performance standards as set forth in the state regulations Sections 3703 et seq. (Standard H.26)

Please refer to Section 4.1.9.

4.1.9 Conformance with Applicable State Standards

a. Wildlife Habitat (Standard H.26a, SMARA Section 3703)

A databases and literature review of the California Natural Diversity Data Base (CNDDB) and California Native Plant Society Electronic Inventory (CNPSEI) was conducted for the project site. Sensitive plant surveys and biological surveys were conducted (Buada, Stebbins, LSA, July 2013).

All existing riparian habitat along the river is not included in the project and is to remain as open space (Exhibit E). Only areas which are in agriculture or farming related activities, including access and maintenance roads, are included within the project boundaries to be mined or disturbed by mining related activities. Mining-related activities, including access and maintenance roads, will not occur any closer than current farming activities to existing habitat along the river. By avoiding all of the existing native habitat, all of which is outside of the project boundary, the wildlife in the area will continue to have habitat available for foraging, shelter, and breeding activities during all phases of mining.

Please refer to Section 2.1.10 for an overview of the presence of special status species and sensitive habitats on the site. Please refer to Section 3.1.3a

Mining operations are not expected to impact any native habitats. Indirect impacts such as noise, lighting, and human presence are not expected to affect sensitive wildlife species because all of these impacts are similar to the site conditions at other existing mining operations on the Kings River and the San Joaquin River where wildlife species have acclimated well to such mining activities and where wildlife species have been observed in great numbers for many years.

A net gain in the number of acres of native habitats within the property boundary will occur as a result of the mining/reclamation project. At the completion of the entire project, approximately 351 acres of created open water and native habitats will be able to support a higher diversity, density, and abundance of wildlife and plant species. The proposed mining/reclamation project will result in a net benefit to the region in that it will provide a significant habitat area for wildlife and plants.

b. Backfilling, Regrading, Slope Stability, and Recontouring (Standard H.26b, SMARA Section 3704)

Please refer to Sections 3.1.5, 3.4.19 and 4.1.3.

c. Revegetation (Standard H.26c, SMARA Section 3705)

The revegetation program will apply to the riparian areas surrounding the reclaimed open water ponds. The following is a summary of the Revegetation Guidelines prepared for the project (Buada and Stebbins, October 2012, Appendix F).

1. Goals and Objectives

The goal of the revegetation program is to supplement natural native plant recolonization by creating natural self-sustaining plant communities or habitats using plant materials that are genetically and ecologically appropriate to the site. Objectives include: providing conditions that allow natural processes such as soil development, nutrient cycling, plant succession, natural regeneration and recovery from disturbance to occur; and within the open water areas, creating habitat for riparian associated species.

2. Construction Sequence

Following completion of mining operations the following typical sequence of revegetation activities will be undertaken:

- Recontouring of planting areas, if necessary
- control of invasive weeds
- placement of topsoil
- installation of temporary irrigation systems, if necessary
- installation of erosion control devices, if necessary
- planting and seeding
- maintenance and monitoring
- reporting

3. Plant Materials, Seed Collection and Plant Propagation

To ensure genetically adapted plant materials for use in the revegetation effort, collection sites should have characteristics similar to the revegetation site. Guidelines for seed collection and plant propagation and plant lists for the riparian habitat to be established are described in the Revegetation Guidelines, Appendix F.

4. Planting Methods

Generally all planting will occur between November 15 and January 15, or later depending on weather conditions, unless supplemental irrigation is provided. It is important to plant during this period when many of the plants are dormant and temperature and rainfall provide optimal conditions for germination and/or establishment.

5. Performance Standards

   Performance standards ensure that the revegetation effort meets the goal of creating viable, self--sustaining habitats. These standards include: (1) container/cutting survivability, (2) cover (3) species richness or diversity (4) species density. Other attributes that evidence functioning habitats include native plant species' recruitment and wildlife usage. These standards are referenced in the Revegetation Guidelines, Appendix F.

6. Maintenance and Monitoring

   Maintenance activities begin at plant installation and continue until performance standards are met. These activities include weed control, irrigation, replacement of dead trees or cuttings, etc. Monitoring will be initiated at installation and will be conducted until performance standards are met.

   Monitoring will generally occur over a 5-year period or until performance standards are met which ever occurs first.

   Such monitoring will provide information for adaptive management of the system. Over time, as restored habitats mature, and more is learned about how the habitats respond to initial management actions, adjustments can be made to incorporate those activities that work best into the management plans. New information from ongoing research on special species could also lead to changes in management action.

   Reports will be prepared and include such information as monitoring methods, general observations of vegetation development, maintenance activities, recommendations, photo documentation, and comparisons of the current years' findings with those of previous years.

7. Recordkeeping

   Revegetation (implementation) activities, maintenance work and the results of horticultural and any biological monitoring undertaken throughout each planting season will be summarized in reports to document compliance with the reclamation plan.

d. Drainage, Diversion Structures, Waterways, and Erosion Control (Standard H.26d, SMARA Section 3706)

   Please refer to Section s3.4.17, 3.4.18, and 4.1.3b..

e. Prime and Other Agricultural Land Reclamation (Standard H.26e, SMARA Sections 3707 and 3708)

   Please refer to Sections 3.4.8a, 4.1.3 and Exhibit F.

f. Building, Structure, and Equipment Removal (Standard H.26f, SMARA Section 3709)

Please refer to Sections 4.1.8t.3 and 4.4

g. Stream Protection Including Surface and Groundwater (Standard H.26g, SMARA Section 3710)

Please refer to Sections 3.4.18, 4.3.1b and 4.2.2.

h. Topsoil Salvage, Maintenance, and Redistribution (Standard H.26h, SMARA Section 3711)

Please refer to Section 3.4.8a, 4.1.3 and Exhibit F.

i. Tailing and Mine Waste Management (Standard H.26i, SMARA Section 3712)

Please refer to Sections 3.4.8a,b. 3.4.20 and 4.1.3.

j. Closure of Surface Openings (Standard H.26j, SMARA Section 3713)

Wells to be removed by mining will be abandoned in accordance with all applicable local and state provisions. After monitoring is completed all monitoring wells will be abandoned in accordance with all applicable local and state provisions.

Please refer to Section 4.4

4.2 Reclamation Site Plan

4.2.1 New Contouring

Please refer to Exhibit F.

4.2.2 Water Features and Methods Planned to Overcome Stagnation

Groundwater will flow into the ponds from the northeast since the groundwater gradient flow is from northeast to southwest. The phases to be filled and reclaimed as farmland and the phases to be reclaimed as open water and riparian habitat have been designed to leave a window about one-quarter mile wide perpendicular to the direction of groundwater flow where no fill will take place. Groundwater will be able to move downward and laterally beneath the fill, laterally around both sides of the fill (to the northwest and southeast), and through the window. (KDSA, December 2013)

The depth of the ponds may be as deep as 100 feet. During the summer and winter the water in fresh water ponds becomes stratified into different temperature layers, which don't mix. Twice a year, in the fall and spring, the waters at all layers of these ponds mix in overturns that equalize the temperatures at all depths. (*Living in the Environment*, G. Tyler-Miller, 1998). The seasonal vertical movement of water and the lateral groundwater movement preclude the occurrence of stagnation.

Please refer to Exhibit F.

4.2.3 Vegetative Planting

Please refer to Section 4.1.9c and Exhibit F.

4.2.4 Access and Treatment

Please refer to Sections 3.1.1 and Exhibit F.

4.2.5 Phasing

Please refer to Table 3, Section 3.1.4 and Exhibits E and F.

4.3 A Soil Salvage Plan and if Proposed For Refill, Definition of Refill Material, and Probable Sources.

Please refer to Sections 3.4.8, 4.1.3 and Exhibit F.

4.4 Site Closure

The site will be considered closed upon the following:

a. Completion of the reclamation activities and reaching associated performance standards as identified herein:

   Please refer to Section 4.1.5.

b. Removal of plant, equipment, conveyors, foundations and associated utilities;

   Please refer to Section 4.1.8t.3.

c. Removal of stockpiles;

   Please refer to Section 4.1.8t.3.

d. Removal of buildings, foundations and associated utilities except those required for post mining use of the site; and

   Please refer to Section 4.1.8t.3.

e. Securing of access points to prevent unauthorized access.

   Please refer to Section 4.1.7.

4.5 Statement of Responsibility

Prior to the excavation of any material from the project site, a recordable agreement will be executed, binding upon successors, heirs or assigns, covenanting to perform all reclamation in the manner prescribed by the approved CUP and Mining and Reclamation Plan.

4.6 Financial Assurances

Reclamation of the project site will be covered by financial assurances in accordance with the requirements of SMARA. The financial assurance estimate and the proposed financial assurance mechanism will be submitted to the County no later than 60 days prior to commencement of activities authorized in connection with this project.

RE: Agreement to Obtain Permits

The real property described on Exhibit "A" attached (the property) is owned by Running Luck Ranch, LLC (owners).

The owners have granted Riverbend Sand and Gravel, LLC the exclusive right to operate a sand and gravel mining operation, and related activities, on the property, including sand and gravel processing facilities, ready-mix concrete facilities, asphalt batching facilities, and concrete and asphalt recycling facilities, and to obtain a permit and other entitlements collectively ("Permits") required to conduct such operations.

APPENDIX B

Legal Description

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF FRESNO, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS: -

Parcel No.1: APN 350-041-12

That portion of Government Lots 1 and 4 in the Northeast quarter of Section 1, Township 15 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, which lies North and East of the Main channel of Kings River.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.2: a portion of APN 332-071-52

That portion of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, described as follows:

Beginning at the Southeast comer of said Section 36, Thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance of 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.3: a portion of APN 332-071-52

That portion of the Southeast quarter of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, lying East of Kings River.

Excepting therefrom that portion of said premises and described as follows:

Beginning at the Southeast corner of said Section 36, thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

LEGAL DESCRIPTION

PARCEL 1:

A portion of the fractional Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described as follows,

Beginning at a point on the West Line of said Southwest quarter which is 30 feet South from the West quarter corner; thence South 88° 52.6' East along the South line of the road right of way, 2668.2 feet to the East line of said Southwest quarter, at a point distance 30 feet South of the center quarter corner of said Section 31, thence South 1° 21.6' West along the East line of said Southwest quarter a distance of 1335.5 feet; thence North 88° 52.6' West, a distance of 2651.7 feet to the west line of said Section 31, thence North O° 39' East, a distance of 1335.5 feet to the point of beginning.

Said land is designated Parcel "A" on a map of resurvey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and other property, recorded December 16, 1941, in Book 15 Page 73 of Record of Surveys, records of said County.

APN 333-061-04

PARCEL 2:

That portion of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official plat thereof, described as follows:

Commencing at a point on the West line of the Southwest quarter of said Section 31, 1365.5 feet Southerly from the Northwest corner of said Southwest quarter of Section 31; thence South 88° 52.6' East and parallel with the East and West centerline of said Section 31, 2651.7 feet to the North and South centerline of said Section 31; thence South 1° 21.6' West 1337.8 feet to a point on the East line of Lot 2 of section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, said point being 82.6 feet Southerly from the quarter section corner common to said sections 31 and 6; thence North 89° 7' West 2635.2 feet to the West line of Lot 1 of said section 6 at a point 82.6 feet Southerly from the Northwest corner of said Section 6; thence North 82° 39' East along the West line of said Lot 1 and of said Section 31, 1348.8 feet to the point of beginning.

Being Parcel "B" as same is designated and delineated upon that certain Map of Re-Survey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, and of Lot 1 of Section 6 and part of the East half of the Northwest quarter of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, recorded at the request of Ross C. Phillips, L. S., on December 16, 1941, in Book 15, Page 73 of Record of surveys, Fresno County Records.

APR 333-061-05 & 360-020-20

LEGAL DESCRIPTION

Real property in the unincorporated area of the County of FRESNO, State of California, described as follows:

PARCEL 1: APN 332-071-53

ALL THAT PORTION OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, AND THE SOUTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT, LYING EAST OF THE KINGS RIVER, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHEAST CORNER OF THE NORTHEAST QUARTER OF THE NORTHEAST QUARTER OF SAID SECTION 36, AND RUNNING THENCE WEST 1320.1 FEET; THENCE AT RIGHT ANGLES SOUTH 1323.2 FEET TO A POINT IN THE CENTER OF A COUNTY ROAD; THENCE AT RIGHT ANGLES WEST 990 FEET; THENCE AT RIGHT ANGLES NORTH 990.75 FEET TO A POINT IN THE CENTER OF KINGS RIVER; THENCE NORTH 45° EAST 466.4 FEET; THENCE ALONG THE CENTER OF KINGS RIVER NORTH 26°30' EAST 1479 FEET TO THE NORTH LINE OF SAID SECTION 36; THENCE CONTINUING ALONG THE LAST MENTIONED COURSES 678 FEET; THENCE RUNNING NORTH 719 FEET TO A POINT 300 FEET EAST OF THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25 IN SAID TOWNSHIP AND RANGE; THENCE RUNNING NORTH 40° EAST 700 FEET; THENCE NORTH 65-1/2° EAST 636 FEET TO THE EAST LINE OF THE SOUTHEAST QUARTER OF SAID SECTION 25 AND RUNNING THENCE SOUTH ALONG SAID LAST MENTIONED LINE 3448.50 FEET TO THE PLACE OF BEGINNING.

ALSO ALL OF THE SOUTHEAST QUARTER OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT.

EXCEPTING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 2: APN 333-160-02S

THAT PORTION OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING ALL OIL, GAS, HYDROCARBONS AND OTHER MINERALS THEREIN AND THEREUNDER AS RESERVED IN THE DEED FROM CELLA VINEYARDS, A CALIFORNIA CORPORATION, RECORDED FEBRUARY 11, 1947, IN BOOK 3884, PAGE 448 OF OFFICIAL

RECORDS.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3: APN 332-042-56

THAT PORTION OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE NORTH LINE THEREOF WHICH IS SOUTH 89°18' EAST A DISTANCE OF 2510.04 FEET FROM THE NORTHWEST CORNER THEREOF; THENCE SOUTH 4°23'21" WEST A DISTANCE OF 1254.5S FEET TO A POINT 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE SOUTH 89°25' EAST A DISTANCE OF 262.64 FEET, PARALLEL WITH AND 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25 TO A POINT ON THE EAST LINE OF SAID SECTION; THENCE NORTH ALONG THE EAST LINE OF SAID SECTION TO THE NORTHEAST CORNER OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION 25; THENCE NORTH 89°18' WEST ALONG THE NORTH LINE OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION TO THE POINT OF BEGINNING.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3A:

AN EASEMENT FOR ROAD PURPOSES OVER THE NORTHERLY 6 FEET OF THE SOUTHERLY 55 FEET OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, FURTHER DESCRIBED AS: COMMENCING AT A POINT WHICH IS 49.00 FEET NORTH 00°31' WEST, OF THE CENTER OF SAID SECTION 25; THENCE NORTH 00°31 WEST, 6.00 FEET; THENCE SOUTH 89°25' EAST, PARALLEL WITH THE EAST AND WEST CENTER LINE OF SAID SECTION, A DISTANCE OF 2400.80 FEET TO A POINT; THENCE NORTH 4°23" EAST, 14.00 FEET TO A POINT; THENCE SOUTH 89°25' EAST, 10.00 FEET TO A POINT; THENCE SOUTH 00°6'19" EAST, 20.00 FEET TO A POINT WHICH IS 49.00 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE NORTH 89°25' WEST, 2410.80 FEET TO THE NORTH OF COMMENCEMENT.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 4: APN 333-160-01S

THAT PORTION OF THE SOUTHWEST QUARTER OF SECTION 19 AND THE WEST HALF OF SECTION 30, ALL IN TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, IN THE UNINCORPORATED AREA, COUNTY OF FRESNO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT THEREOF, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN; THENCE EAST 160 RODS; THENCE NORTH 400

RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE SOUTH TO THE CENTER OF KINGS RIVER; THENCE SOUTHERLY IN THE CENTER OF SAID RIVER TO THE EAST LINE OF THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25; THENCE SOUTH ON SAID SECTION LINE TO THE SOUTHEAST CORNER OF SAID SECTION 25 TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION THEREOF DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 30; THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET, A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING THEREFROM AN UNDIVIDED 50% OF ALL OIL, GAS AND MINERALS, EXCLUDING SAND, AS RESERVED BY CELLA VINEYARDS, FORMERLY KNOWN AS B & L CELLA BROS., BY DEED RECORDED JANUARY 31, 1974, IN BOOK 6261 PAGE 134 OF OFFICIAL RECORDS, DOCUMENT NO. 8303.

ALSO EXCLUDING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

APPENDICIES

A	Reclamation Plan

1.0 INTRODUCTION

Riverbend Sand and Gravel, LLC (Riverbend) is applying for a Conditional Use Permit (CUP) to mine construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. The proposed Project Site, located approximately 1.5 miles southeast of the City of Sanger, includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E and includes approximately 619 acres of an approximately 833 acre site located immediately east and north of the Kings River (Exhibit A). The remaining 214 acres of the property, including all the existing riparian habitat along the Kings River, are excluded from the project. The project site is relatively flat and is currently in orchards and vineyards (Exhibit B).

Mining is anticipated to occur to a depth of approximately 100 feet below natural ground surface. The reclamation plan (Appendix A) is designed to return as much land as possible back to farmland. Overburden together with processing fines will be used to fill selected phases. The filled phases will be topped with several feet of topsoil and reclaimed back to farmland to approximate original grade. Approximately 268 acres are anticipated to be reclaimed as farmland in this manner.

For the remaining phases where there is insufficient overburden and processing fines to fill the phases a series of deep-water ponds will be created. Cut slopes above the water line will be covered with several feet of topsoil, seeded with erosion control grasses and planted with native riparian vegetation. Reclamation of these phases will create approximately 351 acres of riparian (33 acres) and open water (318 acres) wildlife habitat. This Revegetation Plan addresses the riparian habitat to be created.

These Revegetation Guidelines has been prepared in accordance with the Surface Mining and Reclamation Act (SMARA) of 1975, Article 9, Reclamation Standards, Section 3705, Performance Standards for Revegetation; and with the Regulations for Surface Mining and Reclamation in All Districts, Section 858 of the Fresno County Zoning Ordinance (FCZO). The Guidelines include a baseline vegetation analysis, revegetation plan, maintenance requirements, and performance standards for determining success.

2.0 BASELINE VEGETATION ANALYSIS

Baseline vegetation analysis is required by SMARA regulations in order to document the vegetative density, cover, and species richness of naturally occurring habitats in the surrounding area and to provide a basis for evaluation of revegetation success. Where proposed end uses differ from premining uses, data may be obtained from reference areas in lieu of baseline site data.

2.1 Premining Conditions

As previously discussed the entire project site is relatively flat and is currently in orchards and vineyards. No natural habitats exist on the project site

2.1.1Vegetation Communities/Habitats

The historic habitats of the Kings River drainage have been extremely modified in the past. The free flow of the Kings River was eliminated in the early 1950's. Past and present agricultural operations and related development have eliminated all but a relatively narrow band of the riparian habitat adjacent to the river. The only remaining major natural vegetation type present near the proposed project area is Great Valley Mixed Riparian Forest (Holland, #61430) located immediately adjacent to the Kings River and outside of the western and southern edges of the proposed project area.

Native trees and shrubs found in this riparian habitat include; valley oak, (*Quercus lobata*), cottonwood, (*Populus fremontii*), buttonwillow, (*Cephalanthus occidentalis*), Oregon ash, (*Fraxinus latifolia*), elderberry, (*Sambucus mexicana*) and several species of willow, (*Salix* sp.). In addition, the riparian habitat supports several large sycamores, (*Platanus racemosa*). Non-native trees, shrubs that are also present include fruitless mulberry, (*Morus alba*), catalpa, (*Catalpa speciosa*), and silver maple (*Acer saccarhinum*).

Native understory plants include; mugwort, (*Artemesia douglassiana*), stinging nettle, (*Ur.*), rush, (*Juncus balticus*), virgin's bower, (*Clematis ligusticifolia*), horsetail, (*Equisetum arvensis*), and goldenrod, (*Solidago elongata*). Non-native understory species include Castor bean, (*Ricinus communis*), honeysuckle, (*Lonicera japonica*), Virginia creeper, (*Parthenocissus vitacea*), Himalaya berry, (*Rubus armeniacus*), periwinkle (*Vinca major*), and English ivy, (*Hedera helix*). In the following discussion, the names of vegetation communities follow the standard nomenclature used by Sawyer and Keeler-Wolf (1995), as appropriate. The names of the plant species that comprise these communities are taken from Hickman (1993).

Two relatively small "wetland habitat" are associated with two old gravel ponds in the northwest corner of the overall property and these sites are also excluded from the planned project area. The associated habitats of these ponds is riparian/emergent marsh and consists primarily of non-native weedy species and a scattered riparian and emergent plant species.

3.0 REVEGETATION PLAN

3.1 Reference Areas

The areas to be reclaimed to native riparian habitat will be reclaimed to conditions that differ from the premining condition (e.g. agriculture). Consequently, it is more appropriate to use data from reference areas to characterize naturally occurring habitats in the surrounding area as a template for revegetation.

The most appropriate area for use as a reference area is the avoided riparian habitat adjacent to the river (Figure 2). The first pond to be created will not occur until after mining is completed in that phase in about 10 years. Therefore the avoided riparian habitat areas will be examined for potential use as reference sites prior to the completion of mining of the first pond and data will be collected from the areas as appropriate. Revegetation standards, including plant palettes and planting densities, and performance standards will be revised as appropriate based on reference site examination and data.

3.2 Test Plots

SMARA regulations require test plots to determine the most appropriate planting procedures to assure successful revegetation. This requirement may be waived if success can be documented from previous experience with similar species and conditions or based on competent professional advice.

The authors of this Revegetation Plan have been actively involved in the revegetation of similar riparian sites for over 15 years including Vulcan Materials Company's Rank Island site on the San Joaquin River in Fresno County (OMR 2011 Excellence in Reclamation Award) and Triangle Rock Products' Laguna Creek Corridor Preserve in Sacramento County. These previous and on-going revegetation efforts have shown which methods are most effective at achieving initial survival of plantings and which species are most likely to become successfully established. It is unlikely that additional test plots would yield any new information that would help assure successful revegetation. Consequently, no additional test plots are proposed.

3.3 Soils

Soils in revegetation areas will consist of backfilled topsoil. SMARA regulations (Section 3711) require salvage of topsoil prior to mining and redistribution in areas to be revegetated. SMARA regulations (Section 3705) also require soil analysis to determine if the growth media in revegetation areas consists of native topsoil and is otherwise adequate to support successful revegetation.

3.3.1 Soil Fertility and Testing

After final grading of the areas to be reclaimed to native riparian habitat and placement of stockpiled topsoil, standard soil fertility and agricultural suitability testing will be performed to determine if soils are suitable to support growth of native upland vegetation. Since topsoil on the site has high soil index ratings soil analysis is anticipated to indicate the topsoil to be suitable for revegetation purposes.

Soil samples will be based on composites taken of the revegetation areas. The sampling protocol will be approved by the revegetation specialist prior to implementation. Soil testing will include the following:

- Presence of elements toxic to plants
- Nutrient levels
- Percentage of organic matter

If testing indicates low fertility and organic matter, soils will be amended with organic amendment and nutrients as described below.

3.3.2 Soil Amendment Specifications

Organic soil amendment/mulch will comply with the following specifications:

- Soil amendment shall consist of approximately 75 percent organic compost, comprised of chipped, shredded, or ground vegetation or clean processed recycled wood products processed as described below and screened through 3/8-inch mesh; and 25 percent wood chips ranging from 3/8 inch to 3 inch.
- Soil amendment shall not contain paint, petroleum products, herbicides, fungicides, or other chemical residues harmful to plant or animal life. Other deleterious material, including plastic, glass, metal or rock, shall not exceed 0.1 percent by weight or volume.

3.3.3 Fertilizer Specifications

Any fertilizer used to improve soil fertility will be a slow-release organic formulation (Biosol or equivalent).

3.3.4 Placement and Incorporation of Soil Amendment

Upon completion of site preparation, soil amendment will be placed and incorporated as follows:

- Soil amendment that has been stockpiled prior to use may require loosening or moistening to be restored to an acceptable friability and moisture content as directed by the Revegetation Specialist.
- Soil amendment shall be spread evenly over the prepared slopes and placed to a uniform depth.
- Compost shall be incorporated into the soil surface using a three-tine ripper or equivalent. Incorporation shall loosen, distribute and blend soil amendment with mineral soil.

3.4 Revegetation Methods

3.4.1 Technical Supervision

All revegetation activities will be conducted under the supervision of an experienced Revegetation Specialist. Any deviation from the revegetation plans will be approved by the Revegetation Specialist. The Revegetation Specialist will be on site during initiation of each

revegetation task (e.g., site preparation, plant installation, seeding, etc.), and all work will be monitored on a regular basis. Activity logs and field memos will be required to document the work accomplished and any problems encountered.

3.4.2 Preconstruction Activities

Prior to initiation of revegetation, the Revegetation Specialist a will establish and stake the limits of planting areas. All access routes, staging areas, and similar features will be located and staked in the field. Where necessary, orange construction fencing will be installed to delimit sensitive areas adjacent to construction areas.

3.4.3 Site Preparation

Areas to be revegetated will be prepared as follows:

- Vegetation, trash, debris, and weeds shall be cleared. All weeds shall be removed from the area and disposed of.
- Any eroded areas shall be repaired uniformly without leaving pits, holes, or low areas.

3.4.4 Timing

Seeding will be conducted between September 15 and October 15 to take advantage of winter rains for seed germination and growth.

3.5.5 Plant Materials

Container Stock: Container plants proposed for the upland habitat revegetation are shown in Table 1. When feasible, propagules for shrub and tree container plants will be collected from appropriate native plants growing on the project site or in the local area. The use of site specific materials, which are adapted to local conditions, increases the likelihood that revegetation will be successful, and maintains the genetic integrity of the local ecosystem. If local propagules are not available or cannot be collected at least six months prior to the fall planting, materials grown from other sources in the area may be substituted with the approval of the Revegetation Specialist.

Arrangements will be made well in advance of planting to ensure that plant materials are available at the appropriate planting time and that container plants are no more than one year old. Sufficient time will be allocated for seed collection and contract growing. Subject to confirmation by the plant suppliers, a minimum lead time of six months will be allocated prior to the anticipated planting dates.

Container plants will have healthy, well developed root systems, and will not be rootbound. The Revegetation Specialist will inspect a representative sample of all plant stock, and will reject those plants that do not meet these requirements.

Density: Average 2 trees per 150 feet of bank with periodic clustering of stands for more favorable wildlife habitat and aesthetics.

Table 1
Trees and Shrubs

Species	Common name	Size	Mix (%)
Alnus rhombifolia	White alder	Liner	15
Artemesia douglasiana	Mugwort	Liner	5
Cephalanthus occidentalis	Button willow	Liner	10
Fraxinus latifolia	Oregon ash	Liner	5
Platanus racemosa	Sycamore	Liner	15
Quercus lobata	Valley oak	Liner	15
Rosa californica	Rose	Liner	2.5
Rubus ursinus	California blackberry	Liner	2.5
Salix goodingii	Black willow	Liner	10
Salix ligulifolia	Arroyo willow	Liner	15
Vitis californica	California grape	Liner	5

Note: Significant natural revegetation by cottonwood (*Populus fremontii*) and other species of willows, (*Salix sp.*) is expected to occur.

Seed Source: The seed mix shown in Table 2 will be applied to all indicated revegetation areas. Seeding will follow installation of container plantings. Arrangements for seed collection will be made well in advance to ensure availability of material. Seeds and other propagules from appropriate native species will be collected adjacent to the project area or as close as possible to the site. If the collector cannot locate adequate seed/plant material collection areas for any of the species, the collector will contact the Revegetation Specialist immediately so that the Revegetation Specialist can assist in locating adequate collection locations.

Table 2
Seed Mix

Species	Common Name	Lbs/Ac
B hordeaceus	Blando Brome	10
Vulpia myros	Zorfro Annual fescue	8
Trifolium hirtium	Hykon Rose Clover	15
Eschscholzia californica	California Poppy	4
Lupinus bicolor	Blue/white Lupine	1
Achillea millifolium	Yarro	1
Clarkia sp.	Farewell to Spring	1
	Total	40

Seed Installation Technique: Seed will be sown by hydroseeding.

The following specifications shall apply:

- The seed mixes in Table 2 shall be used.
- Hydroseeding shall occur following container plant installation.
- No fertilizer shall be added to the hydroseed mix.

- The slurry shall be sprayed in a sweeping motion and in an arched stream, until a uniform coat is achieved with no slumping or shadowing and the material is spread at the required rate per acre.

3.6 Post Construction Report

The Revegetation Specialist will prepare a post-construction report documenting revegetation methods, changes in the revegetation areas or design, results achieved, and any problems encountered. As-built drawings will be prepared showing final planting areas, and the total revegetation acreage will be calculated.

4.0 MAINTENANCE OF REVEGETATION AREAS

All revegetation areas will be maintained for three years by a qualified Maintenance Crew as needed to meet the performance criteria. The Revegetation Specialist will recommend maintenance services to the extent necessary to assure that performance criteria are met.

Normal maintenance will include weed control as necessary (either by hand or by application of an herbicide labeled for such use), inspection for and repair of erosion problems, repairs to protection devices, and removal of trash.

4.1 Maintenance Schedule

Normal maintenance activities (watering, weed control, etc.) are anticipated to occur on a biweekly basis for the first quarter, and on a monthly basis thereafter for the first year. Subsequent maintenance will occur bimonthly during the growing season and quarterly during the dormant season. Frequency of maintenance visits will be adjusted as necessary.

4.2 Maintenance Activities

4.2.1 Control of Weeds and Exotic Plants

Nonnative invasive plants that threaten California's wildlands have been categorized by the California Invasive Plant Council (Cal-IPC 2006). Invasive plants that have been classified by Cal-IPC as High (severe ecological impacts on physical processes, plant and animal communities, and vegetation structure) or Moderate (substantial and apparent—but generally not severe—ecological impacts on physical processes, plant and animal communities, and vegetation structure) in terms of ecological threat will be controlled as necessary within the revegetation areas for a minimum of three years in order to prevent aggressive weeds from out competing native plant species for resources (e.g., space, water, nutrients, and light). These invasive weeds will be removed mechanically, if feasible. In circumstances where mechanical control is not effective, it is appropriate to utilize EPA-approved systemic herbicides. Herbicides will be applied under the direction of a licensed applicator.

Prior to initiation of revegetation efforts, the Revegetation Specialist will consult the most recent Cal-IPC list and a list of specific species to be controlled under this Revegetation Plan will be developed. Additional species may be added to the list based on actual conditions and the recommendation of the Revegetation Specialist.

4.2.2 Supplemental Irrigation

All plants will be watered by hand directly after planting. Artificial irrigation will be supplied as needed through the first summer after planting to provide supplemental water for the establishment of plants from containers. At the direction of the Revegetation Specialist, irrigation may be continued on an as-needed basis during the second and third years following initial planting to facilitate root development, so that plants will be sufficiently established to survive without artificial irrigation beyond the third year.

The Maintenance Crew will be responsible for providing supplemental irrigation to the container plants by a temporary irrigation system.

The amount and frequency of irrigation of each planting area will be determined through monitoring soil moisture conditions during the initial irrigation period. The goal is to provide deep, infrequent watering to encourage deep rooting of all perennial species. The Maintenance Crew will keep a log ofwatering dates and water amounts administered each time.

4.2.3 Protective Devices

Protective devices, if installed, will be maintained in good condition. Additional devices will be installed, as described in Section 3.3.10, if monitoring indicates plant damage from herbivory.

4.2.4 Replacement of Dead or Diseased Plant Materials

Planting densities given in Tables 1 and 2 assume a certain amount of mortality during the monitoring period. As long as this level of mortality is not exceeded, replacement of plant materials will not be necessary. If mortality levels are excessive, the cause of mortality will be investigated and corrective actions taken as necessary to resolve any problems prior to plant replacement. Plants will be replaced only during the appropriate time of year as discussed in Section 3.4.4.

5.0 PERFORMANCE MONITORING AND REPORTING

The purpose of performance monitoring is to 1) determine the overall status and condition of the revegetation areas; 2) determine if native annual grassland is becoming established and meeting the performance criteria; and 3) identify any shortcomings or new issues, so that appropriate corrective actions can be taken. Performance monitoring will occur for a period of five years following seeding of native grassland or longer if performance standards have not been achieved.

5.1 Performance Criteria

5.1.1 General

The performance criteria for revegetation success are based on achieving adequate germination of seeded species to control weed growth and erosion.

SMARA performance standards for revegetation success are based on achieving vegetation density, cover, and species richness comparable with preproject conditions or with naturally occurring habitats in the area based on appropriate reference sites.

5.1.2 Quantitative Success Criteria

As discussed in Section 3.1 reference sites for this revegetation project have been identified as the avoided riparian habitat adjacent to the river Sample data will be used to determine estimates of native species and species richness for comparison with equivalent samples taken from revegetated areas.

Quantitative success criteria for this project also include total vegetated cover and native species cover as identified in Table 3.

Total Vegetative Cover: Total cover will be measured for seeded areas to assure there has been adequate germination of seeded species to control erosion and exclude noxious weeds, and that progressively higher rates of cover are achieved each year after seeding.

Native Species Cover: The cover of native species will be measured beginning at year two to assure that the relative cover of native species in revegetated areas is equivalent to or greater than naturally occurring habitats.

5.2 Monitoring Methods

Performance monitoring will include both qualitative and quantitative assessment, as described above. Qualitative monitoring will occur during periodic inspections of the revegetation areas. These inspections will occur frequently (approximately every month) during the first year and less often in subsequent years. Quantitative monitoring will typically occur annually in late summer beginning during the first year after planting. Sampling methods will be as described in Section 5.2.2.

5.2.1 Qualitative Monitoring

Qualitative monitoring methods will include visual observation and photo documentation. There are no specific performance criteria associated with this monitoring.

Table 3
Summary of Vegetation Performance Criteria

	Time After Completion of Planting				
Criterion	**6 months**	**1 year**	**2 years**	**3 years**	**5 years**
Survival (container stock only)	70%	50%	NA	NA	NA
Dripline Diameter (trees and shrubs)	NA	NA	Minimum 20 percent annual increase in dripline diameter	Minimum 20 percent annual increase in dripline diameter	Minimum 20 percent annual increase in dripline diameter
Height (trees and shrubs)	NA	NA	Minimum 20 percent annual increase in height	Minimum 20 percent annual increase in height	Minimum 20 percent annual increase in height
Species Richness (# of plant species)	NA	NA	Comparable to or greater than reference areas (<20% difference @ 80% confidence level)	Comparable to or greater than reference areas (<20% difference @ 80% confidence level)	Comparable to or greater than reference areas (<20% difference @ 80% confidence level)
Total Vegetative Cover - All Species[1] (seeded areas)	Adequate germination in any 25 sq. ft. area[2]	25% cover in any 25 sq. ft. area	40% cover in any 25 sq. ft. area	70% cover in any 25 sq. ft. area	90% cover in any 25 sq. ft. area
Native Species Cover[3] (seeded areas)	NA	NA	Comparable to or greater than reference areas (<20 % difference @ 80% confidence level)	Comparable to or greater than reference areas (<20 % difference @ 80% confidence level)	Comparable to or greater than reference areas (<20 % difference @ 80% confidence level)

1. Includes both seeded and volunteer species; native and nonnative.
2. If seed germination is inadequate to prevent erosion damage or control invasion by weeds, re-seeding may be required. Application of appropriate herbicides may also be necessary to control weed growth.
3. Includes both seeded and volunteer species.

Visual Observation: During monitoring events, the Revegetation Specialist will document the condition of revegetation areas based on meander surveys and visual observations. Current conditions, potential problems (i.e., vandalism, fence damage, presence of exotic plant species, herbivory, erosion, etc.), and recommended actions will be documented in a Field Memo that will be provided to Riverbend. Copies of all Field Memos will be included in each year's annual report.

Photo Documentation: Annual photographs of revegetation areas will be taken from preset photostations during quantitative data collection events. Additional photographs will be taken of any potential problem areas. All photographs will be logged and included in each annual report.

5.2.2 Data Collection

Vegetative cover and species composition will be assessed using the sampling methods described below. Sampling will generally be conducted at the end of the growing season. Following each Vegetative cover and species composition will be assessed using the sampling methods described below. Sampling will generally be conducted at the end of the growing season. Following each annual data collection event, the Revegetation Specialist will compile data and prepare an analysis of the results.

Test plots for each vegetation strata will be used to estimate cover, density, and species richness within the habitat types occurring within the mine site. This sample size was selected to likely provide an 80% confidence and precision level. Plot size will be 5 feet rectangles for grass/forb

layers and 100 feet rectangles for shrub layers. The sampling points will be selected by randomly choosing a line transect and then placing sample plots at equally spaced distances along that transect. If not all sample plots can be placed within the line transect within the habitat type, additional random line transects will be selected.

5.3 Annual Reports

Annual monitoring reports will be prepared that include a summary of the revegetation effort, site conditions, any problems encountered, evaluation of data collected and success achieved, and recommendations for meeting the performance criteria. Reports will be submitted to the following:

Fresno County Public Works and Planning Department
2220 Tulare Street, Street Level
Fresno, CA 93721

6.0 CORRECTIVE MEASURES AND CONTINGENCIES

6.1 Corrective Measures

Corrective measures may need to be implemented during the five-year monitoring period in order to assure that performance criteria are ultimately achieved, and revegetation is successful. If corrective measures are deemed necessary, a plan will be developed by the Revegetation Specialist describing the proposed measures to be implemented. If corrective measures are implemented, the monitoring period will be extended for the areas requiring corrective measures such that at least two years of monitoring follow initiation of the corrective measure. Corrective measures will be fully documented in the annual report.

6.2 Contingency Plan

Contingency measures will be initiated if performance criteria are repeatedly not met, even after initiation of corrective measures, and additional corrective measures are determined by the Revegetation Specialist to be infeasible or impracticable. A contingency plan will be prepared that describes the nature and probable cause of the failure, and identifies specific contingency measures to be implemented. The contingency plan will be submitted to the Fresno County Public Works and Planning Department for approval prior to initiation.

Planning, implementation, and monitoring of contingency procedures, and provision of adequate funding, will be the responsibility of Riverbend. Contingency measures will be subject to the same performance criteria and monitoring requirements as the initial revegetation.

Fire, flood, and similar catastrophic events are beyond the control of Riverbend. Accordingly, it is appropriate that some limitation be placed on the requirement to implement contingency measures if failure is due to such catastrophic events. If a catastrophic event should occur during the monitoring period, Riverbend will evaluate the extent of habitat damage and coordinate with the Fresno County Public Works and Planning Department to determine a mutually acceptable resolution.

Any irreparable damage or destruction of revegetation areas caused by catastrophic events, including the acreage affected, and any changes in application of performance criteria, will be documented in the annual report.

RE: Conditional Use Permit Application
Riverbend Sand and Gravel Project
Riverbend Sand and Gravel, LLC
14684 E Goodfellow Avenue, Sanger

Dear Mr. Motta:

As you are aware Riverbend Sand and Gravel, LLC (Riverbend) previously submitted an application to initiate the EIR process for its proposed project to mine construction grade aggregate (sand and gravel) from property located north and south of the Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno.

Riverbend is submitting the following to initiate the Conditional Use Permit application process:

- Completed, signed CUP application
- Copy of Pre-Application Review
- Grant deeds with legal descriptions
- Mining and Reclamation Plan document that includes the following:
  - Project Description/Operational Statement
  - Site Plan – 10 (11x17) copies
  - Mine Plan – 10 (11x17) copies
  - Reclamation Plan – 10 (11x17) copies
  - Elevations
- Check for $9,868 - CUP & Public Health Fee minus credit for Pre-App fee pd
- Check for $25 - Archaeological Info Center fee

If you have any questions or need any additional information please contact me by email at jcbuada@buada.com or by cell phone at 559-269-1376

Sincerely,

John C. Buada

SURFACE MINING AND RECLAMATION PLAN
RIVERBEND SAND AND GRAVEL PROJECT

1.0 PROJECT INFORMATION

1.1 Purpose and Scope

This application is submitted in accordance with the Regulations for Surface Mining and Reclamation in All Districts, Section 858 of the Fresno County Zoning Ordinance (FCZO), the Surface Mining and Reclamation Act (SMARA), and associated SMARA regulations adopted by the State Mining and Geology Board (SMGB) (CCR Sections 3500-3800).

Riverbend Sand and Gravel, LLC (Riverbend) is applying for a Conditional Use Permit (CUP) to mine construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. The proposed Project Site, located approximately 1.5 miles southeast of the City of Sanger, includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E and includes approximately 619 acres of an approximately 833 acre site located immediately east and north of the Kings River (Exhibits A and B). The remaining 214 acres of the property, including all the existing riparian habitat along the Kings River, are excluded from the project. The project site is relatively flat and is currently in orchards and vineyards. The Hanke Ditch is piped and runs through the eastern portion of the project site north of Goodfellow Avenue and is an open ditch along the east side of the project site south of Goodfellow Avenue.

Mining is anticipated to occur to a depth of approximately 100 feet below natural ground surface. A "wet mining" method is proposed utilizing an electric dragline that does not require dewatering of the excavation. The mined aggregate would be processed at an on-site processing plant located north of Goodfellow Avenue with an anticipated annual process rate of 1.6 million tons and proposed annual sales of approximately 1.25 million tons. The processed material will be used by a Ready-Mix Concrete (RMC) plant (150,000 cubic yards/year) and a Hot Mix Asphalt (HMA) concrete plant (250,000 tons/year) located on-site or sold to outside customers. Access to the project site is proposed from Goodfellow Avenue approximately 1/2 mile west of Riverbend Avenue. The facility will also include periodic use of a portable plant to recycle concrete and asphalt debris (including imported) into Crushed Miscellaneous Base (CMB) (100,000 tons/year) and Recycled Asphalt Product (RAP) (25,000 tons/year). RAP will facilitate use of recycled asphalt in HMA mix designs. Operations are anticipated to ramp-up over a five year period with initial sales in 2015 to be 350,000 tons, sales in 2017 to be 700,000 tons and full operations in 2019 at sales of 1.25 million tons. Operations are expected be on-going for at least 75 years.

1.4 Size and Legal Description

The project site includes 619 acres as shown on Exhibit C including all or portions of the properties as identified in Section 1.3.

The legal description of the above properties is contained in Appendix B.

1.5 Vicinity Map

The project vicinity is shown on Exhibit B.

1.6 Map of the Subject Property Including Boundaries and Topographic Details of the Land

Exhibit C shows the boundaries and topographic details of the project site

1.7 Objectives of Project

The following are Riverbend's objectives for this project:

a. Provide a reliable and sustainable, local source of high quality aggregate to help meet the current and long-term demand (75 years) for construction materials in Fresno County.
b. Create additional, long-term supply of local aggregate reserves resulting in significantly shorter truck trip distances by reducing the need to haul aggregate from greater distances to meet Fresno area demands and thereby reducing fuel consumption, air pollution, traffic congestion, road maintenance and the cost of delivery.
c. Utilize aggregate reserves from property already designated by the state and county as MRZ-2 (Mineral Resource Zone containing mineral resources of regional significance, i.e. sand and gravel).
d. Utilize high quality aggregate resources that meet the California Department of Transportation's specifications for use in Portland Cement Concrete (PCC) and Asphaltic

Concrete (AC) which aggregate is important for quality infrastructure growth and maintenance because of its versatility, value, and relative scarcity.

e. Provide an additional local source of construction aggregate with enough annual sales capacity (1.25 million tons) to encourage a healthy competitive market.
f. Obtain aggregate resources with access to an efficient local road network and State Highway system.
g. Obtain aggregate resources unconfined by a restrictive conservation easement.
h. Create a project that would not require dewatering of groundwater.
i. Create an environmentally sound project that would balance the recovery of the aggregate resource with the protection of other resources including wildlife habitat, groundwater, surface water, and air quality.
j. Create a project that will return a significant amount of mined land back to farming.
k. Create local quality jobs, while also benefiting local downstream businesses and creating an enhanced tax revenue to the county.

1.8 Demand for Aggregate

Construction aggregate is essential to the needs of modern society, providing material for the construction and maintenance of infrastructure such as roadways, dams, canals, buildings and other parts of California's infrastructure. Construction aggregates are the very cornerstone of today's built environment and the core building component for schools, hospitals, houses, commercial and industrial buildings. Public works projects comprise 43% of aggregate consumption (John Parish, State Geologist, CalCIMA Conference, March 2007). Aggregate is a key component in most buildings including homes, schools, hospitals and shopping centers.

As part of the infrastructure State bonds approved in 2006, Caltrans is scheduled to deliver historic amounts of highway construction in the next few years. A tremendous amount of aggregate is required to supply the projects that support the State's transportation infrastructure and the need for new aggregate sources. As part of *Go California*, a mobility action plan designed to decrease congestion, improve travel times and increase safety, Will Kempton, Director of Caltrans, expressed concern about the availability and pricing of aggregate (Letter Regarding Aggregate Shortage in California, Will Kempton, Caltrans, February 27, 2006). Caltrans' statewide strategy is to work with communities in securing adequate industry capacity for California's needs. Based on information from DOC (DOC, 2006) possible cost increases could result because of shortages of aggregate that would impact local, regional and state fiscal budgets. Caltrans, therefore, encourages the development of new aggregate reserves.

1.9 Aggregate Cost

Transportation plays a major role in the cost of aggregate to the consumer. Aggregate is a low-unit-value, high-bulk-weight commodity, and it must be obtained from nearby sources to minimize both the dollar cost to the aggregate consumer and other environmental and economic costs associated with transportation. If nearby sources do not exist, then transportation costs will significantly increase the cost of the aggregate by the time it reaches the consumer. For straight hauls with minimal traffic, the price of aggregate increases about 15 cents per ton for every mile that it is hauled from the plant. Currently, transporting aggregate a distance of 30 miles will increase the FOB price by about $4.50 per ton. For example, to construct one mile of six-lane interstate highway requires about 113,505 tons of aggregate. Transporting this amount of aggregate 30 miles adds $510,000 to the base cost of the material. Transporting aggregate from distant sources also results in increased fuel consumption, air pollution, traffic congestion, and

road maintenance. Moreover, transportation cost is the principal constraint defining the market area for an aggregate mining operation.

Permitting and expansion of additional construction aggregate supply sources provides significant benefits and cost savings. (*Construction Aggregate Supply Limitations, Estimates of Economic Impact,* Caltrans, February 2006). Those benefits include:

- A reduction in emissions from trucks with the reduction in truck miles of travel for hauling aggregates;
- Shorter hauling distance reducing aggregate-truck miles of travel and the cost of the materials;
- Reduction of pavement deterioration from fewer truck miles traveled;
- Reduction in project delays due to lack of aggregate supply in the area, which leads to increased project costs; and
- Reduction in aggregate-related truck miles of travel would also reduce traffic congestion and potentially reduce traffic accidents on roads

1.10 Aggregate Quality and Use

The highest quality aggregate is that which meets the California Department of Transportation's specifications for use in Portland Cement Concrete (PCC). Forming 80 to 95% of the material volume in the mix, aggregate provides the bulk and strength to PCC and AC.

The material specifications for PCC and AC aggregate are more restrictive than specifications for other applications such as Class II base, subbase, and fill. These restrictive specifications for use as PCC or AC aggregate make such acceptable deposits the scarcest and most valuable aggregate resources. Aggregate produced from such deposits can be, and commonly is, used in applications other than concrete. PCC and AC-grade aggregate deposits are of major importance when planning for future availability of aggregate commodities because of their versatility, value, and relative scarcity. (CGS, 2006) The aggregate deposits in the Kings River MRZ-2 zone, where Riverbend is located, qualify for use both as PCC or AC aggregate making it one of the most important and most valuable aggregate sites in Fresno County.

Aggregate from a solid, hard rock deposit is typically more expensive than that from an alluvial deposit due to the additional costs associated with the ripping, drilling and blasting necessary to remove material from most quarries and the additional crushing required to produce the various sizes of aggregate. Manufacturing sand by crushing is more costly than mining and processing naturally occurring sand. (CGS, 2006) The aggregate on the Riverbend site is an alluvial sand and gravel deposit with naturally occurring sand that does not require the additional crushing to manufacture sand associated with hard rock quarries.

1.11 Environmental Costs of Aggregates

A local source of aggregates has both direct and indirect impacts on the environment. The indirect impacts include changes in the environmental costs of hauling aggregates and possible changes in the level of construction activity. The most likely effect of permitting a local aggregate site is to reduce the truck miles used for aggregate hauling, which is an environmental benefit, whereas the change in construction activity induced by expanding a site is likely to be extremely small. (*Working Paper No. 994: A Note on the Environmental Costs of Aggregates*, Peter Bereck, California Agricultural Experiment Station, Giannini Foundation of Agricultural Economics, January 2005)

Shorter haul distances result in lower costs and less environmental impacts due to lower fuel usage, less air pollution, less traffic congestion, less road wear, less tire and equipment wear and shorter delivery times.

The Riverbend project would serve the local area and is approximately 16 miles from central Fresno. Permitting additional local aggregate reserves would result in significantly shorter truck trip distances by reducing the need to continue to haul aggregate approximately 60 miles each way from Coalinga to meet the Fresno area's existing and future aggregate demand. There is a direct correlation between miles traveled and greenhouse gas emissions. Thus, comparing haul distances of 32 miles round-trip to 120 miles round-trip, truck trips from the project site result in 73% less greenhouse gas emissions attributed to on-road haul trucks as compared to hauling from Coalinga.

2.0 ENVIRONMENTAL DATA

2.1 Environmental Setting

2.1.1 Existing Land Use

The project site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. The Hanke Ditch is piped and runs through the eastern portion of the project site north of Goodfellow Avenue and is an open ditch along the east side of the project site south of Goodfellow Avenue. Riparian habitat is located along the Kings River outside the western and southern edges of the project site. Exhibit B includes an aerial photo of the project site and vicinity and Appendix C includes photos of the existing conditions.

There are several existing farmhouses and outbuildings on the project site (Exhibit C). These structures will be removed in accordance with appropriate regulations prior to mining each particular phase where the structures are located.

Surrounding land use includes an aggregate operation (Central Valley Ready-Mix) to the north and an aggregate operation to the east and southeast (Calaveras Materials Inc.). Large-lot, low-density rural residences, ranches, agriculture and farms are located to the east and to the west and south across the Kings River. Stone fruit orchards with several farm residences are located on the northwest corner of Goodfellow Avenue and Riverbend Avenue between the northern and southern parts of the project site. The City of Sanger is located approximately 1.5 miles northwest of the project site.

2.1.2 Mineral Resource Zone

In 1986, the State of California included the project site in the classification of the aggregate resources in Kings River area as MRZ-2 (Mineral Resource Zone containing mineral resources, i.e. sand and gravel) [*Mineral Land Classification: Aggregate Materials in the Fresno Production-Consumption Region, Special Report 158*, Judy Wiedenheft Cole and David Fuller, California Department of Conservation (DOC) and Division of Mines and Geology (DMG), 1986]. Fresno County incorporated the MRZ-2 classification into the Mineral Resources Unit of the Open Space/Conservation Element of the General Plan in 1987.

In 1988, the State also designated this site as having construction grade aggregate deposits that are of regional significance (*Designation of Regionally Significant Construction Aggregate Resources in the Fresno Production Consumption Region, SMARA Designation Report #8,* DOC and DMG, July 1988). SMARA requires that a lead agency's land-use decisions involving the designated area be made in accordance with its mineral resource management polices, and that the lead agency consider the importance of the mineral resource to the region as a whole and not just the lead agency's area of jurisdiction.

2.1.3 General Plan

The following Fresno County General Plan policies apply to the project:

a. Agricultural and Land Use Element

   Policy LU-A.4 "The County shall require that the recovery of mineral resources and the exploration and extraction of oil and natural gas in areas designated Agriculture comply with the Mineral Resources Unit of the Open Space and Conservation Element. (See Section OS-G)"

	CURRENT SITE PLAN
	RIVERBEND SAND AND GRAVEL

	Date	Revision
D		
C		
B		
A		Initial Release

The Kings River Regional Plan designates the land use for the project site as Agriculture. The recovery of mineral resources from lands designated Agriculture is permitted by the above policy. The project is also consistent with the Mineral Resources Unit of the Open Space and Conservation Element as discussed below.

b. River Influence Areas

Policy LU-C.1: The County shall regulate land use along the Kings River in accordance with policies of the Kings River Regional Plan.

The project is consistent with the Kings River Regional Plan as discussed below.

Policy LU-C.5: The County may allow the extraction of rock, sand and gravel resources along the Kings River consistent with the Kings River Regional Plan policies and Section OS-C, Mineral Resources, of the Open Space and Conservation Element. (See Policy OS-C.11.)

The project is consistent with the Kings River Regional Plan and Section OS-C, Mineral Resources, of the Open Space and Conservation Element as discussed below.

c. Kings River Regional Plan

The following policies apply to the project.

Policy 4.05: The recovery of mineral resources in all zone districts will occur under the appropriate location and operational standards specified in the Mineral Resources Unit of the Open Space and Conservation Element of the Fresno County General Plan. [Note: Replaced by Mineral Resources Section of the Open Space and Conservation Element in the 2000 General Plan].

The project is consistent with the Mineral Resources Section of the Open Space and Conservation Element as discussed below.

Policy 8.01: Sand and gravel operations should be encouraged in appropriate locations and should meet all Standards of Section 306-06 (Mineral Resources) of the General Plan. [Note: Replaced by Mineral Resources Section of the Open Space and Conservation Element in the 2000 General Plan].

See discussion under Policy OS-C.2 below.

d. Mineral Resources Section of the Open Space and Conservation Element

The introduction to Mineral Resources section states, "Aggregate and petroleum are the county's most significant extractive resources and play an important role in maintaining the county's overall economy.

The combined annual impact of the construction and aggregates industries in Fresno County in 2003 was $4.4 billion. (*Construction & Aggregates in Fresno County, An Economic Analysis of the Construction and Aggregates Industries in Fresno County*, Sharon Prager and Randy Evans, October 2003)

Policy OS-C.2: The County shall not permit land uses incompatible with mineral resource recovery within areas designated as Mineral Resource Zone 2 (MRZ-2). (See Figures 7-9, 7-10, and 7-11 in Fresno County General Plan Background Report.)

Policy OS-C.2 preserves MRZ-2 properties, which includes the project site, for mineral resource recovery.

Policy OS-C.3: The County shall require that the operation and reclamation of surface mines be consistent with the State Surface Mining and Reclamation Act (SMARA) and special zoning ordinance provisions.

This mining and reclamation plan has been prepared in accordance with SMARA and Section 858 of the FCZO.

Policy OS-C.5: The County shall require reclamation of all surface mines consistent with SMARA and the County's implementing ordinance.

This mining and reclamation plan has been prepared in accordance with SMARA and Section 858 of the FCZO.

2.1.4 Zoning

The project site is zoned "AL-20" Limited Agriculture, 20 acre minimum parcel size. Surface mining operations and related facilities and activities are permitted in AL-20 district subject to a CUP and the provisions of Section 858 of the FCZO.

2.1.5 Williamson Act

Approximately 88 acres of the project site (Phases 8A and 8B) are currently subject to a Williamson Act contract (AP-6322). At least 10 years prior to the scheduled mining of Phases 8A and 8B a Notice of Non-renewal will be filed with Fresno County. By the time Phases 8A and 8B are ready to be mined the Williamson Act contract will have expired.

2.1.6 Vegetation Types and Condition

The project site is currently in walnut and olive orchards and grape vineyards. All the riparian habitat which is located along the Kings River on the western and southern edges of the project site will be avoided. (*Biological Resources Evaluation, Riverbend Sand and Gravel Project, Fresno County, California*, Buada Associates and John Stebbins, Consulting Botanist, October 2012)

2.1.7 Soil Types and Condition

Native surface soils on the project site as noted below and as shown on Exhibit D are primarily Grangeville soils as shown on maps #63 and #73 of and as described in the *Soil Survey of Eastern Fresno Area, California*, USDA, Soil Conservation Service (October 1971).

Dello loamy sand (Dm): Capability unit III, Storie Index rating 58

Dello sand loam (Dn): Capability unit III, Storie Index rating 65

Grangeville fine sandy loam (Gf): Capability unit I, Storie Index rating 90

Grangeville fine sandy loam, saline-alkali (Gg): Capability unit II, Storie Index rating 72

Tujunga soils, channeled, 0 to 9% slopes (TzeB): Capability unit IV, Storie Index rating 36

2.1.8 Groundwater

a. Elevation

Groundwater levels in the expansion area range from 16 to 20 feet below the ground surface (bgs) (*Groundwater Conditions at the Riverbend Sand and Gravel Project, Fresno County, California,* Kenneth D. Schmidt & Associates, September 2012).

b. Quantity and Quality

The alluvial deposits at the project site are highly productive. Yields of many irrigation wells in the area range from 500 to 2,000 gallons per minute (gpm).

The main sources of recharge to groundwater in the vicinity are deep percolation from irrigation return flow, seepage from the Hanke Ditch, Kings River, and Cameron Slough, and groundwater inflow from the north. Seepage from the Kings River is indicated to be a significant source of groundwater recharge during high stages in the river. Conversely, no seepage to the groundwater is expected during low river stages. The main sources of groundwater discharge are pumping and groundwater outflow to the south, including to the Kings River during low river stages. The quality of the groundwater is suitable for irrigation use. (Schmidt, September 2012).

There are four domestic wells and four active irrigation wells on the project site (Exhibit C). In addition five 70-foot deep groundwater monitoring wells have been installed on the property. The Groundwater Study prepared for the project indicates that groundwater levels since December 2010 have ranged from 8 to 22 feet and the direction of groundwater flow is south-southwest. The base of the useable aquifer in the vicinity ranges from 500 to more than 800 feet.

The project site is within the Kings River Water District. Most of the irrigation water (95%) used at the project site is Kings River surface water diverted/pumped from the Hanke Ditch located along the east side of the project site. In the northern part of the project site water in the Hanke Ditch is conveyed via a buried pipeline. There is also a pump in the Kings River that irrigates approximately five acres of grapes next to the river. The on-site irrigation wells are used to supplement the Hanke Ditch surface water supply.

2.1.9 Surface Water

a. Surface Water

The Kings River, located along the western boundary of the project site is the predominant surface water feature in the area (Exhibit C). All of the project site is in the Kings River Water District. Most of the irrigation water (95%) used at the project site has come from the Hanke Ditch, which passes along the eastside of the project site. In the northern portion of the project site the Hanke Ditch has been piped. A pump is also used to divert water to the site from the Kings River for the park site and about 5 acres of grapes. The river pump can also be used to supplement the Hanke

Ditch supply. The District has delivered an average of 3.5 to 4.0 acre-feet per acre per year of water to the site. For the current irrigated land at the project site (619 acres), this would total about 2,170 to 2,480 acre-feet per year. Current consumptive water use to for irrigation is estimated to be 1,630 acre-feet per year. (Schmidt, September 2012)

b. Flooding

The project site is setback at least 100-feet from the Designated Floodway. The FEMA flood maps indicate that portions of the project site are within the mapped 100-year floodplain. However, review of the existing topography indicates that much of the currently mapped area is no longer within the 100-year floodplain.

2.1.10 Sensitive Species

The biological resources evaluation prepared for the project site (Buada, Stebbins, October 2012) determined that no native habitats exist on the project site and that the mining/reclamation project will avoid impacts to all of the native plant communities that occur outside of the project area. These communities are considered sensitive habitats because they support a high diversity of wildlife species. By avoiding all of the existing native habitats outside of the project boundary, the native wildlife in the area will continue to have habitat available for foraging, shelter, and breeding activities during all phases of mining.

Sensitive plant surveys and biological surveys were conducted by (Buada, Stebbins, October 2012). The following is an overview of the presence of sensitive species on the site.

The Mexican elderberry (*Sambucus mexicana*), which is the habitat of the Valley elderberry longhorn beetle (VELB) (*Desmocerus californicus dimorphus*) listed as federally threatened (FT) as discussed below is located adjacent the project site. In September 2003, the United State Fish & Wildlife Service (USFWS) recommended delisting of the VELB [*Valley Elderberry Longhorn Beetle (Desmocerus californicus dimorphus) 5-Year Review: Summary and Evaluation,* USFWS, September 26, 2006].

Valley Elderberry Longhorn Beetle: The VELB, a FT species, occurs only in the Central Valley of California and is associated with the Mexican elderberry. The project includes the avoidance of all elderberry shrubs. In addition, mining-related activities, including access and maintenance roads, will not occur any closer to existing elderberry plants than current farming activities.

Bald Eagle: The bald eagle (*Haliaeetus leucocephalus*), a winter migrant, is known to occur in the vicinity along the Kings River.

Sensitive Raptor Species: The riparian area along the Kings River supports raptor species including: red-tailed hawk (*Buteo jamaicensis*), red-shouldered hawk (*Buteo lineatus*), American kestrel (*Falco sparverius*), barn owl (*Tyto alba*) and great horned owl (*Bubo virginianus*) The mining/reclamation project area avoids all of the perching and nesting areas in the existing and avoided native habitat.

2.1.11 Cultural Resources

A cultural resources study was prepared for the project site and the surrounding property owned or controlled by Riverbend, but not included in the project (*Cultural Resources Studies for the Riverbend Sand and Gravel Project, Fresno County, California,* Applied Earthworks, Inc., June 2012). Prehistoric archaeological sites or features were encountered or recorded within the study area but not within the

project area. Since the project avoids these sites, including a 50-foot exclusion zone, no further action was recommended.

2.2 Geologic Description

2.2.1 General Geologic Setting

The project site is within the Great Valley geologic province, lying between the Coast Ranges province and the Sierra Nevada province. The Great Valley province is characterized by relatively flat-lying alluvial sediments formed by the coalescence of successive alluvial fans derived from the Sierra Nevada and Coast ranges. The Kings River deposits were derived from the Sierra Nevada.

Granitic rock types compose the majority of clast types within the Kings River fan with the majority of the remainder of the deposit composed of quartzite, fine-grained basaltic volcanics, and fine-grained metavolcanics. The Kings River is geomorphologically similar to the San Joaquin River, except that it has a broader floodplain and a thicker section of recent sand and gravel. Unlike the San Joaquin River deposits, a persistent underlying clay layer has not been reported in existing aggregate operations on the Kings River. No materials deleterious to the production of quality aggregate have been found in the Kings River deposits. (DOC and DMG, 1986)

2.2.2 Detailed Geologic Description

Relatively coarse-grained deposits of the ancestral Kings River are generally predominant in the subsurface above a depth of about 200 to 220 feet. These deposits are primarily sand, gravel, and cobbles, and have been termed the Quaternary Older Alluvium. Some interlayered clay and silt layers are also present, but these are generally thin and discontinuous. Clay is also intermixed with the coarse-grained deposits in some depth intervals. Because of the overall lack of thick continuous clay layers above a depth of about 220 feet, one aquifer is generally considered to be present in the vicinity.

Crystalline rock or bedrock is not known to have been encountered by wells in the vicinity. Based on information from Sanger, Reedley, and the Great Western School (south of Reedley Airport), where deeper test holes and supply wells have been drilled, the top of the bedrock in the vicinity of the project site is expected to be below a depth of 700 feet. (Schmidt, September 2012)

3.0 MINE PLAN

Alternative A

The mine plan (Exhibit E) is designed to preserve all existing riparian habitat along the Kings River and to protect the Designated Floodway. Mining will be conducted in 14 phases. The phasing schedule is shown on Table 1, Section 3.1.4. Farming operations will continue on all phases not actively being mined or reclaimed.

The phases will be excavated by an electric-powered dragline to a maximum depth of approximately 100 feet below natural ground surface. Blasting will not be conducted. Mined aggregate will be transported to the aggregate processing plant located north of Goodfellow Avenue by electric-powered field conveyors. For the phases that will be reclaimed to farmland, 40 foot wide undisturbed (not mined) levees will separate those phases from the phases to be reclaimed as riparian and open water wildlife habitat.

The plant site will be mined last. Material from plant site will be processed by a portable plant located on Phase 2B, which will have been filled with overburden and processing fines. The portable plant will utilize relocated components of the original processing plant or will be a separate portable processing plant.

Alternative B

As previously described Calaveras Materials Inc. (CMI) operates an aggregate mining and processing site adjacent to the project site, i.e. to the east and southeast of Riverbend proposed Phases 6A and 7, under Fresno County CUP 3052. In the future CMI may be interested in an agreement with Riverbend to mine Phases 6A, 6B and 7 and process the excavated material at the CMI plant. If such an agreement were reached the aggregate from Phases 6A, 6B and 7 would be excavated by an electric dragline and transported to the CMI plant by overland conveyor for processing in the same manner as if it was mined by Riverbend and conveyed to the Riverbend aggregate plant.

All the other phases would be mined by Riverbend in the manner described in Alternative A.

A Mine and Reclamation Plan Summary is shown in Table 1.

3.1 Site Plans

3.1.1 Existing and Proposed Roads, Including Ingress-Egress Roads and On-Site Roads

Existing farm roads are shown on Exhibit C. The proposed ingress-egress road and internal on-site roads are shown on Exhibit E. The access road to the plant site will be from Goodfellow Avenue approximately one-half mile west of Riverbend Avenue. The first 100 feet of the proposed, access road will be paved with asphalt and will be at least 24 feet wide in accordance with Standard H.6, Section 858 FCZO. In addition, the main access roads to the plant site, ready-mix concrete plant and asphalt plant will be paved with asphalt.

Access to the mining phases south of Goodfellow Avenue will be via a tunnel to be constructed under Goodfellow Avenue. The tunnel will be constructed prior to overburden removal on those phases.

GENERAL NOTES

1. AGGREGATE TO BE EXCAVATED BY ELECTRIC DRAGLINE AND TRANSPORTED TO PROCESSING PLANT BY LAND CONVEYOR
2. TECHNOLOGICAL IMPROVEMENTS AND CHANGES ENCOUNTERED IN MINING CONDITIONS MAY DICTATE CHANGES IN MINING METHODS
3. SLOPES WILL BE MINED AT 2:1 (H:V)
4. EXCAVATION DEPTHS ARE BASED ON THE ESTIMATED DEPTH OF THE AGGREGATE RESOURCE
5. NO EXCAVATION WITHIN:
   - 25 FT OF ANY PROPERTY LINE
   - 100 FT OF ANY PUBLIC RIGHT-OF-WAY
   - 100 FEET FROM THE TOP OF THE KINGS RIVER BANK, OR 50 FEET FROM THE DESIGNATED FLOODWAY OR THE DRIPLINE OF RIPARIAN VEGETATION OR MATURE OAK TREE, WHICHEVER IS GREATER.
6. NO STOCKPILES OF SOIL OR OVERBURDEN WILL BE PLACED CLOSER THAN 25 FT OF ANY PROPERTY LINE EXCEPT FOR THE VISUAL/SOUND BERMS
7. LOCATION OF TOPSOIL STOCKPILES IS TYPICAL. SINCE RECLAMATION WILL PROCEED CONCURRENT WITH MINING, TOPSOIL STOCKPILES WILL ROTATE WITH EACH AREA MINED.

Table 1
Mine and Reclamation Plan Summary

Item/Activity	Description[1]
Mining Acres	Approximately 619 acres
Mining Method	Topsoil and overburden removal by scrapers. Wet mining of aggregate by electric dragline. Explosives will not be used.
Mining Depth	Approximately 100 feet below natural ground surface level
Processing	Aggregate processing plant, hot-mix asphalt plant, ready-mix concrete plant, portable plant to recycle concrete and asphalt debris (including imported)
Estimate Aggregate Volume	90 million tons
Estimated Total Sales	70 million tons
Annual Processed Volume	1.6 million tons
Annual Sales Volume	1.25 million tons
Estimated Annual Sales Per Plant[2]	
Aggregate	765,000 Tons
Hot Mix Asphalt	250,000 Tons
Ready-Mix Conrete	150,000 Cubic Yards
Concrete and Asphalt Recycling	25,000 Tons
Depth to Groundwater	15-20 feet below natural ground surface level
Reclamation End uses	
Reclaimed Farmland[3]	Approximately 268 acres
Open Space, Riparian and Open Water Habitat[3]	Approximately 351 acres
Project Life	Approximately 75 years

1. All values are approximate
2. Typical mix of products. Actual sales mix will vary based on demand. The requested otal annual sales of aggregate products is 1.25 million tons

3. Actual final reclamation and areal extent of each end use will depend on the volume and availability of overburden and process fines suitable for use as fill occurring on site.

3.1.2 Processing and Storage Areas

Processing and storage areas, including locations of equipment, structures, and facilities are centrally located in accordance with standard H.23, Section 858 FCZO (Exhibits E and F).

3.1.3 Proposed Setbacks, Screening, Fencing, Gates, Parking, and Signs

a. Setbacks and Avoided Areas

The following setbacks and avoided areas are shown on Exhibit E.

Excavation: No excavation of material or overburden will take place within:

- 100 feet from the top of the Kings River bank (Standards H.16 and H.25c, Section 858 FCZO) or 50 feet from the Designated Floodway, or 50 feet from the dripline of riparian vegetation or mature oak tree (Standard H.25c, Section 858 FCZO), whichever is greater;
- 100 feet from the public right-of-way (Standard H.1, Section 858 FCZO); and
- 25 feet from other property lines (Standard H.1, Section 858 FCZO)

Stockpiles: No stockpiled soil or material will be placed closer than 25 feet from any property boundary (Standard H.2, Section 858 FCZO) except visual/sound berms. (See Section 3.1.3b)

Native Woodlands, Riparian and Wildlife Habitat: In accordance with standard H.25c, Section 858 FCZO, all existing riparian habitat along the river is excluded from the project and is to remain as open space (Exhibit E). Only areas which are in agriculture or farming related activities, including access and maintenance roads, are included within the project boundaries to be mined or disturbed by mining related activities. Mining-related activities, including access and maintenance roads, will not occur any closer than current farming activities to existing habitat along the river.

b. Berms and Vegetated Screens

Since all the existing riparian vegetation along the entire Kings River frontage will be retained views of the project site from the Kings River and from across the Kings River will be screened. Several design measures included in the project will screen potential views of the mining and processing operation. These include installation of 8 to 10-foot-high vegetated berms and orchard-like vegetated visual screens along what would otherwise be the most visible portions of the project site.

Screening of the site will be achieved by the construction of several berms and orchard-like vegetated screens as shown on Exhibit E. The berms include a 10 foot high, vegetated earthen berm adjacent to Riverbend Avenue, an 8-foot high vegetated earthen berm south of Goodfellow Avenue adjacent to Phases 6A and 6B; and a 10-foot high, vegetated earthen berm along the west side of the plant site. Overburden and topsoil will be used to construct the berms. The berm west of the plant site will be constructed prior to operating the plant during nighttime hours. The berms along Riverbend and Goodfellow will be constructed prior to removal of overburden the area of the phases within 900 feet of the nearest residence to be screened. (Standard H.25a, Section 858 FCZO).

The berms will be planted with evergreen trees that will grow at least 15' high in two (2) staggered rows with one row on top of the berm in accordance with standard H.5, Section 858 FCZO as shown on Exhibit E and simulated in *Visual Impact Assessment for the Riverbend Sand and Gravel Project*, RGP Planning and Development Services, August 2012. Irrigation will be provided. The open area along the Kings River where portions of the plant site would be visible from the Kings River was recently planted with redwood trees (Standard H.11, Section 858 FCZO).

The orchard-like screens along Goodfellow Avenue as shown on Exhibit E will be planted prior to overburden removal in the adjacent phases. The tree species will be evergreen trees (e.g. olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening..

Views of the project site from the Kings River range from non-existent to a narrow glimpse of the westernmost edge of the project site due to the presence of the existing mature oak woodland and riparian vegetation occurring along the banks of the river. Redwood trees have been recently planted along the the one narrow visible location west of the proposed plant site. View opportunities from the river are also limited by the fact that the elevation of the river is at least five to six feet below the grade of the project site. Consequently, there is no clear line-of-sight to the entire property from the river, and views of the project site are mostly limited to the orchards and vineyards that are located immediately adjacent to the bank of the river.

The proposed vegetated berm west of the plant site will screen views of the majority of the proposed plant site from along the river. However, the dragline will be visible at times from the Kings River

because it is too tall to be entirely screened from view. The visual character of the potentially visible portions of the dragline contrasts with the natural form, line and texture of the surrounding environment. Nonetheless, this impact will not cause a dominant and/or permanent change in the visual quality of the area. The dragline will be visible only during excavations in the phases nearest the river.

Approximately seven residences are located east of the project site across Riverbend Avenue. The proposed vegetated berm will screen views of the majority of the project site. However, due to the height of the dragline it will be visible at times because it is too tall to be entirely screened from view. This impact will not cause a dominant and/or permanent change in the visual quality of the area. The dragline will be visible only during excavations in the phases nearest the residence.

One residence across the river just southeast of the south portion of the project site is located within the potential viewshed because its property is elevated above the project site. However project activities will not be visible at this location because of the height and density of the oak woodland, riparian vegetation and non-native landscape trees already provide a natural visual screen between the residence and the project site.

The visual study prepared for the project indicates that with the above-described screening the visual impact is considered to be less than significant (RGP, August 2012).

c. Light and Glare

The issue of light and glare is typically associated with excessively bright nighttime lighting that crosses over property lines and illuminates off-site yards or bedroom windows. It is also associated with the condition that occurs when excessive nighttime lighting creates a "skyglow" effect.

For nighttime lighting high pressure sodium and/or cut-off fixtures (or equivalent IDA-approved fixtures) will be used instead of mercury-vapor fixtures for any required nighttime lighting of the dragline and the processing facilities. The lighting will also be designed to confine illumination to the project site, and/or to areas that do not include light-sensitive uses. By utilizing the proposed lighting the project is not anticipated to produce any potentially significant impacts from light and glare (RGP, August 2012).

d. Fencing, Gates

The perimeter of the property along Riverbend and Goodfellow Avenues is fenced with six (6) foot high, wire, ranch fencing in accordance with standard H.4, Section 858 FCZO. In accordance with Standard H.6, Section 858 FCZO, the entrance gate will at least twenty-four (24) feet wide (Exhibit F).

e. Parking

The proposed 53 acre plant site will have sufficient parking for employees, customers, service/delivery vehicles as well as company and outside operated trucks (Exhibit E).

f. Signs

A sign will be located at the entrance road along Goodfellow Avenue.

3.1.4 Phasing

Mining will be conducted in 14 sequential phases (Exhibit E). The timing of the phasing and scheduling shown in Table 2 are rough estimates only. Actual excavation may occur sooner or later depending on the actual volume of material available in each phase and market conditions over time.

Table 2
Estimated Mining and Reclamation Schedule[1]

Phase	Acres[2] (Approx)	Commence Excavation	Reclamation Type[3]	Complete Reclamation
1A	23	2015	Farmland	2028
1B	18	2019	Farmland	2032
2A	27	2022	Riparian & Open Water Habitat	2026
2B	27	2025	Farmland[4]	2043/2090
3A	67	2028	Farmland	2054
3B	68	2034	Farmland	2090
4A	38	2040	Riparian & Open Water Habitat	2050
4B	29	2045	Riparian & Open Water Habitat	2053
5	37	2050	Riparian & Open Water Habitat	2090
6A	34	2054	Farmland	2069
6B	31	2058	Farmland	2083
7	80	2062	Riparian & Open Water Habitat	2072
8A	44	2068	Riparian & Open Water Habitat	2077
8B	44	2075	Riparian & Open Water Habitat	2083
9	52	2081	Riparian & Open Water Habitat	2090
Total	**619**			

[1] Dates are estimates only. Actual excavation and reclamation dates will vary with permit approval date, market demand and actual depth and volume of marketable material.

[2] Gross acres, includes farm roads.

[3] Actual final reclamation of each phase will depend on the volume and availability of overburden and process fines occurring on site.

[4] To be used for portable plant during mining of plant site (Phase 9)

3.1.5 Cross Sections

Cross-sections (typical) defining planned slopes, extent of overburden, extent of sand and gravel deposits, and water table are shown on Exhibit E.

Cut and final slopes will be 2:1 (horizontal:vertical) (Standard H.3. Section 858 FCZO).

3.2 Routes Between the Property and the Nearest Arterial

The project has direct access to E Goodfellow Avenue as shown on Exhibit E. Goodfellow Avenue is classified as a collector with connections to arterials at Academy Avenue, McCall Avenue and Central Avenue (west of Temperance) and to State Route 180 via McCall Avenue and State Route 99 via Central Avenue.

3.3 Anticipated Quantity and Type of Minerals

Total production is estimated to be approximately 90 million tons with total sales estimated to be approximately 70 million tons, depending on the quality and marketability of the reserves.

3.4 Statement of Operations:

3.4.1 Commencement of Operations

Operations will begin upon approval of this Conditional Use Permit, Surface Mining and Reclamation Plan, the acceptance of Financial Assurances and all other necessary approvals.

3.4.2 Hours and Days of Operation

Aggregate operations are proposed to occur five days a week for approximately 250 days a year. Ready-mix concrete and asphalt plant operations are proposed to operate six days a week for approximately 275 days a year (partial days on Saturdays). Typical hours are shown on Table 3, Typical Hours and Days of Operation. However, mining and processing hours, including nighttime hours, will vary during different seasons of the year to comply with California's "Flex Your Hours" program by utilizing electricity during off-peak hours, to the extent feasible. Loading of material onto to trucks during nighttime hours is proposed to support major public road projects that are required to be completed during night hours or on weekends to avoid traffic conflicts. In addition asphaltic oil, cement and other supplies may be delivered during nighttime hours.

Table 3
TYPICAL HOURS AND DAYS OF OPERATION

Activity	Proposed Hours[1,2]
Excavation and Aggregate Processing	7:00 am - 7:00 pm, Weekdays
Loading and Aggregate Trucking[3]	6:00 am - 9:00 pm, Weekdays
Asphalt and Ready-Mixed Concrete Plants[4]	4:00 am-6:00pm, Weekdays, May-Oct 5:30 am-6:00pm, Weekdays, Nov-Apr 7:00 am-2:00pm, Saturdays

[1] Maintenance of mobile and plant equipment extend beyond these hours.
[2] During periods of public emergency and or major public road projects affecting the health and safety of the community, continuous 24 hours a day operations may be required.
[3] Major public road projects may be required to be completed during night hours or on weekends to avoid traffic conflicts. Such projects may require loading operations beyond the hours and days of operation shown.
[4] Asphaltic oil, cement and other supplies may be delivered during nighttime hours.

3.4.3 Estimated Production

The aggregate processing plant will have an anticipated annual process rate of 1.6 million tons and proposed annual sales of construction aggregate products (rock, sand and gravel) produced by the plant of approximately 1.25 million tons. The aggregate products will be produced to supply a Ready-Mix Concrete (RMC) plant (150,000 cubic yards/year) and a Hot Mix Asphalt (HMA) concrete plant (250,000 tons/year) located on-site or sold to outside customers. The facility will also include periodic use of a portable plant to recycle concrete and asphalt debris (including imported) into Crushed Miscellaneous Base (CMB) (100,000 tons/year) and Recycled Asphalt Product (RAP) (25,000 tons/year). RAP will facilitate use of recycled asphalt in HMA mix designs. Operations are anticipated to ramp-up over a five year period with initial sales in 2015 to be 350,000 tons, sales in 2017 to be 700,000 tons and full operations in 2019 at sales of 1.25 million tons.

3.4.4 Traffic

The estimated hourly vehicle trips (one-way trips) associated with the project at average and peak sales are shown on Table 4, Estimated Daily Project Trip Generation. The majority (95%) of truck traffic will travel west on Goodfellow Avenue which changes to Central Avenue at just east of Newmark Avenue. Other smaller amounts of traffic (4%) are estimated to travel east on Goodfellow towards Reedley and eastern Fresno County, north on Academy Avenue to the city of Sanger (2%) and south on Academy (5%) to the cities of Fowler, Selma and Kingsburg. Project traffic past Academy Avenue (88%) is estimated to split evenly at McCall Avenue with half going north on McCall Avenue to access SR 180 and the central and northern parts of Fresno and the city of Clovis and half continuing west to Freeway 99 to access the southern and western portions of the city of Fresno. A traffic study prepared for the project details projected traffic impacts (*Traffic Impact Analysis, Riverbend Sand and Gravel Project, Fresno County, California,* VRPA Technologies, Inc., July 2012).

3.4.5 Number of Employees

The number of employees fluctuates with seasonal demand. The average number of employees during peak season will be approximately 38.

3.4.6 Anticipated Duration of Operation

Operations are expected to continue approximately 75 years depending on varying market conditions.

3.4.7 Maximum Anticipated Depth of Mining

The aggregate deposit has no consistent bottom or top elevation and can change significantly in very short, lateral distances. The maximum anticipated depth is estimated to be 100 feet from natural ground surface.

3.4.8 Method of Extraction

A "wet mining" method is proposed utilizing an electric dragline that does not require dewatering of the excavation. Blasting will not be conducted.

a. Topsoil

There is an approximately two feet thick layer of topsoil. Topsoil will be removed as a separate layer from each phase primarily by using wheel tractor-scrapers that transport it, spread it at previously excavated phases for use as the final cover for reclamation or stored separately for later use in reclamation. If conditions become more difficult or access constraints prevent the use of scrapers, a hydraulic excavator, bulldozer, or front-end loader and haul trucks may be used to remove topsoil. Under typical conditions, topsoil removal will take place approximately one year ahead of mining therefore allowing agricultural use of the land to continue as long as possible (Standard H.25a, Section 858 FCZO). However, the operation may require topsoil for construction of the vegetated visual/sound berms.

Topsoil that cannot be used right away will be stockpiled separately from subsoil overburden. Stockpiled topsoil will be planted with a vegetation cover or will be protected by other equally effective means if necessary to prevent water and wind erosion.

Table 4
Estimated Daily Project Trip Generation[1]
Annual Aggregate Sales[2] of 1.25 Million Tons

Truck Trips	Average Daily Trips[3,4]	Maximum Daily Trips	AM PeakHour Trips[5]	PM Peak Hour Trips[5,6]
Aggregate Loads[7]	246	266	50	2
Asphalt[7]	80	212	40	2
Ready-Mix Concrete[8]	136	224	42	4
Product Truck Totals	462	702	132	8
Liquid Asphalt[9,10]	4	10	2	0
Cement[9,11]	10	22	4	0
Propane[12]	0.4	2	0	0
Import Concrete/Asphalt for Recycle[7]	40	40	0	0
Diesel Fuel[13]	0.1	0.1	0	0
Delivery Truck Totals	52	74	6	0
Total Truck Trips	**514**	**776**	**138**	**8**
Aggregate, Asphalt Employees Trips[14]	36	36	0	4
Ready-Mix Concrete Employee Trips[15]	40	40	0	2
Outside Services & Misc Visitors	14	14	0	0
Total Employees & Outside Services	**90**	**90**	**0**	**6**
Total Trips	**604**	**866**	**138**	**14**

Assumptions

1. Actual mix of products and trucks will vary with market-driven sales
2. Aggregate sales includes aggregate for on-site asphalt and ready-mix plants
3. Trip = one-way trip (i.e. 1 load = 2 trips)
4. 250 working days/yr for aggregate & asphalt, 275 working days/yr for ready-mix concrete
5. Peak hrly sales of each product determined by hrly loading capacity of each plant and mobile loading equipment (loaders) available. 1.25 loader to load aggregate and asphalt trucks. .75 loader to feed HMA and RMC plants.
6. PM peak trips are negligible. Almost all trips in the aggregate related industry occur before 3:00 pm.
7. Aggregate, asphalt, recycle 25 tons/load
8. 1.65 tons agg/cy, avg 8.0 cy/load, peak 9.5 cy/load
9. Liquid asphalt & cement 27 tons/load
10. 0.05 tons of liquid asphalt/ton of asphalt
11. 0.235 tons cement/cy
12. 4.1 lbs/gal propane, delivered by 12,165 gal (25 ton) tanker, = fuel for 4,679 tons of asphalt at avg 2.6 gals/ton of asphalt
13. Engineer's estimate, delivered by 8,000 gal tanker
14. 28 Employees (aggregate & asphalt 18, ready-mix concrete 10)
15. 38 Employees (aggregate & asphalt 18, ready-mix concrete 20)

b. Overburden

Overburden is the material directly beneath the topsoil and overlying the sand and gravel deposit. Overburden is approximately 15 to 22 feet thick. Overburden will be removed from the area to be

mined primarily by using wheel tractor-scrapers. The overburden will be used to construct the screening berms,

to fill the phases to be reclaimed as farmland, to shape the pond edges of the excavated phases to be reclaimed to ponds and riparian habitat as shown in the Reclamation Plan (Exhibit F) or will be stored separately for later use in reclamation. Overburden removal will occur on an estimated annual equivalent of one month per year utilizing conventional scrapers.

c. Aggregate

An electric dragline will be used to mine aggregate to depths of approximately 100 feet deep. A dragline is an electric-powered excavating machine with a long, straight boom from which an open-mouthed bucket is suspended by a cable (Appendix C). The boom is used to cast the bucket away from itself and then down beneath the water to the bottom of the excavation. The bucket is pulled back toward the machine with another cable, loading the bucket with aggregate. The bucket is then hoisted up and the excavated material is stockpiled in windrows to drain. After the stockpiled material has drained, a diesel-powered loader will transport the material to an electric-powered scalping screen which will separate oversized rock to be screened and crushed by a field crusher before the material is transported by overland conveyor to the plant.

3.4.9 Use of Explosives

Explosives will not be used.

3.4.10 Method of Transport

Mined aggregate will initially be transported to the processing plant by off-road trucks for approximately one year. Other than the first year of operation material will be transported by overland conveyors to the plant for further processing. Thereafter haul trucks will only be used for aggregate material transport during occasional repairs of overland conveyors.

3.4.11 Method of Processing

a. Scalping Screen and Field Crusher

As described above, after the stockpiled material has drained a diesel-powered loader will transport the excavated material to an electric-powered scalping screen which will separate oversized rock to be crushed by a field crusher before the material is transported by overland conveyor to the plant.

b. Aggregate Processing Plant

The processing plant will typically be divided into a primary plant, secondary plant and wash plant. The plant will be operated from a control tower.

Primary Plant: The primary plant will screen and separate sand from larger materials. Sand will be classified into different construction grade materials and stockpiled. Water will be introduced to wash fines from the excavated material. The fines will be sent to a wash plant. The remaining larger sized materials will be crushed and the combination of crushed rock and sand will be conveyed to the secondary plant for further processing. Customer trucks will be loaded with finished products by front-end loaders.

Secondary Plant: The secondary plant will utilize additional screening and washing equipment and crushers to create different construction grade materials. Finished products will be stockpiled and used by the on-site ready-mix-concrete and asphalt plants or sold directly to outside customers. Customer trucks will be loaded with finished products by front-end loaders.

Wash Plant: Fines from the excavated material and fines recovered from crushing will be sent to the wash plant where a fines recovery system will separate the fines from the water eliminating the need for settling ponds. The fines will be screened and the marketable products will be stockpiled. The non-marketable fines will be stockpiled for later use as fill in the reclamation of certain phases of the project back to farmland. Recovered water will be recycled back to the aggregate plant as process water.

b. Asphalt Batch Plant

Sand and crushed rock from the aggregate processing plant will be screened, dried and heated in a natural gas or propane-fired dryer/burner and mixed with liquid asphaltic cement to produce asphalt. Liquid asphaltic cement will be imported by truck and stored in above-ground tanks. The emissions from the dryer/burner will be ducted to a baghouse. The hot mixed asphalt concrete may be discharged directly into trucks from the mixer or conveyed to storage silos for discharge into trucks at a later time. Operation of the plant will be controlled from a control room.

At the end of each production day excess asphalt remaining in the plant will be stockpiled. This material will periodically be recycled for blending with fresh asphalt concrete. A Recycled Asphalt Pavement System or RAP system may be added to the asphalt plant. RAP would be blended with new asphaltic concrete.

c. Ready-Mix Concrete Plant

Sand and gravel from the aggregate plant and cement (imported by truck and stored in silos) will be weighed and deposited directly into the mixer truck drum. Baghouses will control dust emissions. Water will be added to the truck and the concrete will be mixed during transportation to the job site. Return concrete (concrete which is unused at the jobsite and returned to the site in the ready-mix trucks) will be stockpiled for later recycling into miscellaneous road base. Operation of the plant will be controlled from a control room.

The concrete plant will include a system to recycle water that is used to rinse out ready-mix concrete trucks. At least once a day, the mixer on each truck will be washed out and the wash water will be deposited into a series of concrete-lined holding basins. After solids are settled out, water will be recycled to the concrete plant for reuse in concrete. Residual sediment in the holding basins will be mixed with base rock for use in road base.

d. Portable Concrete and Asphalt Recycle Plant

A portable recycle plant (operating under a portable air permit) will be periodically brought in to recycle excess asphalt produced at the asphalt plant and stockpiled return concrete. The recycle plant will also recycle concrete and asphalt pavement imported to the site from construction demolition or road rebuilding sites. Asphalt or concrete to be recycled will be fed through a crusher(s), screens and conveyors and stockpiled. The recycled concrete will be sold as miscellaneous road base. The crushing of asphalt debris and stockpiled, unsold HMA will be recycled as RAP and later blended with fresh asphalt concrete. Recycling old concrete and asphalt reduces the volume of fill in local landfills and helps extend the available aggregate reserves in Fresno County.

e. Portable Aggregate Plant

The plant site will be mined last. Material from plant site will be processed by a portable plant located on Phase 2B, which will have been filled with overburden and processing fines. The portable plant will utilize relocated components of the original processing plant or will be a separate portable processing plant.

3.4.12 Equipment

a. Excavation Equipment

Excavation equipment includes the following:

Dragline: A dragline is an electric-powered excavating machine with a long straight boom from which an open-mouthed bucket is suspended by a cable. The boom is used to cast the bucket away from itself and then down beneath the water to the bottom of the excavation. Mining depths for a dragline vary. The bucket is pulled back towards the machine with another cable, loading the bucket with aggregate. The bucket is then hoisted up and the material is stockpiled for transport to the plant.

Front-End Loader: A Front-End Loader is a rubber-tired, diesel-powered machine with a bucket attached to the front. A loader will be used to transport and load aggregate from the windrows into trucks or onto the screen and field crusher.

Screen and Field Crusher: As described above, an electric screen and field crusher will be required to screen and crush oversized rock before the excavated material is transferred by a loader to the land conveyor.

b. Aggregate Plant

Equipment and supporting facilities for the aggregate plant will include, but will not be limited to: front-end loaders, water trucks, conveyors, screens, screening towers, crushers, washers, sand cyclones, sand screws, sand/aggregate truck loadout bins, pollution control equipment, dewatering equipment and tanks, recycle water pumps, computer control tower, a maintenance shop, parts storage building, quality control lab, fuel tanks and other accessory equipment and buildings.

c. Asphalt Plant

Equipment and supporting facilities for the HMA plant will include, but will not be limited to: front-end loaders, aggregate storage bunkers, conveyors, elevators, burner/dryer, storage silos, dust silo, pollution control equipment, storage tanks, control tower, shop and other accessory equipment.

d. Ready-Mix Concrete Plant

Equipment and supporting facilities for the RMC plant will include, but will not be limited to: front-end loaders, ground aggregate storage bins, conveyors, batch plant, cement silos, pollution control equipment, storage buildings, batch office, water reclaimer and other accessory equipment.

e. Portable Concrete and Asphalt Recycle Plant

Equipment for the diesel and electric powered, portable recycle plant will include, but will not be limited to: front-end loaders, crushers, screens and conveyors.

f. Portable Aggregate Plant

Equipment for the electric-powered, portable aggregate plant will include, but will not be limited to: front-loaders, crushers, screens, sand screws and conveyors.

g. Topsoil and Overburden Removal Equipment

Removal of topsoil and overburden will be accomplished primarily with scrapers with the use of water trucks to minimize dust.

h. Haul Trucks

Mined aggregate will initially be transported to the processing plant by off-road trucks for approximately one year. Haul trucks will subsequently only be used for aggregate material transport during occasional repairs of overland conveyors.

i. Conveyors

Other than the first year of operation material will be transported by overland conveyors to the plant for further processing.

j. Import and Export Trucking

Aggregate and asphalt products will be hauled off-site by outside trucking firms. The ready-mix concrete operation includes ready-mix trucks which will be stored on-site. Other outside concrete or trucking companies may purchase ready-mix concrete and transport it in their own trucks. Independent trucking firms will import cement, asphaltic cement, fuel and construction materials. Concrete and asphalt pavement from construction demolition or road rebuilding sites will be imported to the site for recycling by outside trucking firms (see Section 3.4.11e)

k. Other Materials and Supplies

Diesel fuel for use by mobile equipment will be imported and stored in a double-walled tank or in containment. Gasoline for use by the plant pickup trucks will be imported and stored in a double-walled tank or in containment. Products needed to service the mobile equipment such as gear and lube oil, transmission fluid and various other products will be imported and stored at or near the maintenance shop.

3.4.13 Operating Practices to Minimize Noise, Vibration, Dust and Odor

a. Noise

The major on-site noise sources would be the aggregate processing; HMA, RMC, and recycle plants; excavation activities; and mobile equipment. The project includes the following Noise Control Measures:

- The HMA plant will be equipped with an exhaust stack silencer.
- The main aggregate plant will be equipped with urethane screens on the elevated screen decks and heavy urethane or rubberized liners on the hoppers and chutes.
- All mobile equipment will be equipped with noise suppressor mufflers in compliance with all applicable local, state, and federal laws and regulations.

- Smart backup alarms will be utilized and adjusted to ambient noise levels. Strobe lights will replace audible back-up alarms during non-daylight working hours subject to Mine, Safety and Health Administration (MSHA) approval.
- A 10'-foot high berm will be constructed along the west side of the plant site.

The Noise Study prepared for the project (*Environmental Noise Assessment, Riverbend Sand and Gravel Project, Fresno County, California*, Bollard Acoustical Consultants, August 2012) indicates that with the above proposed noise control measures included in the project design, noise generated by the plant-area sources (aggregate processing, asphalt, concrete, and recycle plants) are predicted to satisfy the daytime and nighttime median (L50) noise standards of Fresno County at the nearest residences.

Noise exposure from overburden removal and excavation when operating near residences on Riverbend Avenue could exceed the noise standards of Fresno County. As recommended by the Noise Study, Riverbend has incorporated the following mitigation measures into the project design, including the vegetated noise berms shown on Exhibit E, which will reduce this impact to less than significant:

1. Overburden removal and excavation activities shall be limited to daytime hours unless it can be demonstrated through on-site noise measurements that such activities could occur during nighttime hours without exceeding the project standards of significance at nearby residences.

2. Prior to mining within 900 feet of residences along Riverbend Avenue, a 10-foot high berm will be constructed near the western edge of the proposed 100-foot excavation setback.

3. Prior to mining within 900 feet of the residence north of Phases 6A and 6B across Goodfellow Avenue, an 8-foot tall berm should be constructed near the southern edge of the proposed 100-foot excavation setback along the south side of Goodfellow from Riverbend Avenue to 2000 feet west of Riverbend Avenue.

4. Following construction of the recommended berms along Riverbend and Goodfellow Avenues, to the maximum extent possible, excavation activities within 500 feet of an existing residence located adjacent to those roadways shall start on the portion of the pit furthest from the nearest residences, progressing below grade in the direction of those residences. In this way, mining activities may be visually and acoustically shielded as the mining equipment moves towards the potentially impacted
residences.

b. Vibration

The project is not expected to produce any significant vibration at acoustically sensitive receivers in the project vicinity. This is due to the type of equipment which will be used at the site, the planned extraction methods (no blasting), and the relatively large distances between the project operations and potential receivers.

c. Dust

The existing farm operations generate dust and emissions from the following: ground disturbance, e.g. plowing and disking, etc.; operation of farm equipment, e.g. tractors, farm and produce haul trucks, pickers. etc.; application of herbicides, fertilizers and insecticides; and harvesting.

The proposed aggregate, concrete and asphalt plants will operate in accordance with Permits to Operate from the San Joaquin Valley Air Pollution Control District (SJVAPCD).

The aggregate plant will process excavated material containing over 10% natural moisture from having been excavated below the groundwater level. The aggregate plant will also be a wet process facility where all the materials will be washed. In addition water sprays will be utilized at transfer points as necessary. The above combination of wet excavated material, wet processing and water emission control will minimize dust emissions.

The asphalt plant will be equipped with baghouses, dust collectors, an exhaust filter system and a blue smoke filter system to capture gases created during truck loading. The above combination of emissions control will minimize air emissions.

The concrete plant will be equipped with baghouses, dust collectors and will utilize water sprays at transfer points as necessary. The above combination of emissions control will minimize air emissions.

The entire operation will comply with SJVAPCD's Regulation VIII regarding fugitive dust including, but not limited to, the following measures:

1. Prior to removal of topsoil and overburden, the area will be irrigated or sprayed by water trucks if removal occurs during the dry season.

2. Excavated material will contain approximately 10% natural moisture from having been excavated below the groundwater level.

3. Water will be applied to the material during the washing and processing operation at appropriate transfer points to minimize dust.

4. Conveyors will be equipped with water spray nozzles at appropriate transfer points to minimize dust.

5. Water trucks will be utilized as necessary to meet the SJVAPCD fugitive dust requirements to wet down plant and haul roads.

6. Dust pallatives, such as lignon sulfonate or magnesium chloride will be applied to the main haul roads as necessary.

7. Water trucks will be utilized as necessary to meet the SJVAPCD fugitive dust requirements to wash off dust accumulated on the asphalt roads.

8. The first 100 feet of the existing entrance road will be paved with asphalt and will be at least 24 feet wide. In addition, the main access roads to the plant site, ready-mix concrete plant and asphalt plant will be paved with asphalt.

9. A wheel washer will be installed after the scales to prevent trackout to the public highway.

d. Odor

Diesel exhaust from mobile equipment/vehicles and air emissions from the asphalt plant associated with the Proposed Project will contain quantities of odorous substances. The asphalt plant will incorporate modern technology designed to minimize odorous emissions including an exhaust filter

system and a blue smoke filter system to capture gases created during truck loading. Given the rural nature of the project site location it is not anticipated that any objectionable odors affecting a substantial number of people could result from the project. Based on experience with similar facilities in Fresno County, it is not likely that any odors originating from the batch plant would cause a nuisance or rise to the level of a potentially significant odor source.

e. Light and Glare

The issue of light and glare is typically associated with excessively bright nighttime lighting that crosses over property lines and illuminates off-site yards or bedroom windows. It is also associated with the condition that occurs when excessive nighttime lighting creates a "skyglow" effect.

As previously described, operations will occur primarily during daylight hours. Operations during the time of year when daylight hours are shorter, or for any nighttime operations will require lighting to provide a safe operating environment. For nighttime lighting high pressure sodium and/or cut-off fixtures (or equivalent IDA-approved fixtures) will be used instead of mercury-vapor fixtures for any required nighttime lighting of the dragline and the processing facilities. The lighting will also be designed to confine illumination to the project site, and/or to areas that do not include light-sensitive uses. By utilizing the proposed lighting the project is not anticipated to produce any potentially significant impacts from light and glare (RGP, August 2012).

3.4.14 Quantity and Quality of Water Required

Dewatering will not be utilized for the proposed mining operations. Process water used for the operation will include water to wash the mined aggregate (90 % of which will be recycled), water used for dust control, water used in the ready-mix concrete plant and water for domestic use (Appendix E). Process water will pumped from groundwater at a rate of approximately 160,000 gallons per day. The total annual net (consumptive) water use for processing is estimated to be approximately 178 acre-feet (AF/yr).

3.4.15 Flooding

As previously indicated the FEMA flood maps indicate that portions of the project site are within the mapped 100-year floodplain. However, review of the existing topography indicates that much of the currently mapped area is no longer within the 100-year floodplain.

The phases to be reclaimed to farmland will be filled back to the original grade resulting in no change to the floodplain. The phases reclaimed back to ponds will actually increase the flood-holding capacity in those phases because the water surface in the ponds will be 15-20' below the original grade of the land.

3.4.16 Liquid or Solid Waste to be Produced

Fines recovered from the aggregate processing will be used as fill to reclaim portions of the site back to farmland. Domestic sewage will be handled by conventional septic systems and serviced as necessary by commercial septic services. Solid waste, e.g. parts packaging, paper, etc., will be deposited in dumpsters for pickup and disposal by a licensed solid waste disposal company.

3.4.17 Methods Employed to Prevent Pollution of Surface and/or Groundwater

a. Pollution Control Programs: Pollution control programs will include: Storm Water Pollution Prevention Plan, Hazardous Materials Business Plan, a Spill Prevention Control and Countermeasure

Plan, Employee Training, Record Keeping, Preventative Maintenance and Best Management Practices.

b. Equipment and Vehicle Parking/Storage Areas: These areas will be graded to prevent storm water run-off to surface water or into the groundwater.

c. Vehicle Maintenance and Repair: Mobile vehicles will be maintained and repaired in a covered shop or on paved surfaces. Such areas will be designed to collect pollutants. All pollutants will then be disposed of in accordance with local, state, and federal regulations. Inspection and maintenance programs will be established to ensure that vehicles are operating properly and leaks are prevented to the extent feasible.

d. Excavation Equipment: Excavation equipment will be maintained and repaired at the excavation phases. All pollutants will be managed in accordance with local, State and Federal regulations to prevent pollutants from entering surface or groundwater.

e. Vehicle and Equipment Fueling: Vehicles will be fueled on concrete pads next to the fueling areas. The fueling areas will be designed to handle storm water in accordance with local, state, and federal regulations. Fuel will be stored in double-wall concrete tanks or in containment in accordance with EPA regulations.

f. Vehicle and Equipment Washing and Steam Cleaning: Vehicle washing will take place in specific paved areas adjacent to the shop that will drain to holding ponds, a concrete lined sump or holding tank to prevent storm water run-off to surface or groundwater. Steam cleaning will take place on concrete or hard surface pads or in the enclosed shop, which will be designed to collect pollutants. Such pollutants will then disposed of in accordance with local, state and federal regulations.

g. Waste Handling and Disposal: Wastes from the facility will be stored in designated containers adjacent to the shop in the containment area and/or within the shop and disposed of in accordance with local, state, and federal regulations.

h. Outdoor Loading and Unloading of Materials: All loading and unloading of materials will take place in designated areas that will be graded and designed to prevent storm water run-off from entering the river.

i. Outdoor Container Storage of Liquids: All containers containing potentially hazardous materials will be stored in containment areas engineered in accordance with the Spill Prevention Control and Counter-Measure Plan.

j. Outdoor Process Equipment Operations and Maintenance: An inspection and maintenance program will be established to ensure that equipment is operating properly and leaks are prevented to the extent feasible.

k. Outdoor Storage of Raw Materials, Products and By Products: The processing site will be graded to prevent drainage and storm water runoff from raw materials, products and by-products from entering the river.

l. Containment of Erodible Areas: All erodible surfaces within the plant areas will be graded to prevent storm water run-off to the river.

m. Sediment: The site will be graded to prevent sediment from the stockpiles or the excavation areas from entering the Kings River.

n. Agricultural Surface Water Runoff: Temporary berms will be placed between the created ponds and farmland to prevent agricultural surface water runoff from entering the lakes.

o. Site Drainage: The above measures will contain and prevent pollution of groundwater and surface water by all hazardous or pollutant materials. Since the stockpiles on the plant site contain only native materials excavated from the site, the remainder of the plant site and roadways will be graded to direct drainage to the excavated phases to prevent storm water from leaving the site.

3.4.18 Disposal Methods for Tailing and Other Mining Waste

Fines recovered from the aggregate processing will be used as fill to reclaim portions of the site back to farmland.

3.4.19 Compliance With Mining and Reclamation Standards

Please refer to Section 4.1.8.

4.0 RECLAMATION PLAN

4.1 Planned Reclamation

4.1.1 Proposed End Use

The reclamation plan (Exhibit F) is designed to return as much land as possible back to farmland. Approximately 268 acres, or 43% of the project site, are to be reclaimed as farmland in this manner. For the remaining phases, where there is not sufficient overburden and processing fines to fill approximately 351 acres, or 57 % of the project site, will be reclaimed to riparian and open water wildlife habitat.

4.1.2 Notification of All Owners of a Possessory Interest in the Land of the Proposed Use.

Copies of the reclamation plan have been provided to the underlying property owner. Letter of Agreement from the property owner is contained in Appendix B.

4.1.3 Manner in Which Reclamation, Adequate for the Proposed Use, Will Be Accomplished

The reclamation plan (Exhibit F) is designed to return as much land as possible back to farmland. Overburden together with processing fines will be used to fill selected phases. The filled phases will be topped with several feet of topsoil and reclaimed back to farmland to approximate original grade. Approximately 268 acres are anticipated to be reclaimed as farmland in this manner as shown in Table 5.

For the remaining phases where there is not sufficient overburden and processing fines to fill the phases a series of deep-water ponds will be created. Cut slopes above the water line will be covered with several feet of topsoil, seeded with erosion control grasses and planted with native riparian vegetation pursuant to the Revegetation Guidelines prepared for the project (*Revegetation Guidelines, Riverbend Sand and Gravel Project, Fresno County, California*, Buada Associates-John Stebbins, October 2012). Reclamation of these phases will create approximately 351 acres of riparian (33 acres) and open water (318 acres) wildlife habitat.

Table 5
Reclaimed End Uses

Use	Approximate Acres
Farmland	268
Riparian Habitat	33
Open Water Habitat	318
Total	619

a. Control of Contaminants and Disposal of Mining Waste

Please refer to Sections 3.4.15, 3.4.16 and 3.4.17.

b. Rehabilitation of Affected Streambed Channels and Streambanks

No streambed channels and streambanks will be disturbed by the project..

	RIVERBEND SAND AND GRAVEL

	Date	Revision
D		
C		
B		
A		Initial Release

4.1.4 Schedule for the Completion of Surface Mining

Mining and reclamation is estimated to be completed in 75 years from initiation of the project. The reclamation schedule is shown on Table 2, Section 3.1.4 and Exhibit F.

4.1.5 Phasing Plan for Reclamation Activities and Schedule for Completion

Reclamation phasing is depicted in Exhibit F and consists of 14 phases. The phasing schedule is shown on Table 2, Section 3.1.4. For each of the phases to be reclaimed as farmland, farming will resume within two years after the phase has been filled in the manner described in Section 4.1.3. For each of the phases to be reclaimed as open water and riparian habitat the phases will be reclaimed within two years of the completion of mining in that phase in the manner described in Section 4.1.3. Reclamation in this manner assures concurrency of reclamation with mining.

4.1.6 Effect On Future On-Site Mining and Mining in the Surrounding Area

Implementation of the proposed reclamation will have no effect on the ability to mine other areas designated as containing "Regionally Significant Construction Aggregate Resources" pursuant to SMARA Section 2790 (see Section 2.1.2d).

4.1.7 Measures to Protect Public Health and Safety

The perimeter of the property will be fenced with minimum four (4) foot high, ranch fencing consisting of metal T-posts and at least three (3) strands of barbed wire in accordance with Section 858 H.4 of the FCZO.

4.1.8 Compliance with Fresno County Surface Mining and Reclamation Standards (Section 858-H)

a. No extraction of material or overburden shall be permitted within twenty-five (25) feet of any property boundary or within fifty (50) feet of a boundary contiguous with a public road right-of-way or recorded residential subdivision. (Standard H.1)

   Please refer to Section 3.1.3a.

b. No stockpiled soil or material shall be placed closer than twenty-five (25) feet from a property boundary. (Standard H.2)

   Please refer to Section 3.1.3a.

c. No production from an open pit shall create a slope steeper than 2:1 within fifty (50) feet of a property boundary nor steeper than 1½:1 elsewhere on the property, except steeper slopes may be created in the conduct of extraction for limited periods of time prior to grading the slope to its reclamation configuration, and slopes of 1:1 may be maintained five (5) feet below the lowest water table on the property, experienced in the preceding three (3) years. (Standard H.3)

   Please refer to Section 3.1.5.

d. Security fencing four (4) feet in height consisting of not less than three (3) strands of barbed wire, or an approved equivalent, shall be placed along any property line abutting a public right-of-way and around any extraction area where slopes steeper than two (2) feet horizontal to one (1) foot vertical

are maintained. Such interior fencing will not be required where exterior fencing surrounds the property. (Standard H.4)

Please refer to Section 3.1.3d

e. Screening of the site shall be achieved by planting trees of a variety approved by the Director along all property lines adjacent to a public road right-of-way or a recorded residential subdivision. Adequate screening can generally be achieved with evergreen trees planted in two (2) staggered rows, with twenty (20) feet between the rows and between the trees in each row. As an alternative, oleanders or shrubs of a similar size and density may be planted in the same pattern at ten (10) foot intervals. The plant species and planting plan and timetable shall be designated in the Mining and Reclamation Plan. All required plants shall be maintained in a good horticultural manner. In areas where it is found that the planting of trees or shrubs will not achieve the desired screening effect due to soil conditions, the Director may approve an alternate method of screening consisting of meandering dirt berms of sufficient height to screen the site. (Standard H.5)

Please refer to Section 3.1.3b.

f. The first one hundred (100) feet of access road(s) intersecting with a County maintained road shall be surfaced in a manner approved by the Board and shall not exceed a two (2) percent grade and shall have a width of not less than twenty-four (24) feet. (Standard H.6)

Please refer to Section 3.1.1.

g. Where an access road intersects a County Maintained road, it shall be improved with a driveway approach constructed to Fresno County Standards. (Standard H.7)

Please refer to Section 3.1.1.

h. All interior roads within the site shall be maintained so as to control the creation of dust. (Standard H.8)

Please refer to Sections 3.4.13c.

i. Traffic control and warning signs shall be installed as required by the Commission at the intersection of all private roads with public roads. The placement, size, and wording of these signs shall be approved by the Director. (Standard H.9)

A stop sign will be installed at the intersection of the site entrance road to E Goodfellow Avenue.

j. When the plan calls for resoiling, coarse hard mine waste shall be leveled and covered with a layer of finer material or weathered waste. A soil layer shall then be placed on this prepared surface. Surface mine operators who do not salvage soil during the initial operations shall attempt, where feasible, to upgrade remaining materials. The use of soil conditioners, mulches, or imported topsoil shall be considered where revegetation is part of the Mining and Reclamation Plan and where such measures appear necessary. It is not justified; however, to denude adjacent areas of their soil, for any such denuded areas must in turn be reclaimed. (Standard H.10)

Please refer to Section 3.4.8a.

k. The species selected for revegetation shall be those with good survival characteristics for the topography, resoiling characteristics, and climate of the mined area. The operator shall provide a schedule and methodology for monitoring vegetation and replacing vegetation should the Department determine that replacement is necessary. (Standard H.11)

Please refer to Section 4.1.9c.

l. Additional vegetative planting may be required in the interest of erosion control. (Standard H.12)

Please refer to Section 4.1.9c.

m. Grading and revegetation shall be designed to minimize erosion and to convey surface runoff to natural drainage courses or interior basins designed for water storage. Basins that will store water during periods of surface runoff shall be designed to prevent erosion of spillways when these basins have outlet to lower ground. (Standard H.13)

Please refer to Section 3.4.17.

n. *Stockpiles of overburden and minerals shall be managed to minimize water and wind erosion.* (Standard H.14)

Please refer to Section 3.4.13c.

o. Erosion control facilities such as settling basins, ditches, stream bank stabilization, and dikes shall be constructed and maintained where necessary to control erosion. (Standard H.15)

Please refer to Section 3.4.17.

p. Extraction operations adjacent to any flowing stream shall be separated from the stream by closed dikes. No extractions within the stream will be permitted. (Standard H.16)

Please refer to Section 3.4.17.

q. All water utilized in the plant operation shall be disposed of behind a closed dike so that it will not cause impairment of water in any stream. (Standard H.17)

Please refer to Section 3.4.17.

r. Operations shall be conducted to substantially prevent siltation of groundwater recharge areas. (Standard H.18)

Please refer to Section 3.1.7.

s. Settling ponds or basins shall be constructed to prevent potential sedimentation of streams at operations where they will provide a significant benefit to water quality. (Standard H.19)

No settling ponds are proposed. Please refer to Section 3.4.11b.

t. Good operating practices shall at all times be utilized to minimize noise, vibration, dust and unsightliness. In reviewing a proposal the Planning Commission shall consider: (Standard H.20)

Please refer to operating practices to reduce noise in Section 3.4.13a.
Please refer to operating practices to reduce vibration in Section 3.4.13b.
Please refer to operating practices to reduce dust in Section 3.4.13c.
Please refer to operation practices to reduce unsightliness in Section 3.1.3b. In addition, the dragline, and all visible plant facilities will be painted with an earth-tone color to blend with the surrounding landscape and vegetation.

1. The location of the processing plant. (Standard H.20a)

   Please refer to Section 3.1.2 and Exhibit E.

2. The location where unused equipment will be stored. (Standard H.20b)

   Please refer to Section 3.1.2 and Exhibit E.

3. Proposals for the removal of all structures, metallic equipment, debris, or objects upon conclusion of the extraction operations. (Standard H.20c)

   The permanent plant, including equipment, foundations, associated utilities and stockpiles will be removed during the mining of phase 9. Septic systems will be removed in accordance with Fresno County standards. Buildings and associated utilities that may be adaptable to end uses may be left. Interior roads are to be left for access purposes.

u. Operating hours may be limited to designated periods except during periods of public emergency affecting the health and welfare of the community requiring continuous operation. (Standard H.21)

   Please refer to Section 3.4.2 and Table 2.

v. Any night lighting established on the property shall be arranged and controlled so as not to illuminate public rights-of-way or adjacent properties. (Standard H.22)

   Please refer to Section 3.4.13e.

w. Processing and storage yards shall be centrally located on the site whenever possible. (Standard H.23)

   Please refer to Section 3.1.2 and Exhibit E.

x. All surface mining operations and reclamation activities shall be conducted consistent with all policies of the Noise Element of the Fresno County General Plan. (Standard H.24)

   Please refer to Section 3.4.13a.

y. The Department shall consider the potentially adverse environmental effects of surface mining operations and will generally require that: (Standard H.25)

   1. Disturbances of vegetation and overburden in advance of mining activities be minimized. (Standard H.25a)

      Please refer to Section 3.4.8a & b.

2. Sufficient topsoil be saved to perform site reclamation in accordance with the Mining and Reclamation Plan. (Standard H.25b)

   Please refer to Section 3.4.8a.

3. All reasonable and practical measures be taken to protect the habitat of fish and wildlife. (Standard H.25c)

   Please refer to Sections 3.1.3a and 4.1.8f.1.

4. Temporary stream or watershed diversion be restored. (Standard H.25d)

   No temporary stream or watershed diversion is proposed.

5. Permanent piles or dumps of mine waste rock and overburden be stabilized and not restrict the natural drainage without suitable provisions for diversion and toxic materials be removed or confined to control leaching. (Standard H.25e)

   No permanent piles of waste rock or overburden are anticipated.

z. Reclamation of mined lands shall be implemented in conformance with applicable performance standards as set forth in the state regulations Sections 3703 et seq. (Standard H.26)

   Please refer to Section 4.1.9.

4.1.9 Conformance with Applicable State Standards

a. Wildlife Habitat (Standard H.26a, SMARA Section 3703)

   A databases and literature review of the California Natural Diversity Data Base (CNDDB) and California Native Plant Society Electronic Inventory (CNPSEI) was conducted for the project site. Sensitive plant surveys and biological surveys were conducted (Buada, Stebbins September 2012).

   All existing riparian habitat along the river is not included in the project and is to remain as open space (Exhibit E). Only areas which are in agriculture or farming related activities, including access and maintenance roads, are included within the project boundaries to be mined or disturbed by mining related activities. Mining-related activities, including access and maintenance roads, will not occur any closer than current farming activities to existing habitat along the river. By avoiding all of the existing native habitat, all of which is outside of the project boundary, the wildlife in the area will continue to have habitat available for foraging, shelter, and breeding activities during all phases of mining.

   Please refer to Section 3.1.3a

   The following is an overview of the presence of sensitive species on the site.

   The Mexican elderberry (*Sambucus mexicana*), which is the habitat of the Valley elderberry longhorn beetle (VELB) (*Desmocerus californicus dimorphus*) listed as federally threatened (FT), is located on the project site as discussed below. In September 2003, the United State Fish & Wildlife Service (USFWS) recommended delisting of the VELB [*Valley Elderberry Longhorn Beetle (Desmocerus californicus dimorphus) 5-Year Review: Summary and Evaluation,* USFWS, September 26, 2006].

Valley Elderberry Longhorn Beetle: The VELB, a FT, occurs only in the Central Valley of California and is associated with the Mexican elderberry. Elderberry shrubs were observed outside the project boundaries during visual surveys conducted on the project site and the adjacent riparian areas next to the Kings River. The elderberry shrubs adjacent to the project site appeared to be unaffected by and have reproduced next to the ongoing agricultural activities for many decades. The project includes the avoidance of all elderberry shrubs. Mining-related activities, including access and maintenance roads, will not occur any closer to existing elderberry plants than current farming activities. These plants are not expected to be directly affected by the mining/reclamation project and are expected to survive in their existing locations throughout the duration of the mining/reclamation project.

Bald Eagle: The bald eagle (*Haliaeetus leucocephalus*), a winter migrant is known to forage along the Kings River near this vicinity. Therefore, wintering individuals are assumed to be present on the site. The project is expected to have a negligible effect on wintering bald eagles because of the increased amount of open water habitat created by the proposed project. The new ponds and adjacent riparian woodlands may be beneficial to wintering populations of bald eagle by providing additional foraging habitat and perching locations.

Western Pond Turtle: Western pond turtles were not observed in the few ponds near the river adjacent to the project site. The planned creation of approximately 351 acres of open water and riparian habitat would provide potential pond turtle habitat.

Sensitive Raptor Species: The riparian area along the Kings River supports raptor species including: red-tailed hawk (*Buteo jamaicensis*), red-shouldered hawk (*Buteo lineatus*), American kestrel (*Falco sparverius*), barn owl (*Tyto alba*) and great horned owl (*Bubo virginianus*, However, the mining/reclamation project area avoids all of the perching and nesting areas in the existing and avoided native habitat. The planned creation of approximately 351 acres of open water and riparian habitat is expected to benefit a number of sensitive raptor species by providing additional nesting and foraging habitat.

Mining operations are not expected to impact any native habitats. Indirect impacts such as noise, lighting, and human presence are not expected to affect sensitive wildlife species because all of these impacts are similar to the site conditions at other existing mining operations on the Kings River and the san Joaquin River where wildlife species have acclimated well to such mining activities and where wildlife species have been observed in great numbers for many years.

A net gain in the number of acres of native habitats within the property boundary will occur as a result of the mining/reclamation project. At the completion of the entire project, approximately 351 acres of created open water and native habitats will be able to support a higher diversity, density, and abundance of wildlife and plant species. The proposed mining/reclamation project will result in a net benefit to the region in that it will provide a significant habitat area for wildlife and plants.

b. Backfilling, Regrading, Slope Stability, and Recontouring (Standard H.26b, SMARA Section 3704)

Please refer to Sections 3.1.5 and 4.1.3.

c. Revegetation (Standard H.26c, SMARA Section 3705)

The revegetation program will apply to the riparian areas surrounding the reclaimed open water ponds. The following is a summary of the Revegetation Guidelines prepared for the project (Buada and Stebbins, October 2012, Appendix F).

1. Goals and Objectives

   The goal of the revegetation program is to supplement natural native plant recolonization by creating natural self-sustaining plant communities or habitats using plant materials that are genetically and ecologically appropriate to the site. Objectives include: providing conditions that allow natural processes such as soil development, nutrient cycling, plant succession, natural regeneration and recovery from disturbance to occur; and within the open water areas, creating habitat for riparian associated species.

2. Construction Sequence

   Following completion of mining operations the following typical sequence of revegetation activities will be undertaken:

   - Recontouring of planting areas, if necessary
   - control of invasive weeds
   - placement of topsoil
   - installation of temporary irrigation systems, if necessary
   - installation of erosion control devices, if necessary
   - planting and seeding
   - maintenance and monitoring
   - reporting

3. Plant Materials, Seed Collection and Plant Propagation

   To ensure genetically adapted plant materials for use in the revegetation effort, collection sites should have characteristics similar to the revegetation site. Guidelines for seed collection and plant propagation and plant lists for the riparian habitat to be established are described in the Revegetation Guidelines, Appendix F.

4. Planting Methods

   Generally all planting will occur between November 15 and January 15, or later depending on weather conditions, unless supplemental irrigation is provided. It is important to plant during this period when many of the plants are dormant and temperature and rainfall provide optimal conditions for germination and/or establishment.

5. Performance Standards

   Performance standards ensure that the revegetation effort meets the goal of creating viable, self--sustaining habitats. These standards include: (1) container/cutting survivability, (2) cover (3) species richness or diversity (4) species density. Other attributes that evidence functioning habitats include native plant species' recruitment and wildlife usage. These standards are referenced in the Revegetation Guidelines, Appendix F.

6. Maintenance and Monitoring

   Maintenance activities begin at plant installation and continue until performance standards are met. These activities include weed control, irrigation, replacement of dead trees or cuttings, etc.

Monitoring will be initiated at installation and will be conducted until performance standards are met.

Monitoring will generally occur over a 5-year period or until performance standards are met which ever occurs first.

Such monitoring will provide information for adaptive management of the system. Over time, as restored habitats mature, and more is learned about how the habitats respond to initial management actions, adjustments can be made to incorporate those activities that work best into the management plans. New information from ongoing research on special species could also lead to changes in management action.

Reports will be prepared and include such information as monitoring methods, general observations of vegetation development, maintenance activities, recommendations, photo documentation, and comparisons of the current years' findings with those of previous years.

7. Recordkeeping

Revegetation (implementation) activities, maintenance work and the results of horticultural and any biological monitoring undertaken throughout each planting season will be summarized in reports to document compliance with the reclamation plan.

d. Drainage, Diversion Structures, Waterways, and Erosion Control (Standard H.26d, SMARA Section 3706)

Please refer to Section 3.4.17.

e. Prime and Other Agricultural Land Reclamation (Standard H.26e, SMARA Sections 3707 and 3708)

Please refer to Sections 3.4.8a, 4.1.3 and Exhibit F.

f. Building, Structure, and Equipment Removal (Standard H.26f, SMARA Section 3709)

Please refer to Section 4.1.8t.3

g. Stream Protection Including Surface and Groundwater (Standard H.26g, SMARA Section 3710)

Please refer to Sections 3.4.17 and 4.3.1b.

h. Topsoil Salvage, Maintenance, and Redistribution (Standard H.26h, SMARA Section 3711)

Please refer to Section 3.4.8a, 4.1.3 and Exhibit F.

i. Tailing and Mine Waste Management (Standard H.26i, SMARA Section 3712)

Please refer to Sections 3.4.11a and 4.1.3.

j. Closure of Surface Openings (Standard H.26j, SMARA Section 3713)

Wells to be removed by mining will be abandoned in accordance with all applicable local and state provisions. After monitoring is completed all monitoring wells will be abandoned in accordance with all applicable local and state provisions.

4.2 Reclamation Site Plan

4.2.1 New Contouring

Please refer to Exhibit F.

4.2.2 Water Features and Methods Planned to Overcome Stagnation

Groundwater will flow into the ponds from the northeast since the groundwater gradient flow is from northeast to southwest. The phases to be filled and reclaimed as farmland and the phase to be reclaimed as open water and riparian habitat have been designed to leave a window about one-quarter mile wide perpendicular to the direction of groundwater flow where no fill will take place. Groundwater will be able to move downward and laterally beneath the fill, laterally around both sides of the fill (to the northwest and southeast), and through the window. (Schmidt, September 2012)

The depth of the ponds may be as deep as 100 feet. During the summer and winter the water in fresh water ponds becomes stratified into different temperature layers, which don't mix. Twice a year, in the fall and spring, the waters at all layers of these ponds mix in overturns that equalize the temperatures at all depths. (*Living in the Environment*, G. Tyler-Miller, 1998). The seasonal vertical movement of water and the lateral groundwater movement preclude the occurrence of stagnation.

Please refer to Exhibit F.

4.2.3 Vegetative Planting

Please refer to Section 4.1.9c and Exhibit F.

4.2.4 Access and Treatment

Please refer to Sections 3.1.1 and Exhibit F.

4.2.5 Phasing

Please refer to Table 2, Section 3.1.4 and Exhibits E and F.

4.3 A Soil Salvage Plan and if Proposed For Refill, Definition of Refill Material, and Probable Sources.

Please refer to Sections 3.4.8, 3.4.18, 4.1.3 and Exhibit F.

4.4 Site Closure

The site will be considered closed upon the following:

a. Completion of the reclamation activities and reaching associated performance standards as identified herein:

Please refer to Section 4.1.5.

b. Removal of plant, equipment, conveyors, foundations and associated utilities;

Please refer to Sections 4.1.5 and 4.1.8t.3.

c. Removal of stockpiles;

Please refer to Section 4.1.8t.3.

d. Removal of buildings, foundations and associated utilities except those required for post mining use of the site; and

Please refer to Section 4.1.8t.3.

e. Securing of access points to prevent unauthorized access.

Please refer to Section 4.1.7.

4.5 Statement of Responsibility

Prior to the excavation of any material from the project site, a recordable agreement will be executed, binding upon successors, heirs or assigns, covenanting to perform all reclamation in the manner prescribed by the approved CUP and Mining and Reclamation Plan.

4.6 Financial Assurances

Reclamation of the project site will be covered by financial assurances in accordance with the requirements of SMARA. The financial assurance estimate and the proposed financial assurance mechanism will be submitted to the County no later than 60 days prior to commencement of activities authorized in connection with this project.

RE: Agreement to Obtain Permits

The real property described on Exhibit "A" attached (the property) is owned by Running Luck Ranch, LLC (owners).

The owners have granted Riverbend Sand and Gravel, LLC the exclusive right to operate a sand and gravel mining operation, and related activities, on the property, including sand and gravel processing facilities, ready-mix concrete facilities, asphalt batching facilities, and concrete and asphalt recycling facilities, and to obtain a permit and other entitlements collectively ("Permits") required to conduct such operations.

APPENDIX B

Legal Description

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF FRESNO, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS: -

Parcel No.1: APN 350-041-12

That portion of Government Lots 1 and 4 in the Northeast quarter of Section 1, Township 15 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, which lies North and East of the Main channel of Kings River.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.2: a portion of APN 332-071-52

That portion of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, described as follows:

Beginning at the Southeast comer of said Section 36, Thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance of 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.3: a portion of APN 332-071-52

That portion of the Southeast quarter of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, lying East of Kings River.

Excepting therefrom that portion of said premises and described as follows:

Beginning at the Southeast corner of said Section 36, thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

LEGAL DESCRIPTION

PARCEL 1:

A portion of the fractional Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described as follows,

Beginning at a point on the West Line of said Southwest quarter which is 30 feet South from the West quarter corner; thence South 88° 52.6' East along the South line of the road right of way, 2668.2 feet to the East line of said Southwest quarter, at a point distance 30 feet South of the center quarter corner of said Section 31, thence South 1° 21.6' West along the East line of said Southwest quarter a distance of 1335.5 feet; thence North 88° 52.6' West, a distance of 2651.7 feet to the west line of said Section 31, thence North O° 39' East, a distance of 1335.5 feet to the point of beginning.

Said land is designated Parcel "A" on a map of resurvey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and other property, recorded December 16, 1941, in Book 15 Page 73 of Record of Surveys, records of said County.

APN 333-061-04

PARCEL 2:

That portion of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official plat thereof, described as follows:

Commencing at a point on the West line of the Southwest quarter of said Section 31, 1365.5 feet Southerly from the Northwest corner of said Southwest quarter of Section 31; thence South 88° 52.6' East and parallel with the East and West centerline of said Section 31, 2651.7 feet to the North and South centerline of said Section 31; thence South 1° 21.6' West 1337.8 feet to a point on the East line of Lot 2 of section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, said point being 82.6 feet Southerly from the quarter section corner common to said sections 31 and 6; thence North 89° 7' West 2635.2 feet to the West line of Lot 1 of said section 6 at a point 82.6 feet Southerly from the Northwest corner of said Section 6; thence North 82° 39' East along the West line of said Lot 1 and of said Section 31, 1348.8 feet to the point of beginning.

Being Parcel "B" as same is designated and delineated upon that certain Map of Re-Survey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, and of Lot 1 of Section 6 and part of the East half of the Northwest quarter of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, recorded at the request of Ross C. Phillips, L. S., on December 16, 1941, in Book 15, Page 73 of Record of surveys, Fresno County Records.

APR 333-061-05 & 360-020-20

LEGAL DESCRIPTION

Real property in the unincorporated area of the County of FRESNO, State of California, described as follows:

PARCEL 1: APN 332-071-53

ALL THAT PORTION OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, AND THE SOUTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT, LYING EAST OF THE KINGS RIVER, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHEAST CORNER OF THE NORTHEAST QUARTER OF THE NORTHEAST QUARTER OF SAID SECTION 36, AND RUNNING THENCE WEST 1320.1 FEET; THENCE AT RIGHT ANGLES SOUTH 1323.2 FEET TO A POINT IN THE CENTER OF A COUNTY ROAD; THENCE AT RIGHT ANGLES WEST 990 FEET; THENCE AT RIGHT ANGLES NORTH 990.75 FEET TO A POINT IN THE CENTER OF KINGS RIVER; THENCE NORTH 45° EAST 466.4 FEET; THENCE ALONG THE CENTER OF KINGS RIVER NORTH 26°30' EAST 1479 FEET TO THE NORTH LINE OF SAID SECTION 36; THENCE CONTINUING ALONG THE LAST MENTIONED COURSES 678 FEET; THENCE RUNNING NORTH 719 FEET TO A POINT 300 FEET EAST OF THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25 IN SAID TOWNSHIP AND RANGE; THENCE RUNNING NORTH 40° EAST 700 FEET; THENCE NORTH 65-1/2° EAST 636 FEET TO THE EAST LINE OF THE SOUTHEAST QUARTER OF SAID SECTION 25 AND RUNNING THENCE SOUTH ALONG SAID LAST MENTIONED LINE 3448.50 FEET TO THE PLACE OF BEGINNING.

ALSO ALL OF THE SOUTHEAST QUARTER OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT.

EXCEPTING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 2: APN 333-160-02S

THAT PORTION OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING ALL OIL, GAS, HYDROCARBONS AND OTHER MINERALS THEREIN AND THEREUNDER AS RESERVED IN THE DEED FROM CELLA VINEYARDS, A CALIFORNIA CORPORATION, RECORDED FEBRUARY 11, 1947, IN BOOK 3884, PAGE 448 OF OFFICIAL

RECORDS.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3: APN 332-042-56

THAT PORTION OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE NORTH LINE THEREOF WHICH IS SOUTH 89°18' EAST A DISTANCE OF 2510.04 FEET FROM THE NORTHWEST CORNER THEREOF; THENCE SOUTH 4°23'21" WEST A DISTANCE OF 1254.5S FEET TO A POINT 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE SOUTH 89°25' EAST A DISTANCE OF 262.64 FEET, PARALLEL WITH AND 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25 TO A POINT ON THE EAST LINE OF SAID SECTION; THENCE NORTH ALONG THE EAST LINE OF SAID SECTION TO THE NORTHEAST CORNER OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION 25; THENCE NORTH 89°18' WEST ALONG THE NORTH LINE OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION TO THE POINT OF BEGINNING.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3A:

AN EASEMENT FOR ROAD PURPOSES OVER THE NORTHERLY 6 FEET OF THE SOUTHERLY 55 FEET OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, FURTHER DESCRIBED AS: COMMENCING AT A POINT WHICH IS 49.00 FEET NORTH 00°31' WEST, OF THE CENTER OF SAID SECTION 25; THENCE NORTH 00°31 WEST, 6.00 FEET; THENCE SOUTH 89°25' EAST, PARALLEL WITH THE EAST AND WEST CENTER LINE OF SAID SECTION, A DISTANCE OF 2400.80 FEET TO A POINT; THENCE NORTH 4°23" EAST, 14.00 FEET TO A POINT; THENCE SOUTH 89°25' EAST, 10.00 FEET TO A POINT; THENCE SOUTH 00°6'19" EAST, 20.00 FEET TO A POINT WHICH IS 49.00 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE NORTH 89°25' WEST, 2410.80 FEET TO THE NORTH OF COMMENCEMENT.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 4: APN 333-160-01S

THAT PORTION OF THE SOUTHWEST QUARTER OF SECTION 19 AND THE WEST HALF OF SECTION 30, ALL IN TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, IN THE UNINCORPORATED AREA, COUNTY OF FRESNO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT THEREOF, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN; THENCE EAST 160 RODS; THENCE NORTH 400

RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE SOUTH TO THE CENTER OF KINGS RIVER; THENCE SOUTHERLY IN THE CENTER OF SAID RIVER TO THE EAST LINE OF THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25; THENCE SOUTH ON SAID SECTION LINE TO THE SOUTHEAST CORNER OF SAID SECTION 25 TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION THEREOF DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 30; THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET, A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING THEREFROM AN UNDIVIDED 50% OF ALL OIL, GAS AND MINERALS, EXCLUDING SAND, AS RESERVED BY CELLA VINEYARDS, FORMERLY KNOWN AS B & L CELLA BROS., BY DEED RECORDED JANUARY 31, 1974, IN BOOK 6261 PAGE 134 OF OFFICIAL RECORDS, DOCUMENT NO. 8303.

ALSO EXCLUDING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

APPENDICIES

A	Reclamation Plan

1.0 INTRODUCTION

Riverbend Sand and Gravel, LLC (Riverbend) is applying for a Conditional Use Permit (CUP) to mine construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. The proposed Project Site, located approximately 1.5 miles southeast of the City of Sanger, includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E and includes approximately 619 acres of an approximately 833 acre site located immediately east and north of the Kings River (Exhibit A). The remaining 214 acres of the property, including all the existing riparian habitat along the Kings River, are excluded from the project. The project site is relatively flat and is currently in orchards and vineyards (Exhibit B).

Mining is anticipated to occur to a depth of approximately 100 feet below natural ground surface. The reclamation plan (Appendix A) is designed to return as much land as possible back to farmland. Overburden together with processing fines will be used to fill selected phases. The filled phases will be topped with several feet of topsoil and reclaimed back to farmland to approximate original grade. Approximately 268 acres are anticipated to be reclaimed as farmland in this manner.

For the remaining phases where there is insufficient overburden and processing fines to fill the phases a series of deep-water ponds will be created. Cut slopes above the water line will be covered with several feet of topsoil, seeded with erosion control grasses and planted with native riparian vegetation. Reclamation of these phases will create approximately 351 acres of riparian (33 acres) and open water (318 acres) wildlife habitat. This Revegetation Plan addresses the riparian habitat to be created.

These Revegetation Guidelines has been prepared in accordance with the Surface Mining and Reclamation Act (SMARA) of 1975, Article 9, Reclamation Standards, Section 3705, Performance Standards for Revegetation; and with the Regulations for Surface Mining and Reclamation in All Districts, Section 858 of the Fresno County Zoning Ordinance (FCZO). The Guidelines include a baseline vegetation analysis, revegetation plan, maintenance requirements, and performance standards for determining success.

2.0 BASELINE VEGETATION ANALYSIS

Baseline vegetation analysis is required by SMARA regulations in order to document the vegetative density, cover, and species richness of naturally occurring habitats in the surrounding area and to provide a basis for evaluation of revegetation success. Where proposed end uses differ from premining uses, data may be obtained from reference areas in lieu of baseline site data.

2.1 Premining Conditions

As previously discussed the entire project site is relatively flat and is currently in orchards and vineyards. No natural habitats exist on the project site

2.1.1 Vegetation Communities/Habitats

The historic habitats of the Kings River drainage have been extremely modified in the past. The free flow of the Kings River was eliminated in the early 1950's. Past and present agricultural operations and related development have eliminated all but a relatively narrow band of the riparian habitat adjacent to the river. The only remaining major natural vegetation type present near the proposed project area is Great Valley Mixed Riparian Forest (Holland, #61430) located immediately adjacent to the Kings River and outside of the western and southern edges of the proposed project area.

Native trees and shrubs found in this riparian habitat include; valley oak, (*Quercus lobata*), cottonwood, (*Populus fremontii*), buttonwillow, (*Cephalanthus occidentalis*), Oregon ash, (*Fraxinus latifolia*), elderberry, (*Sambucus mexicana*) and several species of willow, (*Salix* sp.). In addition, the riparian habitat supports several large sycamores, (*Platanus racemosa*). Non-native trees, shrubs that are also present include fruitless mulberry, (*Morus alba*), catalpa, (*Catalpa speciosa*), and silver maple (*Acer saccarhinum*).

Native understory plants include; mugwort, (*Artemesia douglassiana*), stinging nettle, (*Ur.*), rush, (*Juncus balticus*), virgin's bower, (*Clematis ligusticifolia*), horsetail, (*Equisetum arvensis*), and goldenrod, (*Solidago elongata*). Non-native understory species include Castor bean, (*Ricinus communis*), honeysuckle, (*Lonicera japonica*), Virginia creeper, (*Parthenocissus vitacea*), Himalaya berry, (*Rubus armeniacus*), periwinkle (*Vinca major*), and English ivy, (*Hedera helix*). In the following discussion, the names of vegetation communities follow the standard nomenclature used by Sawyer and Keeler-Wolf (1995), as appropriate. The names of the plant species that comprise these communities are taken from Hickman (1993).

Two relatively small "wetland habitat" are associated with two old gravel ponds in the northwest corner of the overall property and these sites are also excluded from the planned project area. The associated habitats of these ponds is riparian/emergent marsh and consists primarily of non-native weedy species and a scattered riparian and emergent plant species.

3.0 REVEGETATION PLAN

3.1 Reference Areas

The areas to be reclaimed to native riparian habitat will be reclaimed to conditions that differ from the premining condition (e.g. agriculture). Consequently, it is more appropriate to use data from reference areas to characterize naturally occurring habitats in the surrounding area as a template for revegetation.

The most appropriate area for use as a reference area is the avoided riparian habitat adjacent to the river (Figure 2). The first pond to be created will not occur until after mining is completed in that phase in about 10 years. Therefore the avoided riparian habitat areas will be examined for potential use as reference sites prior to the completion of mining of the first pond and data will be collected from the areas as appropriate. Revegetation standards, including plant palettes and planting densities, and performance standards will be revised as appropriate based on reference site examination and data.

3.2 Test Plots

SMARA regulations require test plots to determine the most appropriate planting procedures to assure successful revegetation. This requirement may be waived if success can be documented from previous experience with similar species and conditions or based on competent professional advice.

The authors of this Revegetation Plan have been actively involved in the revegetation of similar riparian sites for over 15 years including Vulcan Materials Company's Rank Island site on the San Joaquin River in Fresno County (OMR 2011 Excellence in Reclamation Award) and Triangle Rock Products' Laguna Creek Corridor Preserve in Sacramento County. These previous and on-going revegetation efforts have shown which methods are most effective at achieving initial survival of plantings and which species are most likely to become successfully established. It is unlikely that additional test plots would yield any new information that would help assure successful revegetation. Consequently, no additional test plots are proposed.

3.3 Soils

Soils in revegetation areas will consist of backfilled topsoil. SMARA regulations (Section 3711) require salvage of topsoil prior to mining and redistribution in areas to be revegetated. SMARA regulations (Section 3705) also require soil analysis to determine if the growth media in revegetation areas consists of native topsoil and is otherwise adequate to support successful revegetation.

3.3.1 Soil Fertility and Testing

After final grading of the areas to be reclaimed to native riparian habitat and placement of stockpiled topsoil, standard soil fertility and agricultural suitability testing will be performed to determine if soils are suitable to support growth of native upland vegetation. Since topsoil on the site has high soil index ratings soil analysis is anticipated to indicate the topsoil to be suitable for revegetation purposes.

Soil samples will be based on composites taken of the revegetation areas. The sampling protocol will be approved by the revegetation specialist prior to implementation. Soil testing will include the following:

- Presence of elements toxic to plants
- Nutrient levels
- Percentage of organic matter

If testing indicates low fertility and organic matter, soils will be amended with organic amendment and nutrients as described below.

3.3.2 Soil Amendment Specifications

Organic soil amendment/mulch will comply with the following specifications:

- Soil amendment shall consist of approximately 75 percent organic compost, comprised of chipped, shredded, or ground vegetation or clean processed recycled wood products processed as described below and screened through 3/8-inch mesh; and 25 percent wood chips ranging from 3/8 inch to 3 inch.
- Soil amendment shall not contain paint, petroleum products, herbicides, fungicides, or other chemical residues harmful to plant or animal life. Other deleterious material, including plastic, glass, metal or rock, shall not exceed 0.1 percent by weight or volume.

3.3.3 Fertilizer Specifications

Any fertilizer used to improve soil fertility will be a slow-release organic formulation (Biosol or equivalent).

3.3.4 Placement and Incorporation of Soil Amendment

Upon completion of site preparation, soil amendment will be placed and incorporated as follows:

- Soil amendment that has been stockpiled prior to use may require loosening or moistening to be restored to an acceptable friability and moisture content as directed by the Revegetation Specialist.
- Soil amendment shall be spread evenly over the prepared slopes and placed to a uniform depth.
- Compost shall be incorporated into the soil surface using a three-tine ripper or equivalent. Incorporation shall loosen, distribute and blend soil amendment with mineral soil.

3.4 Revegetation Methods

3.4.1 Technical Supervision

All revegetation activities will be conducted under the supervision of an experienced Revegetation Specialist. Any deviation from the revegetation plans will be approved by the Revegetation Specialist. The Revegetation Specialist will be on site during initiation of each

revegetation task (e.g., site preparation, plant installation, seeding, etc.), and all work will be monitored on a regular basis. Activity logs and field memos will be required to document the work accomplished and any problems encountered.

3.4.2 Preconstruction Activities

Prior to initiation of revegetation, the Revegetation Specialist a will establish and stake the limits of planting areas. All access routes, staging areas, and similar features will be located and staked in the field. Where necessary, orange construction fencing will be installed to delimit sensitive areas adjacent to construction areas.

3.4.3 Site Preparation

Areas to be revegetated will be prepared as follows:

- Vegetation, trash, debris, and weeds shall be cleared. All weeds shall be removed from the area and disposed of.
- Any eroded areas shall be repaired uniformly without leaving pits, holes, or low areas.

3.4.4 Timing

Seeding will be conducted between September 15 and October 15 to take advantage of winter rains for seed germination and growth.

3.5.5 Plant Materials

Container Stock: Container plants proposed for the upland habitat revegetation are shown in Table 1. When feasible, propagules for shrub and tree container plants will be collected from appropriate native plants growing on the project site or in the local area. The use of site specific materials, which are adapted to local conditions, increases the likelihood that revegetation will be successful, and maintains the genetic integrity of the local ecosystem. If local propagules are not available or cannot be collected at least six months prior to the fall planting, materials grown from other sources in the area may be substituted with the approval of the Revegetation Specialist.

Arrangements will be made well in advance of planting to ensure that plant materials are available at the appropriate planting time and that container plants are no more than one year old. Sufficient time will be allocated for seed collection and contract growing. Subject to confirmation by the plant suppliers, a minimum lead time of six months will be allocated prior to the anticipated planting dates.

Container plants will have healthy, well developed root systems, and will not be rootbound. The Revegetation Specialist will inspect a representative sample of all plant stock, and will reject those plants that do not meet these requirements.

Density: Average 2 trees per 150 feet of bank with periodic clustering of stands for more favorable wildlife habitat and aesthetics.

Table 1
Trees and Shrubs

Species	Common name	Size	Mix (%)
Alnus rhombifolia	White alder	Liner	15
Artemesia douglasiana	Mugwort	Liner	5
Cephalanthus occidentalis	Button willow	Liner	10
Fraxinus latifolia	Oregon ash	Liner	5
Platanus racemosa	Sycamore	Liner	15
Quercus lobata	Valley oak	Liner	15
Rosa californica	Rose	Liner	2.5
Rubus ursinus	California blackberry	Liner	2.5
Salix goodingii	Black willow	Liner	10
Salix ligulifolia	Arroyo willow	Liner	15
Vitis californica	California grape	Liner	5

Note: Significant natural revegetation by cottonwood (*Populus fremontii*) and other species of willows, (*Salix sp.*) is expected to occur.

Seed Source: The seed mix shown in Table 2 will be applied to all indicated revegetation areas. Seeding will follow installation of container plantings. Arrangements for seed collection will be made well in advance to ensure availability of material. Seeds and other propagules from appropriate native species will be collected adjacent to the project area or as close as possible to the site. If the collector cannot locate adequate seed/plant material collection areas for any of the species, the collector will contact the Revegetation Specialist immediately so that the Revegetation Specialist can assist in locating adequate collection locations.

Table 2
Seed Mix

Species	Common Name	Lbs/Ac
B hordeaceus	Blando Brome	10
Vulpia myros	Zorfro Annual fescue	8
Trifolium hirtium	Hykon Rose Clover	15
Eschscholzia californica	California Poppy	4
Lupinus bicolor	Blue/white Lupine	1
Achillea millifolium	Yarro	1
Clarkia sp.	Farewell to Spring	1
	Total	40

Seed Installation Technique: Seed will be sown by hydroseeding.

The following specifications shall apply:

- The seed mixes in Table 2 shall be used.
- Hydroseeding shall occur following container plant installation.
- No fertilizer shall be added to the hydroseed mix.

- The slurry shall be sprayed in a sweeping motion and in an arched stream, until a uniform coat is achieved with no slumping or shadowing and the material is spread at the required rate per acre.

3.6 Post Construction Report

The Revegetation Specialist will prepare a post-construction report documenting revegetation methods, changes in the revegetation areas or design, results achieved, and any problems encountered. As-built drawings will be prepared showing final planting areas, and the total revegetation acreage will be calculated.

4.0 MAINTENANCE OF REVEGETATION AREAS

All revegetation areas will be maintained for three years by a qualified Maintenance Crew as needed to meet the performance criteria. The Revegetation Specialist will recommend maintenance services to the extent necessary to assure that performance criteria are met.

Normal maintenance will include weed control as necessary (either by hand or by application of an herbicide labeled for such use), inspection for and repair of erosion problems, repairs to protection devices, and removal of trash.

4.1 Maintenance Schedule

Normal maintenance activities (watering, weed control, etc.) are anticipated to occur on a biweekly basis for the first quarter, and on a monthly basis thereafter for the first year. Subsequent maintenance will occur bimonthly during the growing season and quarterly during the dormant season. Frequency of maintenance visits will be adjusted as necessary.

4.2 Maintenance Activities

4.2.1 Control of Weeds and Exotic Plants

Nonnative invasive plants that threaten California's wildlands have been categorized by the California Invasive Plant Council (Cal-IPC 2006). Invasive plants that have been classified by Cal-IPC as High (severe ecological impacts on physical processes, plant and animal communities, and vegetation structure) or Moderate (substantial and apparent—but generally not severe—ecological impacts on physical processes, plant and animal communities, and vegetation structure) in terms of ecological threat will be controlled as necessary within the revegetation areas for a minimum of three years in order to prevent aggressive weeds from out competing native plant species for resources (e.g., space, water, nutrients, and light). These invasive weeds will be removed mechanically, if feasible. In circumstances where mechanical control is not effective, it is appropriate to utilize EPA-approved systemic herbicides. Herbicides will be applied under the direction of a licensed applicator.

Prior to initiation of revegetation efforts, the Revegetation Specialist will consult the most recent Cal-IPC list and a list of specific species to be controlled under this Revegetation Plan will be developed. Additional species may be added to the list based on actual conditions and the recommendation of the Revegetation Specialist.

4.2.2 Supplemental Irrigation

All plants will be watered by hand directly after planting. Artificial irrigation will be supplied as needed through the first summer after planting to provide supplemental water for the establishment of plants from containers. At the direction of the Revegetation Specialist, irrigation may be continued on an as-needed basis during the second and third years following initial planting to facilitate root development, so that plants will be sufficiently established to survive without artificial irrigation beyond the third year.

The Maintenance Crew will be responsible for providing supplemental irrigation to the container plants by a temporary irrigation system.

The amount and frequency of irrigation of each planting area will be determined through monitoring soil moisture conditions during the initial irrigation period. The goal is to provide deep, infrequent watering to encourage deep rooting of all perennial species. The Maintenance Crew will keep a log ofwatering dates and water amounts administered each time.

4.2.3 Protective Devices

Protective devices, if installed, will be maintained in good condition. Additional devices will be installed, as described in Section 3.3.10, if monitoring indicates plant damage from herbivory.

4.2.4 Replacement of Dead or Diseased Plant Materials

Planting densities given in Tables 1 and 2 assume a certain amount of mortality during the monitoring period. As long as this level of mortality is not exceeded, replacement of plant materials will not be necessary. If mortality levels are excessive, the cause of mortality will be investigated and corrective actions taken as necessary to resolve any problems prior to plant replacement. Plants will be replaced only during the appropriate time of year as discussed in Section 3.4.4.

5.0 PERFORMANCE MONITORING AND REPORTING

The purpose of performance monitoring is to 1) determine the overall status and condition of the revegetation areas; 2) determine if native annual grassland is becoming established and meeting the performance criteria; and 3) identify any shortcomings or new issues, so that appropriate corrective actions can be taken. Performance monitoring will occur for a period of five years following seeding of native grassland or longer if performance standards have not been achieved.

5.1 Performance Criteria

5.1.1 General

The performance criteria for revegetation success are based on achieving adequate germination of seeded species to control weed growth and erosion.

SMARA performance standards for revegetation success are based on achieving vegetation density, cover, and species richness comparable with preproject conditions or with naturally occurring habitats in the area based on appropriate reference sites.

5.1.2 Quantitative Success Criteria

As discussed in Section 3.1 reference sites for this revegetation project have been identified as the avoided riparian habitat adjacent to the river Sample data will be used to determine estimates of native species and species richness for comparison with equivalent samples taken from revegetated areas.

Quantitative success criteria for this project also include total vegetated cover and native species cover as identified in Table 3.

Total Vegetative Cover: Total cover will be measured for seeded areas to assure there has been adequate germination of seeded species to control erosion and exclude noxious weeds, and that progressively higher rates of cover are achieved each year after seeding.

Native Species Cover: The cover of native species will be measured beginning at year two to assure that the relative cover of native species in revegetated areas is equivalent to or greater than naturally occurring habitats.

5.2 Monitoring Methods

Performance monitoring will include both qualitative and quantitative assessment, as described above. Qualitative monitoring will occur during periodic inspections of the revegetation areas. These inspections will occur frequently (approximately every month) during the first year and less often in subsequent years. Quantitative monitoring will typically occur annually in late summer beginning during the first year after planting. Sampling methods will be as described in Section 5.2.2.

5.2.1 Qualitative Monitoring

Qualitative monitoring methods will include visual observation and photo documentation. There are no specific performance criteria associated with this monitoring.

Table 3
Summary of Vegetation Performance Criteria

	Time After Completion of Planting				
Criterion	**6 months**	**1 year**	**2 years**	**3 years**	**5 years**
Survival (container stock only)	70%	50%	NA	NA	NA
Dripline Diameter (trees and shrubs)	NA	NA	Minimum 20 percent annual increase in dripline diameter	Minimum 20 percent annual increase in dripline diameter	Minimum 20 percent annual increase in dripline diameter
Height (trees and shrubs)	NA	NA	Minimum 20 percent annual increase in height	Minimum 20 percent annual increase in height	Minimum 20 percent annual increase in height
Species Richness (# of plant species)	NA	NA	Comparable to or greater than reference areas (<20% difference @ 80% confidence level)	Comparable to or greater than reference areas (<20% difference @ 80% confidence level)	Comparable to or greater than reference areas (<20% difference @ 80% confidence level)
Total Vegetative Cover - All Species[1] (seeded areas)	Adequate germination in any 25 sq. ft. area[2]	25% cover in any 25 sq. ft. area	40% cover in any 25 sq. ft. area	70% cover in any 25 sq. ft. area	90% cover in any 25 sq. ft. area
Native Species Cover[3] (seeded areas)	NA	NA	Comparable to or greater than reference areas (<20 % difference @ 80% confidence level)	Comparable to or greater than reference areas (<20 % difference @ 80% confidence level)	Comparable to or greater than reference areas (<20 % difference @ 80% confidence level)

1. Includes both seeded and volunteer species; native and nonnative.
2. If seed germination is inadequate to prevent erosion damage or control invasion by weeds, re-seeding may be required. Application of appropriate herbicides may also be necessary to control weed growth.
3. Includes both seeded and volunteer species.

Visual Observation: During monitoring events, the Revegetation Specialist will document the condition of revegetation areas based on meander surveys and visual observations. Current conditions, potential problems (i.e., vandalism, fence damage, presence of exotic plant species, herbivory, erosion, etc.), and recommended actions will be documented in a Field Memo that will be provided to Riverbend. Copies of all Field Memos will be included in each year's annual report.

Photo Documentation: Annual photographs of revegetation areas will be taken from preset photostations during quantitative data collection events. Additional photographs will be taken of any potential problem areas. All photographs will be logged and included in each annual report.

5.2.2 Data Collection

Vegetative cover and species composition will be assessed using the sampling methods described below. Sampling will generally be conducted at the end of the growing season. Following each Vegetative cover and species composition will be assessed using the sampling methods described below. Sampling will generally be conducted at the end of the growing season. Following each annual data collection event, the Revegetation Specialist will compile data and prepare an analysis of the results.

Test plots for each vegetation strata will be used to estimate cover, density, and species richness within the habitat types occurring within the mine site. This sample size was selected to likely provide an 80% confidence and precision level. Plot size will be 5 feet rectangles for grass/forb

layers and 100 feet rectangles for shrub layers. The sampling points will be selected by randomly choosing a line transect and then placing sample plots at equally spaced distances along that transect. If not all sample plots can be placed within the line transect within the habitat type, additional random line transects will be selected.

5.3 Annual Reports

Annual monitoring reports will be prepared that include a summary of the revegetation effort, site conditions, any problems encountered, evaluation of data collected and success achieved, and recommendations for meeting the performance criteria. Reports will be submitted to the following:

Fresno County Public Works and Planning Department
2220 Tulare Street, Street Level
Fresno, CA 93721

6.0 CORRECTIVE MEASURES AND CONTINGENCIES

6.1 Corrective Measures

Corrective measures may need to be implemented during the five-year monitoring period in order to assure that performance criteria are ultimately achieved, and revegetation is successful. If corrective measures are deemed necessary, a plan will be developed by the Revegetation Specialist describing the proposed measures to be implemented. If corrective measures are implemented, the monitoring period will be extended for the areas requiring corrective measures such that at least two years of monitoring follow initiation of the corrective measure. Corrective measures will be fully documented in the annual report.

6.2 Contingency Plan

Contingency measures will be initiated if performance criteria are repeatedly not met, even after initiation of corrective measures, and additional corrective measures are determined by the Revegetation Specialist to be infeasible or impracticable. A contingency plan will be prepared that describes the nature and probable cause of the failure, and identifies specific contingency measures to be implemented. The contingency plan will be submitted to the Fresno County Public Works and Planning Department for approval prior to initiation.

Planning, implementation, and monitoring of contingency procedures, and provision of adequate funding, will be the responsibility of Riverbend. Contingency measures will be subject to the same performance criteria and monitoring requirements as the initial revegetation.

Fire, flood, and similar catastrophic events are beyond the control of Riverbend. Accordingly, it is appropriate that some limitation be placed on the requirement to implement contingency measures if failure is due to such catastrophic events. If a catastrophic event should occur during the monitoring period, Riverbend will evaluate the extent of habitat damage and coordinate with the Fresno County Public Works and Planning Department to determine a mutually acceptable resolution.

Any irreparable damage or destruction of revegetation areas caused by catastrophic events, including the acreage affected, and any changes in application of performance criteria, will be documented in the annual report.

Rev 12/15/2009 F226 PreApplication Review

County of Fresno

DEPARTMENT OF PUBLIC WORKS AND PLANNING
ALAN WEAVER
DIRECTOR

August 17, 2012

John C. Buada
Buada Associates
4872 N. Arcade Avenue
Fig Garden Studio
Fresno, CA 93704

Dear Mr. Buada:

Pre-Application Review No: 38279
Subject Assessor's Parcel No.: 333-160-01; 332-071-52 & 53; 350-041-12; 360-020-20; 333-061-04 & 05

An Unclassified Conditional Use Permit (CUP) application is required to allow mining and sand gravel processing operation in the AL-20 Zone District. I am enclosing the necessary forms to return for a complete application.

The proposal will require an analysis per the California Environmental Quality Act (CEQA). The County understands that the applicant has chosen to begin the process for initiating an Environmental Impact Report (EIR) rather than to start the Initial Study process. Staff will still need to have the Initial Study form completed. Enclosed is a copy of the Fresno County Regulations for the Implementation of the California Environmental Quality Act. For initiating the EIR process, staff will need a $25,000 initial deposit and thorough project description.

Your property is under a Williamson Act Contract (6322). As such, the uses permitted under contract are restricted and a determination must be made prior to filing a formal application as to whether the proposed operation may be permitted. See enclosed information related to mining on contracted land. We would recommend that you contact our Policy Planning Section at (559) 600-4022 to discuss the project prior to filing a formal application.

You should be aware that in order to approve a Conditional Use Permit application, the Fresno County Ordinance Code requires that four mandatory findings of fact must exist before a Conditional Use Permit Application may be granted (see Conditional Use Permit Findings on back of application form). Your application will be reviewed and a staff recommendation made based upon these four mandatory findings.

Below is a list of the filing requirements.

Application Form: This application is a green triplicate form. Please complete the owner, applicant, and representative portions of the application. All owners included on the Grant Deed must sign the application.

Initial Study Application: This application form is a stapled, five-page form. Please complete and sign.

Pre-Application Review: This is a single blue sheet that has already been completed. Please return this application to our office. The information provided on this sheet will be needed to complete the application. **(Note: The Pre-Application Fee of $247.00 will be applied to the Filing Fee if submitted within six months of the date on the Pre-Application form. The following Filing Fee information assumes that the application will be filed within the six-month time period.)**

Filing Fees:

Conditional Use Permit Application (CUP)	$ 9,123.00
Public Health Environmental Review	$ 992.00
Minus the $247.00 Pre-Application Credit	$ - 247.00
Please make check payable to "Fresno County" for:	$ 9,868.00

Also, a separate check for $25 must be submitted, payable to the Southern San Joaquin Valley Information Center for Archaeological Inventory. In addition, a separate fee may be collected by the County on behalf of the California Department of Fish and Game prior to closure of the Initial Study Assessment and prior to setting a date for public hearing. For more information regarding this fee, see page 5 of the Initial Study Application.

Legal Description: Submit a copy of the Grant Deed to the property with the legal description. (Note: The legal description must correlate with the property boundaries depicted on the Site Plan drawing.)

Site Plans: Twenty-four (24) folded copies of a detailed Site Plan are required. As we are now routing projects for comments electronically, we prefer that electronic versions of all drawings be submitted in PDF format. If that is not possible, we require one black-line print in either 8 ½" x 11" or 11" x 17" size so that it can be scanned. Please refer to the back of the application for detailed requirements on preparing Site Plans. It is important that all requirements are met in order for the Site Plan to be acceptable. Therefore, you may wish to review the Site Plan with a Planner prior to submitting the application.

Project Description/Operational Statement: Please provide a complete, detailed description of the proposed use. Enclosed is a checklist of considerations that should be addressed. The Operational Statement must be on a separate sheet and should be typed.

As prescribed by the Zoning Ordinance, the Planning Commission will make a decision on the application following a public hearing. Please note that if review comments are not received from certain key reviewing agencies in response to our initial request for comments, staff will continue to pursue formal comments from those agencies so as to provide for the most complete project analysis possible. This may result in additional processing time. Also, please note that an appeal of the Planning Commission's decision would add additional time because it would necessitate a hearing before the Board of Supervisors who would then make the final decision.

In order to save time processing your application, we recommend that you or your representative schedule a meeting to review your application submittal prior to filing a formal application.

If you have any questions regarding the information described in this letter, or wish to schedule a meeting concerning the filing of an application, please contact me at cmotta@co.fresno.ca.us or (559) 600-4227.

Sincerely,

Chris Motta, Senior Planner
Development Services Division

EXHIBIT 21

Inter Office Memo

ATTENTION: FOR FINAL ACTION OR MODIFICATION TO OR ADDITION OF CONDITIONS, SEE FINAL BOARD OF SUPERVISOR'S ACTION SUMMARY MINUTES.

DATE: February 26, 2015

TO: Board of Supervisors

FROM: Planning Commission

SUBJECT: RESOLUTION NO. 12492 - ENVIRONMENTAL IMPACT REPORT NO. 6606 (STATE CLEARINGHOUSE NO. 2013071097) and UNCLASSIFIED CONDITIONAL USE PERMIT APPLICATION NO. 3390

APPLICANT: Riverbend Sand and Gravel, LLC

OWNER: Riverbend Sand and Gravel, LLC

REQUEST: Allow an aggregate mining operation on 619 acres of a combined 833 acres of property. The remaining 214 acres, including the entire existing riparian habitat along the Kings River, are excluded from the Project. The anticipated annual processing of material would be 1.6 million tons per year with annual sales at approximately 1.25 million tons per year. The 619-acre Project Site is currently occupied by walnut and olive orchards and grape vineyards with several farm residences nearby. Reclamation of the Project Site will create approximately 268 acres of reclaimed farmland and approximately 351 acres of open space, riparian and open water habitat.

LOCATION: The 619-acre Project is located in unincorporated Fresno County, approximately 1.5 miles southeast of the City of Sanger, between the Kings River and Riverbend Avenue. East Goodfellow Avenue bisects the Project Site, which is composed of seven parcels. The Project Site is located in Township 14 South, Range 22 East, Sections 25 and 36; Township 14 South, Range 23 East, Sections 19, 30 and 31; and Township 15 South, Range 22 East, Section 1 (Mount Diablo Baseline and Meridian) on the *Sanger* and *Wahtoke* 7.5-minute U.S. Geological Survey (USGS) topographic quadrangles (SUP. DIST.: 4) (APNs: 333-160-01; 332-071-53, 52; 333-061-04, 05; 350-041-12; 360-020-20).

PLANNING COMMISSION ACTION:

At its hearing of February 26, 2015, the Commission considered the Staff Report and testimony (summarized in Exhibit "A").

A motion was made by Commissioner Borba and seconded by Commissioner Rocca to certify the Environmental Impact Report (EIR) prepared for Unclassified Conditional Use Permit Application No. 3390 and the Reclamation Plan for the Riverbend Sand and Gravel Project based on the following Findings:

1. That a Draft and Final EIR have been prepared for the Project in compliance with the California Environmental Quality Act (CEQA);

2. That the Draft and Final EIR have been presented to the planning Commission, and the information in the EIR has been reviewed and considered by the Commission;

3. That the Draft EIR and Final EIR represent the County's independent judgment and analysis;

4. That based on the evidence before the Commission, the EIR identified potentially significant impacts related to aesthetics, agriculture and forestry resources, biological resources, cultural resources, geology and soils, greenhouse gasses/climate change, hazards and hazardous materials, hydrology and water quality, and land use and planning, which have been determined to be "less than significant" or mitigated to less than significant with the implementation of the Mitigation Measures identified in the EIR;

5. That the Commission has considered the Mitigation Monitoring and Reporting Program included in the EIR to reduce the potential impacts associated with the Project to the maximum extent feasible;

6. That certain impacts associated with air quality, noise, and traffic and circulation remain significant and unavoidable, even after the application of all feasible Mitigation Measures and feasible alternatives; and

7. That the Commission has considered the alternatives to the proposed Project discussed in the EIR and believes that the Reduced Mine Depth Alternative is environmentally superior, but does not meet all of the Project objectives.

This motion passed on the following vote:

VOTING:	Yes:	Commissioners Borba, Rocca, Batth, Mendes, Zadourian
	No:	Commissioner Woolf
	Absent:	Commissioner Ferguson
	Abstain:	Commissioner Lawson

A second and separate motion was made by Commissioner Rocca and seconded by Commissioner Borba to:

1. Move to approve the CEQA Findings of Fact and Statement of Overriding Considerations and the Mitigation Monitoring and Reporting Program and Conditions of Compliance Reporting Matrix (attached as Exhibit “B”) prepared for Unclassified Conditional Use Permit Application No. 3390 based on the Findings as listed on pages 11 through 42 of the Planning Commission Staff Report dated February 26, 2015 with modifications to Mitigation Measure No. AG-1 to have all Agricultural Conservation Easements transferred to a qualified Land Trust within five (5) years of being established to manage and maintain for compliance;

2. Move to determine that the required Findings discussed can be made for the proposed Project and move to approve Unclassified Conditional Use Permit Application No. 3390, including the additional Finding (Finding 5), related specifically to surface mining operations, with conditions and notes;

3. Move to approve the Reclamation Plan for the proposed Project;

4. Pursuant to Zoning Ordinance Section 873.F, the Conditions incorporated into this Project are necessary for public health, safety, and general welfare; and

5. Direct the Secretary to prepare a Resolution documenting the Commission’s action and direct staff to file a Notice of Determination for the approved Project.

This motion passed on the following vote:

VOTING:	Yes:	Commissioners Rocca, Borba, Batth, Mendes, Zadourian
	No:	Commissioner Woolf
	Absent:	Commissioner Ferguson
	Abstain:	Commissioner Lawson

ALAN WEAVER, DIRECTOR
Department of Public Works and Planning
Secretary-Fresno County Planning Commission

By: _____
William M. Kettler, Manager
Development Services Division

NOTE: The approval of this project will expire two years from the date of approval unless a determination is made that substantial development has occurred. When circumstances beyond the control of the Applicant do not permit compliance with this time limit, the Commission may grant an extension not to exceed one additional year. Application for such extension must be filed with the Department of Public Works and Planning before the expiration of the Unclassified Conditional Use Permit.

EXHIBIT "A"

ENVIRONMENTAL IMPACT REPORT NO. 6606
(STATE CLEARINGHOUSE# 2013071097)
UNCLASSIFIED CONDITIONAL USE PERMIT APPLICATION NO. 3390

Staff: The Fresno County Planning Commission considered the Staff Report dated February 26, 2015, and heard a summary presentation by staff and the County's consultant.

Applicant: The representatives of the Applicant concurred with the Staff Report and the recommended Conditions. They described the project and offered the following information:

- Riverbend is in the farming business; the rocky soil makes farming difficult; after project reclamation, the land won't have cobbles.
- Riverbend is the first applicant to voluntarily agree to enter into a Farmland Preservation Easement.
- Aggregate and petroleum are the County's most significant extractive resources.
- We need to go where the rock is, within Mineral Reserve Zones; both state documentation and Fresno County policies pertaining to mineral extraction indicate that the best places to mine for aggregate are the San Joaquin and Kings rivers.
- There is a need for a local long-term supply of aggregate; the intent of a local supply is to be within 20 miles of the metropolitan area being served.
- There is a shortage of aggregate in the region; this project is needed to assist in meeting the County's long-term aggregate needs.
- Locally sourced aggregate reduces regional environmental impacts.
- Responsible mining and reclamation is a matter of balance.
- We offer concurrent farming, mining and reclamation.

- The project will contribute to Fresno County's economy through increased tax revenue and providing $58.9 million to the economy.

- The project will bring much needed jobs.

- State policies pertaining to mineral extraction will be followed.

- Protection of resources is important to the Applicant.

- The project includes mitigation of significant impacts; it will include buffers and monitoring for water quality and quantity and project design has incorporated several features to avoid impacts including a 100-foot setback from the Kings River and using avoidance to reduce biological impacts.

- Access to the site will be from Goodfellow Road.

- The project will be phased to allow lands subject to Williamson Act Contracts to expire and to avoid sensitive receptors during the initial project phases.

- Phases 6 through 8 will be located south of Goodfellow Road and a conveyor will be utilized to transport the material under the road; Phase 8 will occur approximately 50 years from now.

- The project includes design features to minimize noise impacts; it will include 10 and 15-foot tall berms, and noise curtains at stationary sources.

- Air Quality Impact Analysis and a Health Risk Assessment were completed for the project; the air quality analysis was based on very conservative assumptions.

- A water supply assessment and groundwater study were completed for the proposal.

- Approximately 90% of the aggregate process water will be recirculated.

- No explosives will be used as part of this operation.

- Agricultural mitigation was not required as part of this proposal but was offered as part of the project's mitigation.

Others: Eleven individuals presented information in opposition to the application, citing:

- The project does not adequately account for river movement and erosion issues.
- The need for a County-wide extraction fee program to off-set project impacts.
- The setbacks and buffer zones are not adequate.
- The need for agricultural land mitigation.
- The negative impacts of the project on hydrology, noise, traffic, agriculture, aesthetics, cultural resources, hazards, and the Kings River.
- The Kings River Regional Plan should be updated.
- The Farmland Preservation Easement should be held by a qualified Conservation Trust.
- There is no need for the gravel from this project; current demand could be addressed by increasing production at the existing permitted facilities by approximately 12%.

Correspondence: One letter in support from the applicant containing two reports, one on Aggregate Demand for the Fresno region and one on the net economic contribution of the project to the economy of Fresno County, was presented to the Planning Commission. Two letters in opposition were presented to the Planning Commission, one expressing concerns related to loss of ground water from the evaporation ponds that included a table on evaporation from water surfaces in California, and the other primarily concerned with the project's cumulative impacts.

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM AND CONDITIONS COMPLIANCE MATRIX FOR THE RIVERBEND SAND AND GRAVEL PROJECT

INTRODUCTION

The Mitigation Monitoring and Reporting Program ("MMRP") has been prepared to implement the mitigation measures identified in the Riverbend Sand and Gravel Project ("Project") Environmental Impact Report ("EIR"). Section 21081.6 of the California Environmental Quality Act ("CEQA") requires adoption of a monitoring or reporting program when mitigation measures have been identified that would reduce or avoid significant environmental effects. This MMRP contains measures identified in the EIR that would be implemented through monitoring of an activity, such as grading or excavation, and other measures that would be implemented through a reporting mechanism, such as obtaining an air quality permit or an Emergency/Contingency Plan.

The law states that the MMRP shall be designed to ensure compliance during implementation of the Project. When implemented, environmental effects associated with the Project will be reduced or eliminated. Therefore, the MMRP has been prepared as a matrix containing the following elements:

- Measures that would mitigate significant impacts on the environment are recorded with a description of the action and the procedure necessary to ensure compliance.
- A procedure of compliance and verification has been outlined for each measure. This procedure designates what action will be taken and when, who will take action, and to whom and when compliance will be reported.
- The MMRP has been designed to provide focused, yet flexible guidelines. As monitoring progresses, changes to compliance procedures may be necessary based upon recommendations by those responsible for the program.

PROGRAM MANAGEMENT

The MMRP will be in place through all phases of the Project. The Project planner, assigned by the Fresno County ("County") planning director, shall coordinate enforcement of the MMRP and oversee it to ensure that proper action is taken on each mitigation measure. Each County department or division shall ensure that the Project complies with the conditions (mitigation) that relate to that department.

The Project planner or responsible County department has the authority to stop the work of the operator if compliance with any aspects of the MMRP is not occurring after written notification

has been issued. The Project planner or responsible County department also has the authority to deny entry into a new mining phase until compliance with a mitigation measure occurs.

CONDITIONS COMPLIANCE MATRIX

The MMRP that was circulated as Chapter 4.0 in the Final EIR has been revised to include the recommended conditions of approval for the Project. Table 1, "Mitigation Monitoring and Reporting Program and Conditions Compliance Matrix for the Riverbend Sand and Gravel Project," includes the mitigation measures and conditions of approval, the procedure for complying with and/or monitoring them, and the party responsible for implementing them.

EXHIBIT B

TABLE 1
MITIGATION MONITORING AND REPORTING PROGRAM AND CONDITIONS COMPLIANCE MATRIX FOR THE RIVERBEND SAND AND GRAVEL PROJECT

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
MITIGATION MEASURES			
AESTHETICS			
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-1**: A 10-foot high vegetated berm shall be constructed along Riverbend Avenue adjacent to Phases 3A, 3B, 4A and 4B. An 8-foot vegetated berm shall be constructed along the south side of Goodfellow from Riverbend Avenue to 2,000 feet west of Riverbend Avenue. The berms will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. The berms shall be constructed and planted prior to the removal of overburden in each phase.	**AES-1**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-2**: Orchard-like screens shall be planted on the north side of Goodfellow Avenue west of the entrance road and on the south side of Goodfellow Avenue west of the 8-foot high vegetated berm prior to overburden removal in the adjacent phases. The tree species will be evergreen trees (e.g., olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening.	**AES-2**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AES-1: Would the Project substantially degrade the existing visual character	**MM AES-3**: The dragline shall be painted a neutral-tone color to achieve the best blending with the surrounding	**AES-3**: Use of a neutral-tone paint color will be monitored through the	Fresno County Dept. of Public Works & Planning, Development Services

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
or quality of the site and its surroundings?	landscape and vegetation.	annual County Mine Inspections.	Division
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-4**: Prior to commencement of plant area operations, a 15-foot high vegetated berm shall be constructed along the Kings River adjacent to the Plant area (i.e., Phase 9). The berm will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm.	**AES-4**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
AGRICULTURE & FORESTRY RESOURCES			
Impact AG-1: Would the Project convert Prime Farmland, Unique Farmland, Farmland of Statewide Importance, Farmland of Local Importance, or Grazing Land, as shown on maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	**MM AG-1:** The Project shall conserve agricultural land by acquiring an agricultural conservation easement (ACE) on 351 acres of Important Farmland as classified by DOC's FMMP to mitigate for the 351 acres of Important Farmland on the Project site to be converted to non-agricultural use. The ACE would be phased in accordance with the following schedule: • Within one year of existing agricultural land being taken out production for the Project 100 acres shall be placed in an ACE. • Within the earlier of 5 years, or before 100 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 100 acres shall be placed in an ACE. • Within the earlier of 10 years, or before 200 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 75 acres shall be placed in an ACE.	**AG-1:** Annual compliance through annual County Mine Inspections until the ACE is transferred to a Land Trust to manage and maintain for compliance.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	• Within the earlier of 15 years, or before 275 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 76 acres shall be placed in an ACE. All ACE's entered into as described here shall have ownership transferred to a qualified Land Trust within 5 years of being established. Temporarily taking of land out of agriculture production for normal farming purposes (e.g. rotating crops, resting soil, etc.) shall not be considered taking of existing agricultural land out of production for the Project.		
AIR QUALITY			
Impact AQ-5: Would the Project create objectionable odors affecting a substantial number of people?	**MM AQ-1**: The following design features will mitigate VOC, SVOC, and/or SO_2 emissions: 1. The type of asphaltic cement produced by on-site plants affects odorous emissions. Some cements have lower VOC/SVOC emissions than others. Therefore, cements with lower VOC/SVOC emissions shall be used to the extent feasible. 2. Periodic burner tune-ups may reduce VOC emission by about 38 percent. Therefore, periodic burner tune-ups shall be implemented. 3. Mixing drum vapors shall be routed back to the dryer burner.	**AQ-1**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AQ-2: Would the Project violate any air quality standard or contribute	**MM AQ-2:** Each off-road engine on-site between 1/1/2015 and 12/31/2018, excluding scrapers and haul trucks, shall	**AQ-2**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
substantially to an existing or projected air quality violation? ***Impact AQ-3:*** Would the Project cause a cumulatively considerable net increase of a criteria pollutant for which the Project region is non-attainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)? ***Impact AQ-4:*** Would the Project expose sensitive receptors to substantial pollution concentrations?	be model year 2015 or later. Engines in scrapers shall be no greater than ten (10) years old and shall meet the Tier 3 off-road engine standard. Engines in off-road haul trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards. Each off-road engine on-site after 1/1/2019, excluding scrapers, shall be model year 2014 or later. Engines in scrapers shall meet Tier 3 engine standard and be model year 2010 model year or later. Off-road haul trucks shall not be used after 1/1/2019 except during occasional repairs or during relocation of overland conveyors not to exceed five workdays in any month. In such cases, the off-road trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards.	In addition, documentation demonstrating compliance with the identified off-road engine requirements shall be maintained on-site and provided to the County upon request.	Division
Impact AQ-2: Would the Project violate an air quality standard or contribute substantially to an existing or projected air quality violation? ***Impact AQ-3:*** Would the Project cause a cumulatively considerable net increase of a criteria pollutant for which the Project region is non-	**MM AQ-3**: Diesel trucks shall not idle greater than five (5) minutes while on-site as required by the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling (13 CCR §2485).	**AQ-3**: Compliance through annual County Mine Inspections. In addition, the facility shall maintain a written idling policy and distribute that policy to affected operators of off-road equipment.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Air Resources Board, and San Joaquin Valley Air Pollution Control District

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
attainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)? ***Impact AQ-4:*** Would the Project expose sensitive receptors to substantial pollution concentrations?			
BIOLOGICAL RESOURCES			
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-1**: 1. All buildings to be removed shall be surveyed by a qualified biologist to determine if they are being used as a roost site for bats, and if so, what type of roosting behavior is occurring (night roost vs. day/maternity roost). The survey shall be conducted in June or July when maternity roosts would be most active. 2. Any buildings to be removed that are determined to support only night-roosting bats shall be removed between September 1 and October 14, or between February 16 and April 14. Removal of buildings during these periods will avoid impacts to any bats utilizing the buildings during the normal breeding season (April 15 to August 30) and winter torpor (October 15 to February 15). 3. If a building is determined to support a day/maternity roost, a mitigation plan (i.e., removal	**BIO-1**: Qualified biologist shall conduct pre-demolition surveys for bat roosting sites and oversee avoidance of night-roosting bats during demolition activities for the periods specified. Qualified biologist shall conduct pre-demolition surveys for day/maternity roosts and oversee humane eviction of the existing bat population and creation of artificial day roost habitat. If necessary, a mitigation/removal plan shall be prepared by a qualified biologist.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Department of Fish and Wildlife

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	plan) shall be prepared by a qualified bat biologist experienced with bat eviction and exclusion possessing a Memorandum of Understanding with the California Department of Fish and Wildlife. At a minimum, the mitigation plan shall provide for humane eviction of the existing bat population and creation of artificial day roost habitat, to mitigate impacts resulting from removal of the roost site.		
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-2**: 1. To the maximum extent practicable, all construction activities associated with the initiation of work on the Project site or initiation of new mining phases shall be scheduled between September 15 and February 1, which is the typical non-nesting season. 2. If the initiation of work in new areas cannot be scheduled during the non-nesting season, prior to the initiation of work on the Project site and each individual phase of mining (e.g., Phase 1A, 1B, etc.), a qualified biologist shall survey all suitable nest trees within 0.25 mile of the work limits for nesting Swainson's hawks, within 500 feet of the work limits for other raptors, and within 250 feet of the work limits for other nesting birds no more than 10 days prior to the start of ground disturbing activities. The survey will follow the methodology developed by the Swainson's Hawk Technical Advisory Committee (SWHA TAC, 2000). 3. If nesting Swainson's hawks are found within 0.25 mile, other nesting raptors are found within 500 feet, or other nesting birds are found within 250	**BIO-2**: Qualified biologist shall conduct pre-construction surveys for nesting migratory birds and raptors and oversee avoidance of active nests during construction and ground disturbance activities. If nests are found within identified ranges, CDFW shall be contacted.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Department of Fish and Wildlife

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	feet of the work limits as described in Item 2 above: a. A qualified biologist shall evaluate the potential for the proposed work to disturb nesting activities. The evaluation criteria shall include, but not be limited to, the location/orientation of the nest in the nest tree, the distance of the nest to the work limits, the line of sight between the nest and the work limits, and the description of the proposed work. The nest shall be continually surveyed for the first 24 hours. b. CDFW shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities. c. If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities that occur during the breeding season to monitor nesting activity. The biologist shall have the authority to stop work if it is determined the Project is adversely affecting nesting activities. 4. If no nesting Swainson's hawks are found within 0.25 miles, no other nesting raptors are found within 500 feet, or no other nesting birds are found within 250 feet of the work limits as described in measure 2 above, work can proceed as planned. 5. Construction initiated during the non-nesting season and continuing into the nesting season shall not be subject to the above measures.		

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-3**: 1. Prior to the start of ground disturbing activities for the aggregate plant and each individual phase of mining (i.e. Phase 1A, 1B), surveys for elderberry shrubs shall be conducted within the mixed riparian forest community within 100 feet of the work limits. Any elderberry shrubs identified shall be located on a map and the stems inventoried in accordance with USFWS guidelines. 2. To the maximum extent practicable, all Project activities shall be set back a minimum of 100 feet from all elderberry shrubs with one or more stems of 1-inch diameter at ground level growing within the Biological Study Area (BSA) or adjacent areas. If a 100-foot setback cannot be maintained, implementation of additional mitigation measures described below shall be required in accordance with USFWS guidelines: a. Prior to initiation of construction, the limits of all construction, access roads, staging areas, etc., shall be staked. The staked areas shall be inspected by a qualified biologist. Based on this inspection, additional refinements to construction areas shall be performed as necessary and as feasible to ensure a minimum 20-foot setback from the dripline of all elderberry plants. b. Once the final limits of construction are set, brightly colored fencing (i.e., snow fencing) shall be installed at the 20-foot setback around the perimeter of each elderberry plant or plant group under the direction of a	**BIO-3**: Qualified biologist shall conduct pre-construction surveys for elderberry shrubs and oversee avoidance and/or implementation of additional mitigation measures as specified. Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	qualified biologist. c. Signs shall be posted every 50 feet along the edge of the VELB avoidance area with the following information: "This area is habitat for the Valley Elderberry Longhorn Beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as amended. Violators are subject to prosecution, fines, and imprisonment." d. Workers shall be briefed on the need to avoid damage to elderberry shrubs and the possible penalties for not complying with these requirements. All work crews shall be advised of the status of VELB and the need to protect the elderberry shrubs. e. During the initial construction period for each phase of mining, a qualified biologist shall inspect the mining area periodically to assure that the Project is not affecting VELB.		
CULTURAL AND PALEONTOLOGICAL RESOURCES			
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-1**: Prior to commencement of Phase 8B, markers shall be placed at the geographic boundary coordinates delineating the 50-foot exclusion zone surrounding site CA-FRE-3591 to prevent disturbance by project activities. It is inappropriate to prescribe a specific type of markers at this time, as technological changes over the next 60 years may result in fencing/marker options not currently available. However, the markers shall fulfill the following purpose: (1) provide a clear visual	**CPR-1**: Cultural site geographic coordinates shall be provided to the County prior to commencement of Phase 8B. Thereafter, the exclusion zone would also be subject to compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	indicator of the exclusion zone and (2) prevent the entry of unauthorized equipment, vehicles, and mine personnel into the exclusion zone. To facilitate the identification and delineation of the boundary and 50-foot exclusion zone for CA-FRE-3591, the site shall be surveyed and Universal Transverse Mercator (UTM) geographic coordinates provided to the County.		
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-2**: The Project Applicant shall obtain the services of a qualified cultural and paleontological consultant to implement an education program to ensure that construction personnel are aware of potentially sensitive archaeological and paleontological resources.	**CPR-2**: Execution of agreement with qualified cultural and paleontological consultant regarding personnel education program.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-3**: If any subsurface cultural resources, including either prehistoric or historic resources, are encountered during construction of the Project, all construction activities in the vicinity of the encounter shall be halted until a qualified archaeologist can examine these materials and make a determination of their significance. Such finds include, but are not limited to, prehistoric grinding implements, stone tools, soapstone bowls, and ornaments (e.g., beads, pendants) as well as intact building foundations and high concentrations of historical artifacts. The Fresno County Department of Public Works and Planning shall be notified, and the owners, developers and/or successors-in-interest shall be responsible for mitigation of any significant cultural resources pursuant to the CEQA Guidelines.	**CPR-3**: Earthmoving activities shall cease and a qualified archaeologist shall be retained to assess the significance and provide direction. If such finds are found the Fresno County Department of Public Works and Planning shall be notified.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
Impact CPR-3: Would the Project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	**MM CPR-4**: If paleontological resources are discovered during project-related activities, the find shall be reported immediately to the County of Fresno Planning Department, who shall provide direction to contact a paleontological monitor. The area of the find shall be avoided until the monitor is on-site. The monitor shall assess the find and make any necessary recommendations, including any procedures to further investigate or mitigate impacts to the find as required by law.	**CPR-4**: Earthmoving activities shall cease and a paleontologist shall be retained to assess the significance and provide direction. Is such finds are discovered they shall be immediately reported to Fresno County Department of Public Works and Planning.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact CPR-4: Would the Project disturb any human remains, including those interred outside of formal cemeteries?	**MM CPR-5**: In the event that unanticipated human remains are discovered, work shall immediately stop at the discovery location and any nearby area reasonably suspected to overlie adjacent human remains. The Fresno County Coroner shall immediately be contacted to determine whether the cause of death must be investigated. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours (H&SC §7050.5). At the same time, the mine operator shall immediately notify the Fresno County Department of Public Works and Planning, and a qualified archaeologist shall be contacted to evaluate the archaeological implications of the find.	**CPR-5:** Earthmoving activities shall cease. The Fresno County Coroner shall be contacted immediately in order to assess the remains and to determine the correct action. If the coroner has reason to believe that the remains are of Native American origin, he or she shall contact the NAHC by telephone within 24 hours.	Fresno County Dept. of Public Works & Planning, Development Services Division; Fresno County Coroner
Impact CPR-4: Would the Project disturb any human remains, including those interred outside of formal cemeteries?	**MM CPR-6**: The CEQA Guidelines (§15064.5) detail steps to be taken when human remains are found to be of Native American origin. If Native American remains are discovered, the operator/landowner shall work with the NAHC to develop and execute an agreement between themselves and the most likely descendant(s) of	**CPR-6:** If Native American remains are discovered, an agreement shall be executed between the operator/landowner and NAHC regarding treatment of burial items and unanticipated human	Fresno County Dept. of Public Works & Planning, Development Services Division; Native American Heritage Commission; Fresno County Coroner

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	Native Americans who may be buried in the vicinity by which the human remains and associated burial items shall be treated or disposed, with appropriate dignity. The NAHC and landowner shall follow prescribed steps in Public Resources Code §5097.98, which include but are not limited to the following: • The NAHC shall notify those persons it believes to be the most likely to have descended from the deceased Native American. • The most likely descendant(s) may recommend to the landowner the means of treating and disposing of, with appropriate dignity, the human remains and any associated grave goods. • The landowner shall ensure the immediate vicinity of the Native American human remains is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations.	remains.	
HYDROLOGY AND WATER QUALITY			
Impact HWQ-7: Would the Project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	**MM HWQ-1**: To mitigate the risk of loss or injury potentially resulting from flooding, the operator shall implement a system to regularly monitor public announcements concerning potential Kings River flooding. At the beginning of each day that employees are to work in areas mapped within the 100-year flood hazard zone,	**HWQ-1**: Compliance through annual County Mine Inspections. In addition, the operator will communicate the flooding potential to all employees each	Fresno County Dept. of Public Works & Planning, Development Services Division

	the operator must check with the National Weather Service to determine if flood warnings are in effect. The operator must communicate the flooding potential to all employees each day. Employees must avoid working in portions of the Project site that are within the flood hazard zone. In addition, access to areas of the Project site subject to potential flooding shall be physically demarcated with signage and deterrents such as traffic barricades.	day verbally or by conspicuous posting of the current conditions (e.g., same location as safety items are posted).	
NOISE AND VIBRATION			
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? **Impact NO-2:** Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?	**MM NO-1**: The following specific measures are required to ensure impacts associated with Project dragline excavation are less than significant: 1. The reference sound levels associated with dragline operation shall be verified through noise level measurements immediately upon commencement of dragline operations at the Project site. In the event that actual noise emissions of the dragline exceed the assumptions contained within this analysis, additional noise control measures shall be implemented. Those measures would include replacing fan motors with variable drive motors and/or installation of cooling air inlet and/or exhaust silencers directly to the dragline as required to satisfy the Fresno County Noise Ordinance standards. 2. Except during a public emergency that requires immediate production of aggregates and concrete products, excavation activities using the proposed dragline shall be limited to daytime hours when	**NO-1:** 1. Upon commencement of operation, dragline noise measurements shalll be provided to the County demonstrating that the L_{50} noise levels are equal to or less than 70 dBA at a distance of 100-feet. If L_{50} noise levels exceed 70 dBA, then additional dragline mitigation measures shall be implemented, subsequent noise measurements shall be conducted and provided to the County demonstrating that the dragline noise will not exceed the Fresno County Noise Standard (50 dBA day and 45 dBA night) at any noise receiver. In the	Fresno County Dept. of Public Works & Planning, Development Services Division

	located within the following distances from noise receivers: a. When operating the mine and aggregates plant only: i. 600 ft from R3, R4, R5, R7, R9, R10. ii. 900 ft from R8. iii. 725 ft from R13. iv. 925 ft from R14. b. When operating the mine, aggregates plant and the hot mix asphalt plant and/or the ready mix concrete plant: i. 600 ft from R3, R4, R5. ii. 750 ft from R7, R9, R10. iii. 1,050 from ft R8. iv. 850 ft from R13. v. 975 ft from R14. 3. Prior to mining within 900 feet of Residence Nos. 3, 4, 5, 7, & 9 along Riverbend Avenue, the proposed 10-foot tall berm shall be constructed near the western edge of the proposed 100-foot excavation setback. 4. Prior to mining within 900 feet of Residence No. 10 along Riverbend Avenue, an 11-foot tall berm shall be constructed near the western edge of the proposed 100-foot excavation setback. 5. Prior to mining within 900 feet of Residence No. 13, the proposed 8-foot tall berm shall be constructed near the southern edge of the proposed 100-foot excavation setback along the South side of Goodfellow from Riverbend Avenue	event the measured ambient noise level exceeds the noise level standard, the standard shall be adjusted so as to equal the ambient noise level. Compliance shall additionally be met through annual County Mine Inspections. **NO-1:** 2-6. Compliance through annual County Mine Inspections.

	to 2000 feet West of Riverbend Avenue. 6. Excavation activities within 1,000 feet of an existing residence shall be conducted such that the dragline cooling exhaust fans do not directly face the residence.		
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? **Impact NO-2:** Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?	**MM NO-2**: The following specific measures are required to ensure that impacts associated with concurrent operation of the aggregates processing plant, mine, and other activities are less than significant at Receiver 8: 1. Plant area noise at Receiver 8 shall be reduced to less than the Fresno County Noise Control Ordinance thresholds by implementing the following noise control measures: a. A 15-foot tall earthen berm shall be constructed near the Project western boundary in the vicinity of Receiver 8. The berm shall extend laterally to the extents shown on DEIR Figure 2-7. b. Prior to commencement of night-time operation, sound curtains shall be constructed adjacent to the noisiest aggregate plant equipment (i.e. crushers) in order to provide additional shielding in the direction of Receiver 8. The curtains are estimated to result in an 8 dBA reduction in noise from the aggregate plant. 2. Following implementation of the noise control measures identified in Item 1 above, noise tests	**NO-2**: Prior to nighttime operation of the aggregates plant, the operator shall install the 15-foot berm, install sound curtains, and provide noise measurements to the County that show noise levels at Receiver 8 to be less than Fresno County Noise Standards with the aggregates plant in operation. In the event the measured ambient noise level exceeds the noise level standard, the standard shall be adjusted so as to equal the ambient noise level. Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	shall be conducted to confirm effectiveness of the control measures and compliance with the County Noise Control Ordinance exterior noise standards.		
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	**MM NO-3:** The Project shall designate an individual to be the contact person for noise complaints. This individual shall have access to a noise meter and be available to measure noise levels and confirm compliance with the County noise ordinance.	**NO-3**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
TRANSPORTATION AND TRAFFIC			
Impact TRANS-1: Would the Project conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?	**MM TRANS-1**: The Project Applicant shall pay proportional fair share contributions towards the required identified improvements. (*Please refer to Section 3.12.6.8 of the DEIR for explanation of the County and Caltrans fair share formulas and Tables 3.12-16 through 3.12-18 for fair share percentages*). The Project Applicant shall enter into traffic mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements). The traffic mitigation agreements shall establish the exact payment amounts and thresholds that define the timing of the required payments. (*The required improvements are listed on pages 3.12-63 through 3.12-68 of the DEIR*).	**TRANS-1**: The Applicant shall enter into traffic mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements). Fair share payments shall be made based on the schedule(s) to be detailed in the traffic mitigation agreements.	California Department of Transportation; Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
Impact TRANS-2: Would the Project conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?			
Impact TRANS-4: Would the Project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	**MM TRANS-2:** The Project applicant shall make the following improvements ***prior to any product being shipped from the Project site***: <u>Project Driveway at Goodfellow</u> • Eastbound left turn and westbound right turn at the Project Driveway at Goodfellow Avenue. • Westbound acceleration lane for trucks exiting the site.	**TRANS-2**: The Applicant shall construct the improvements prior to any product being shipped from the Project site. Compliance through annual County Mine Inspections	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact TRANS-7: Would truck traffic generated by the Project result in the Traffic Index (TI) increasing by a factor of 0.5?	**MM TRANS-3:** The Project shall contribute its fair share cost for the purposes of improving the structural section of the impacted street segments. <u>Central Avenue</u> • McCall Avenue and Bethel Avenue • Bethel Avenue and Academy Avenue • Academy Avenue and Newmark • Newmark Avenue and Riverbend Avenue	**TRANS-3**: The Applicant shall enter into Traffic Index mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements. Fair share payments shall be made based on the schedule(s) to be detailed in the mitigation agreements. NOTES: The following Notes reference mandatory requirements of Fresno County or other Agencies and are provided as information to the Project Applicant.			
1.	This Use Permit will become void, unless there has been substantial development within two years of the effective date of this approval		
2.	Prior to occupancy, the Applicant shall complete and submit either a Hazardous Materials Business Plan or a Business Plan Exemption form to the Fresno County Department of Community Health, Environmental Health Division. Contact the Certified Unified Program Agency at (559) 445-3271 for more information.		
3.	Pursuant to the provision identified in Zoning Ordinance Section 858.E.4, a Site Plan Review shall be submitted and approved for the entire area shown for the mining and reclamation plan prior to commencing mining or building.		
4.	All hazardous waste shall be handled in accordance with requirements set forth in the California Health and Safety Code, Chapter 6.5. This chapter discusses proper labeling, storage and handling of hazardous wastes.		
5.	The Applicant shall adhere to all the requirements identified in Section 858 of the Fresno County Zoning Ordinance.		
6.	A Storm water pollution prevention plan shall be submitted to the U.S. Environmental Protection Agency and administered by the California State Regional Water Quality Control Board.		
7.	Because the proposed project includes land disturbances of more than five acres, the Applicant		

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	will be required to obtain a National Pollution Discharge Elimination System (NPDES) General Construction Storm Water Permit from the Regional Water Quality Control Board.		
8.	The Applicant shall adhere to San Joaquin Air Pollution Control District Regulation VIII – Fugitive Dust Rules. The Applicant shall also adhere to the Districts permitting requirements which include Permit to Operate (PTO) and Authority to Construct (ATC).		
9.	The processing plant and ready-mix plant shall annually renew their air quality permits and comply with their conditions.		
10.	The operator shall comply with all applicable Air Resources Board and San Joaquin Valley Air Pollution Control District regulations related to diesel-fueled trucks and equipment, which may include among others: (1) meeting more stringent emission standards; (2) retrofitting existing engines with particulate traps; (3) use of low sulfur fuel; and (4) use of alternative fuels or equipment.		
11.	The Applicant shall adhere to the provisions set forth by the Office of Mine Reclamation. These provisions include regulations for compliance, reporting, and financial assurances.

AGENDA
February 26, 2015
- Plaza Ballroom -

8:45 a.m. - CALL TO ORDER

INTRODUCTION
Explanation of the REGULAR AGENDA process and mandatory procedural requirements. Staff Reports are available on the table near the room entrance.

PLEDGE OF ALLEGIANCE

ROLL CALL

REGULAR AGENDA

1. **PUBLIC PRESENTATIONS** (This portion of the meeting is reserved for persons desiring to address the Planning Commission on any matter within the Commission's jurisdiction and not on this Agenda.)

2. **2014 FRESNO COUNTY GENERAL PLAN ANNUAL PROGRESS REPORT** filed by **FRESNO COUNTY**, to inform the Planning Commission, Board of Supervisors, and County residents on the status of implementing the County General Plan, as well as Planning activities for the unincorporated County.

   -Contact person, Mohammed Khorsand (559) 600-4022, email: mkhorsand@co.fresno.ca.us

   -Staff Report Included

3. **UNCLASSIFIED CONDITIONAL USE PERMIT APPLICATION NO. 3390** filed by **RIVERBEND SAND AND GRAVEL, LLC**, proposing to certify and make related findings on **ENVIRONMENTAL IMPACT REPORT NO. 6606 (State Clearinghouse No. 2013071097)** prepared for the project and approve **UNCLASSIFIED CONDITIONAL USE PERMIT APPLICATION NO. 3390** filed by **RIVERBEND SAND AND GRAVEL, LLC**, proposing to mine 619 acres of a combined 833 acres of property. The remaining 214 acres, including the entire existing riparian habitat along the Kings River, are excluded from the project. The project site is currently occupied by walnut and olive orchards and grape vineyards with several farm residences nearby. Reclamation of the project site will create approximately 268 acres of reclaimed farmland and approximately 351 acres of open space, riparian and open water wildlife habitat. Anticipated annual processing of material would be 1.6 million tons per year with annual sales at approximately 1.25 million tons per year. The 619-acre project is located in unincorporated Fresno County, approximately 1.5 miles southeast of the City of Sanger, between the Kings River and Riverbend Avenue. East Goodfellow Avenue bisects the

Project site, which is composed of seven parcels. The project site is located in Township 14 South, Range 22 East, Sections 25 and 36; Township 14 South, Range 23 East, Sections 19, 30 and 31; and Township 15 South, Range 22 East, Section 1 (Mount Diablo Baseline and Meridian) on the *Sanger* and *Wahtoke* 7.5-minute U.S. Geological Survey (USGS) topographic quadrangles (SUP. DIST.: 4) (APNs: 333-160-01; 332-071-53, 52; 333-061-04, 05; 350-041-12; 360-020-20).

-Contact person, Briza Sholars (559) 600-4207, email: bsholars@co.fresno.ca.us

-Staff Report Included -Individual Noticing

4. **INFORMATION/DISCUSSION ITEM:**

Report from staff on prior Agenda Items, status of upcoming Agenda, and miscellaneous matters.

-Contact person, Eric VonBerg (559) 600-4569, email: evonberg@co.fresno.ca.us

Requests for disability-related modification or accommodation reasonably necessary in order to participate in the meeting must be made to Suzie Novak, Planning Commission Clerk, by calling (559) 600-4497 or email knovak@co.fresno.ca.us, no later than the Monday preceding the meeting by 9:00 a.m.

Thanks!

Yikes we need some money.

I will ask the applicant for $10,000 for staff time and the final deliverable deposit of $49,284.

The $5,700. was for Extra Services for the consultant.

The final consultant invoice should be coming in June after the Board.

Regards, Briza

May 13, 2015

06-FRE-180-74.56
Riverbend Sand and Gravel Project
UCUP No. 3390

Ms. Debbie Poochigian
Supervisor
County of Fresno
2281 Tulare Street, Room 300
Fresno, CA 93721

Dear Chairperson Poochigian:

As you are aware, aggregate resources play a vital role in our efforts to build and improve our State's infrastructure. Indeed, our State's mineral resource development is essential to our economic well-being, as well as our intentions to grow more responsibly and provide the safest, fastest, and most efficient transportation options possible. While it is important that we find ways to meet our current needs for construction materials, we must also anticipate future demand and expand our aggregate supply in an environmentally appropriate and culturally circumspect manner. In doing so, we prepare our future generations to navigate the challenges that our State will face as population increases and accessible resources grow scarce.

Throughout the State, attention is being given to what is increasingly seen as an urgent resource issue. The recently enrolled Assembly Bill 566 (Galgiani, 2011) codified several legislative findings, among them that mineral extraction is essential to the needs of society, and that the development of local mineral resources is vital in reducing truck emissions in our State.

The California Department of Transportation (Caltrans) continues to coordinate with public decision-makers, the construction industry, and government officials in exploring opportunities to improve the reclamation and permitting processes and increase California's aggregate supply. While the pressure for resources has eased for the last three years due to a sharp decline in residential construction, the transportation sector continues to build projects and the housing market is showing signs of regaining strength. This is not a time to relax our efforts, but to redouble them in anticipation of full economic recovery.

In the last five years, Caltrans has delivered approximately 3,085 highway projects worth $17.9 billion that were moved into construction. There are currently 600 construction contracts statewide value at $10.7 billion. Highway projects are only one part of the story, however, as local and regional agencies continue to maintain and improve the roads in their jurisdictions the aggregate needs will continue to grow.

In addition to the outlay of traditional transportation agencies, the California High Speed Rail Authority has broken ground on its first Construction Package (CP1) that will begin major activities

in August of this year. This section, from Merced to Bakersfield, will require over five million tons of sand, gravel, and crushed stone, which is about four percent of the total production that the State saw in 2009. There will be subsequent Construction packages following this CP1 package that will begin major activities in the next year.

With the passage of SB 397 (Liu, 2009) and SB 378 (Steinberg, 2008), Caltrans and local transportation agencies were challenged to conceive of new ways to reduce greenhouse gas (GHG) emissions while providing world class transportation facilities for our constituents. The statewide modal plans and Regional Transportation Plans, which shape California's transportation future, outline extensive improvements to the current system. Yet, between long truck hauls averaging 50 miles and international importing of materials, the GHG impact of aggregate delivery continues to mount. An increased aggregate reserve that is closer to construction sites is key to addressing our dire air quality and climate change concerns.

While we are continuing to work with local and State Agencies to help gain approval of new aggregate mining sites throughout the state, there is still much to be done to insure that these essential resources will be available for development in the far reaches of our long-range plans. I would like to encourage you to explore new strategies to increase aggregate reserves in your region, including education of local stakeholders, early public engagement, and willingness to collaborate in the mitigation of environmental and transportation system impacts from aggregate production and distribution.

The attached Fact Sheet provides information on the potential economic, social, air quality, and environmental factors that are affected by local aggregate supply. This is a good starting point for collaborative discussions that aim to find solutions to issues regarding aggregate availability. Also attached is a map that shows statewide aggregate supply and demand.

Finally, I would like to invite you to contact Michael Navarro, Chief of Transportation Planning, who is available upon request to speak at public meetings in your area regarding the importance of increasing California's aggregate supply in an environmentally sustainable manner. While the permitting of new mining facilities must be done with attention to all of the possible impacts to surrounding areas, Caltrans encourages the development of new sources for construction aggregate. Our economy and our environment depend on it.

Sincerely,

Sharri Bender Ehlert

SHARRI BENDER EHLERT
District 6 Director

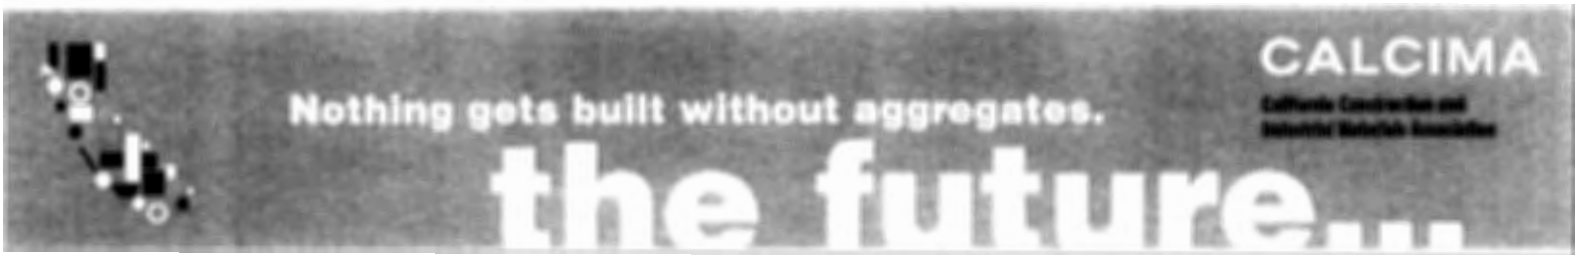
Department of Conservation Map Sheet 52, *Aggregate Sustainability in California*



California's Permitted Aggregate Supplies Are *Running Out*

Time is running out for local, low cost, and uninterrupted aggregate supplies

Supplies of sand and gravel and crushed stone throughout California are being depleted much faster than replacement resources are being permitted. Shortages negatively affect California's quality of life, economy, and environment.

Some regions are running out in a few years, or have already run out. The State Geologist estimates that statewide there may only be a 16 year supply at current rates of consumption. There are 4 areas with less than a 10 year supply. Here are a few examples, based on percentage of expected 50 year demand:

- **North Bay Area – 8%**
- **Western San Diego County – 17%**
- **Fresno – 11%**
- **San Fernando Valley & Ventura County – 19%**

These estimates do not take into account accelerated construction from infrastructure bonds in November 2006, or from an earthquake or other natural disaster.

What are aggregates and why does it matter if they're running out?

- Sand and gravel and crushed stone are "Aggregates." Over 90% are used in construction. Steady supplies are necessary for constructing and maintaining roads, housing, schools, buildings, and all other public and private infrastructure. Asphalt pavements and concrete are mostly made of aggregates.

- Approximately 43% of all aggregates are used in public works projects – our public roads, highways, buildings, bridges, airports, sewer systems, schools, and other structures.
- An average home requires nearly 100 tons of aggregates. After adding neighborhood infrastructure, a 1500 sq. ft. home requires 328 tons of sand and gravel and 202 cubic yards of concrete.
- Californians use an average of 5-7 tons per person per year of aggregates. Using conservative population estimates for the next 20 years, California will require 5 billion tons of aggregates, or an average of 250 millions tons per year.
- Supplying aggregates is a local business. The farther away aggregates are shipped, the costlier they are for customers and taxpayers. Long distance shipping impacts the economy and the environment.
- The permitting process can be lengthy, often taking years to permit an operation. Considering that aggregate shortages have the ability to severely imperil the state's infrastructure – our economic prosperity – improved permitting processes are urgently needed.

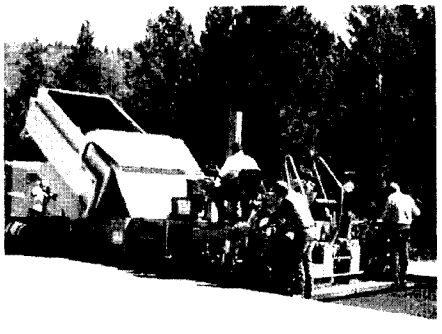
construction & aggregates

Build California's Economy

Producing aggregates and industrial minerals is only part of the picture... Reclaiming, restoring, and reusing land is the rest



Aggregates and Construction Go Hand-in-Hand

- California's aggregates industry supplies sand, gravel, and crushed stone for local construction. Aggregates are necessary for making ready-mixed concrete, asphalt, and many other building materials. Millions of tons of aggregates are required to build and maintain our infrastructure: roads, highways, homes, buildings, schools, and public works.

Economic Impacts

- Aggregates and construction are California's 4th largest industry.
- Statewide, the aggregates and construction industry's total economic impact has been as much as $230 billion – 16% of all California industry output – in recent years.
- Aggregates and construction contribute $13.8 billion to other major California industries.
- In recent years, over 1.8 million California jobs were supported by the aggregates and construction industry.

- California workers earned over $86 billion from aggregate and construction activities.
- Compared to other industries, salary packages for California aggregate workers alone rank 4th highest overall.
- The aggregates and construction industry's economic impacts benefit local California economies.
- Every Californian uses nearly 5-7 tons of aggregates per person per year. The State Department of Conservation forecasts a 70% shortfall of construction aggregates statewide – 13 billion tons – over the next 5 decades.

Nothing gets built without aggregates.

CALCIMA

fast facts

About California's Aggregate Industry...

- **California is the nation's leading producer of construction aggregates.**

- **Aggregates are key to construction:** Sand, gravel, and crushed stone are the first step in the construction process. They are used for making cement, concrete, and asphalt, as well as many other building materials. Without aggregates, construction can't commence.

- **Every Californian uses over 5-7 tons of construction aggregates annually.** Statewide, that is a total of, on average, 229 million tons of annual production (based on 1999-2007).[1]

- **In recent years, the aggregate and construction industries supported 1.8 million jobs and California workers earned over $86 billion from aggregate and construction activities.** Combined economic impact of the aggregate and construction industries in California makes it the fourth largest industry in California.[2]

- **Nationwide, about 43% of all construction aggregates are for public works projects paid by taxpayers.**[3]

- **California sand and gravel producers reclaim land to 44 different uses.** The most common usage is conservation – open space, wildlife habitat, and wetlands – followed by recreation and agriculture. During the 1990s, all types of reclamation statewide exceeded 33,000 acres, a size greater than the land area of the City and County of San Francisco.[4]

- **Transporting from shorter distances saves money.** The cost of trucking aggregates increases 15 cents per ton for every mile hauled. Given that even one mile of a six lane highway requires over 110,000 tons of aggregates, each mile of transport would add one-half million dollars to the base cost of the aggregates for such a project.[5]

- **Transporting from shorter distances protects the environment and reduces traffic.** If trip length can be reduced by even 15 miles, then diesel fuel consumption can be reduced by 44 million gallons annually, truck emissions by 835 tons per year and greenhouse gases by 400,000 metric tons![6]

- **Aggregate supplies for many California population centers are running out.** A recent state study indicates we may have only a 16 year supply at current rates of consumption. In particular, 4 areas of the state may have less than a 10 year supply. These supply deficiencies will directly affect California's infrastructure and quality of life.[7]

- **Recycled concrete and asphalt help build sustainable communities.** California's aggregate producers are in the forefront for promoting the use of recycled construction materials. Sand and gravel operators help direct these materials from landfills by crushing millions of tons of used concrete and asphalt pavement into construction aggregates.

INTRODUCTION

Sand, gravel, and crushed stone are "construction materials." These commodities, collectively referred to as aggregate, provide the bulk and strength to Portland Cement Concrete (PCC), Asphaltic Concrete (AC, commonly called "black top"), plaster, and stucco. Aggregate is also used as road base, subbase, railroad ballast, and fill. Aggregate normally provides from 80 to 100 percent of the material volume in the above uses.

The building and paving industries consume large quantities of aggregate and future demand for this commodity is expected to increase throughout California. Aggregate materials are essential to modern society, both to maintain the existing infrastructure and to provide for new construction. Therefore, aggregate materials are a resource of great importance to the economy of any area. Because aggregate is a low unit-value, high bulk weight commodity, it must be obtained from nearby sources to minimize economic and environmental costs associated with transportation. If nearby sources do not exist, then transportation costs can quickly exceed the value of the aggregate. Transporting aggregate from distant sources results in increased construction costs, fuel consumption, greenhouse gas emissions, air pollution, traffic congestion, and road maintenance.

To give an idea of the scale of these impacts, from 1981 to 2010, California consumed an average of about 180 million tons of construction aggregate (all grades) per year. Moving in 25 ton truckloads that is over 7.2 million truck trips per year. With an average 25 mile haul (50 mile round trip) that amounts to more than 360 million truck miles traveled, almost 47 million gallons of diesel fuel used, and more than 520,000 tons of carbon dioxide emissions produced annually. If the haul distance is doubled to 50 miles (100 mile round trip) the numbers double to 721 million truck miles traveled, almost 94 million gallons of diesel fuel used, and over 1 million tons of carbon dioxide emissions produced.

Land-use planners and decision makers in California are faced with balancing a wide variety of needs. Increasingly, as existing permitted aggregate supplies are depleted, local land-use decisions regarding aggregate resources can have regional impacts that go beyond local jurisdictional boundaries.

These factors, universal need, increasing demand, the economic and environmental costs of transportation, and multiple land-use pressures make information about the availability and demand for aggregate valuable to land-use planners and decision makers charged with planning for a sustainable future for California's citizens.

California Geological Survey (CGS) Map Sheet 52, 1:1,100,000-scale, and this accompanying report provide general information about the current availability of, and future demand for, California's permitted aggregate reserves. Map Sheet 52 was originally published in 2002 (Kohler 2002) and subsequently updated in 2006 (Kohler 2006). Map Sheet 52 (2012) is an update of the version published in 2006.

Map Sheet 52 updates data from reports compiled by the CGS for 31 aggregate study areas throughout the state. These study areas cover about 30 percent of the state and provide aggregate for about 85 percent of California's population. This report is divided into three parts: Part I provides data sources and methods used to derive the information presented; Part II compares the updated 2012 Map Sheet 52 to the prior (2006) map; and, Part III is an overview of construction

aggregate. All aggregate data and any reference to "aggregate" in this report and on the map pertain to "construction aggregate," defined for this report as alluvial sand and gravel or crushed stone that meets standard specifications for use in PCC or AC unless otherwise noted.

The estimates of permitted resources, aggregate demand, and years of permitted reserves remaining presented on Map Sheet 52 (2012) and in this report are based on conditions as of January 1, 2011 and do not reflect changes, such as production, mine closures, or new or expanded permits, that may have occurred since that time. Although the statewide and regional information presented on the map and in this report may be useful to decision-makers, it should not be used as a basis for local land-use decisions. The more detailed information on the location and estimated amounts of permitted and non-permitted resources, and future regional demands contained in each of the aggregate studies employed in the compilation of Map Sheet 52 should be used for local land-use and decision making purposes.

PART I: DESCRIPTION OF MAP SHEET 52, AGGREGATE SUSTAINABILITY IN CALIFORNIA

Map Sheet 52 is a statewide map showing a compilation of data about aggregate availability collected over a period of about 33 years and updated to January 1, 2011. The purpose of the map is to compare projected aggregate demand for the next 50 years with currently permitted aggregate reserves in 31 regions of the state. The map also shows the projected years of permitted reserves remaining and highlights regions where there is less than 10 years of permitted aggregate supply remaining. The following sections describe data sources and methodology that were used in the development of the map.

Mineral Land Classification Reports and Aggregate Studies

Data regarding aggregate reserves and projected aggregate demand shown on Map Sheet 52 are updated from a series of mineral land classification reports published by CGS between 1981 and 2010 (see Appendix). They were prepared in response to California's Surface Mining and Reclamation Act of 1975 (SMARA) that requires the State Geologist to classify land based on the known or inferred mineral resource potential of that land. SMARA, its regulations and guidelines, are described in Special Publication 51(Division of Mines and Geology, 2000).

The Mineral Land Classification process identifies lands that contain economically significant mineral deposits. The primary goal of mineral land classification is to ensure that the mineral resource potential of lands is recognized and considered in land-use planning. The classification process includes an assessment of the quantity, quality, and extent of aggregate deposits in a study area.

Mineral land classification reports may be specific to aggregate resources, may contain information about both aggregate and other mineral resources, or they may only contain information on minerals other than aggregate. Reports that focus on aggregate include aggregate resource classification and mapping, estimates of permitted and non-permitted aggregate resources, projected 50-year demand for aggregate resources, and an estimate of when the permitted reserves will be depleted. Map Sheet 52 is a statewide updated summary of 50-year demands and permitted resource calculations for all SMARA classification reports pertaining to construction aggregate.

Mineral land classification studies for aggregate may use either a Production-Consumption (P-C) region or a County as the study area boundary. A P-C region is one or more aggregate production districts (a group of producing aggregate mines) and the market area they serve. P-C Regions sometimes cross county boundaries. Mineral land classification reports include information from one or more P-C regions, or from a county. For ease in discussion, the area covered by each P-C region or county aggregate study is referred to as an "aggregate study area". These areas are shown at the lower left-hand corner of the map along with their respective report number and publication date. It should be noted that a report may include more than one aggregate study area.

SMARA guidelines recommend that the State Geologist periodically review the mineral land classification in defined study regions to determine if new classifications are necessary. The projected 50-year forecast of aggregate demand in the region may also be revised. Fourteen

updated classification studies have been completed since the program began. Updated studies were completed by county:

- Los Angeles,
- Orange, and
- Ventura

or by P-C region

- South San Francisco Bay,
- Monterey Bay,
- Western San Diego County,
- Fresno, Palm Springs,
- Stockton-Lodi,
- Claremont-Upland,
- North San Francisco Bay (in progress) ,
- San Bernardino,
- San Gabriel Valley,
- Bakersfield, and
- San Luis Obispo-Santa Barbara.

Since Los Angeles and Ventura counties had more than one P-C region, separate updated 50-year forecasts were made for each region. The Los Angeles County update (OFR 94-14) includes the San Fernando Valley, San Gabriel Valley, Saugus-Newhall, and the Palmdale P-C regions. The San Gabriel Valley P-C Region has since been updated separately. The Ventura County update (OFR 93-10) included the Western Ventura and the Simi Valley P-C regions. The index map of aggregate studies shown in the lower left hand corner of Map Sheet 52 shows the latest reports that cover an aggregate study area. Earlier reports covering the same areas or portions of areas are referenced in the Appendix with an asterisk ("*").

Fifty-Year Aggregate Demand Forecast

The fifty-year aggregate demand forecast for each of the aggregate study areas is presented on Map Sheet 52 as a pie chart (See *Fifty-Year Aggregate Demand Compared to Permitted Aggregate Reserves* section), and also is presented in Table 1 of this report. The demand information may be new, or updated from previously published mineral land classification reports. The demand forecast information depicted on Map Sheet 52 is for the period January 1, 2011 through December 2060.

The aggregate study areas with the greatest projected future need for aggregate are South San Francisco Bay, Temescal Valley-Orange County, and Western San Diego County. Each is expected to require more than a billion tons of aggregate by the end of 2060. Other areas with projected high demands are San Gabriel Valley, and San Bernardino. Each of these areas is projected to need more than 800 million tons of aggregate in the next 50 years. Aggregate study areas having smaller demands generally are located in rural, less populated areas. The aggregate study areas of El Dorado County, Glenn County, Nevada County, Shasta County, Southern Tulare

County, Tehama County, and Western Merced County are all projected to require 100 million tons of aggregate or less over the next 50 years.

Methodology

Before selecting a method for predicting a 50-year aggregate demand, historical aggregate use was compared to such factors as housing starts, gross national product, population, and several other economic factors. It was found that the only factor showing a strong correlation to historical aggregate use was population change. Consequently, a per capita aggregate consumption forecast model is used for most of the aggregate study projections. This method of forecasting aggregate consumption benefits from its simplicity and the availability of population forecast data. The California's Department of Finance (DOF) makes 50-year county population forecasts using U.S. census data.

The steps used for forecasting California's 50-year aggregate needs using the per capita consumption model are: 1) collecting yearly historical production and population data for a period of years ranging from the 1960s through 2010; 2) dividing yearly aggregate production by the population for that same year to determine annual historical per capita consumption; 3) projecting yearly population for a 50-year period from the beginning of 2011 through 2060; and, 4) multiplying each year of projected population by the average historical per capita consumption and adding the results for each year to obtain the 50-year aggregate demand. It should be noted that the years chosen to determine an average historical per capita consumption may differ depending upon historical aggregate use for that specific region.

Effectiveness of the Per Capita Consumption Model

The assumption that each person will use a certain amount of aggregate every year is a simplification of actual usage patterns, but overall, an increase in the population leads to the use of more aggregate. Over long enough periods, perhaps 20 to 30 years or more, the random impacts of major public construction projects and economic recessions tend to be smoothed and consumption trends become similar to historic per capita consumption rates. Per capita consumption is a commonly used and accepted national, state, and regional measure for purposes of forecasting.

The per capita consumption model has proved to be effective for projecting aggregate demand in major metropolitan areas. The Western San Diego and the San Gabriel Valley P-C regions are examples of how well the model works, having only a two percent (over 14 years) and an eight percent (over 29 years) difference, respectively, in actual versus projected aggregate demand (Miller, 1996, Kohler, 2010). However, the per capita model may not work well in county aggregate studies or in P-C regions that import or export a large percentage of aggregate resulting in a low correlation between P-C region production and population. In such areas, projections may be made based on historical production or multiple projections based on differing assumptions may be used to better characterize a range of future demand. For regions that export large amounts of aggregate to neighboring P-C regions, projections are based on an historical production model where 50-year aggregate demand is determined by extending a best-fit line of historical aggregate production data for a county or region. This model was used to project Yuba City-Marysville's 50-year demand because the region exports about 70 percent its aggregate into neighboring areas such as Sacramento County and Placer County. In addition, the 50-year demand

for Glenn and Tehama counties, the Palmdale P-C region, and the Temescal Valley-Orange County area was also projected using this method.

Permitted Aggregate Reserves

Approximately 4 billion tons of permitted aggregate reserves lie within the 31 aggregate study areas shown on Map Sheet 52. Permitted aggregate reserves are aggregate deposits that have been determined to be acceptable for commercial use, exist within properties owned or leased by aggregate producing companies, and have permits allowing mining of aggregate material. A "permit" is a legal authorization or approval by a lead agency, the absence of which would preclude mining operations. Although some permitted reserves face legal challenges, these reserves are included in this study pending resolution of those challenges. In California, mining permits usually are issued by local lead agencies (county or city governments). Map Sheet 52 shows permitted aggregate reserves as a percentage of the 50-year demand on each pie chart (See *Fifty-Year Aggregate Demand Compared to Permitted Aggregate Reserves* section). Beneath the study area name located next to its corresponding pie chart is the amount of permitted resource in tons along with the amount of 50-year demand. These figures are also given in Table 1. Tonnages are not given for Western Merced County and for the southern Tulare County to preserve proprietary company data.

Permitted aggregate resource calculations shown on the map and in Table 1 initially were determined from information provided in reclamation plans, mining plans and use permits issued by the lead agencies. When information was inadequate to make reliable independent calculations, CGS staff used resource estimates provided by mine operators or owners. These data were checked against rough calculations made by CGS staff, and any major discrepancies were discussed with the mine operators or owners. Permitted resource calculations have been updated to account for production from 2006-2010 and are current as of the beginning of 2011.

Fifty-year Aggregate Demand Compared to Permitted Aggregate Reserves

Fifty-year aggregate demand compared to the currently permitted aggregate reserves is represented by a pie chart for each of the 31 aggregate study areas shown on Map Sheet 52. Each pie chart is located in the approximate center of the aggregate study area it represents. There are four different sizes of charts, each size representing a 50-year demand range. The smallest pie chart represents 50-year demands ranging from 25 million to 200 million tons, while the largest chart represents demands of over 800 million tons. The amount of 50-year demand in tons is shown on the map along with the amount of permitted reserves beneath the study area name located next to its corresponding pie chart (permitted reserves, left / 50-year demand, right). The whole pie represents the total 50-year aggregate demand for a particular aggregate study area. The blue portion of the pie represents the permitted aggregate resource (shown as a percentage of the 50-year demand) while the purple-colored portion of the pie represents that portion of the 50-year demand that will not be met by the currently permitted reserves. For example, if the blue portion is 25 percent and the purple portion is 75 percent of a pie chart that represents a total demand of 400 million tons, the permitted reserves are 100 million tons, and the region will need an additional 300 million tons of aggregate to supply the area for the next 50 years. The pie representing the Placer County aggregate study area (north-central California) is completely colored blue showing permitted aggregate reserves are equal to or greater than the area's 50-year aggregate demand.

AGGREGATE STUDY AREA [1]	50-Year Demand (million tons)	Permitted Aggregate Reserves (million tons)	Permitted Aggregate Reserves Compared to 50-Year Demand (percent)	Projected Years Remaining
Bakersfield P-C Region	438	143	33	21 to 30

Yuba City-Marysville P-C Region	403	392	97	41 to 50
Total	**12,047**	**4,067**	**34**	

[1] Aggregate study areas follow either a Production-Consumption (P-C) region boundary or a county boundary. A P-C region includes one or more aggregate production districts and the market area that those districts serve. Aggregate resources are evaluated within the boundaries of the P-C Region. County studies evaluate all aggregate resources within the county boundary.

[2] The County study has been divided into two areas, each having its own production and market area. A separate permitted resource calculation and 50-year forecast is made for each area.

[3] Two P-C regions have been combined into one study area.

Table 1. Comparison of 50-year demand to permitted aggregate reserves for aggregate study areas as of January 1, 2011. (Study areas with ten or fewer years of permitted reserves are in bold type).

Except for Placer County, all of the aggregate study areas have less permitted aggregate reserves than they are projected to need for the next 50-years. Nineteen of the 31 aggregate study areas have less than half of the permitted reserves they are projected to need in the next 50 years.

Estimates of Years of Permitted Reserves Remaining

New to the 2012 update, the right hand column of Table 1 indicates the projected years of permitted reserves remaining for the various aggregate study areas. Calculations of depletion years are made by comparing the currently permitted reserves to the projected annual aggregate consumption in the study area on a year-by-year basis. This is not the same as dividing the total projected 50-year demand for aggregate by 50 because, as population increases, so does the projected annual consumption of aggregate for a study area. Data are presented as ranges; 10 or fewer, 11-20, 21-30, 31-40, 41-50, and more than 50 years. This information is included on the map beneath the study area name along with the permitted reserves and the projected 50-year demand. These estimates are based on conditions as of January 1, 2011 and do not reflect changes, such as new or expanded permits, that may have occurred since that time.

Four of the 31 aggregate study areas – Western San Diego County, Sacramento County, Fresno County, and the San Fernando Valley-Saugus Newhall area – are projected to have less than 10 years of permitted aggregate reserves remaining as of January 1, 2011. They are highlighted by red halos around the pie charts on Map Sheet 52 and appear in bold type in Table 1.

Thirteen of the 31 aggregate study areas have between 11 and 20 years of permitted aggregate reserves remaining. Several of these including the North and South San Francisco Bay study areas and the Palmdale, San Bernardino, San Gabriel Valley, Temescal Valley-Orange County and Ventura County study areas are in or adjacent to urban areas with high aggregate demands.

Eight of the 31 aggregate study areas have between 21 and 30 years of permitted aggregate reserves remaining, three have more than 31 years remaining, two have more than 41 years and one (Placer County) has more than 50 years of permitted reserves remaining.

These numbers are estimates and the actual lifespan of existing permitted reserves in a study area can be influenced by many factors. In periods of high economic growth, demand may increase, shortening the life of permitted reserves. Large projects, such as the construction or maintenance of major infrastructure, or rebuilding after a disaster such as an earthquake could also deplete permitted reserves more rapidly. Increased demand from neighboring regions with dwindling or depleted permitted reserves may also accelerate the depletion of permitted reserves in a study area. Conversely, a slow economy may reduce demand for a period of time, extending the life of permitted reserves, or new or expanded permits may be granted in a study area increasing the permitted reserves and the lifespan of permitted reserves in that area.

Non-Permitted Aggregate Resources

Non-permitted aggregate resources are deposits that may meet specifications for construction aggregate, are recoverable with existing technology, have no land use overlying them that is incompatible with mining, and currently are not permitted for mining. While not shown on Map Sheet 52, non-permitted aggregate resources are identified and discussed in each of the mineral land classification reports used to compile the map (See Appendix). There are currently an

estimated 74 billion tons of non-permitted construction aggregate resources in the 31 aggregate study areas shown on the map. While this number seems large, it is unlikely that all of these resources will ever be mined because of social, environmental, or economic factors. The location of aggregate resources too close to urban or environmentally sensitive areas can limit or prevent their development. Resources may also be located too far from a potential market to be economic. In spite of such possible constraints, non-permitted aggregate resources are the most likely future sources of construction aggregate potentially available to meet California's continuing demand. Factors used to calculate non-permitted resource amounts and to determine the aerial extent of these resources, are given in each of the aggregate classification reports listed in the Appendix.

Aggregate Production Areas and Districts

Aggregate production areas are shown on the map by five different sizes of triangle. A triangle may represent one or more active aggregate mines. The relative size of each symbol corresponds to the amount of yearly production for each mine or group of mines. Yearly production was based on data from the Department of Conservation's Office of Mine Reclamation (OMR) records for the calendar year 2010. The smallest triangle represents a production area that produces less than 0.5 million tons of aggregate in 2010. These triangles represent a single mine operation. About 90 percent of the production areas on the map fall into this category, and many are located in rural parts of the state. The largest triangle represents aggregate mining districts with production of more than 5 million tons in 2010. Only two aggregate production districts fall into this category – the Temescal Valley District in western Riverside County and the San Gabriel Valley District in Los Angeles County. It should be noted that, because of the economic slowdown from 2007 to 2010, the tonnages represented by the triangles on the 2012 map are different from those on the 2006 map.

PART II COMPARISONS BETWEEN THE PRIOR (2006) AND THE UPDATED (2012) MAP SHEET 52

The prior version of Map Sheet 52 was completed and published in 2006. Permitted aggregate resource data for that map were current as of January 1, 2006. Work conducted for that study took place during 2006. The latest aggregate production and location data available for the prior map were from 2005 records. The aggregate demand projections for the prior map were based on DOF county population projections from the 2000 U.S. census. Fifty-year aggregate demand from January 1, 2006 through the year 2055 was determined for 31 study areas.

This updated Map Sheet 52 was completed and published in 2012. **Permitted aggregate resource data for the updated map is current as of January 1, 2011.** All work conducted for the updated study also took place during 2012. The latest aggregate production and location data available for the updated map are from 2010 records. The aggregate demand projections for the updated map were based on DOF county population projections from the 2010 U.S. census. Fifty-year aggregate demand from January 1, 2011 through the year 2060 was determined for 31 study areas.

Changes have occurred in both aggregate supplies (permitted aggregate reserves) and in 50-year aggregate demand in the five years since the prior Map Sheet 52 update was completed. Changes in permitted aggregate reserves between the prior Map Sheet 52 (2006) and updated Map Sheet 52 (2012) are shown in Table 2. Table 3 compares the changes in 50-year demand between Map Sheet 52 (2006) and the updated 2012 map.

Aggregate Study Area Changes

Six aggregate study areas on the original (2002) Map Sheet 52 were modified for the 2006 map, resulting in three fewer study areas. They included the Southern California P-C regions of Orange County, Temescal Valley, San Fernando Valley, Saugus-Newhall, Western Ventura County, and Simi Valley. These regions were combined into three regions when they began to run out of permitted reserves and became dependant on aggregate sources from neighboring regions. The importation of aggregate from neighboring regions typically results in longer haul distances, higher costs, and increased carbon dioxide emissions, air pollution, traffic congestion, and highway maintenance. The shift in supply area also results in more rapid depletion of permitted reserves in neighboring regions.

No additional study areas have been combined in this update. It is likely that in some future update the San Fernando Valley-Saugus Newhall aggregate study area and the Palmdale study area may be combined as permitted reserves in the San Fernando Valley-Saugus Newhall aggregate study area are depleted.

Changes in Permitted Aggregate Reserves

Twenty-four of the 31 study areas shown on the updated map experienced a decrease in permitted aggregate reserves since the 2006 map was completed (See Table 2). Included in these 24 areas are Western Merced County and Southern Tulare County. Permitted reserves for both of these county study areas cannot be shown because they are proprietary.

Table 3. Comparison of 50-year demand between Map Sheet 52, 2006 and Map Sheet 52, 2012.

Seven of the study areas shown on the updated map had increases in permitted aggregate reserves. Most of these increases are because of newly permitted or expanded mining operations. An expansion may increase the footprint of the mine or increase permitted mining depth. Significant increases exceeding 50 percent occurred in the Placer County, Glenn County, Northern Tulare County, and the North San Francisco Bay aggregate study areas (See Table 2).

Total permitted reserves for all 31 areas decreased from 4,343 million tons to 4,067 million tons – an apparent reduction of 276 million tons. Most of this reduction was because of aggregate consumption. Other potential reasons for reductions in permitted aggregate reserves include social and economic conditions leading to mine closures, regulatory changes, or natural variations in the quality of aggregate deposits. Actual production was greater but was offset in part by increases in permitted reserves in some study areas.

Changes in Fifty-Year Demand

Of the 31 study areas shown on the updated Map Sheet 52 five had increases in 50-year demand, one remained constant, and 25 showed decreases in projected 50-year demand (See Table 3). The large number of study areas with decreasing 50-year demand is due in large part to the new population projections used in forecasting. The new county population projections (State of California Department of Finance, 2012) are based on the 2010 U.S. census and project lower growth rates for much of California compared to the projections used in the previous versions of this study. Newly updated per capita consumption numbers may also have contributed to changes in projected 50-year demand.

The large increase (74 percent) in the 50-year demand for the Bakersfield study area is due to the use of newer population projections than were used in the original study and previous versions of this study.

Changes in Permitted Aggregate Reserves and Demand

Table 4 shows the percentages of permitted reserves compared to the 50-year demand for the 2006 and updated 2012 Map Sheet 52. These percentages are represented on both maps as pie charts – the blue portion of the pie depicting percentage of the 50-year demand met with current permitted reserves. Increases occurred in 14 of the 29 study areas that can be compared and no change or decreases occurred in 15 study areas.

The large increases in some of these study areas (Glenn County, North San Francisco Bay, Northern Tulare County, Placer County, Shasta County, and Stockton-Lodi) were because of new or expanded permits resulting in additional permitted aggregate reserves. Many of the small increases are not due to new or modified permits, but are a result of low production rates during the economic slowdown from 2007 to 2010 and the lower projected 50-year demand in many study areas based on updated population forecasts used in the 2012 update. Similarly those study areas with no change or small decreases may also have been influenced by these factors.

Comparison of Areas with Less than 10-Years of Permitted Aggregate Reserves

The 2012 Map Sheet 52 shows four aggregate study areas with less than a 10-year supply of permitted aggregate reserves – Sacramento County, Fresno County, San Fernando Valley-Saugus Newhall, and the Western San Diego County P-C Regions. The map shows these areas with red halos around the pie charts. Compared to the 2006 version of the map, the San Fernando Valley-Saugus Newhall study area is a new addition to this group while the North San Francisco Bay and Northern Tulare County study areas have been removed.

Table 4. Percentage of permitted aggregate reserves as compared to 50-year demand for Map Sheet 52, 2006 and Map Sheet 52, 2012.

PART III: OVERVIEW OF CONSTRUCTION AGGREGATE

Construction aggregate was the leading non-fuel mineral commodity produced in California in 2010. Valued at $1.19 billion, aggregate made up about 41 percent of California's $2.9 billion non-fuel mineral production in 2010.

Aggregate Quality and Use

Aggregate normally makes up 80 to 100 percent of the material volume in PCC and AC and provides the bulk and strength to these materials. Rarely, even from the highest-grade deposits, is in-place aggregate physically or chemically suited for every type of aggregate use. Every potential deposit must be tested to determine how much of the material can meet specifications for a particular use, and what processing is required. Specifications for PCC, AC, and various other uses of aggregate have been established by several agencies, such as the U.S. Bureau of Reclamation, the U.S. Army Corps of Engineers, and the California Department of Transportation to ensure that aggregate is satisfactory for specific uses. These agencies and other major consumers test aggregate using standard test procedures of the American Society for Testing Materials (ASTM), the American Association of State Highway Officials, and other organizations.

Most PCC and AC aggregate specifications have been established to ensure the manufacture of strong, durable structures capable of withstanding the physical and chemical effects of weathering and use. For example, specifications for PCC and concrete products prohibit or limit the use of rock materials containing mineral substances such as gypsum, pyrite, zeolite, opal, chalcedony, chert, siliceous shale, volcanic glass, and some high-silica volcanic rocks. Gypsum retards the setting time of portland cement; pyrite dissociates to yield sulfuric acid and an iron oxide stain; and other substances contain silica in a form that reacts with alkali substances in the cement, resulting in cracks and "pop-outs." Alkali reactions in PCC can be minimized by the addition of pozzolanic admixtures such as fly ash or naturally occurring pozzolanic materials. Pozzolans are siliceous or siliceous and aluminous material of natural or artificial origin that, in the presence of moisture, reacts with calcium hydroxide to form cementitious compounds.

Specifications also call for precise particle-size distribution for the various uses of aggregate that is commonly classified into two general sizes: coarse and fine. Coarse aggregate is rock retained on a 3/8-inch or a #4 U.S. sieve. Fine aggregate passes a 3/8-inch sieve and is retained on a #200 U.S. sieve (a sieve with 200 weaves per inch). For some uses, such as asphalt paving, particle shape is specified. Aggregate material used with bituminous binder (asphalt) to form sealing coats on road surfaces shall consist of at least 90% by weight of crushed particles. Crushed stone is preferable to natural gravel in asphaltic concrete (AC) because asphalt adheres better to broken surfaces than to rounded surfaces and the interlocking of angular particles strengthens the AC and road base.

The material specifications for PCC and AC aggregate are more restrictive than specifications for other applications such as Class II base, subbase, and fill. These restrictive specifications make deposits acceptable for use as PCC or AC aggregate, the scarcest and most valuable aggregate resources. Aggregate produced from such deposits can be, and commonly is, used in applications other than concrete. PCC- and AC-grade aggregate deposits are of major importance when planning for future availability of aggregate commodities because of their versatility, value, and relative scarcity.

Factors Affecting Aggregate Deposit Quality

The major factors that affect the quality of construction aggregate are the rock type and the degree of weathering of the deposit. Rock type determines the hardness, durability, and potential chemical reactivity of the rock when mixed with cement to make concrete. In alluvial sand and gravel deposits, rock type is variable and reflects the rocks present in the drainage basin of the stream or river. In crushed stone deposits, rock type is typically less variable, although in some types of deposits, such as sandstones or volcanic rocks, there may be significant variability of rock type within a deposit. Rock type may also influence aggregate shape. For example, some metamorphic rocks such as slates tend to break into thin platy fragments that are unsuitable for many aggregate uses, while many volcanic and granitic rocks break into blocky fragments more suited to a wide variety of aggregate uses. Deposit type also affects aggregate shape. For example, in alluvial sand and gravel deposits, the natural abrasive action of the stream rounds the edges of rock particles, in contrast to the sharp edges of particles from crushed stone deposits.

Weathering is the in-place physical or chemical decay of rock materials at or near the Earth's surface. Weathering commonly decreases the physical strength of the rock and may make the material unsuitable for high strength and durability uses. Weathering may also alter the chemical composition of the aggregate, making it less suitable for some aggregate uses. If weathering is severe enough, the material may not be suitable for use as PCC or AC aggregate. Typically, the older a deposit is, the more likely it has been subjected to weathering. The severity of weathering commonly increases with increasing age of the deposit.

Comparison of Alluvial Sand and Gravel to Crushed Stone Aggregate

The preferred use of one aggregate material over another in construction practices depends not only on specification standards, but also on economic considerations. Alluvial gravel is typically preferred to crushed stone for PCC aggregate because the rounded particles of alluvial sand and gravel result in a wet mix that is easier to work than a mix made of angular fragments. Also, crushed stone is less desirable in applications where the concrete is placed by pumping because sharp edges will increase wear and damage to the pumping equipment. The workability of a mix consisting of portland cement with crushed stone aggregate can be improved by adding more sand and water, but more cement must then be added to the mix to meet concrete durability standards. This results in a more expensive concrete mix and a higher cost to the consumer. In addition, aggregate from a crushed stone deposit is typically more expensive than that from an alluvial deposit due to the additional costs associated with the ripping, drilling and blasting necessary to remove material from most quarries and the additional crushing required to produce the various sizes of aggregate. Manufacturing sand by crushing is more costly than mining and processing naturally occurring sand. Although more care is required in pouring and placing a wet mix containing crushed stone, PCC made with this aggregate is as satisfactory as that made with alluvial sand and gravel of comparable rock quality. Owing to environmental concerns and regulatory constraints in many areas of the state, it is likely that extraction of sand and gravel resources from instream and floodplain areas will become less common in the future. If this trend continues, crushed stone may become increasingly important to the California market.

Aggregate Price

The price of aggregate throughout California varies considerably depending on location, quality, and supply and demand. The highest quality aggregate, and typically most costly, is that which meets the California Department of Transportation's specifications for use in Portland Cement Concrete (PCC). All prices discussed in this section are for PCC-grade aggregate at the plant site or FOB (freight on board). Transportation cost, which adds to the final cost of aggregate, is discussed in the next section.

Regional variations make it difficult to estimate the average price of PCC-grade aggregate for the state. Over the last decade, prices have varied from $20 per ton or more in areas with depleting or depleted aggregate supplies and high demands to $7 to $8 per ton in areas with abundant aggregate supplies and low to moderate demands.

In the last decade, the highest prices aggregate in the state have been in the San Diego area, where PCC-grade sand is in short supply, causing prices to range up to $20-$22 per ton and in parts of the San Francisco Bay area where sand has also been in short supply and prices have ranged from $15 to $19 per ton.

In the Los Angeles metropolitan areas prices have been in the $13 to $16 per ton range with aggregate from the sparsely populated Palmdale area at about $10 per ton. Aggregate from Palmdale is also transported to Ventura County – a haul distance of about 60 miles, and into the San Fernando Valley-Saugus Newhall area. The cost of transportation in these cases adds significantly to the final cost of the aggregate.

In the Central Valley, prices have ranged from $7 to $8 per ton in the Yuba City-Marysville area where aggregate supplies are abundant to $10 to $11 per ton in the Sacramento and Stockton-Lodi areas. In the Southern Valley, prices have been somewhat higher, about $12 per ton in the Bakersfield region and $14 to $18 per ton in the Fresno and northern Tulare areas.

Transportation and Increasing Haul Distances

Transportation plays a major role in the cost of aggregate to the consumer. Aggregate is a low-unit-value, high-bulk-weight commodity, and it must be obtained from nearby sources to minimize both the dollar cost to the aggregate consumer and other environmental and economic costs associated with transportation. If nearby sources do not exist, then transportation costs may significantly increase the cost of the aggregate by the time it reaches the consumer. For straight hauls with minimal traffic, the price of aggregate increases about 15 cents per ton for every mile that it is hauled from the plant according to industry sources. Currently, transporting aggregate a distance of 30 miles will increase the FOB price by about $4.50 per ton. For example, to construct one mile of six-lane interstate highway requires about 113,500 tons of aggregate. Transporting this amount of aggregate 30 miles adds $510,000 to the base cost of the material at the mine. In major metropolitan areas, this rate is often greater because of heavy traffic that increases the haul time. Other factors that affect hauling rates include toll bridges and toll roads, road conditions, and routes in hilly or mountainous areas. Transportation cost is the principal constraint defining the market area for an aggregate mining operation.

Throughout California, aggregate haul distances have been gradually increasing as more local sources of aggregate diminish. Consequently, older P-C regions, most of which were established in the late 1970s have changed considerably since their boundaries were drawn. This is especially evident in Los Angeles, Orange, and Ventura counties where aggregate shortages have led to the merging of six P-C regions shown on the original (2002) map into three regions for the updated maps.

Increased aggregate haul distances not only increase the cost of aggregate to the consumer, but also increase environmental and societal impacts such as increased fuel consumption, carbon dioxide emissions, air pollution, traffic congestion and road maintenance.

Factors Affecting Aggregate Demand

Several factors may influence aggregate demand. In periods of high economic growth, demand may increase, depleting permitted reserves more rapidly than expected. Large projects, such as the construction or maintenance of major infrastructure, or rebuilding after a disaster such as an earthquake could also deplete permitted reserves more rapidly. Increased demand from neighboring regions with dwindling or depleted permitted reserves may also accelerate the depletion of permitted reserves in a study area. Conversely, a period of declining economy or of low economic growth, such as that during the recession of 2007 to 2009 and the subsequent slow economic recovery, can reduce demand for a period of time, extending the life of permitted reserves. In some cases, importation of aggregate from other areas may extend the life of a region's permitted reserves.

SUMMARY AND CONCLUSIONS

Aggregate is essential to the needs of modern society, providing material for the construction and maintenance of roadways, dams, canals, buildings and other parts of California's infrastructure. Aggregate is also found in homes, schools, hospitals and shopping centers. In the 30-year period from 1981 to 2010, Californians consumed an average of more than 180 million tons of construction aggregate (all grades) per year or about 5.7 ton per person per year. Demand for aggregate is expected to increase as the state's population continues to grow and infrastructure is maintained, improved, and expanded. Because aggregate is a low unit-value, high bulk weight commodity, it must be obtained from nearby sources to minimize the dollar cost to the aggregate consumer and other environmental and economic costs associated with transportation.

For the last 33 years, under the Surface Mining and Reclamation Act, CGS has conducted on-going studies that identify and evaluate aggregate resources throughout the state. Map Sheet 52 (2012) is an updated summary of supply and demand data from these studies. The map presents a statewide overview of future aggregate needs and currently permitted reserves.

The following conclusions can be drawn from Map Sheet 52 (2012) and this accompanying report:

- In the next 50 years, the 31 study areas identified on Map sheet 52 (2012) will need approximately 12 billion tons of aggregate.

- The 31 study areas currently have about 4 billion tons of permitted reserves, which is about one third of the total projected 50-year aggregate demand identified for these study areas. This is about 5.5 percent of the total aggregate resources located within the 31 study areas.

- Four of the aggregate study areas are projected to have 10 or fewer years of permitted aggregate reserves remaining as of January 2011 (pie charts highlighted with red borders).

- Thirteen of the 31 aggregate study areas have between 11 and 20 years of aggregate reserves remaining.

- Eight of the 31 aggregate study areas have between 21 and 30 years of aggregate reserves remaining.

- Three of the 31 aggregate study areas have between 31 and 40 years of aggregate reserves remaining.

- Two of the 31 aggregate study areas have between 41 and 50 years of aggregate reserves remaining

- One of the 31 aggregate study areas (Placer County) has more than 50 years of aggregate reserves remaining.

The information presented on Map Sheet 52 (2012) and in the referenced reports is provided to assist land use planners and decision makers in identifying those areas containing construction aggregate resources, and to quantify potential future demand for these resources in different regions of the state. This information is intended to help planners and decision makers balance the need for construction aggregate with the many other competing land use issues in their jurisdictions, and to provide for adequate supplies of construction aggregate to meet future needs.

Kohler, S.L., 2010, Update of mineral land classification for Portland cement concrete-grade aggregate in the San Gabriel Valley Production-Consumption Region, Los Angeles County, California.

Miller, R.V., 1996, Update of minerals land classification: aggregate materials in the western San Diego County Production-Consumption Region.

State of California, Department of Finance, *Interim Population Projections for California and Its Counties 2010-2050,* Sacramento, California, May 2012.

APPENDIX: MINERAL LAND CLASSIFICATION REPORTS BY THE CALIFORNIA GEOLOGICAL SURVEY (Special Reports and Open-File Reports, with information on aggregate resources)

SPECIAL REPORTS

SR 132: Mineral Land Classification: Portland Cement Concrete-Grade Aggregate in the Yuba City-Marysville Production-Consumption Region.
By Habel, R.S., and Campion, L.F., 1986.

*SR 143: Part I: Mineral Land Classification of the Greater Los Angeles Area: Description of the Mineral Land Classification Project of the Greater Los Angeles Area.
By Anderson T. P., Loyd, R.C., Clark, W.B., Miller, R.M., Corbaley, R., Kohler, S.L., and Bushnell, M.M., 1979.

*SR 143: Part II: Mineral Land Classification of the Greater Los Angeles Area: Classification of Sand and Gravel Resource Areas, San Fernando Valley Production-Consumption Region.
By Anderson T.P., Loyd, R.C., Clark, W.B., Miller, R.M., Corbaley, R., Kohler, S.L., and Bushnell, M.M., 1979.

*SR 143: Part III: Mineral Land Classification of the Greater Los Angeles Area: Classification of Sand and Gravel Resource Areas, Orange County-Temescal Valley Production-Consumption Region.
By Miller, R.V., and Corbaley, R., 1981.

*SR 143: Part IV: Mineral Land Classification of the Greater Los Angeles Area: Classification of Sand and Gravel Resource Areas, San Gabriel Valley Production-Consumption Region.
By Kohler, S.L., 1982.

*SR 143: Part V: Mineral Land Classification of the Greater Los Angeles Area: Classification of Sand and Gravel Resource Areas, Saugus-Newhall Production-Consumption Region and Palmdale Production-Consumption Region.
By Joseph, S.E, Miller, R.V., Tan, S.S., and Goodman, R.W., 1987.

*SR 143: Part VI: Mineral Land Classification of the Greater Los Angeles Area: Classification of Sand and Gravel Resource Areas, Claremont-Upland Production-Consumption Region.
By Cole, J.W., 1987.

*SR 143: Part VII: Mineral Land Classification of the Greater Los Angeles Area: Classification of Sand and Gravel Resource Areas, San Bernardino Production-Consumption Region.
By Miller, R.V., 1987.

*SR 145: Part I: Mineral Land Classification of Ventura County: Description of the Mineral Land Classification Project of Ventura County.
By Anderson,T.P., Loyd, R.C., Kiessling, E.W., Kohler, S.L., and Miller, R.V., 1981.

*SR 145: Part II: Mineral Land Classification of Ventura County: Classification of the Sand, Gravel, and Crushed Rock Resource Areas, Simi Production-Consumption Region.
By Anderson,T.P., Loyd, R.C., Kiessling, E.W., Kohler, S.L., and Miller, R.V., 1981.

*SR 145: Part III: Mineral Land Classification of Ventura County: Classification of the Sand and Gravel, and Crushed Rock Resource Areas, Western Ventura County Production-Consumption Region.
By Anderson,T.P., Loyd, R.C., Kiessling, E.W., Kohler, S.L., and Miller, R. V., 1981.

*SR 146: Part I: Mineral Land Classification: Project Description: Mineral Land Classification for Construction Aggregate in the San Francisco-Monterey Bay Area.
By Stinson, M.C., Manson, M.W., and Plappert, J.J., 1987.

*SR 146: Part II: Mineral Land Classification: Aggregate Materials in the South San Francisco Bay Production-Consumption Region.
By Stinson, M.C., Manson, M.W., and Plappert, J.J., 1987.

*SR 146: Part III: Mineral Land Classification: Aggregate Materials in the North San Francisco Bay Production-Consumption Region.
By Stinson, M.C., Manson, M.W., and Plappert, J.J., 1987.

*SR 146: Part IV: Mineral Land Classification: Aggregate Materials in the Monterey Bay Production-Consumption Region.
By Stinson, M.C., Manson, M.W., and Plappert, J.J., 1987.

*SR 147: Mineral Land Classification: Aggregate Materials in the Bakersfield Production-Consumption Region.
By Cole, J.W., 1988.

*SR 153: Mineral Land Classification: Aggregate Materials in the Western San Diego County Production-Consumption Region.
By Kohler, S.L., and Miller, R.V., 1982.

SR 156: Mineral Land Classification: Portland Cement Concrete-Grade Aggregate in the Sacramento-Fairfield Production-Consumption Region.
By Dupras, D.L., 1988.

*SR 158: Mineral Land Classification: Aggregate Materials in the Fresno Production-Consumption Region.
By Cole, J.W., and Fuller, D.R., 1986.

*SR 159: Mineral Land Classification: Aggregate Materials in the Palm Springs Production-Consumption Region.
By Miller, R.V., 1987.

*SR 160: Mineral Land Classification: Portland Cement Concrete-Grade Aggregate in the Stockton-Lodi Production-Consumption Region.
By Jensen, L.S., and Silva, M.A., 1989.

*SR 162: Mineral Land Classification: Portland Cement Concrete Aggregate and Active Mines of All Other Mineral Commodities in the San Luis Obispo-Santa Barbara Production-Consumption Region.
By Miller, R.V., Cole, J.W., and Clinkenbeard, J.P., 1989.

SR 164: Mineral Land Classification of Nevada County, California.
By Loyd, R.C., and Clinkenbeard, J.P., 1990.

SR 165: Mineral Land Classification of the Temescal Valley Area, Riverside County, California.
By Miller, R.V., Shumway, D.O., and Hill, R.L., 1991.

SR 173: Mineral Land Classification of Stanislaus County, California.
By Higgins, C.T., and Dupras, D.L., 1993.

SR 198: Update of Mineral Land Classification for Portland Cement Concrete-Grade Aggregate in the Palm Springs Production-Consumption Region, Riverside County, California. Busch, L.L., 2007.

SR 199: Update of Mineral Land Classification for Portland Cement Concrete-Grade Aggregate in the Stockton-Lodi Production-Consumption Region, San Joaquin and Stanislaus Counties, California. Smith, J.D. and Clinkenbeard J.P., 2012.

SR202 Update of Mineral Land Classification for Portland Cement Concrete-Grade Aggregate in the Claremont-Upland Production-Consumption Region, Los Angeles and San Bernardino Counties, California. Miller, R.V. and Busch, L.L., 2007.

SR 205 Update of Mineral Land Classification of Aggregate Resources in the North San Francisco Bay P-C Region: Sonoma, Napa, and Marin Counties and Southwestern Solano County, California. Miller, R.V. and Busch, L.L., 2012 (in progress)

SR206 Update of Mineral Land Classification for Portland Cement Concrete-Grade Aggregate in the San Bernardino Production-Consumption Region, San Bernardino and Riverside Counties, California. Miller, R.V. and Busch, L.L., 2008.

SR 209 Update of Mineral Land Classification for Portland Cement Concrete-Grade Aggregate in the San Gabriel Valley Production-Consumption Region, Los Angeles County, California. Kohler, S.L., 2010.

SR 210 Update of Mineral Land Classification: Aggregate Materials in the Bakersfield Production-Consumption Region, Kern County, California. Busch, L.L., 2009.

SR 215 Update of Mineral Land Classification: Aggregate Materials in the San Luis Obispo-Santa Barbara Production-Consumption Region, California. Busch, L.L. and Miller, R.V., 2011.

* These Mineral Land Classification reports have been updated and are not shown on the index map (lower left-hand corner of Map Sheet 52).

OPEN-FILE REPORTS

OFR 92-06: Mineral Land Classification of Concrete Aggregate Resources in the Barstow-Victorville Area. By Miller, R.V., 1993.

OFR 93-10: Update of Mineral Land Classification of Portland Cement Concrete Aggregate in Ventura, Los Angeles, and Orange Counties, California: Part I - Ventura County. By Miller, R.V., 1993.

OFR 94-14: Update of Mineral Land Classification of Portland Cement Concrete Aggregate in Ventura, Los Angeles, and Orange Counties, California: Part II - Los Angeles County. By Miller, R.V., 1994.

OFR 94-15: Update of Mineral Land Classification of Portland Cement Concrete Aggregate in Ventura, Los Angeles, and Orange Counties, California: Part III - Orange County. By Miller, R.V., 1995.

OFR 95-10: Mineral Land Classification of Placer County, California. By Loyd, R.C., 1995.

OFR 96-03: Update of Mineral Land Classification: Aggregate Materials in the South San Francisco Bay Production-Consumption Region. By Kohler-Antablin, S.L., 1996.

OFR 96-04: Update of Mineral Land Classification: Aggregate Materials in the Western San Diego County Production-Consumption Region. By Miller, R.V., 1996.

OFR 97-01: Mineral Land Classification of Concrete Aggregate Resources in the Tulare County Production-Consumption Region, California. By Taylor, G.C., 1997.

OFR 97-02: Mineral Land Classification of Concrete-Grade Aggregate Resources in Glenn County, California. By Shumway, D.O., 1997.

OFR 97-03: Mineral Land Classification of Alluvial Sand and Gravel, Crushed Stone, Volcanic Cinders, Limestone, and Diatomite within Shasta County, California. By Dupras, D.L, 1997.

OFR 99-01: Update of Mineral Land Classification: Aggregate Materials in the Monterey Bay Production-Consumption Region, California. By Kohler-Antablin, S.L., 1999.

OFR 99-02: Update of Mineral Land Classification: Aggregate Materials in the Fresno Production-Consumption Region, California. By Youngs, L.G. and Miller, R.V., 1999.

OFR 99-08: Mineral Land Classification of Merced County, California. By Clinkenbeard, J.P., 1999.

OFR 99-09: Mineral Land Classification: Portland Cement Concrete-Grade Aggregate and Clay Resources in Sacramento County, California. By Dupras, D.L., 1999.

OFR 2000-03: Mineral Land Classification of El Dorado County, California. By Busch L.L., 2001

OFR 2000-18: Mineral Land Classification of Concrete-Grade Aggregate Resources in Tehama County, California. By Foster, B.D., 2001

Deborah A. Poochigian, 5th District, Chairman
Buddy Mendes, 4th District, Vice Chairman
Brian Pacheco, 1st District
Andreas Borgeas, 2nd District
Henry Perea, 3rd District

John Navarrette, County Administrative Officer
Daniel C. Cederborg, County Counsel
Bernice E. Seidel, Clerk

Tuesday, May 19, 2015 **9:00 AM** **Hall of Records**

The Fresno County Board of Supervisors welcomes you to this meeting and encourages your participation. This agenda contains a brief general description of each item to be considered. The number of the item being heard is indicated on the Clerk's desk. Please see note below regarding consent agenda items. The Chairman will call for public testimony as each item is heard. If you wish to speak to an individual item please step to the podium during this time period and state your name for the record. If you wish to speak on a matter which does not appear on the agenda, you may do so during the Public Presentation period at the end of the regular p.m. session.

All supporting documentation is available for public review in the office of the Clerk to the Board of Supervisors located in the Hall of Records building, 2281 Tulare Street, Room 301, Fresno, 93721 during regular business hours, 8:00 a.m. – 5:00 p.m., Monday through Friday. Agenda items are also available online at:

http://fresnocounty.legistar.com.

Invocation and Pledge of Allegiance

1. Approve Agenda

2. Approve Consent Agenda - Item Numbers 19 – 53

These matters are routine in nature and are usually approved by a single vote. Prior to action by the Board, the Board Members and the public will be given the opportunity to remove any item from the Consent Calendar. Items removed from the Consent Calendar may be heard immediately following approval of this Consent Calendar or set aside until later in the day

Supervisor Pacheco

3. Adopt Resolution proclaiming May 2015 as Elder and Dependent Adult Abuse Awareness Month

Attachments: Resolution

Supervisor Perea

4. Proclaim the month of May 2015 as older Americans Month in the County of Fresno. We urge every citizen to take time this month to recognize older adults and the people who serve and support them as powerful and vital citizens who greatly contribute to the community

Attachments: Resolution

Supervisors Borgeas and Supervisor Pacheco

5. Discuss and adopt the "County Counsel Information Policy"

Attachments: Agenda Item

Administrative Office

6. Conduct public hearing under Tax Equity and Fiscal Responsibility Act ("TEFRA") and the Internal Revenue Code of 1986, as amended (the "Code") regarding the issuance of tax-exempt conduit bonds for Community Hospitals of Central California, Fresno Community Hospital and Medical Center, Fresno Heart Hospital, LLC, and Sierra Hospital Foundation, which collectively operate as Community Medical Centers (CMC) in an amount not to exceed $450,000,000 to finance and refinance the cost of the acquisition, construction, improvement, renovation and equipping of health care facilities at various locations in the County of Fresno; and adopt the resolution approving the issuance of the Bonds by the California Municipal Financing Authority (CMFA) for the benefit of CMC, which adoption is solely for the purposes of satisfying the requirements of TEFRA, the Code

Attachments: Agenda Item

On File with Clerk - Resolution

Agriculture

7. Conduct the first hearing of a proposed Ordinance to amend the Master Schedule of Fees, Charges and Recovered Costs by amending Subsection 3306 of Section 3300 - Agriculture Services; waive reading of the Ordinance in its entirety and set the second hearing for June 2, 2015

Attachments: Agenda Item

Ordinance

Public Works and Planning

8. Consider the following actions approving the proposed Riverbend Sand and Gravel Project, which would allow an aggregate mining operation on 619 acres of a combined 833 acres of property, located approximately 1.5 miles southeast of the City of Sanger, between the Kings River and Riverbend Avenue: (1) adoption of resolution certifying the **Final** Environmental Impact Report for the Riverbend Sand and Gravel Project; (2) adoption of Resolution adopting Statement of Findings and Overriding Considerations and the Mitigation Monitoring and Reporting Program; (3) adoption of Findings approving Unclassified Conditional Use Permit Application No. 3390, subject to the conditions listed in the Staff Report; and (4) approval of the Reclamation Plan prepared for the Riverbend Sand and Gravel Project **(KETTLER/VonBerg)**

Tuesday, May 19, 2015 **9:00 AM** **Hall of Records**

The Fresno County Board of Supervisors welcomes you to this meeting and encourages your participation. This agenda contains a brief general description of each item to be considered. The number of the item being heard is indicated on the Clerk's desk. Please see note below regarding consent agenda items. The Chairman will call for public testimony as each item is heard. If you wish to speak to an individual item please step to the podium during this time period and state your name for the record. If you wish to speak on a matter which does not appear on the agenda, you may do so during the Public Presentation period at the end of the regular p.m. session.

All supporting documentation is available for public review in the office of the Clerk to the Board of Supervisors located in the Hall of Records building, 2281 Tulare Street, Room 301, Fresno, 93721 during regular business hours, 8:00 a.m. – 5:00 p.m., Monday through Friday. Agenda items are also available online at:

http://fresnocounty.legistar.com.

Invocation and Pledge of Allegiance

1. Approve Agenda

2. Approve Consent Agenda - Item Numbers 19 – 53

These matters are routine in nature and are usually approved by a single vote. Prior to action by the Board, the Board Members and the public will be given the opportunity to remove any item from the Consent Calendar. Items removed from the Consent Calendar may be heard immediately following approval of this Consent Calendar or set aside until later in the day

Supervisor Pacheco

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF FRESNO, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS: -

Parcel No.1: APN 350-041-12

That portion of Government Lots 1 and 4 in the Northeast quarter of Section 1, Township 15 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, which lies North and East of the Main channel of Kings River.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.2: a portion of APN 332-071-52

That portion of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, described as follows:

Beginning at the Southeast comer of said Section 36, Thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance of 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.3: a portion of APN 332-071-52

That portion of the Southeast quarter of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, lying East of Kings River.

Excepting therefrom that portion of said premises and described as follows:

Beginning at the Southeast corner of said Section 36, thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

LEGAL DESCRIPTION

PARCEL 1:

A portion of the fractional Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described as follows,

Beginning at a point on the West Line of said Southwest quarter which is 30 feet South from the West quarter corner; thence South 88° 52.6' East along the South line of the road right of way, 2668.2 feet to the East line of said Southwest quarter, at a point distance 30 feet South of the center quarter corner of said Section 31, thence South 1° 21.6' West along the East line of said Southwest quarter a distance of 1335.5 feet; thence North 88° 52.6' West, a distance of 2651.7 feet to the west line of said Section 31, thence North O° 39' East, a distance of 1335.5 feet to the point of beginning.

Said land is designated Parcel "A" on a map of resurvey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and other property, recorded December 16, 1941, in Book 15 Page 73 of Record of Surveys, records of said County.

APN 333-061-04

PARCEL 2:

That portion of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official plat thereof, described as follows:

Commencing at a point on the West line of the Southwest quarter of said Section 31, 1365.5 feet Southerly from the Northwest corner of said Southwest quarter of Section 31; thence South 88° 52.6' East and parallel with the East and West centerline of said Section 31, 2651.7 feet to the North and South centerline of said Section 31; thence South 1° 21.6' West 1337.8 feet to a point on the East line of Lot 2 of section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, said point being 82.6 feet Southerly from the quarter section corner common to said sections 31 and 6; thence North 89° 7' West 2635.2 feet to the West line of Lot 1 of said section 6 at a point 82.6 feet Southerly from the Northwest corner of said Section 6; thence North 82° 39' East along the West line of said Lot 1 and of said Section 31, 1348.8 feet to the point of beginning.

Being Parcel "B" as same is designated and delineated upon that certain Map of Re-Survey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, and of Lot 1 of Section 6 and part of the East half of the Northwest quarter of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, recorded at the request of Ross C. Phillips, L. S., on December 16, 1941, in Book 15, Page 73 of Record of surveys, Fresno County Records.

APR 333-061-05 & 360-020-20

Notice of Public Hearing
Proposed Resolution
(Summary)

Notice is hereby given that at its regularly scheduled meeting on September 1, 2015, at the hour of 9:00 AM or as soon thereafter as possible in the Board of Supervisors Chambers, Room 301, Hall of Records, 2281 Tulare St., Fresno, California, the Fresno County Board of Supervisors will consider authorizing the Chairman to sign the Mitigation Monitoring Reimbursement Agreement for County Staff Time for the Riverbend Sand and Gravel Project, Unclassified Conditional Permit Application No. 3390 and adoption of a resolution establishing an account for staff to charge to while reviewing and administering materials related to the Mitigation Monitoring and/or Reporting Program and Condition Compliance Matrix for the project. The project, approved February 26, 2015, proposes to mine 619 acres of a combined 833 acres of property that is owned by Riverbend Sand and Gravel, LLC., located approximately 1.5 miles southeast of the City of Sanger between the Kings River and Riverbend Avenue.

Data indicating the cost or estimated cost of providing the services for which the fees will be charged, and the revenue sources anticipated for these costs, is available at the Fresno County Department of Public Works and Planning, 2220 Tulare Street, 7th Floor, Fresno, CA 93721.

The full text of this resolution is available at the Department of Public Works and Planning public counter located at 2220 Tulare Street, Suite A, Fresno, CA 93721. For information, contact Briza Sholars at (559) 600-4207.

County of Fresno

DEPARTMENT OF PUBLIC WORKS AND PLANNING
ALAN WEAVER, DIRECTOR

June 11, 2015

John G. Parrish, Acting Assistant Director
State of California, Reclamation Unit
Office of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814

SUBJECT: Riverbend Sand and Gravel Project
Final Response to Director's Comments

Dear Mr. Parrish:

This letter is submitted per Public Resources Code (PRC) Section 2774(d)(2), which required the lead agency, here County of Fresno (County) to give the Director of the Department of Conservation (Director) the County's final response to the Director's comments within 30 days following the County's approval of a Reclamation Plan, Plan Amendment, or Financial Assurance. At its public hearing on February 26, 2015, the Fresno County Planning Commission approved the Reclamation Plan for the Riverbend Sand and Gravel Project. This letter constitutes the County's notice to the Director of the approval of the Reclamation Plan, in compliance with PRC 2774(d)(2).

If you have any questions or need further information please feel free to contact me by telephone at (559) 600-4022 or by e-mail at auramirez@co.fresno.ca.us.

Sincerely,

Augustine C. Ramirez, Senior Engineer
Water, Geology, and Natural Resources Section

Subject: RE: Riverbend EIR 6606

Hi Briza,

I looked up this payment and it shows that the check will be sent to P.O. Box 2625, Ventura, CA 93002. The invoice from SESPE identifies this P.O. Box number as the "Remit To" address. The address at the top of the invoice does show the 374 Poli Street address.

Subject: Riverbend EIR 6606

Hi Carol,
I wanted to check on the status of a payment to Sespe (County Consultant) for $49,284.00 for the Riverbend EIR. I sent the paperwork upstairs May 28, 2015.
If it has been sent, can you confirm that it went to 374 Poli Street, Suite 200, Ventura, CA 93001?
They have a new address and I am not sure if the Business Office was updated.
Thanks! Regards, Briza

Subject: RE: EIR 6606 Riverbend

Hi Mohammad and Briza,

As requested, we will be processing the credit to EIR 6606. As mentioned below, we cannot process timesheet corrections for this time period as the FY 2013-14 Road Report has been submitted. We will however process the credit entry this year and Lemuel will reflect a prior year adjustment in the FY 2014-15 Road Report.

I have attached a CAMS report which reflects Harpreet's charges in May and June to project #Z6606C. Noted at the bottom are the hours that will be credited. The total amount that will be refunded to the applicant's deposit will be $3,383.42.

May we proceed with processing the credit or will there be any further changes that will have to be made to this project?

Thank you.

Subject: RE: EIR 6606 Riverbend

Briza,

As I stated before, Harpreet's charges in the report you sent earlier add up to 131 hours. We are changing some of the hours for the dates shown below to Traffic/Transportation Planning activity 4554 which would reduce her total number of hours by 40. Since these charges took place in the last FY, Business Office cannot make any changes to the report. However, Harpreet has checked with Carol Pratt and they can credit the applicant for these 40 hours.

Please let me know if you have any questions.

Thanks,

Mohammad

Thanks Briza. We will look at this to make sure all the charges are coded properly. However, by taking a quick look at the financial report, it is apparent that the 197 hours is not just for Design and it includes Frank's hours. It seems Harpreet has charged about 130 hours or so, but as I said, we will look at to make sure it accurately reflects her time.

Thanks,

Mohammad

Hi Briza,

I have attached a project cost source report for 4510 staff charges to project number Z6606C through the pay period ending 10/26/14. This report reflects the detail for the 197 hours charged by Design and Maintenance.

I have also attached a copy of the recent letter that was sent out.

FYI - Mr. Lang would like to see the monthly charges so I will be producing letters for the period ending August and the period ending September. He wants to see the monthly change.

I plan to file the SPR application for the Riverbend Sand and Gravel project (CUP 3390) tomorrow morning. I will provide 7 copies of the Site Plan sheets and a pdf file with the Site Plans and related documents. How many copies of the related documents do you need?

The application package includes the following:

- Completed application form
- SPR filing fee for $14,124 payable to the "County of Fresno"
- Deeds for the Riverbend properties
- Vehicle Statement
- Site Plan sheets incorporating approved mitigation measures and conditions of approval including:
  - Current Site Plan
  - Mine Plan
  - Reclamation Plan
- Mine and Reclamation Plan document approved with CUP 3390 as Operational Statement
- Mitigation Monitoring and Reporting Program and Condition Compliance Matrix

John,

One hard copy of related documents will suffice, electronic copies (PDF) of documents submitted is the preference. If you have not made copies of plans yet, 5 copies of plans will be fine. I am trying to move away from hard copies and utilize electronic files for easier access.

Feel free to contact me should you have any questions.

Hector,

I plan to file the SPR application for the Riverbend Sand and Gravel project (CUP 3390) tomorrow morning. I will provide 7 copies of the Site Plan sheets and a pdf file with the Site Plans and related documents. How many copies of the related documents do you need?

The application package includes the following:

- Completed application form
- SPR filing fee for $14,124 payable to the "County of Fresno"
- Deeds for the Riverbend properties
- Vehicle Statement
- Site Plan sheets incorporating approved mitigation measures and conditions of approval including:
  - Current Site Plan
  - Mine Plan
  - Reclamation Plan
- Mine and Reclamation Plan document approved with CUP 3390 as Operational Statement
- Mitigation Monitoring and Reporting Program and Condition Compliance Matrix

MITIGATION MONITORING REIMBURSEMENT AGREEMENT (COUNTY STAFF TIME) FOR RIVERBEND SAND AND GRAVEL PROJECT

IN ACCORDANCE with California Public Resources Code Section 21081.6 and Section 15097 of Title 14 of the California Code of Regulations, which require a mitigation monitoring program, this reimbursement agreement ("Agreement") is entered into on the last date signed below ("Effective Date") between the County of Fresno, a political subdivision of the State of California, acting through its Department of Public Works & Planning, Development Services Division ("County"), and Riverbend Sand and Gravel, LLC, a Limited Liability Company ("Riverbend"), upon the following facts and circumstances:

RECITALS

A. Riverbend proposes to construct, operate and reclaim an aggregate mine, related processing, asphalt, ready mix concrete, and recycling plant on 619 acres of land located in the County, more commonly known as the Riverbend Sand and Gravel Project ("Project"), which will occur on certain real property which is more particularly described in **Exhibit A**, attached hereto and incorporated herein by reference.

B. On February 26, 2015, pursuant to County Resolution No. 12492, subject to the conditions listed therein, the County Planning Commission ("Commission") certified an Environmental Impact Report for the Project (State Clearinghouse No. 2013071097), approving Unclassified Conditional Use Permit ("CUP") No. 3390 and adopting a Mitigation Monitoring and Reporting Plan and Condition Compliance Matrix ("Monitoring Plan"). The Monitoring Plan is attached hereto as **Exhibit B** and incorporated herein by reference. The Commission approved a Reclamation Plan for the Project on February 26, 2015.

C. Reviewing and administering materials related to the Monitoring Plan will require the County to incur various costs and expenses, including staff time.

D. Condition of Approval 12 for CUP No. 3390 requires Riverbend to enter into an agreement with the County to provide funding to compensate for County staff time in reviewing and administering any materials related to the Monitoring Plan.

E. Condition of Approval No. 11 for CUP 3390 requires Riverbend to compensate the County to hire a consultant to serve as a Third Party Administrator (as defined below) to administer completion of the Conditions of Approval and Mitigation Measures listed in the Monitoring Plan.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing recitals and for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Riverbend and the County (collectively "Parties," individually "Party") agree as follows:

1. **SCOPE OF AGREEMENT**. As required by Condition of Approval 12 for CUP No. 3390, Riverbend agrees to enter into this Agreement with the County to provide funding to compensate for County staff time in reviewing and administering any materials related to the Monitoring Plan, including those prepared by the Third Party Administrator of the Monitoring Plan per Condition of Approval 11. As required by Condition of Approval 12 for CUP 3390, Riverbend shall also reimburse the County for costs incurred by the County in compensating a third party contractor to serve as the Third Party Administrator ("Third Party Administrator") to monitor Riverbend's compliance with the Conditions of Approval and Mitigation Measures listed in the Monitoring Plan.

2. **REIMBURSEMENT OBLIGATION**. Riverbend shall reimburse the County for all reasonable costs incurred by the County in connection with staff time spent reviewing and administering any materials related to the Monitoring Plan, including those prepared by the Third Party Administrator ("Eligible Costs"). As used herein, "Third Party Administrator" means any consultant, contractor, or other third party whose work-product gives rise to a cost for the County, or who is hired by the Third Party Administrator, in connection with implementation of the Monitoring Plan. County staff time will be billed per the master schedule of fee rates for actual hours worked per job classification attached hereto as **Exhibit C**. Third Party Administrator costs will be billed in accordance with the consultant agreement and subject to a not-to-exceed maximum of $45,000.

3. **PAYMENT OF ELIGIBLE COSTS**. The County shall submit to Riverbend a copy of each invoice, bill, or other evidence or reasonable substantiation that the County has incurred Eligible Costs ("Invoice"). Each such Invoice shall be paid in full by Riverbend, without deduction or offset, within forty-five (45) calendar days of the date of receipt of the Invoice.

4. **BINDING EFFECT**. This Agreement shall be construed as a covenant running with the land and shall bind and benefit the County, its successors and assigns, and Riverbend, and its successors in interest.

5. **ATTORNEYS FEES**. If any legal action is brought by either Party to interpret or enforce any terms or provisions of this Agreement, the prevailing party shall be entitled to its reasonable attorneys fees and costs.

6. **WAIVERS**. Waiver of a breach or default under this Agreement shall not constitute a continuing waiver or a waiver of a subsequent breach of the same or any other provision of this Agreement.

7. **SEVERABILITY**. If a court of competent jurisdiction finds that any provision of this Agreement is invalid or unenforceable, such determination shall not affect the validity and enforceability of any other provision of this Agreement.

8. **INTERPRETATION**. The titles to the sections of this Agreement are for convenience only and shall have no effect upon the construction or interpretation of any part of this Agreement. The Parties agree that this Agreement has been arrived at through negotiation

and neither Party is to be deemed the Party which prepared this Agreement for the purposes of California Civil Code Section 1654.

9. **ENTIRE AGREEMENT**. This Agreement constitutes the entire agreement of the Parties with respect to the matters set forth herein. This Agreement may be amended only by a written document signed by both Parties.

10. **RECORDATION**. Upon execution of this Agreement, the County shall cause recordation thereof with the County Recorder's Office.

11. **JURISDICTION**. This Agreement shall be administered and interpreted under the laws of the State of California without regard to its choice of law rules. Jurisdiction and venue of litigation arising from this Agreement shall be in the County of Fresno, State of California.

12. **NOTICES**. Notices required by this Agreement shall be personally delivered, mailed, postage prepaid, or mailed via nationally-recognized overnight courier as follows:

To Riverbend:

Herb Lang, Project Manager
Riverbend Sand and Gravel, LLC
14962 E. Fantz Avenue
Parlier, CA 93648

To the County:

Will Kettler, Division Manager
Fresno County, Development Services Division
2220 Tulare Street, Sixth Floor
Fresno, CA 93721

With a copy to:

Patrick Mitchell
Mitchell Chadwick LLP
3001 Lava Ridge Court, Suite 120
Roseville, CA 95661

13. **ASSIGNMENT OF CLAIMS**. To the extent the County determines that it may have claims against the third party administrator in connection with the implementation of the Monitoring Plan, the County may, upon written request by Riverbend, assign such claims to Riverbend. As used herein, "third party administrator" means any consultant, contractor, or other third party whose work-product gives rise to a cost for the County, or who is hired by the third party administrator, in connection with implementation of the Monitoring Plan. As used herein, "claims" means any and all claims, potential claims, causes of action, and potential

causes of action for breach of contract and/or professional negligence, regardless of whether such claims or causes of action accrue prior to or after the effective date of this Agreement.

14. **COUNTERPARTS**. This Agreement may be signed in counterparts, and shall be deemed effective when all Parties have signed the Agreement, or any counterpart thereof.

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement as of the date first above written.

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF FRESNO, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS: -

Parcel No.1: APN 350-041-12

That portion of Government Lots 1 and 4 in the Northeast quarter of Section 1, Township 15 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, which lies North and East of the Main channel of Kings River.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.2: a portion of APN 332-071-52

That portion of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, described as follows:

Beginning at the Southeast comer of said Section 36, Thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance of 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.3: a portion of APN 332-071-52

That portion of the Southeast quarter of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, lying East of Kings River.

Excepting therefrom that portion of said premises and described as follows:

Beginning at the Southeast corner of said Section 36, thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

LEGAL DESCRIPTION

PARCEL 1:

A portion of the fractional Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described as follows,

Beginning at a point on the West Line of said Southwest quarter which is 30 feet South from the West quarter corner; thence South 88° 52.6' East along the South line of the road right of way, 2668.2 feet to the East line of said Southwest quarter, at a point distance 30 feet South of the center quarter corner of said Section 31, thence South 1° 21.6' West along the East line of said Southwest quarter a distance of 1335.5 feet; thence North 88° 52.6' West, a distance of 2651.7 feet to the west line of said Section 31, thence North O° 39' East, a distance of 1335.5 feet to the point of beginning.

Said land is designated Parcel "A" on a map of resurvey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and other property, recorded December 16, 1941, in Book 15 Page 73 of Record of Surveys, records of said County.

APN 333-061-04

PARCEL 2:

That portion of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official plat thereof, described as follows:

Commencing at a point on the West line of the Southwest quarter of said Section 31, 1365.5 feet Southerly from the Northwest corner of said Southwest quarter of Section 31; thence South 88° 52.6' East and parallel with the East and West centerline of said Section 31, 2651.7 feet to the North and South centerline of said Section 31; thence South 1° 21.6' West 1337.8 feet to a point on the East line of Lot 2 of section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, said point being 82.6 feet Southerly from the quarter section corner common to said sections 31 and 6; thence North 89° 7' West 2635.2 feet to the West line of Lot 1 of said section 6 at a point 82.6 feet Southerly from the Northwest corner of said Section 6; thence North 82° 39' East along the West line of said Lot 1 and of said Section 31, 1348.8 feet to the point of beginning.

Being Parcel "B" as same is designated and delineated upon that certain Map of Re-Survey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, and of Lot 1 of Section 6 and part of the East half of the Northwest quarter of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, recorded at the request of Ross C. Phillips, L. S., on December 16, 1941, in Book 15, Page 73 of Record of surveys, Fresno County Records.

APR 333-061-05 & 360-020-20

LEGAL DESCRIPTION

Real property in the unincorporated area of the County of FRESNO, State of California, described as follows:

PARCEL 1: APN 332-071-53

ALL THAT PORTION OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, AND THE SOUTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT, LYING EAST OF THE KINGS RIVER, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHEAST CORNER OF THE NORTHEAST QUARTER OF THE NORTHEAST QUARTER OF SAID SECTION 36, AND RUNNING THENCE WEST 1320.1 FEET; THENCE AT RIGHT ANGLES SOUTH 1323.2 FEET TO A POINT IN THE CENTER OF A COUNTY ROAD; THENCE AT RIGHT ANGLES WEST 990 FEET; THENCE AT RIGHT ANGLES NORTH 990.75 FEET TO A POINT IN THE CENTER OF KINGS RIVER; THENCE NORTH 45° EAST 466.4 FEET; THENCE ALONG THE CENTER OF KINGS RIVER NORTH 26°30' EAST 1479 FEET TO THE NORTH LINE OF SAID SECTION 36; THENCE CONTINUING ALONG THE LAST MENTIONED COURSES 678 FEET; THENCE RUNNING NORTH 719 FEET TO A POINT 300 FEET EAST OF THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25 IN SAID TOWNSHIP AND RANGE; THENCE RUNNING NORTH 40° EAST 700 FEET; THENCE NORTH 65-1/2° EAST 636 FEET TO THE EAST LINE OF THE SOUTHEAST QUARTER OF SAID SECTION 25 AND RUNNING THENCE SOUTH ALONG SAID LAST MENTIONED LINE 3448.50 FEET TO THE PLACE OF BEGINNING.

ALSO ALL OF THE SOUTHEAST QUARTER OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT.

EXCEPTING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 2: APN 333-160-02S

THAT PORTION OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING ALL OIL, GAS, HYDROCARBONS AND OTHER MINERALS THEREIN AND THEREUNDER AS RESERVED IN THE DEED FROM CELLA VINEYARDS, A CALIFORNIA CORPORATION, RECORDED FEBRUARY 11, 1947, IN BOOK 3884, PAGE 448 OF OFFICIAL

RECORDS.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3: APN 332-042-56

THAT PORTION OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE NORTH LINE THEREOF WHICH IS SOUTH 89°18' EAST A DISTANCE OF 2510.04 FEET FROM THE NORTHWEST CORNER THEREOF; THENCE SOUTH 4°23'21" WEST A DISTANCE OF 1254.55 FEET TO A POINT 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE SOUTH 89°25' EAST A DISTANCE OF 262.64 FEET, PARALLEL WITH AND 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25 TO A POINT ON THE EAST LINE OF SAID SECTION; THENCE NORTH ALONG THE EAST LINE OF SAID SECTION TO THE NORTHEAST CORNER OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION 25; THENCE NORTH 89°18' WEST ALONG THE NORTH LINE OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION TO THE POINT OF BEGINNING.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3A:

AN EASEMENT FOR ROAD PURPOSES OVER THE NORTHERLY 6 FEET OF THE SOUTHERLY 55 FEET OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, FURTHER DESCRIBED AS: COMMENCING AT A POINT WHICH IS 49.00 FEET NORTH 00°31' WEST, OF THE CENTER OF SAID SECTION 25; THENCE NORTH 00°31 WEST, 6.00 FEET; THENCE SOUTH 89°25' EAST, PARALLEL WITH THE EAST AND WEST CENTER LINE OF SAID SECTION, A DISTANCE OF 2400.80 FEET TO A POINT; THENCE NORTH 4°23" EAST, 14.00 FEET TO A POINT; THENCE SOUTH 89°25' EAST, 10.00 FEET TO A POINT; THENCE SOUTH 00°6'19" EAST, 20.00 FEET TO A POINT WHICH IS 49.00 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE NORTH 89°25' WEST, 2410.80 FEET TO THE NORTH OF COMMENCEMENT.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 4: APN 333-160-01S

THAT PORTION OF THE SOUTHWEST QUARTER OF SECTION 19 AND THE WEST HALF OF SECTION 30, ALL IN TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, IN THE UNINCORPORATED AREA, COUNTY OF FRESNO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT THEREOF, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN; THENCE EAST 160 RODS; THENCE NORTH 400

RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE SOUTH TO THE CENTER OF KINGS RIVER; THENCE SOUTHERLY IN THE CENTER OF SAID RIVER TO THE EAST LINE OF THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25; THENCE SOUTH ON SAID SECTION LINE TO THE SOUTHEAST CORNER OF SAID SECTION 25 TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION THEREOF DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 30; THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET, A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING THEREFROM AN UNDIVIDED 50% OF ALL OIL, GAS AND MINERALS, EXCLUDING SAND, AS RESERVED BY CELLA VINEYARDS, FORMERLY KNOWN AS B & L CELLA BROS., BY DEED RECORDED JANUARY 31, 1974, IN BOOK 6261 PAGE 134 OF OFFICIAL RECORDS, DOCUMENT NO. 8303.

ALSO EXCLUDING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM AND CONDITIONS COMPLIANCE MATRIX FOR THE RIVERBEND SAND AND GRAVEL PROJECT

INTRODUCTION

The Mitigation Monitoring and Reporting Program ("MMRP") has been prepared to implement the mitigation measures identified in the Riverbend Sand and Gravel Project ("Project") Environmental Impact Report ("EIR"). Section 21081.6 of the California Environmental Quality Act ("CEQA") requires adoption of a monitoring or reporting program when mitigation measures have been identified that would reduce or avoid significant environmental effects. This MMRP contains measures identified in the EIR that would be implemented through monitoring of an activity, such as grading or excavation, and other measures that would be implemented through a reporting mechanism, such as obtaining an air quality permit or an Emergency/Contingency Plan.

The law states that the MMRP shall be designed to ensure compliance during implementation of the Project. When implemented, environmental effects associated with the Project will be reduced or eliminated. Therefore, the MMRP has been prepared as a matrix containing the following elements:

- Measures that would mitigate significant impacts on the environment are recorded with a description of the action and the procedure necessary to ensure compliance.
- A procedure of compliance and verification has been outlined for each measure. This procedure designates what action will be taken and when, who will take action, and to whom and when compliance will be reported.
- The MMRP has been designed to provide focused, yet flexible guidelines. As monitoring progresses, changes to compliance procedures may be necessary based upon recommendations by those responsible for the program.

PROGRAM MANAGEMENT

The MMRP will be in place through all phases of the Project. The Project planner, assigned by the Fresno County ("County") planning director, shall coordinate enforcement of the MMRP and oversee it to ensure that proper action is taken on each mitigation measure. Each County department or division shall ensure that the Project complies with the conditions (mitigation) that relate to that department.

The Project planner or responsible County department has the authority to stop the work of the operator if compliance with any aspects of the MMRP is not occurring after written notification

has been issued. The Project planner or responsible County department also has the authority to deny entry into a new mining phase until compliance with a mitigation measure occurs.

CONDITIONS COMPLIANCE MATRIX

The MMRP that was circulated as Chapter 4.0 in the Final EIR has been revised to include the recommended conditions of approval for the Project. Table 1, "Mitigation Monitoring and Reporting Program and Conditions Compliance Matrix for the Riverbend Sand and Gravel Project," includes the mitigation measures and conditions of approval, the procedure for complying with and/or monitoring them, and the party responsible for implementing them.

TABLE 1

MITIGATION MONITORING AND REPORTING PROGRAM AND CONDITIONS COMPLIANCE MATRIX
FOR THE RIVERBEND SAND AND GRAVEL PROJECT

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
MITIGATION MEASURES			
AESTHETICS			
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-1**: A 10-foot high vegetated berm shall be constructed along Riverbend Avenue adjacent to Phases 3A, 3B, 4A and 4B. An 8-foot vegetated berm shall be constructed along the south side of Goodfellow from Riverbend Avenue to 2,000 feet west of Riverbend Avenue. The berms will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. The berms shall be constructed and planted prior to the removal of overburden in each phase.	**AES-1**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-2**: Orchard-like screens shall be planted on the north side of Goodfellow Avenue west of the entrance road and on the south side of Goodfellow Avenue west of the 8-foot high vegetated berm prior to overburden removal in the adjacent phases. The tree species will be evergreen trees (e.g., olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening.	**AES-2**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AES-1: Would the Project substantially degrade the existing visual character	**MM AES-3**: The dragline shall be painted a neutral-tone color to achieve the best blending with the surrounding	**AES-3**: Use of a neutral-tone paint color will be monitored through the	Fresno County Dept. of Public Works & Planning, Development Services

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
or quality of the site and its surroundings?	landscape and vegetation.	annual County Mine Inspections.	Division
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-4**: Prior to commencement of plant area operations, a 15-foot high vegetated berm shall be constructed along the Kings River adjacent to the Plant area (i.e., Phase 9). The berm will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm.	**AES-4**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
AGRICULTURE & FORESTRY RESOURCES			
Impact AG-1: Would the Project convert Prime Farmland, Unique Farmland, Farmland of Statewide Importance, Farmland of Local Importance, or Grazing Land, as shown on maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	**MM AG-1:** The Project shall conserve agricultural land by acquiring an agricultural conservation easement (ACE) on 351 acres of Important Farmland as classified by DOC's FMMP to mitigate for the 351 acres of Important Farmland on the Project site to be converted to non-agricultural use. The ACE would be phased in accordance with the following schedule: • Within one year of existing agricultural land being taken out production for the Project 100 acres shall be placed in an ACE. • Within the earlier of 5 years, or before 100 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 100 acres shall be placed in an ACE. • Within the earlier of 10 years, or before 200 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 75 acres shall be placed in an ACE.	**AG-1:** Annual compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	• Within the earlier of 15 years, or before 275 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 76 acres shall be placed in an ACE. Temporarily taking of land out of agriculture production for normal farming purposes (e.g. rotating crops, resting soil, etc.) shall not be considered taking of existing agricultural land out of production for the Project.		
AIR QUALITY			
Impact AQ-5: Would the Project create objectionable odors affecting a substantial number of people?	**MM AQ-1**: The following design features will mitigate VOC, SVOC, and/or SO_2 emissions: 1. The type of asphaltic cement produced by on-site plants affects odorous emissions. Some cements have lower VOC/SVOC emissions than others. Therefore, cements with lower VOC/SVOC emissions will be used to the extent feasible. 2. Periodic burner tune-ups may reduce VOC emission by about 38 percent. Therefore, periodic burner tune-ups will be implemented. 3. Mixing drum vapors will be routed back to the dryer burner.	**AQ-1**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AQ-2: Would the Project violate any air quality standard or contribute substantially to an existing or projected air quality violation?	**MM AQ-2:** Each off-road engine on-site between 1/1/2015 and 12/31/2018, excluding scrapers and haul trucks, shall be model year 2015 or later. Engines in scrapers shall be no greater than ten (10) years old and shall meet the Tier 3 off-road engine standard. Engines in off-road haul trucks shall be equipped with engines that	**AQ-2**: Compliance through annual County Mine Inspections. In addition, documentation demonstrating compliance with the identified off-road engine	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
Impact AQ-3: Would the Project cause a cumulatively considerable net increase of a criteria pollutant for which the Project region is non-attainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)? ***Impact AQ-4:*** Would the Project expose sensitive receptors to substantial pollution concentrations?	meet the Interim Tier 4 emissions standards. Each off-road engine on-site after 1/1/2019, excluding scrapers, shall be model year 2014 or later. Engines in scrapers shall meet Tier 3 engine standard and be model year 2010 model year or later. Off-road haul trucks shall not be used after 1/1/2019 except during occasional repairs or during relocation of overland conveyors not to exceed five workdays in any month. In such cases, the off-road trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards.	requirements shall be maintained on-site and provided to the County upon request.	
Impact AQ-2: Would the Project violate an air quality standard or contribute substantially to an existing or projected air quality violation? ***Impact AQ-3:*** Would the Project cause a cumulatively considerable net increase of a criteria pollutant for which the Project region is non-attainment under an applicable Federal or State ambient air quality standard (including releasing	**MM AQ-3**: Diesel trucks shall not idle greater than five (5) minutes while on-site as required by the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling (13 CCR §2485).	**AQ-3**: Compliance through annual County Mine Inspections. In addition, the facility shall maintain a written idling policy and distribute that policy to affected operators of off-road equipment.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Air Resources Board, and San Joaquin Valley Air Pollution Control District

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
emissions which exceed quantitative thresholds for ozone precursors)? ***Impact AQ-4:*** Would the Project expose sensitive receptors to substantial pollution concentrations?			
BIOLOGICAL RESOURCES			
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-1**: 1. All buildings to be removed shall be surveyed by a qualified biologist to determine if they are being used as a roost site for bats, and if so, what type of roosting behavior is occurring (night roost vs. day/maternity roost). The survey shall be conducted in June or July when maternity roosts would be most active. 2. Any buildings to be removed that are determined to support only night-roosting bats shall be removed between September 1 and October 14, or between February 16 and April 14. Removal of buildings during these periods will avoid impacts to any bats utilizing the buildings during the normal breeding season (April 15 to August 30) and winter torpor (October 15 to February 15). 3. If a building is determined to support a day/maternity roost, a mitigation plan (i.e., removal plan) shall be prepared by a qualified bat biologist experienced with bat eviction and exclusion possessing a Memorandum of Understanding with the California Department of Fish and Wildlife. At	**BIO-1**: Qualified biologist will conduct pre-demolition surveys for bat roosting sites and oversee avoidance of night-roosting bats during demolition activities for the periods specified. Qualified biologist will conduct pre-demolition surveys for day/maternity roosts and oversee humane eviction of the existing bat population and creation of artificial day roost habitat. If necessary, a mitigation/removal plan shall be prepared by a qualified biologist.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Department of Fish and Wildlife

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	a minimum, the mitigation plan shall provide for humane eviction of the existing bat population and creation of artificial day roost habitat, to mitigate impacts resulting from removal of the roost site.		
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-2**: 1. To the maximum extent practicable, all construction activities associated with the initiation of work on the Project site or initiation of new mining phases shall be scheduled between September 15 and February 1, which is the typical non-nesting season. 2. If the initiation of work in new areas cannot be scheduled during the non-nesting season, prior to the initiation of work on the Project site and each individual phase of mining (e.g., Phase 1A, 1B, etc.), a qualified biologist shall survey all suitable nest trees within 0.25 mile of the work limits for nesting Swainson's hawks, within 500 feet of the work limits for other raptors, and within 250 feet of the work limits for other nesting birds no more than 10 days prior to the start of ground disturbing activities. The survey will follow the methodology developed by the Swainson's Hawk Technical Advisory Committee (SWHA TAC, 2000). 3. If nesting Swainson's hawks are found within 0.25 mile, other nesting raptors are found within 500 feet, or other nesting birds are found within 250 feet of the work limits as described in Item 2 above: a. A qualified biologist shall evaluate the potential for the proposed work to disturb	**BIO-2**: Qualified biologist will conduct pre-construction surveys for nesting migratory birds and raptors and oversee avoidance of active nests during construction and ground disturbance activities. If nests are found within identified ranges, CDFW shall be contacted.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Department of Fish and Wildlife

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	nesting activities. The evaluation criteria shall include, but not be limited to, the location/orientation of the nest in the nest tree, the distance of the nest to the work limits, the line of sight between the nest and the work limits, and the description of the proposed work. The nest shall be continually surveyed for the first 24 hours. b. CDFW shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities. c. If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities that occur during the breeding season to monitor nesting activity. The biologist shall have the authority to stop work if it is determined the Project is adversely affecting nesting activities. 4. If no nesting Swainson's hawks are found within 0.25 miles, no other nesting raptors are found within 500 feet, or no other nesting birds are found within 250 feet of the work limits as described in measure 2 above, work can proceed as planned. 5. Construction initiated during the non-nesting season and continuing into the nesting season shall not be subject to the above measures.		
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat	**MM BIO-3**: 1. Prior to the start of ground disturbing activities for the aggregate plant and each individual phase of mining (i.e. Phase 1A, 1B), surveys for elderberry	**BIO-3**: Qualified biologist will conduct pre-construction surveys for elderberry shrubs and oversee	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	shrubs shall be conducted within the mixed riparian forest community within 100 feet of the work limits. Any elderberry shrubs identified shall be located on a map and the stems inventoried in accordance with USFWS guidelines. 2. To the maximum extent practicable, all Project activities shall be set back a minimum of 100 feet from all elderberry shrubs with one or more stems of 1-inch diameter at ground level growing within the Biological Study Area (BSA) or adjacent areas. If a 100-foot setback cannot be maintained, implementation of additional mitigation measures described below shall be required in accordance with USFWS guidelines: a. Prior to initiation of construction, the limits of all construction, access roads, staging areas, etc., shall be staked. The staked areas shall be inspected by a qualified biologist. Based on this inspection, additional refinements to construction areas shall be performed as necessary and as feasible to ensure a minimum 20-foot setback from the dripline of all elderberry plants. b. Once the final limits of construction are set, brightly colored fencing (i.e., snow fencing) shall be installed at the 20-foot setback around the perimeter of each elderberry plant or plant group under the direction of a qualified biologist. c. Signs shall be posted every 50 feet along the edge of the VELB avoidance area with the following information: "This area is habitat for	avoidance and/or implementation of additional mitigation measures as specified. Compliance through annual County Mine Inspections.	

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	the Valley Elderberry Longhorn Beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as amended. Violators are subject to prosecution, fines, and imprisonment." d. Workers shall be briefed on the need to avoid damage to elderberry shrubs and the possible penalties for not complying with these requirements. All work crews shall be advised of the status of VELB and the need to protect the elderberry shrubs. e. During the initial construction period for each phase of mining, a qualified biologist shall inspect the mining area periodically to assure that the Project is not affecting VELB.		
CULTURAL AND PALEONTOLOGICAL RESOURCES			
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-1**: Prior to commencement of Phase 8B, markers shall be placed at the geographic boundary coordinates delineating the 50-foot exclusion zone surrounding site CA-FRE-3591 to prevent disturbance by project activities. It is inappropriate to prescribe a specific type of markers at this time, as technological changes over the next 60 years may result in fencing/marker options not currently available. However, the markers shall fulfill the following purpose: (1) provide a clear visual indicator of the exclusion zone and (2) prevent the entry of unauthorized equipment, vehicles, and mine personnel into the exclusion zone. To facilitate the identification and delineation of the boundary and 50-	**CPR-1**: Cultural site geographic coordinates will be provided to the County prior to commencement of Phase 8B. Thereafter, the exclusion zone would also be subject to compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	foot exclusion zone for CA-FRE-3591, the site shall be surveyed and Universal Transverse Mercator (UTM) geographic coordinates provided to the County.		
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-2**: The Project Applicant shall obtain the services of a qualified cultural and paleontological consultant to implement an education program to ensure that construction personnel are aware of potentially sensitive archaeological and paleontological resources.	**CPR-2**: Execution of agreement with qualified cultural and paleontological consultant regarding personnel education program.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-3**: If any subsurface cultural resources, including either prehistoric or historic resources, are encountered during construction of the Project, all construction activities in the vicinity of the encounter shall be halted until a qualified archaeologist can examine these materials and make a determination of their significance. Such finds include, but are not limited to, prehistoric grinding implements, stone tools, soapstone bowls, and ornaments (e.g., beads, pendants) as well as intact building foundations and high concentrations of historical artifacts. The Fresno County Department of Public Works and Planning shall be notified, and the owners, developers and/or successors-in-interest shall be responsible for mitigation of any significant cultural resources pursuant to the CEQA Guidelines.	**CPR-3**: Earthmoving activities shall cease and a qualified archaeologist will be retained to assess the significance and provide direction. If such finds are found the Fresno County Department of Public Works and Planning shall be notified.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact CPR-3: Would the Project directly or indirectly destroy a unique paleontological resource or	**MM CPR-4**: If paleontological resources are discovered during project-related activities, the find shall be reported immediately to the County of Fresno Planning	**CPR-4**: Earthmoving activities shall cease and a paleontologist will be retained to assess the	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
site or unique geologic feature?	Department, who shall provide direction to contact a paleontological monitor. The area of the find shall be avoided until the monitor is on-site. The monitor shall assess the find and make any necessary recommendations, including any procedures to further investigate or mitigate impacts to the find as required by law.	significance and provide direction. Is such finds are discovered they shall be immediately reported to Fresno County Department of Public Works and Planning.	
Impact CPR-4: Would the Project disturb any human remains, including those interred outside of formal cemeteries?	**MM CPR-5**: In the event that unanticipated human remains are discovered, work shall immediately stop at the discovery location and any nearby area reasonably suspected to overlie adjacent human remains. The Fresno County Coroner shall immediately be contacted to determine whether the cause of death must be investigated. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours (H&SC §7050.5). At the same time, the mine operator shall immediately notify the Fresno County Department of Public Works and Planning, and a qualified archaeologist shall be contacted to evaluate the archaeological implications of the find.	**CPR-5:** Earthmoving activities shall cease. The Fresno County Coroner shall be contacted immediately in order to assess the remains and to determine the correct action. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours.	Fresno County Dept. of Public Works & Planning, Development Services Division; Fresno County Coroner
Impact CPR-4: Would the Project disturb any human remains, including those interred outside of formal cemeteries?	**MM CPR-6**: The CEQA Guidelines (§15064.5) detail steps to be taken when human remains are found to be of Native American origin. If Native American remains are discovered, the operator/landowner shall work with the NAHC to develop and execute an agreement between themselves and the most likely descendant(s) of Native Americans who may be buried in the vicinity by which the human remains and associated burial items shall be treated or disposed, with appropriate dignity. The NAHC and landowner shall follow prescribed	**CPR-6:** If Native American remains are discovered, an agreement shall be executed between the operator/landowner and NAHC regarding treatment of burial items and unanticipated human remains.	Fresno County Dept. of Public Works & Planning, Development Services Division; Native American Heritage Commission; Fresno County Coroner

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	steps in Public Resources Code §5097.98, which include but are not limited to the following: • The NAHC shall notify those persons it believes to be the most likely to have descended from the deceased Native American. • The most likely descendant(s) may recommend to the landowner the means of treating and disposing of, with appropriate dignity, the human remains and any associated grave goods. • The landowner shall ensure the immediate vicinity of the Native American human remains is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations.		
HYDROLOGY AND WATER QUALITY			
Impact HWQ-7: Would the Project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	**MM HWQ-1**: To mitigate the risk of loss or injury potentially resulting from flooding, the operator shall implement a system to regularly monitor public announcements concerning potential Kings River flooding. At the beginning of each day that employees are to work in areas mapped within the 100-year flood hazard zone, the operator must check with the National Weather Service to determine if flood warnings are in effect. The operator must communicate the flooding potential to all employees each day. Employees must avoid	**HWQ-1**: Compliance through annual County Mine Inspections. In addition, the operator will communicate the flooding potential to all employees each day verbally or by conspicuous posting of the current conditions (e.g., same location as safety items are posted).	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	working in portions of the Project site that are within the flood hazard zone. In addition, access to areas of the Project site subject to potential flooding shall be physically demarcated with signage and deterrents such as traffic barricades.		
NOISE AND VIBRATION			
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? **Impact NO-2:** Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?	**MM NO-1**: The following specific measures are required to ensure impacts associated with Project dragline excavation are less than significant: 1. The reference sound levels associated with dragline operation shall be verified through noise level measurements immediately upon commencement of dragline operations at the Project site. In the event that actual noise emissions of the dragline exceed the assumptions contained within this analysis, additional noise control measures shall be implemented. Those measures would include replacing fan motors with variable drive motors and/or installation of cooling air inlet and/or exhaust silencers directly to the dragline as required to satisfy the Fresno County Noise Ordinance standards. 2. Except during a public emergency that requires immediate production of aggregates and concrete products, excavation activities using the proposed dragline shall be limited to daytime hours when located within the following distances from noise receivers: a. When operating the mine and aggregates	**NO-1:** 1. Upon commencement of operation, dragline noise measurements will be provided to the County demonstrating that the L_{50} noise levels are equal to or less than 70 dBA at a distance of 100-feet. If L_{50} noise levels exceed 70 dBA, then additional dragline mitigation measures shall be implemented, subsequent noise measurements shall be conducted and provided to the County demonstrating that the dragline noise will not exceed the Fresno County Noise Standard (50 dBA day and 45 dBA night) at any noise receiver. In the event the measured ambient noise level exceeds the noise level standard, the standard	Fresno County Dept. of Public Works & Planning, Development Services Division

	plant only: i. 600 ft from R3, R4, R5, R7, R9, R10. ii. 900 ft from R8. iii. 725 ft from R13. iv. 925 ft from R14. b. When operating the mine, aggregates plant and the hot mix asphalt plant and/or the ready mix concrete plant: i. 600 ft from R3, R4, R5. ii. 750 ft from R7, R9, R10. iii. 1,050 from ft R8. iv. 850 ft from R13. v. 975 ft from R14. 3. Prior to mining within 900 feet of Residences 3, 4, 5, 7, & 9 along Riverbend Avenue, the proposed 10-foot tall berm should be constructed near the western edge of the proposed 100-foot excavation setback. 4. Prior to mining within 900 feet of Residence 10 along Riverbend Avenue, an 11-foot tall berm should be constructed near the western edge of the proposed 100-foot excavation setback. 5. Prior to mining within 900 feet of Residence 13, the proposed 8-foot tall berm should be constructed near the southern edge of the proposed 100-foot excavation setback along the South side of Goodfellow from Riverbend Avenue to 2000 feet West of Riverbend Avenue. 6. Excavation activities within 1,000 feet of an existing residence shall be conducted such that	shall be adjusted so as to equal the ambient noise level. Compliance will additionally be met through annual County Mine Inspections. **NO-1:** 2-6. Compliance through annual County Mine Inspections.	

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	the dragline cooling exhaust fans do not directly face the residence.		
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? **Impact NO-2:** Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?	**MM NO-2**: The following specific measures are required to ensure that impacts associated with concurrent operation of the aggregates processing plant, mine, and other activities are less than significant at Receiver 8: 1. Plant area noise at Receiver 8 shall be reduced to less than the Fresno County Noise Control Ordinance thresholds by implementing the following noise control measures: a. A 15-foot tall earthen berm shall be constructed near the Project western boundary in the vicinity of Receiver 8. The berm shall extend laterally to the extents shown on DEIR Figure 2-7. b. Prior to commencement of night-time operation, sound curtains shall be constructed adjacent to the noisiest aggregate plant equipment (i.e. crushers) in order to provide additional shielding in the direction of Receiver 8. The curtains are estimated to result in 8 dBA reduction in noise from the aggregate plant. 2. Following implementation of the noise control measures identified in Item 1 above, noise tests shall be conducted to confirm effectiveness of the control measures and compliance with the County Noise Control Ordinance exterior noise standards.	**NO-2**: Prior to nighttime operation of the aggregates plant, the operator shall install the 15-foot berm, install sound curtains, and provide noise measurements to the County that show noise levels at Receiver 8 to be less than Fresno County Noise Standards with the aggregates plant in operation. In the event the measured ambient noise level exceeds the noise level standard, the standard shall be adjusted so as to equal the ambient noise level. Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	**MM NO-3:** The Project shall designate an individual to be the contact person for noise complaints. This individual shall have access to a noise meter and be available to measure noise levels and confirm compliance with the County noise ordinance.	**NO-3**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
TRANSPORTATION AND TRAFFIC			
Impact TRANS-1: Would the Project conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit? **Impact TRANS-2***:* Would the Project conflict with an applicable congestion management program,	**MM TRANS-1**: The Project Applicant shall pay proportional fair share contributions towards the required identified improvements. (*Please refer to Section 3.12.6.8 of the DEIR for explanation of the County and Caltrans fair share formulas and Tables 3.12-16 through 3.12-18 for fair share percentages*). The Project Applicant shall enter into traffic mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements). The traffic mitigation agreements shall establish the exact payment amounts and thresholds that define the timing of the required payments. (*The required improvements are listed on pages 3.12-63 through 3.12-68 of the DEIR*).	**TRANS-1**: The Applicant shall enter into traffic mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements). Fair share payments shall be made based on the schedule(s) to be detailed in the traffic mitigation agreements.	California Department of Transportation; Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?			
Impact TRANS-4: Would the Project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	**MM TRANS-2:** The Project applicant shall make the following improvements ***prior to any product being shipped from the Project site***: <u>Project Driveway at Goodfellow</u> • Eastbound left turn and westbound right turn at the Project Driveway at Goodfellow Avenue. • Westbound acceleration lane for trucks exiting the site.	**TRANS-2**: The Applicant will construct the improvements prior to any product being shipped from the Project site. Compliance through annual County Mine Inspections	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact TRANS-7: Would truck traffic generated by the Project result in the Traffic Index (TI) increasing by a factor of 0.5?	**MM TRANS-3:** The Project will contribute its fair share cost for the purposes of improving the structural section of the impacted street segments. <u>Central Avenue</u> • McCall Avenue and Bethel Avenue • Bethel Avenue and Academy Avenue • Academy Avenue and Newmark • Newmark Avenue and Riverbend Avenue <u>McCall Avenue</u> • SR 180 (Kings Canyon) and Jensen Avenue	**TRANS-3**: The Applicant shall enter into Traffic Index mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements. Fair share payments shall be made based on the schedule(s) to be detailed in the mitigation agreements. 		Applicant shall notify the County of these changes and it shall be determined whether the changes require an amendment to the reclamation plan.	upon receipt of and deeming the materials to be complete, the information shall be processed as a plan amendment to allow the incorporation of the changed requirements into the reclamation plan. As part of the review process, the County may provide the Department of Conservation/Office of Mine Reclamation the opportunity to review the amended reclamation plan, in accordance with the provisions of SMARA.	Development Services Division
CALIFORNIA DEPARTMENT OF PUBLIC HEALTH				
15.		The Applicant shall obtain a Domestic Water Supply Permit from the California Department of Public Health in the event that Project facilities are to be developed that meet the definition of a public water system.	Upon the determination that that Project facilities meet the definition of a public water system, the applicant shall file an application for a Domestic Water Supply Permit from the California Department of Public Health.	California Department of Public Health
SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT				
16.		The Applicant shall comply with all applicable rules and permitting requirements of the SJVAPCD.	The Applicant shall comply with all applicable rules and permitting requirements of the SJVAPCD as part of periodic SJVAPCD inspections.	San Joaquin Valley Air Pollution Control District; Fresno County Dept. of Public Works & Planning Development Services Division
NOTES: The following Notes reference mandatory requirements of Fresno County or other Agencies and are provided as information to the Project Applicant.				

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
1.	This Use Permit will become void, unless there has been substantial development within two years of the effective date of this approval		
2.	Prior to occupancy, the Applicant shall complete and submit either a Hazardous Materials Business Plan or a Business Plan Exemption form to the Fresno County Department of Community Health, Environmental Health Division. Contact the Certified Unified Program Agency at (559) 445-3271 for more information.		
3.	Pursuant to the provision identified in Zoning Ordinance Section 858.E.4, a Site Plan Review shall be submitted and approved for the entire area shown for the mining and reclamation plan prior to commencing mining or building.		
4.	All hazardous waste shall be handled in accordance with requirements set forth in the California Health and Safety Code, Chapter 6.5. This chapter discusses proper labeling, storage and handling of hazardous wastes.		
5.	The Applicant shall adhere to all the requirements identified in Section 858 of the Fresno County Zoning Ordinance.		
6.	A Storm water pollution prevention plan shall be submitted to the U.S. Environmental Protection Agency and administered by the California State Regional Water Quality Control Board.		
7.	Because the proposed project includes land disturbances of more than five acres, the Applicant will be required to obtain a National Pollution Discharge Elimination System (NPDES) General Construction Storm Water Permit from the Regional Water Quality Control Board.		

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
8.	The Applicant shall adhere to San Joaquin Air Pollution Control District Regulation VIII – Fugitive Dust Rules. The Applicant shall also adhere to the Districts permitting requirements which include Permit to Operate (PTO) and Authority to Construct (ATC).		
9.	The processing plant and ready-mix plant shall annually renew their air quality permits and comply with their conditions.		
10.	The operator shall comply with all applicable Air Resources Board and San Joaquin Valley Air Pollution Control District regulations related to diesel-fueled trucks and equipment, which may include among others: (1) meeting more stringent emission standards; (2) retrofitting existing engines with particulate traps; (3) use of low sulfur fuel; and (4) use of alternative fuels or equipment.		
11.	The Applicant shall adhere to the provisions set forth by the Office of Mine Reclamation. These provisions include regulations for compliance, reporting, and financial assurances.

2205. Drainage Costs and Fees	Local drainage fees required by Chapter 17.64 of Title 17 of the Fresno County Ordinance Code are calculated in accordance with a schedule of per gross acre fees. The fee applicable to any parcel of land or division shall be the product of the gross acreage of the parcel or division multiplied by the rate or rates per gross acre applicable to the land use district, local drainage area and local drainage area zone within which the parcel or division is located. The per gross acre rates and estimated total cost of the planned local drainage facilities are set forth on a separate schedule. Copies of that schedule are kept and maintained in the offices of the County Public Works Department, County Auditor-Controller/ Treasurer-Tax Collector, and Clerk to the Board of Supervisors.

Subject: EIR 6606 Riverbend Sand and Gravel
Date: Thursday, July 23, 2015 4:08:01 PM
Attachments: EIR6606RoadsChgs.pdf

Good Afternoon Mohammad and Bob,

I received a call from Herb Lang today regarding his EIR #6606 Riverbend Sand and Gravel project. He was very concerned and unhappy about the number of hours Design Division and Maintenance Division was charging to his project. Although we had reversed Harpreet Kooner's time from this project (40 hours from April and May 2014) he is still concerned about the hours charged after July 2014. He wanted to know exactly what your staff was doing for his project as the work was signed off in July 2014.

I have attached a project cost source report for project number Z6606C. There has been a total of 68.5 hours charged by Design and Maintenance since October 2014.

I would appreciate it if one of you could give Mr. Lang a call to explain the work that was performed by your staff. His cell number is 978-0846. His office number is 875-6565.

Please let me know if you have any questions or need additional information.

Thank you for your assistance.

Carol Pratt

Subject: RE: EIR 6606 Riverbend Sand and Gravel

Carol,

The project did not go to the Planning Commission till February 2016 and to our Board till May 2015. The staff were working on the CUP till it was approved and that's what these charges are for. I will call Mr. Lang and explain these charges.

Thanks,

Mohammad

Fresno County Department of Public Works and Planning is conducting a Customer Service Survey. Please take a few minutes to complete our survey at the following link. Your feedback is greatly appreciated. **Customer Service Survey.**

Subject: EIR 6606 Riverbend Sand and Gravel

Good Afternoon Mohammad and Bob,

I received a call from Herb Lang today regarding his EIR #6606 Riverbend Sand and Gravel project. He was very concerned and unhappy about the number of hours Design Division and Maintenance Division was charging to his project. Although we had reversed Harpreet Kooner's time from this project (40 hours from April and May 2014) he is still concerned about the hours charged after July 2014. He wanted to know exactly what your staff was doing for his project as the work was signed off in July 2014.

I have attached a project cost source report for project number Z6606C. There has been a total of 68.5 hours charged by Design and Maintenance since October 2014.

I would appreciate it if one of you could give Mr. Lang a call to explain the work that was performed by your staff. His cell number is 978-0846. His office number is 875-6565.

Please let me know if you have any questions or need additional information.

Thank you for your assistance.

SURFACE MINING AND RECLAMATION PLAN
RIVERBEND SAND AND GRAVEL PROJECT

1.0 PROJECT INFORMATION

1.1 Purpose and Scope

This application is submitted in accordance with the Regulations for Surface Mining and Reclamation in All Districts, Section 858 of the Fresno County Zoning Ordinance (FCZO), the Surface Mining and Reclamation Act (SMARA), and associated SMARA regulations adopted by the State Mining and Geology Board (SMGB) (CCR Sections 3500-3800).

Riverbend Sand and Gravel, LLC (Riverbend) is applying for a Conditional Use Permit (CUP) to mine construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. The proposed Project Site, located approximately 1.5 miles southeast of the City of Sanger, includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E and includes approximately 619 acres of an approximately 833 acre site located immediately east and north of the Kings River (Exhibits A and B). The remaining 214 acres of the property, including all the existing riparian habitat along the Kings River, are excluded from the project. The project site is relatively flat and is currently in orchards and vineyards. The Hanke Ditch is piped and runs through the eastern portion of the project site north of Goodfellow Avenue and is an open ditch along the east side of the project site south of Goodfellow Avenue.

Mining is anticipated to occur to a depth of approximately 100 feet below natural ground surface. A “wet mining” method is proposed utilizing an electric dragline that does not require dewatering of the excavation. The mined aggregate would be processed at an on-site processing plant located north of Goodfellow Avenue with an anticipated annual process rate of 1.6 million tons and proposed annual sales of approximately 1.25 million tons. The processed material will be used by a Ready-Mix Concrete (RMC) plant (150,000 cubic yards/year) and a Hot Mix Asphalt (HMA) concrete plant (250,000 tons/year) located on-site or sold to outside customers. Access to the project site is proposed from Goodfellow Avenue approximately 1/2 mile west of Riverbend Avenue. The facility will also include periodic use of a portable plant to recycle concrete and asphalt debris (including imported) into Crushed Miscellaneous Base (CMB) (100,000 tons/year) and Recycled Asphalt Product (RAP) (25,000 tons/year). RAP will facilitate use of recycled asphalt in HMA mix designs. Operations are anticipated to ramp-up over a five year period with initial sales in 2015 to be 350,000 tons, sales in 2017 to be 700,000 tons and full operations in 2019 at sales of 1.25 million tons. Operations are expected be on-going for at least 75 years.

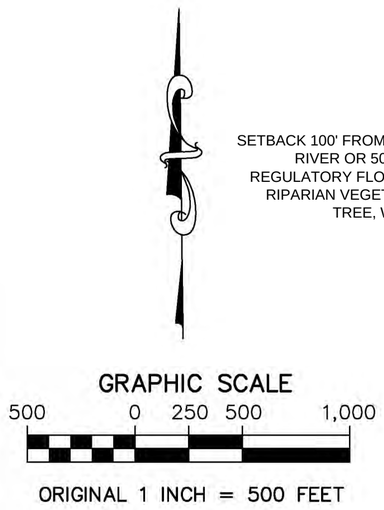
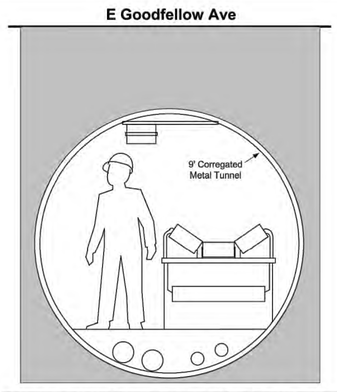
7	80	2062	Riparian & Open Water Habitat	2072
8A	44	2068	Riparian & Open Water Habitat	2077
8B	44	2075	Riparian & Open Water Habitat	2083
9	52	2081	Riparian & Open Water Habitat	2090
Total	**619**			

1. Dates are estimates only. Actual excavation and reclamation dates will vary with permit approval date, market demand and actual depth and volume of marketable material.
2. Gross acres, includes farm roads.
3. Actual final reclamation of each phase will depend on the volume and availability of overburden and process fines occurring on site.
4. To be used for portable plant during mining of plant site (Phase 9)





A conveyor tunnel will be constructed under Goodfellow Avenue to transport mined material from Phases 6-8 south of Goodfellow Avenue to the plant site. The tunnel will be constructed prior to the initiation of mining in Phase 6A in approximately 2054. Construction will require an Encroachment Permit issued by the Fresno County Department of Public Works and Planning Road Maintenance and Operations Division. Construction plans prepared by a Registered Civil Engineer shall be required to show compliance with all applicable standards, codes, and ordinance in affect at the time the permit is issued to insure the integrity of the road and the safety of the public and employees. The tunnel will be a corrugated metal tunnel or equivalent. Approximate dimensions will be nine feet in circumference by 75 feet long.

Detail B - Conveyor Tunnel Under Goodfellow Ave
NTS

Detail A - Plant Site Layout
NTS

GENERAL NOTES:

1. AGGREGATE TO BE EXCAVATED BY ELECTRIC DRAGLINE AND TRANSPORTED TO PROCESSING PLANT BY LAND CONVEYOR.
2. TECHNOLOGICAL IMPROVEMENTS AND CHANGES ENCOUNTERED IN MINING CONDITIONS MAY DICTATE CHANGES IN MINING METHODS.
3. SLOPES WILL BE MINED AT 2:1 (H:V).
4. EXCAVATION DEPTHS ARE BASED ON THE ESTIMATED DEPTH OF THE AGGREGATE RESOURCE.
5. NO EXCAVATION WITHIN:
   - 25 FT OF ANY PROPERTY LINE
   - 100 FT OF ANY PUBLIC RIGHT-OF-WAY
   - 100 FEET FROM THE TOP OF THE KINGS RIVER BANK, OR 50 FEET FROM THE DESIGNATED FLOODWAY OR THE DRIPLINE OF RIPARIAN VEGETATION OR MATURE OAK TREE
   - WHICHEVER IS GREATER;
6. NO STOCKPILES OF SOIL OR OVERBURDEN WILL BE PLACED CLOSER THAN 25 FT OF ANY PROPERTY LINE EXPCEPT FOR THE VISUAL/SOUND BERMS.
7. LOCATION OF TOPSOIL STOCKPLES IS TYPICAL. SINCE RECLAMATION WILL PROCEED CONCURRENT WITH MINING, TOPSOIL STOCKPILES WILL ROTATE WITH EACH AREA MINED.

Subject: Letters for EIR #6606 Riverbend Sand and Gravel
Date: Friday, July 24, 2015 2:21:35 PM
Attachments: Riverbend.pdf

Good Afternoon Mr. Lang,

Attached are copies of the expense report letters for EIR #6606. These include the expenditures reported for the months of February, March, April, and May 2015.

We are still working on finalizing the numbers for the month of June. We will send you the report once this has been completed. In the meantime, I ran a preliminary report for the month of June. During the month of June, Development Services staff charged nine hours to EIR #6606. Road Maintenance and Design staff did not charge this project in June. There were also two invoices paid to SESPE Consulting totaling $60,684.00 and a payment to Business Journal in the amount of $237.50.

Please contact me if you have any questions or need additional information.

We apologize for the delay in getting this information to you.

Dear Gentlemen:

SUBJECT: EXPENSE REPORT – JUNE 18, 2013 THROUGH FEBRUARY 15, 2015
ENVIRONMENTAL IMPACT REPORT #6606

Pursuant to our agreement to provide you with an accounting of time and expenses incurred in relation to the review and processing of your project, the following Expenditure Report reflects the work performed by Fresno County staff from June 18, 2013 through February 15, 2015.

Department Salaries and Benefits	Hours	Costs Incurred
Development Services	417.0	$ 38,618.06
Environmental Health	10.0	980.00
Road Maintenance/Design	171.5	16,654.04
Total	598.5	$ 56,252.10
Other Costs		
Mid Valley Publishing		$ 1,856.25
SESPE Consulting		369,542.00
Fleet Vehicle		105.45
Federal Express		173.36
Business Journal		925.00
	Total Costs	$428,854.16

The above may not include incidental charges against this project which have not yet been accumulated. Costs incurred for salaries and benefits include weighted salaries, benefits, and Department overhead.

The remaining balance of your $54,172.55 staff deposit is <$5,139.61>.
The remaining balance of your $375,242.00 consultant deposit is $5,700.00.*
The remaining balance of your $50,000.00 Legal Services deposit is $50,000.00.
*Includes deposit of $5,700.00 for consultant services received on 2/24/15.

If you have any questions, please contact me at (559) 600-4298.

Sincerely,

Carol Pratt for

SUBJECT: EXPENSE REPORT – JUNE 18, 2013 THROUGH APRIL 26, 2015
ENVIRONMENTAL IMPACT REPORT #6606

Pursuant to our agreement to provide you with an accounting of time and expenses incurred in relation to the review and processing of your project, the following Expenditure Report reflects the work performed by Fresno County staff from June 18, 2013 through April 26, 2015.

Department Salaries and Benefits	Hours	Costs Incurred
Development Services	524.6	$ 48,507.05
Environmental Health	10.0	980.00
Road Maintenance/Design	220.0	21,938.08
Total	754.6	$ 71,425.13
Other Costs		
Mid Valley Publishing		$ 1,856.25
SESPE Consulting		369,542.00
Fleet Vehicle		105.45
Federal Express		186.96
Business Journal		925.00
	Total Costs	$444,040.79

The above may not include incidental charges against this project which have not yet been accumulated. Costs incurred for salaries and benefits include weighted salaries, benefits, and Department overhead.

The remaining balance of your $64,172.55 staff deposit is <$10,326.24>.*
The remaining balance of your $424,526.00 consultant deposit is $54,984.00.*
The remaining balance of your $50,000.00 Legal Services deposit is $50,000.00.
*Includes deposits of $10,000.00 (Staff) and $49,284.00 (Consultant) received on 4/14/15.

If you have any questions, please contact me at (559) 600-4298.

Sincerely,

Carol Pratt for

Subject: Letters for EIR #6606 Riverbend Sand and Gravel

Good Afternoon Mr. Lang,

Attached are copies of the expense report letters for EIR #6606. These include the expenditures reported for the months of February, March, April, and May 2015.

We are still working on finalizing the numbers for the month of June. We will send you the report once this has been completed. In the meantime, I ran a preliminary report for the month of June. During the month of June, Development Services staff charged nine hours to EIR #6606. Road Maintenance and Design staff did not charge this project in June. There were also two invoices paid to SESPE Consulting totaling $60,684.00 and a payment to Business Journal in the amount of $237.50.

Please contact me if you have any questions or need additional information.

We apologize for the delay in getting this information to you.

Fyi Martin, this is what I'm using to track deposits and expenditures. I realize this contractor requests monthly breakdowns so if utilizing this spreadsheet we'd have to take that into consideration and look at only specific months.

Subject: RE: SPR 7946 eRoute - Riverbend Sand & Gravel (CUP 3390)

Hector – our review of this under CUP 3390 indicated that a domestic water supply permit would be required. Concurrent with their application for construction through the County, they should be submitting an application to our office for a domestic water supply permit such that we can be assured they have adequate water supply wells and water quality prior to operation. We will be issuing a letter to the legal owner listed in the SPR requiring submittal of a permit application. Reminders on your end, as per the final EIR would be helpful.

Hector,

I plan to file the SPR application for the Riverbend Sand and Gravel project (CUP 3390) tomorrow morning. I will provide 7 copies of the Site Plan sheets and a pdf file with the Site Plans and related documents. How many copies of the related documents do you need?

The application package includes the following:

- Completed application form
- SPR filing fee for $14,124 payable to the "County of Fresno"
- Deeds for the Riverbend properties
- Vehicle Statement
- Site Plan sheets incorporating approved mitigation measures and conditions of approval including:
  - Current Site Plan
  - Mine Plan
  - Reclamation Plan
- Mine and Reclamation Plan document approved with CUP 3390 as Operational Statement
- Mitigation Monitoring and Reporting Program and Condition Compliance Matrix

EXHIBIT 64

THIRD PARTY ADMINISTRATOR CONSULTANT AGREEMENT

THIS AGREEMENT is made and entered into this 1st day of September 2015, by and between the County of Fresno, a Political Subdivision of the State of California, hereinafter referred to as "County," and Buada Associates, Inc., whose address is 4872 N Arcade Avenue, Fresno, CA 93704, hereinafter referred to as "Consultant."

WITNESSETH

WHEREAS, on February 26, 2015, pursuant to County Resolution No. 12492, subject to the Conditions listed therein, the County Planning Commission certified Environmental Impact Report (EIR) No. 6606 for the Riverbend Sand and Gravel Project (State Clearinghouse No. 2013071097) ("Project"), approving Unclassified Conditional Use Permit ("UCUP") No. 3390, and adopting a Mitigation Monitoring and Reporting Plan and Condition Compliance Matrix ("Monitoring Plan") for the Project; and

WHEREAS, Riverbend Sand and Gravel, LLC is the owner of the Project ("Applicant") and will be operating and developing the Project approved under UCUP No. 3390, consisting of a sand and gravel extraction facility on a 619-acre portion of a 833-acre site. Exhibit "A", attached hereto and incorporated herein by reference, reflects the legal description of the land in question; and

WHEREAS, the Monitoring Plan is attached hereto as Exhibit "B" and incorporated herein by reference. This Agreement is for UCUP No. 3390 and Applicant will be responsible for the Project described under UCUP No. 3390. The County Planning Commission approved a Reclamation Plan as a component of the UCUP for the Project on February 26, 2015; and

WHEREAS, Condition of Approval No. 11 of UCUP No. 3390 requires that the Applicant enter into an agreement with the County of Fresno to implement the Monitoring Plan via a third party consultant in accordance with Section 21081.6 of the

California Public Resources Code and Section 15097 of Title 14, Chapter 3 of the California Code of Regulations; and

WHEREAS, the Consultant's Proposal for Riverbend Sand and Gravel Mitigation Monitoring and Conditions Compliance, dated July 9, 2015 ("Proposal") is attached hereto as Exhibit "C" and incorporated herein by reference. The Proposal includes Tasks 1 – 3 under Scope of Services; and

WHEREAS, this Agreement shall cover monitoring the Project's Mitigation Measures and Conditions of Approval, as provided in the Monitoring Plan (Exhibit "B"); and

WHEREAS, the Consultant represents that it is qualified, able, and willing to monitor the Project's Mitigation Measures and Conditions of Approval, which representation the County specifically relies upon.

NOW, THEREFORE, in consideration of the Covenants and Conditions set forth herein, the parties agree as follows:

1. Obligations of the Consultant

A. Services To Be Provided: Consultant will monitor Applicant's compliance with all Project Mitigation Measures and Conditions of Approval (described in Exhibit "B"), as set forth in the Proposal (Exhibit "C").

B. Reporting: Consultant will provide County a written report by e-mail within 30 days of each monitoring visit to document the site conditions. If a failure to comply with applicable Mitigation Measures or Conditions of Approval is identified, the report shall indicate the issue, the person(s) contacted, and the corrective action(s) recommended.

2. Obligations of the County

A. County shall make available to Consultant all documents, studies, and other information, not otherwise confidential or privileged, in its possession related to the Project.

B. County shall compensate Consultant as provided in Section 3 of

this Agreement.

3. Invoicing and Compensation

A. Invoices: Consultant shall submit two copies of each invoice, which shall describe the tasks performed during the period covered by the invoice. The invoice shall specify: (1) hours worked and the billing rates, as set forth in Exhibit "C", and (2) the total amount billed to-date for the Project.

B. Compensation to Consultant: In full compensation for services performed under this Agreement, County agrees to pay Consultant, and Consultant agrees to accept, compensation according to the Hourly Rate and Expense Schedule specified in Exhibit "C".

Within 45 days of receipt of a proper invoice, County shall determine whether Consultant has adequately performed to the satisfaction of County the item(s) for which Consultant seeks payment, and shall remit payment thereof to Consultant.

If County determines that Consultant has not adequately performed any such task or services, County shall inform Consultant of those acts in writing which are necessary for satisfactory completion of the item(s). Consultant shall undertake any and all work to satisfactorily complete the item(s) at no additional charge to County.

Notwithstanding any other provision in this Agreement, compensation paid to Consultant shall not exceed Nine Thousand Dollars ($9,000) annually (September 1st – August 31st) for the entire term of this Agreement. The maximum amount payable for the entire term of this Agreement is $45,000.

C. Consultant to Bear Expenses: It is understood that the Consultant shall bear all expenses incidental to the performance of his obligations under this Agreement.

4. Term

This Agreement shall become effective on September 1, 2015 and shall

terminate on August 31, 2020.

5. Termination

A. The County may immediately suspend or terminate this Agreement in whole or in part, where in the determination of the County there is:

i. A discontinuance by Applicant of operation of the Project;

ii. A failure by Applicant to timely remit reimbursement to County for an invoice submitted by Consultant to County;

iii. An illegal or improper use of funds by Consultant;

iv. A failure by Consultant to comply with any term of this Agreement;

v. A substantially incorrect or incomplete report submitted to the County by Consultant;

vi. Inadequately performed services by Consultant.

B. Consultant or County may terminate this Agreement upon 180 days prior written notice to the other party. If the Consultant terminates the Agreement, Consultant shall reimburse the County, up to a maximum of Five Thousand Dollars ($5,000), for the actual expense of issuing a Request For Proposal, engaging a new Consultant, and the new Consultant's cost in becoming familiar with the Project, its operations to date, and its compliance with the Project Monitoring Plan set forth in Exhibit "B".

C. If this Agreement is terminated as provided in this section, the Consultant shall be compensated for satisfactorily performed services completed to the date of termination based upon the compensation rates set forth in Section 3 of this Agreement.

6. Hold Harmless and Insurance

A. The Consultant shall hold the County, its Boards, Commissions, officers, agents, and employees harmless and indemnify and, at County's request, defend the County, its Boards, Commissions, officers, agents and employees, against

the payment of any and all costs and expenses (including reasonable attorney fees and court costs), claims, losses, damages, causes of action, lawsuits, and liability for bodily and personal injury to or death of any person and for injury or loss of any property resulting from, or arising out of, or in any way connected with any negligent or wrongful acts or omissions of the Consultant, its officers, agents, and employees, in performing or failing to perform any work, services, or functions provided for, or referred to, or in any way connected with any work, services, or functions to be performed under this Agreement and against the payment of any and all costs and expenses (including reasonable attorney fees and court costs), claims, losses, damages, causes of action, lawsuits and liability for bodily and personal injury to, or death of any person, and for injury or loss of any property resulting from or arising out of, or in any way occurring to any person, firm, or corporation who may be so injured by any negligent or wrongful act or omission of the Consultant, its officers, agents, and employees in performing or failing to perform any work service or functions provided for, or referred to, or in any way connected with any work, service, or functions to be performed under this Agreement.

B. Without limiting the County's right to obtain indemnification from the Consultant or any third parties, the Consultant, at its sole expense, shall maintain in full force and effect the following insurance policies throughout the term of this Agreement: (1) Commercial General Liability Insurance with limits of not less than One-Million Dollars ($1,000,000.) per occurrence and an annual aggregate of Two Million Dollars ($2,000,000.). This policy shall be issued on a per occurrence basis. County may require specific coverages including completed operations, products liability, contractual liability, Explosion-Collapse-Underground, fire legal liability, or any other liability insurance deemed necessary because of the nature of this contract; (2) Comprehensive Automobile Liability Insurance with limits for bodily injury of not less than Two Hundred Fifty Thousand Dollars ($250,000.) per person, Five-Hundred Thousand Dollars ($500,000.) per accident and for property damages of not less than

Fifty Thousand Dollars ($50,000.), or such coverage with a combined single limit of Five Hundred Thousand Dollars ($500,000.). Coverage should include owned and non-owned vehicles used in connection with this Agreement; (3) Professional Liability Insurance, if Consultant employs licensed professional staff, (e.g., Ph.D., R.N., L.C.S.W., M.F.C.C.) in providing services, with limits of not less than One Million Dollars ($1,000,000.) per occurrence, Three Million Dollars ($3,000,000.) annual aggregate; and (4) A policy of Worker's Compensation Insurance as may be required by the California Labor Code.

The General Liability and Automobile Liability Insurance policies shall name the County, its officers, agents, and employees, individually and collectively, as additional insured, but only insofar as the operations under this Agreement are concerned. Such coverage for additional insured shall apply as primary insurance and any other insurance, or self-insurance, maintained by the County, its officers, agents, and employees, shall be excess only and not contributing with insurance provided under the Consultant's policies herein. This insurance shall not be canceled or changed without a minimum of 30 days advance, written notice given to County.

Prior to the commencement of performing its obligations under this Agreement, the Consultant shall provide Certificates of Insurance on the foregoing policies, as required herein, to the County's Department of Public Works and Planning, stating that such insurance coverages have been obtained and are in full force; that the County, its officers, agents, and employees shall not be responsible for any premiums on the policies; that such insurance (General Liability and Automobile Liability only) names the County, its officers, agents, and employees, individually and collectively, as additional insured, but only insofar as the operations under this Agreement are concerned; that such coverages for additional insured shall apply as primary insurance and any other insurance, or self-insurance, maintained by the County, its officers, agents, and employees, shall be excess only and not contributing with insurance provided under the Consultant's policies herein; and that this insurance

shall not be canceled or changed without a minimum 30 days advance, written notice given to the County.

In the event the Consultant fails to keep in effect at all times insurance coverages as herein provided, the County may, in addition to other remedies it may have, suspend or terminate this Agreement upon the occurrence of such event.

7. Work Product

A. Any and all reports, studies, data, or other information, prepared or assembled by the Consultant under this Agreement shall not be provided to any person, association, corporation, or other organization during the term of this Agreement without the prior written consent of the County.

B. The County shall have the unlimited authority to forever publish, disclose, distribute and otherwise use throughout the world, in whole or in part, and allow others to do so, any and all reports, studies, data, or other information prepared by the Consultant pursuant to this Agreement.

C. All documents prepared or obtained by the Consultant shall become the exclusive property of the County. Upon termination of this Agreement and prior to any compensation received from the County for unpaid services, the Consultant shall surrender to the County all work products created pursuant to this Agreement without any reservation of rights therein. Consultant may retain such documents only for so long as the County authorizes such work product to be retained to allow the completion of work as provided in Subsection 5.B of this Agreement. Consultant may retain copies of any documents prepared or obtained by the Consultant and designated as public records under the Public Records Act, and such documents may be used by the Consultant in any manner after this Agreement has been terminated.

D. The Consultant shall provide (submit, reproduce and distribute) all materials related to Tasks 1 - 3 of the Proposal. The County will require that the Consultant provide documents in both Microsoft Word Office 2010 (or newer) and

PDF file formats.

8. Independent Contractor

In performance of the work, duties, and obligations assumed by the Consultant under this Agreement, it is mutually understood and agreed that the Consultant, including any and all of the Consultant's officers, agents, and employees, will at all times be acting and performing as an independent contractor, and shall act in an independent capacity and not as an officer, agent, servant, employee, joint venture, partner, or associate of the County. Furthermore, the County shall have no right to control or supervise or direct the manner or method by which the Consultant shall perform its works and function. However, the County shall retain the right to administer this Agreement so as to verify that the Consultant is performing its obligations in accordance with the terms and conditions thereof. The Consultant and the County shall comply with all applicable provisions of law and the rules and regulations, if any, of Governmental authorities having jurisdiction over matters the subject thereof.

Because of its status as an independent contractor, the Consultant shall have absolutely no right to any and all employment rights and benefits available to County employees. The Consultant shall be solely liable and responsible for providing to, or on behalf of its employees, all legally-required employees benefits. In addition, the Consultant shall be solely responsible and save the County harmless from all matters relating to payment of the Consultant's employees, including compliance with Social Security withholding, and all other regulations governing such matters. It is acknowledged that during the term of this Agreement, Consultant may be providing services to others unrelated to the County or to this Agreement.

9. Governing Law

Venue for any action arising out of, or related to this Agreement shall only be in Fresno County, California.

The rights and obligations of the parties and all interpretation and

performance of this Agreement shall be governed in all respects by the laws of the State of California.

10. Amendments

Any changes to this Agreement requested either by the County or the Consultant may only be affected if mutually agreed upon in writing by duly authorized representatives of the parties hereto. This Agreement shall not be modified or amended or any rights of a party to it waived except by such writing.

11. Compliance With Laws

The Consultant shall comply with all Federal, State, and local laws, ordinances, regulations, and Fresno County Charter Provisions applicable in the performance of its services.

12. Audits and Inspections

The Consultant shall at any time during business hours, and as often as the County may deem necessary, make available to the County for examination all of its records and data with respect to the matters covered by this Agreement. The Consultant shall, upon request by the County, permit the County to audit and inspect all of such records and data necessary to ensure the Consultant's compliance with the terms of this Agreement.

If this Agreement exceeds Ten Thousand Dollars ($10,000.), the Consultant shall be subject to the examination and audit of the Auditor General for a period of three (3) years after final payment under this Agreement (Government Code Section 8546.7).

13. Contract Administration

The Consultant shall notify its appropriate employees of the individual whom the County designates as the County Contract Administrator for this Agreement. All routine correspondence and telecommunications related to Agreement performance and related issues should be addressed as follows:

Alan Weaver, Director
Department of Public Works and Planning

Development Services Division
2220 Tulare Street, Sixth Floor
Fresno, CA 93721
Phone: (559) 600-4500
Fax: (559) 600-4548
e-mail: AWeaver@co.fresno.ca.us

14. Notices

The persons and their addresses having authority to give and receive notices under this Agreement include the following:

COUNTY:

Alan Weaver, Director
Department of Public Works and Planning
2220 Tulare Street, Sixth Floor
Fresno, CA 93721
Attn: Division Manager/Development Services

CONSULTANT:

John Buada, President
Buada Associates, Inc.
4872 N Arcade Avenue
Fresno, CA 93704

Any and all notices between the County and the Consultant provided for or permitted under this Agreement or by law shall be in writing and shall be deemed duly served when personally delivered to one of the parties, or in lieu of such personal service, when deposited in the United States Mail, postage prepaid, addressed to such party.

15. Non-Assignment

Neither party shall assign, transfer, or sub-contract this Agreement nor their rights or duties under this Agreement without the written consent of the other party.

16. Disclosure Of Self-Dealing Transactions

This provision is only applicable if the CONTRACTOR is operating as a corporation (a for-profit or non-profit corporation) or if during the term of the agreement, the CONTRACTOR changes its status to operate as a corporation.

Members of the CONTRACTOR's Board of Directors shall disclose any

self-dealing transactions that they are a party to while CONTRACTOR is providing goods or performing services under this agreement. A self-dealing transaction shall mean a transaction to which the CONTRACTOR is a party and in which one or more of its directors has a material financial interest. Members of the Board of Directors shall disclose any self-dealing transactions that they are a party to by completing and signing a Self-Dealing Transaction Disclosure Form, attached hereto as Exhibit "D" and incorporated herein by reference, and submitting it to the COUNTY prior to commencing with the self-dealing transaction or immediately thereafter.

17. Consultant's Legal Authority

Each individual executing or attesting this Agreement on behalf of the Consultant hereby covenants, warrants, and represents: (i) that he or she is duly authorized to execute or attest and deliver this Agreement on behalf of the Consultant's Corporation; and (ii) that this Agreement is binding upon such Corporation.

18. Binding Upon Successors

This Agreement shall be binding upon and inure to the benefit of the parties and their respective successors in interest, assigns, legal representatives, and heirs.

//

//

//

//

//

//

//

//

//

19. Entire Agreement

This Agreement constitutes the entire Agreement between the Consultant and County with respect to the subject matter hereof and supersedes all previous negotiations, proposals, commitments, writing, advertisements, publications, and understandings of any nature whatsoever unless expressly included in this Agreement.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed as of the day and year first above written.

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF FRESNO, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS: -

Parcel No.1: APN 350-041-12

That portion of Government Lots 1 and 4 in the Northeast quarter of Section 1, Township 15 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, which lies North and East of the Main channel of Kings River.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.2: a portion of APN 332-071-52

That portion of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, described as follows:

Beginning at the Southeast comer of said Section 36, Thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance of 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

Parcel No.3: a portion of APN 332-071-52

That portion of the Southeast quarter of Section 36, Township 14 South, Range 22 East, Mount Diablo Base and Meridian, in the County of Fresno, State of California, according to the Official Plats thereof, lying East of Kings River.

Excepting therefrom that portion of said premises and described as follows:

Beginning at the Southeast corner of said Section 36, thence running North along the Easterly line of said Section, a distance of 0.68 chains to a survey stake; thence at right angles in a Westerly direction parallel to the Southerly line of said Section 36, a distance of 31.70 chains to the centerline of the main channel of Kings River; thence in a Southerly direction along the centerline of the main channel of Kings River, 0.68 chains to the South line of said Section 36; thence at right angles Easterly along the South line of said Section 36, a distance 31.70 chains to the point of beginning.

Excepting therefrom any portion or portions thereof now lying within the boundaries of the Kings River or its navigable tributaries or any other navigable body of water.

LEGAL DESCRIPTION

PARCEL 1:

A portion of the fractional Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, described as follows,

Beginning at a point on the West Line of said Southwest quarter which is 30 feet South from the West quarter corner; thence South 88° 52.6' East along the South line of the road right of way, 2668.2 feet to the East line of said Southwest quarter, at a point distance 30 feet South of the center quarter corner of said Section 31, thence South 1° 21.6' West along the East line of said Southwest quarter a distance of 1335.5 feet; thence North 88° 52.6' West, a distance of 2651.7 feet to the west line of said Section 31, thence North O° 39' East, a distance of 1335.5 feet to the point of beginning.

Said land is designated Parcel "A" on a map of resurvey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and other property, recorded December 16, 1941, in Book 15 Page 73 of Record of Surveys, records of said County.

APN 333-061-04

PARCEL 2:

That portion of Section 31, Township 14 South, Range 23 East, Mount Diablo Base and Meridian, and of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, according to the Official plat thereof, described as follows:

Commencing at a point on the West line of the Southwest quarter of said Section 31, 1365.5 feet Southerly from the Northwest corner of said Southwest quarter of Section 31; thence South 88° 52.6' East and parallel with the East and West centerline of said Section 31, 2651.7 feet to the North and South centerline of said Section 31; thence South 1° 21.6' West 1337.8 feet to a point on the East line of Lot 2 of section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, said point being 82.6 feet Southerly from the quarter section corner common to said sections 31 and 6; thence North 89° 7' West 2635.2 feet to the West line of Lot 1 of said section 6 at a point 82.6 feet Southerly from the Northwest corner of said Section 6; thence North 82° 39' East along the West line of said Lot 1 and of said Section 31, 1348.8 feet to the point of beginning.

Being Parcel "B" as same is designated and delineated upon that certain Map of Re-Survey of the Southwest quarter of Section 31, Township 14 South, Range 23 East, and of Lot 1 of Section 6 and part of the East half of the Northwest quarter of Section 6, Township 15 South, Range 23 East, Mount Diablo Base and Meridian, recorded at the request of Ross C. Phillips, L. S., on December 16, 1941, in Book 15, Page 73 of Record of surveys, Fresno County Records.

APR 333-061-05 & 360-020-20

Real property in the unincorporated area of the County of FRESNO, State of California, described as follows:

PARCEL 1: APN 332-071-53

ALL THAT PORTION OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, AND THE SOUTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT, LYING EAST OF THE KINGS RIVER, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHEAST CORNER OF THE NORTHEAST QUARTER OF THE NORTHEAST QUARTER OF SAID SECTION 36, AND RUNNING THENCE WEST 1320.1 FEET; THENCE AT RIGHT ANGLES SOUTH 1323.2 FEET TO A POINT IN THE CENTER OF A COUNTY ROAD; THENCE AT RIGHT ANGLES WEST 990 FEET; THENCE AT RIGHT ANGLES NORTH 990.75 FEET TO A POINT IN THE CENTER OF KINGS RIVER; THENCE NORTH 45° EAST 466.4 FEET; THENCE ALONG THE CENTER OF KINGS RIVER NORTH 26°30' EAST 1479 FEET TO THE NORTH LINE OF SAID SECTION 36; THENCE CONTINUING ALONG THE LAST MENTIONED COURSES 678 FEET; THENCE RUNNING NORTH 719 FEET TO A POINT 300 FEET EAST OF THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25 IN SAID TOWNSHIP AND RANGE; THENCE RUNNING NORTH 40° EAST 700 FEET; THENCE NORTH 65-1/2° EAST 636 FEET TO THE EAST LINE OF THE SOUTHEAST QUARTER OF SAID SECTION 25 AND RUNNING THENCE SOUTH ALONG SAID LAST MENTIONED LINE 3448.50 FEET TO THE PLACE OF BEGINNING.

ALSO ALL OF THE SOUTHEAST QUARTER OF THE NORTHEAST QUARTER OF SECTION 36, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, ACCORDING TO THE UNITED STATES GOVERNMENT TOWNSHIP PLAT.

EXCEPTING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 2: APN 333-160-02S

THAT PORTION OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SECTION 30, TOWNSHIP 14 SOUTH, RANGE 23 EAST, THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING ALL OIL, GAS, HYDROCARBONS AND OTHER MINERALS THEREIN AND THEREUNDER AS RESERVED IN THE DEED FROM CELLA VINEYARDS, A CALIFORNIA CORPORATION, RECORDED FEBRUARY 11, 1947, IN BOOK 3884, PAGE 448 OF OFFICIAL

RECORDS.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3: APN 332-042-56

THAT PORTION OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE NORTH LINE THEREOF WHICH IS SOUTH 89°18' EAST A DISTANCE OF 2510.04 FEET FROM THE NORTHWEST CORNER THEREOF; THENCE SOUTH 4°23'21" WEST A DISTANCE OF 1254.5S FEET TO A POINT 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE SOUTH 89°25' EAST A DISTANCE OF 262.64 FEET, PARALLEL WITH AND 69 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25 TO A POINT ON THE EAST LINE OF SAID SECTION; THENCE NORTH ALONG THE EAST LINE OF SAID SECTION TO THE NORTHEAST CORNER OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION 25; THENCE NORTH 89°18' WEST ALONG THE NORTH LINE OF THE SOUTH HALF OF THE NORTHEAST QUARTER OF SAID SECTION TO THE POINT OF BEGINNING.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 3A:

AN EASEMENT FOR ROAD PURPOSES OVER THE NORTHERLY 6 FEET OF THE SOUTHERLY 55 FEET OF THE NORTHEAST QUARTER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN, FURTHER DESCRIBED AS: COMMENCING AT A POINT WHICH IS 49.00 FEET NORTH 00°31' WEST, OF THE CENTER OF SAID SECTION 25; THENCE NORTH 00°31 WEST, 6.00 FEET; THENCE SOUTH 89°25' EAST, PARALLEL WITH THE EAST AND WEST CENTER LINE OF SAID SECTION, A DISTANCE OF 2400.80 FEET TO A POINT; THENCE NORTH 4°23" EAST, 14.00 FEET TO A POINT; THENCE SOUTH 89°25' EAST, 10.00 FEET TO A POINT; THENCE SOUTH 00°6'19" EAST, 20.00 FEET TO A POINT WHICH IS 49.00 FEET NORTH OF THE EAST AND WEST CENTER LINE OF SECTION 25; THENCE NORTH 89°25' WEST, 2410.80 FEET TO THE NORTH OF COMMENCEMENT.

ALSO EXCEPTING THEREFROM ANY PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

PARCEL 4: APN 333-160-01S

THAT PORTION OF THE SOUTHWEST QUARTER OF SECTION 19 AND THE WEST HALF OF SECTION 30, ALL IN TOWNSHIP 14 SOUTH, RANGE 23 EAST, MOUNT DIABLO BASE AND MERIDIAN, IN THE UNINCORPORATED AREA, COUNTY OF FRESNO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT THEREOF, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF SECTION 25, TOWNSHIP 14 SOUTH, RANGE 22 EAST, MOUNT DIABLO BASE AND MERIDIAN; THENCE EAST 160 RODS; THENCE NORTH 400

RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE WEST 80 RODS, THENCE SOUTH 80 RODS; THENCE SOUTH TO THE CENTER OF KINGS RIVER; THENCE SOUTHERLY IN THE CENTER OF SAID RIVER TO THE EAST LINE OF THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 25; THENCE SOUTH ON SAID SECTION LINE TO THE SOUTHEAST CORNER OF SAID SECTION 25 TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION THEREOF DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 30; THENCE EAST ALONG THE NORTH LINE OF SAID SECTION A DISTANCE OF 870 FEET, A LITTLE MORE OR LESS, TO THE WEST BANK OF THE KINGS RIVER; THENCE ALONG THE WEST BANK OF SAID RIVER AS FOLLOWS: SOUTH 17°51' WEST 1387 FEET; SOUTH 34°22' WEST 514 FEET, AND SOUTH 19°41' WEST 460 FEET, A LITTLE MORE OR LESS, TO THE WEST LINE OF SAID SECTION; THENCE NORTHERLY ALONG THE WEST LINE OF SECTION 30, 2177 FEET, MORE OR LESS, TO THE POINT OF COMMENCEMENT.

EXCEPTING THEREFROM AN UNDIVIDED 50% OF ALL OIL, GAS AND MINERALS, EXCLUDING SAND, AS RESERVED BY CELLA VINEYARDS, FORMERLY KNOWN AS B & L CELLA BROS., BY DEED RECORDED JANUARY 31, 1974, IN BOOK 6261 PAGE 134 OF OFFICIAL RECORDS, DOCUMENT NO. 8303.

ALSO EXCLUDING THEREFROM ANY PORTION OR PORTIONS THEREOF NOW LYING WITHIN THE BOUNDARIES OF THE KINGS RIVER OR ITS NAVIGABLE TRIBUTARIES OR ANY OTHER NAVIGABLE BODY OF WATER.

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM AND CONDITIONS COMPLIANCE MATRIX FOR THE RIVERBEND SAND AND GRAVEL PROJECT

INTRODUCTION

The Mitigation Monitoring and Reporting Program ("MMRP") has been prepared to implement the mitigation measures identified in the Riverbend Sand and Gravel Project ("Project") Environmental Impact Report ("EIR"). Section 21081.6 of the California Environmental Quality Act ("CEQA") requires adoption of a monitoring or reporting program when mitigation measures have been identified that would reduce or avoid significant environmental effects. This MMRP contains measures identified in the EIR that would be implemented through monitoring of an activity, such as grading or excavation, and other measures that would be implemented through a reporting mechanism, such as obtaining an air quality permit or an Emergency/Contingency Plan.

The law states that the MMRP shall be designed to ensure compliance during implementation of the Project. When implemented, environmental effects associated with the Project will be reduced or eliminated. Therefore, the MMRP has been prepared as a matrix containing the following elements:

- Measures that would mitigate significant impacts on the environment are recorded with a description of the action and the procedure necessary to ensure compliance.
- A procedure of compliance and verification has been outlined for each measure. This procedure designates what action will be taken and when, who will take action, and to whom and when compliance will be reported.
- The MMRP has been designed to provide focused, yet flexible guidelines. As monitoring progresses, changes to compliance procedures may be necessary based upon recommendations by those responsible for the program.

PROGRAM MANAGEMENT

The MMRP will be in place through all phases of the Project. The Project planner, assigned by the Fresno County ("County") planning director, shall coordinate enforcement of the MMRP and oversee it to ensure that proper action is taken on each mitigation measure. Each County department or division shall ensure that the Project complies with the conditions (mitigation) that relate to that department.

The Project planner or responsible County department has the authority to stop the work of the operator if compliance with any aspects of the MMRP is not occurring after written notification

has been issued. The Project planner or responsible County department also has the authority to deny entry into a new mining phase until compliance with a mitigation measure occurs.

CONDITIONS COMPLIANCE MATRIX

The MMRP that was circulated as Chapter 4.0 in the Final EIR has been revised to include the recommended conditions of approval for the Project. Table 1, "Mitigation Monitoring and Reporting Program and Conditions Compliance Matrix for the Riverbend Sand and Gravel Project," includes the mitigation measures and conditions of approval, the procedure for complying with and/or monitoring them, and the party responsible for implementing them.

TABLE 1

MITIGATION MONITORING AND REPORTING PROGRAM AND CONDITIONS COMPLIANCE MATRIX

FOR THE RIVERBEND SAND AND GRAVEL PROJECT

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
MITIGATION MEASURES			
AESTHETICS			
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-1**: A 10-foot high vegetated berm shall be constructed along Riverbend Avenue adjacent to Phases 3A, 3B, 4A and 4B. An 8-foot vegetated berm shall be constructed along the south side of Goodfellow from Riverbend Avenue to 2,000 feet west of Riverbend Avenue. The berms will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. The berms shall be constructed and planted prior to the removal of overburden in each phase.	**AES-1**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-2**: Orchard-like screens shall be planted on the north side of Goodfellow Avenue west of the entrance road and on the south side of Goodfellow Avenue west of the 8-foot high vegetated berm prior to overburden removal in the adjacent phases. The tree species will be evergreen trees (e.g., olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening.	**AES-2**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AES-1: Would the Project substantially degrade the existing visual character	**MM AES-3**: The dragline shall be painted a neutral-tone color to achieve the best blending with the surrounding	**AES-3**: Use of a neutral-tone paint color will be monitored through the	Fresno County Dept. of Public Works & Planning, Development Services

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
or quality of the site and its surroundings?	landscape and vegetation.	annual County Mine Inspections.	Division
Impact AES-1: Would the Project substantially degrade the existing visual character or quality of the site and its surroundings?	**MM AES-4**: Prior to commencement of plant area operations, a 15-foot high vegetated berm shall be constructed along the Kings River adjacent to the Plant area (i.e., Phase 9). The berm will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm.	**AES-4**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
AGRICULTURE & FORESTRY RESOURCES			
Impact AG-1: Would the Project convert Prime Farmland, Unique Farmland, Farmland of Statewide Importance, Farmland of Local Importance, or Grazing Land, as shown on maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	**MM AG-1:** The Project shall conserve agricultural land by acquiring an agricultural conservation easement (ACE) on 351 acres of Important Farmland as classified by DOC's FMMP to mitigate for the 351 acres of Important Farmland on the Project site to be converted to non-agricultural use. The ACE would be phased in accordance with the following schedule: • Within one year of existing agricultural land being taken out production for the Project 100 acres shall be placed in an ACE. • Within the earlier of 5 years, or before 100 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 100 acres shall be placed in an ACE. • Within the earlier of 10 years, or before 200 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 75 acres shall be placed in an ACE.	**AG-1:** Annual compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	• Within the earlier of 15 years, or before 275 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 76 acres shall be placed in an ACE. Temporarily taking of land out of agriculture production for normal farming purposes (e.g. rotating crops, resting soil, etc.) shall not be considered taking of existing agricultural land out of production for the Project.		
AIR QUALITY			
Impact AQ-5: Would the Project create objectionable odors affecting a substantial number of people?	**MM AQ-1**: The following design features will mitigate VOC, SVOC, and/or SO_2 emissions: 1. The type of asphaltic cement produced by on-site plants affects odorous emissions. Some cements have lower VOC/SVOC emissions than others. Therefore, cements with lower VOC/SVOC emissions will be used to the extent feasible. 2. Periodic burner tune-ups may reduce VOC emission by about 38 percent. Therefore, periodic burner tune-ups will be implemented. 3. Mixing drum vapors will be routed back to the dryer burner.	**AQ-1**: Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact AQ-2: Would the Project violate any air quality standard or contribute substantially to an existing or projected air quality violation?	**MM AQ-2:** Each off-road engine on-site between 1/1/2015 and 12/31/2018, excluding scrapers and haul trucks, shall be model year 2015 or later. Engines in scrapers shall be no greater than ten (10) years old and shall meet the Tier 3 off-road engine standard. Engines in off-road haul trucks shall be equipped with engines that	**AQ-2**: Compliance through annual County Mine Inspections. In addition, documentation demonstrating compliance with the identified off-road engine	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
Impact AQ-3: Would the Project cause a cumulatively considerable net increase of a criteria pollutant for which the Project region is non-attainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)? ***Impact AQ-4:*** Would the Project expose sensitive receptors to substantial pollution concentrations?	meet the Interim Tier 4 emissions standards. Each off-road engine on-site after 1/1/2019, excluding scrapers, shall be model year 2014 or later. Engines in scrapers shall meet Tier 3 engine standard and be model year 2010 model year or later. Off-road haul trucks shall not be used after 1/1/2019 except during occasional repairs or during relocation of overland conveyors not to exceed five workdays in any month. In such cases, the off-road trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards.	requirements shall be maintained on-site and provided to the County upon request.	
Impact AQ-2: Would the Project violate an air quality standard or contribute substantially to an existing or projected air quality violation? ***Impact AQ-3:*** Would the Project cause a cumulatively considerable net increase of a criteria pollutant for which the Project region is non-attainment under an applicable Federal or State ambient air quality standard (including releasing	**MM AQ-3**: Diesel trucks shall not idle greater than five (5) minutes while on-site as required by the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling (13 CCR §2485).	**AQ-3**: Compliance through annual County Mine Inspections. In addition, the facility shall maintain a written idling policy and distribute that policy to affected operators of off-road equipment.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Air Resources Board, and San Joaquin Valley Air Pollution Control District

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
emissions which exceed quantitative thresholds for ozone precursors)? *Impact AQ-4:* Would the Project expose sensitive receptors to substantial pollution concentrations?			
BIOLOGICAL RESOURCES			
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-1**: 1. All buildings to be removed shall be surveyed by a qualified biologist to determine if they are being used as a roost site for bats, and if so, what type of roosting behavior is occurring (night roost vs. day/maternity roost). The survey shall be conducted in June or July when maternity roosts would be most active. 2. Any buildings to be removed that are determined to support only night-roosting bats shall be removed between September 1 and October 14, or between February 16 and April 14. Removal of buildings during these periods will avoid impacts to any bats utilizing the buildings during the normal breeding season (April 15 to August 30) and winter torpor (October 15 to February 15). 3. If a building is determined to support a day/maternity roost, a mitigation plan (i.e., removal plan) shall be prepared by a qualified bat biologist experienced with bat eviction and exclusion possessing a Memorandum of Understanding with the California Department of Fish and Wildlife. At	**BIO-1**: Qualified biologist will conduct pre-demolition surveys for bat roosting sites and oversee avoidance of night-roosting bats during demolition activities for the periods specified. Qualified biologist will conduct pre-demolition surveys for day/maternity roosts and oversee humane eviction of the existing bat population and creation of artificial day roost habitat. If necessary, a mitigation/removal plan shall be prepared by a qualified biologist.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Department of Fish and Wildlife

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	a minimum, the mitigation plan shall provide for humane eviction of the existing bat population and creation of artificial day roost habitat, to mitigate impacts resulting from removal of the roost site.		
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	**MM BIO-2**: 1. To the maximum extent practicable, all construction activities associated with the initiation of work on the Project site or initiation of new mining phases shall be scheduled between September 15 and February 1, which is the typical non-nesting season. 2. If the initiation of work in new areas cannot be scheduled during the non-nesting season, prior to the initiation of work on the Project site and each individual phase of mining (e.g., Phase 1A, 1B, etc.), a qualified biologist shall survey all suitable nest trees within 0.25 mile of the work limits for nesting Swainson's hawks, within 500 feet of the work limits for other raptors, and within 250 feet of the work limits for other nesting birds no more than 10 days prior to the start of ground disturbing activities. The survey will follow the methodology developed by the Swainson's Hawk Technical Advisory Committee (SWHA TAC, 2000). 3. If nesting Swainson's hawks are found within 0.25 mile, other nesting raptors are found within 500 feet, or other nesting birds are found within 250 feet of the work limits as described in Item 2 above: a. A qualified biologist shall evaluate the potential for the proposed work to disturb	**BIO-2**: Qualified biologist will conduct pre-construction surveys for nesting migratory birds and raptors and oversee avoidance of active nests during construction and ground disturbance activities. If nests are found within identified ranges, CDFW shall be contacted.	Fresno County Dept. of Public Works & Planning, Development Services Division, California Department of Fish and Wildlife

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	nesting activities. The evaluation criteria shall include, but not be limited to, the location/orientation of the nest in the nest tree, the distance of the nest to the work limits, the line of sight between the nest and the work limits, and the description of the proposed work. The nest shall be continually surveyed for the first 24 hours. b. CDFW shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities. c. If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities that occur during the breeding season to monitor nesting activity. The biologist shall have the authority to stop work if it is determined the Project is adversely affecting nesting activities. 4. If no nesting Swainson's hawks are found within 0.25 miles, no other nesting raptors are found within 500 feet, or no other nesting birds are found within 250 feet of the work limits as described in measure 2 above, work can proceed as planned. 5. Construction initiated during the non-nesting season and continuing into the nesting season shall not be subject to the above measures.		
Impact BIO-5: Would the Project have a substantial adverse effect, either directly or through habitat	**MM BIO-3**: 1. Prior to the start of ground disturbing activities for the aggregate plant and each individual phase of mining (i.e. Phase 1A, 1B), surveys for elderberry	**BIO-3**: Qualified biologist will conduct pre-construction surveys for elderberry shrubs and oversee	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	shrubs shall be conducted within the mixed riparian forest community within 100 feet of the work limits. Any elderberry shrubs identified shall be located on a map and the stems inventoried in accordance with USFWS guidelines. 2. To the maximum extent practicable, all Project activities shall be set back a minimum of 100 feet from all elderberry shrubs with one or more stems of 1-inch diameter at ground level growing within the Biological Study Area (BSA) or adjacent areas. If a 100-foot setback cannot be maintained, implementation of additional mitigation measures described below shall be required in accordance with USFWS guidelines: a. Prior to initiation of construction, the limits of all construction, access roads, staging areas, etc., shall be staked. The staked areas shall be inspected by a qualified biologist. Based on this inspection, additional refinements to construction areas shall be performed as necessary and as feasible to ensure a minimum 20-foot setback from the dripline of all elderberry plants. b. Once the final limits of construction are set, brightly colored fencing (i.e., snow fencing) shall be installed at the 20-foot setback around the perimeter of each elderberry plant or plant group under the direction of a qualified biologist. c. Signs shall be posted every 50 feet along the edge of the VELB avoidance area with the following information: "This area is habitat for	avoidance and/or implementation of additional mitigation measures as specified. Compliance through annual County Mine Inspections.	

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	the Valley Elderberry Longhorn Beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as amended. Violators are subject to prosecution, fines, and imprisonment." d. Workers shall be briefed on the need to avoid damage to elderberry shrubs and the possible penalties for not complying with these requirements. All work crews shall be advised of the status of VELB and the need to protect the elderberry shrubs. e. During the initial construction period for each phase of mining, a qualified biologist shall inspect the mining area periodically to assure that the Project is not affecting VELB.		
CULTURAL AND PALEONTOLOGICAL RESOURCES			
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-1**: Prior to commencement of Phase 8B, markers shall be placed at the geographic boundary coordinates delineating the 50-foot exclusion zone surrounding site CA-FRE-3591 to prevent disturbance by project activities. It is inappropriate to prescribe a specific type of markers at this time, as technological changes over the next 60 years may result in fencing/marker options not currently available. However, the markers shall fulfill the following purpose: (1) provide a clear visual indicator of the exclusion zone and (2) prevent the entry of unauthorized equipment, vehicles, and mine personnel into the exclusion zone. To facilitate the identification and delineation of the boundary and 50-	**CPR-1**: Cultural site geographic coordinates will be provided to the County prior to commencement of Phase 8B. Thereafter, the exclusion zone would also be subject to compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	foot exclusion zone for CA-FRE-3591, the site shall be surveyed and Universal Transverse Mercator (UTM) geographic coordinates provided to the County.		
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-2**: The Project Applicant shall obtain the services of a qualified cultural and paleontological consultant to implement an education program to ensure that construction personnel are aware of potentially sensitive archaeological and paleontological resources.	**CPR-2**: Execution of agreement with qualified cultural and paleontological consultant regarding personnel education program.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact CPR-2: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	**MM CPR-3**: If any subsurface cultural resources, including either prehistoric or historic resources, are encountered during construction of the Project, all construction activities in the vicinity of the encounter shall be halted until a qualified archaeologist can examine these materials and make a determination of their significance. Such finds include, but are not limited to, prehistoric grinding implements, stone tools, soapstone bowls, and ornaments (e.g., beads, pendants) as well as intact building foundations and high concentrations of historical artifacts. The Fresno County Department of Public Works and Planning shall be notified, and the owners, developers and/or successors-in-interest shall be responsible for mitigation of any significant cultural resources pursuant to the CEQA Guidelines.	**CPR-3**: Earthmoving activities shall cease and a qualified archaeologist will be retained to assess the significance and provide direction. If such finds are found the Fresno County Department of Public Works and Planning shall be notified.	Fresno County Dept. of Public Works & Planning, Development Services Division
Impact CPR-3: Would the Project directly or indirectly destroy a unique paleontological resource or	**MM CPR-4**: If paleontological resources are discovered during project-related activities, the find shall be reported immediately to the County of Fresno Planning	**CPR-4**: Earthmoving activities shall cease and a paleontologist will be retained to assess the	Fresno County Dept. of Public Works & Planning, Development Services Division

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
site or unique geologic feature?	Department, who shall provide direction to contact a paleontological monitor. The area of the find shall be avoided until the monitor is on-site. The monitor shall assess the find and make any necessary recommendations, including any procedures to further investigate or mitigate impacts to the find as required by law.	significance and provide direction. Is such finds are discovered they shall be immediately reported to Fresno County Department of Public Works and Planning.	
Impact CPR-4: Would the Project disturb any human remains, including those interred outside of formal cemeteries?	**MM CPR-5**: In the event that unanticipated human remains are discovered, work shall immediately stop at the discovery location and any nearby area reasonably suspected to overlie adjacent human remains. The Fresno County Coroner shall immediately be contacted to determine whether the cause of death must be investigated. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours (H&SC §7050.5). At the same time, the mine operator shall immediately notify the Fresno County Department of Public Works and Planning, and a qualified archaeologist shall be contacted to evaluate the archaeological implications of the find.	**CPR-5:** Earthmoving activities shall cease. The Fresno County Coroner shall be contacted immediately in order to assess the remains and to determine the correct action. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours.	Fresno County Dept. of Public Works & Planning, Development Services Division; Fresno County Coroner
Impact CPR-4: Would the Project disturb any human remains, including those interred outside of formal cemeteries?	**MM CPR-6**: The CEQA Guidelines (§15064.5) detail steps to be taken when human remains are found to be of Native American origin. If Native American remains are discovered, the operator/landowner shall work with the NAHC to develop and execute an agreement between themselves and the most likely descendant(s) of Native Americans who may be buried in the vicinity by which the human remains and associated burial items shall be treated or disposed, with appropriate dignity. The NAHC and landowner shall follow prescribed	**CPR-6:** If Native American remains are discovered, an agreement shall be executed between the operator/landowner and NAHC regarding treatment of burial items and unanticipated human remains.	Fresno County Dept. of Public Works & Planning, Development Services Division; Native American Heritage Commission; Fresno County Coroner

Identified Impact	EIR Mitigation Measures/Conditions of Approval	Compliance/Monitoring Procedure	Responsible Department
	steps in Public Resources Code §5097.98, which include but are not limited to the following: • The NAHC shall notify those persons it believes to be the most likely to have descended from the deceased Native American. • The most likely descendant(s) may recommend to the landowner the means of treating and disposing of, with appropriate dignity, the human remains and any associated grave goods. • The landowner shall ensure the immediate vicinity of the Native American human remains is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations.		
HYDROLOGY AND WATER QUALITY			
Impact HWQ-7: Would the Project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	**MM HWQ-1**: To mitigate the risk of loss or injury potentially resulting from flooding, the operator shall implement a system to regularly monitor public announcements concerning potential Kings River flooding. At the beginning of each day that employees are to work in areas mapped within the 100-year flood hazard zone, the operator must check with the National Weather Service to determine if flood warnings are in effect. The operator must communicate the flooding potential to all employees each day. Employees must avoid	**HWQ-1**: Compliance through annual County Mine Inspections. In addition, the operator will communicate the flooding potential to all employees each day verbally or by conspicuous posting of the current conditions (e.g., same location as safety items are posted). 	working in portions of the Project site that are within the flood hazard zone. In addition, access to areas of the Project site subject to potential flooding shall be physically demarcated with signage and deterrents such as traffic barricades.		
NOISE AND VIBRATION			
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? **Impact NO-2:** Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?	**MM NO-1**: The following specific measures are required to ensure impacts associated with Project dragline excavation are less than significant: 1. The reference sound levels associated with dragline operation shall be verified through noise level measurements immediately upon commencement of dragline operations at the Project site. In the event that actual noise emissions of the dragline exceed the assumptions contained within this analysis, additional noise control measures shall be implemented. Those measures would include replacing fan motors with variable drive motors and/or installation of cooling air inlet and/or exhaust silencers directly to the dragline as required to satisfy the Fresno County Noise Ordinance standards. 2. Except during a public emergency that requires immediate production of aggregates and concrete products, excavation activities using the proposed dragline shall be limited to daytime hours when located within the following distances from noise receivers: a. When operating the mine and aggregates	**NO-1:** 1. Upon commencement of operation, dragline noise measurements will be provided to the County demonstrating that the L_{50} noise levels are equal to or less than 70 dBA at a distance of 100-feet. If L_{50} noise levels exceed 70 dBA, then additional dragline mitigation measures shall be implemented, subsequent noise measurements shall be conducted and provided to the County demonstrating that the dragline noise will not exceed the Fresno County Noise Standard (50 dBA day and 45 dBA night) at any noise receiver. In the event the measured ambient noise level exceeds the noise level standard, the standard	Fresno County Dept. of Public Works & Planning, Development Services Division

	plant only: i. 600 ft from R3, R4, R5, R7, R9, R10. ii. 900 ft from R8. iii. 725 ft from R13. iv. 925 ft from R14. b. When operating the mine, aggregates plant and the hot mix asphalt plant and/or the ready mix concrete plant: i. 600 ft from R3, R4, R5. ii. 750 ft from R7, R9, R10. iii. 1,050 from ft R8. iv. 850 ft from R13. v. 975 ft from R14. 3. Prior to mining within 900 feet of Residences 3, 4, 5, 7, & 9 along Riverbend Avenue, the proposed 10-foot tall berm should be constructed near the western edge of the proposed 100-foot excavation setback. 4. Prior to mining within 900 feet of Residence 10 along Riverbend Avenue, an 11-foot tall berm should be constructed near the western edge of the proposed 100-foot excavation setback. 5. Prior to mining within 900 feet of Residence 13, the proposed 8-foot tall berm should be constructed near the southern edge of the proposed 100-foot excavation setback along the South side of Goodfellow from Riverbend Avenue to 2000 feet West of Riverbend Avenue. 6. Excavation activities within 1,000 feet of an existing residence shall be conducted such that	shall be adjusted so as to equal the ambient noise level. Compliance will additionally be met through annual County Mine Inspections. **NO-1:** 2-6. Compliance through annual County Mine Inspections.

	the dragline cooling exhaust fans do not directly face the residence.		
Impact NO-1: Would the Project result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? **Impact NO-2:** Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?	**MM NO-2**: The following specific measures are required to ensure that impacts associated with concurrent operation of the aggregates processing plant, mine, and other activities are less than significant at Receiver 8: 1. Plant area noise at Receiver 8 shall be reduced to less than the Fresno County Noise Control Ordinance thresholds by implementing the following noise control measures: a. A 15-foot tall earthen berm shall be constructed near the Project western boundary in the vicinity of Receiver 8. The berm shall extend laterally to the extents shown on DEIR Figure 2-7. b. Prior to commencement of night-time operation, sound curtains shall be constructed adjacent to the noisiest aggregate plant equipment (i.e. crushers) in order to provide additional shielding in the direction of Receiver 8. The curtains are estimated to result in 8 dBA reduction in noise from the aggregate plant. 2. Following implementation of the noise control measures identified in Item 1 above, noise tests shall be conducted to confirm effectiveness of the control measures and compliance with the County Noise Control Ordinance exterior noise standards.	**NO-2**: Prior to nighttime operation of the aggregates plant, the operator shall install the 15-foot berm, install sound curtains, and provide noise measurements to the County that show noise levels at Receiver 8 to be less than Fresno County Noise Standards with the aggregates plant in operation. In the event the measured ambient noise level exceeds the noise level standard, the standard shall be adjusted so as to equal the ambient noise level. Compliance through annual County Mine Inspections.	Fresno County Dept. of Public Works & Planning, Development Services Division

RE: Proposal for Riverbend Sand and Gravel Mitigation Monitoring and Conditions Compliance (EIR No. 6606, UCUP No. 3390)

Dear Ms. Sholars:

The following is Buada Associates, Inc.'s ("Buada Associates") proposal for services relating to implementation of the Mitigation Monitoring and Reporting Plan and Condition Compliance Matrix ("Monitoring Plan") approved and adopted in connection with the certification of Environmental Impact Report (EIR) No. 6606 for the Riverbend Sand and Gravel Project (State Clearinghouse No. 2013071097) ("Project") and approval of Unclassified Conditional Use Permit (UCUP) No. 3390 and Reclamation Plan by the Fresno County Planning Commission on February 26, 2015.

Riverbend Sand and Gravel, LLC ("Riverbend") will be operating and developing the Riverbend Sand and Gravel Project, approved under UCUP No. 3390, consisting of a sand and gravel extraction facility on a 619-acre portion of a 833-acre site. Condition 11 of the Monitoring Plan requires that Riverbend (as the Applicant) enter into an agreement with the County of Fresno to implement the Monitoring Plan via a third party consultant.

A. Scope of Services

Buada Associates will perform the following services, as an independent third party consultant, to implement monitoring of the Project's Mitigation Measures and Conditions of Approval, as provided in the Monitoring Plan:

Task 1: Monitoring to verify compliance with all Project Mitigation Measures and Conditions of Approval. Coordinate with County and/or Riverbend to collect all relevant information, and review information as necessary

Task 2: Prepare and provide the County a written report by e-mail within 30 days of each monitoring visit to document the status of compliance with all Project Mitigation Measures and Conditions of Approval.

Task 3: Attend, as necessary, up to two (2) site visits and two (2) meetings with the County and Riverbend per year.

B. Compensation and Term

Buada Associates will provide the above services on a time and materials basis, in accordance with the attached Schedule of Charges, at a cost not to exceed Nine Thousand Dollars ($9,000) annually, for a period of five (5) years. Therefore, the maximum cost for services per this proposal is $45,000.

If you need any additional information or have any questions regarding this proposal, please contact me by email at jcbuada@buada.com or by phone at (559) 432-4902.

Sincerely,

John C. Buada
President

BUADA ASSOCIATES, INC.

INVOICES

Invoices will be rendered monthly, either as final or partial billing. Terms are Net 15 days. An additional late payment charge of 1.5% per month will be payable on accounts not paid within 30 days from the billing date. On accounts not paid within 60 days from the billing date services will be suspended until current.

EXHIBIT D

SELF-DEALING TRANSACTION DISCLOSURE FORM

In order to conduct business with the County of Fresno (hereinafter referred to as "County"), members of a contractor's board of directors (hereinafter referred to as "County Contractor"), must disclose any self-dealing transactions that they are a party to while providing goods, performing services, or both for the County. A self-dealing transaction is defined below:

"A self-dealing transaction means a transaction to which the corporation is a party and in which one or more of its directors has a material financial interest"

The definition above will be utilized for purposes of completing this disclosure form.

INSTRUCTIONS

(1) Enter board member's name, job title (if applicable), and date this disclosure is being made.

(2) Enter the board member's company/agency name and address.

(3) Describe in detail the nature of the self-dealing transaction that is being disclosed to the County. At a minimum, include a description of the following:

   a. The name of the agency/company with which the corporation has the transaction; and

   b. The nature of the material financial interest in the Corporation's transaction that the board member has.

(4) Describe in detail why the self-dealing transaction is appropriate based on applicable provisions of the Corporations Code.

(5) Form must be signed by the board member that is involved in the self-dealing transaction described in Sections (3) and (4).

(1) Company Board Member Information:			
Name:	John C. Buada	**Date:**	July 9, 2015
Job Title:	President		

(2) Company/Agency Name and Address:

Buada Associates, Inc.
4872 N Arcade
Fresno, CA 93704

(3) Disclosure (Please describe the nature of the self-dealing transaction you are a party to):

Not party to any self-dealing transaction.

(4) Explain why this self-dealing transaction is consistent with the requirements of Corporations Code 5233 (a):

(5) Authorized Signature

Signature:	John C. Buada	Date:	July 7, 2015

Summary Agenda

Board of Supervisors

Deborah A. Poochigian, 5th District, Chairman
Buddy Mendes, 4th District, Vice Chairman
Brian Pacheco, 1st District
Andreas Borgeas, 2nd District
Henry Perea, 3rd District

John Navarrette, County Administrative Officer
Daniel C. Cederborg, County Counsel
Bernice E. Seidel, Clerk

Tuesday, September 1, 2015 **9:00 AM** **Hall of Records**

The Fresno County Board of Supervisors welcomes you to this meeting and encourages your participation. This agenda contains a brief general description of each item to be considered. The number of the item being heard is indicated on the Clerk's desk. Please see note below regarding consent agenda items. The Chairman will call for public testimony as each item is heard. If you wish to speak to an individual item please step to the podium during this time period and state your name for the record. If you wish to speak on a matter which does not appear on the agenda, you may do so during the Public Presentation period at the end of the regular p.m. session.

All supporting documentation is available for public review in the office of the Clerk to the Board of Supervisors located in the Hall of Records building, 2281 Tulare Street, Room 301, Fresno, 93721 during regular business hours, 8:00 a.m. – 5:00 p.m., Monday through Friday. Agenda items are also available online at:

http://fresnocounty.legistar.com.

Invocation and Pledge of Allegiance

1. 15-1257 Approve Agenda

2. 15-1349 Approve Consent Agenda - Item Numbers 16 – 36

Chairman Poochigian

3. 15-1354 Adopt resolution proclaiming September 13 - 19, 2015 as 4-H Club Week in Fresno County and receive a presentation by local 4-H All-Star team members

Attachments: Resolution

Supervisor Perea

4. 15-1341 Proclaim the week of September 7th-13th as Suicide Prevention Week in Fresno County

Attachments: Proclamation

Administrative Office

5. **15-1407** Approve and authorize the Chairman to execute an Agreement with Fresno Humane Animal Services, for the provision of mandated animal control services, effective upon execution with services commencing October 1, 2015, not to exceed five consecutive years which includes a three year base contract and two optional one year extensions, total not to exceed $6,222,048; approve and authorize the Clerk to the Board to execute Budget Transfer 10 to transfer appropriations in the amount of $386,379 within Org 2540, Interest and Miscellaneous Expenditures from Operating Transfer Out to Org 56204762, Department of Public Health, Professional and Specialized Services; and, adopt Resolution decreasing FY 2015-16 appropriations and revenues for Org 0124 - Debt Service in the amount of $386,379.

Attachments: On file with Clerk - Resolution (Org 0120)

Board Agenda Item 8

DATE: September 1, 2015

TO: Board of Supervisors

FROM: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Amendment to Title 15 (Addition of Section 15.18.030 - Small Residential Rooftop Solar Energy Systems)

RECOMMENDED ACTION(S):

1. **Conduct first hearing of proposed amendment to Fresno County Ordinance Code, Title 15 regulating building and construction within Fresno County to add Section 15.18.030 of Chapter 15.18 pertaining to residential rooftop solar energy systems, waive reading of Ordinance in its entirety and set second hearing for September 22, 2015.**

2. **Approve the County's standard checklist for small residential rooftop energy systems, forms that substantially comply with those contained in the California Solar Permitting Guidebook published by the Governor's Office of Planning and Research.**

Approval of this recommended action would amend Title 15 of the Fresno County Ordinance Code to implement the requirements of Assembly Bill 2188 (AB 2188), approved by the California Legislature in 2014 which amended Section 714 of the Civil Code and Section 65850.5 of the Government Code. AB 2188 addresses streamlined permitting for small residential rooftop solar systems. Staff notes that it is the current practice of the Department is to provide over-the-counter review and next day inspections for roof-mount solar customers.

ALTERNATIVE ACTION(S):

No viable alternative is available. The County is required to adopt the ordinance mandated by Government Code Section 65850.5(g)(1).

FISCAL IMPACT:

There is no net County cost associated with the recommended action. All costs are recovered through existing building permit fees.

DISCUSSION:

Section 65850.5(a) of the California Government Code provides that it is the policy of the State to promote and encourage the installation and use of solar energy systems by limiting obstacles to their use and by minimizing the permitting costs of such systems. In furtherance of that objective, Section 65850.5(g)(1) of the California Government Code requires that, on or before September 30, 2015, every city, county, or city and county must adopt an ordinance that creates an expedited, streamlined permitting process for small residential rooftop solar energy systems.

The County currently expedites the review of such applications by reviewing and issuing applications over the counter. The County also currently can accept and approve such applications at the building counter and/or electronically through the County's email, internet, or via fax.

The County, however, is required to adopt the ordinance mandated by Section 65850.5(g)(1). The attached ordinance is intended to satisfy this requirement. The proposed ordinance codifies the requirements of Section 65850.5(g)(1), such as accepting and approving applications electronically, directing the County's Building Official to develop a checklist of all requirements with which small rooftop solar energy systems shall comply to be eligible for expedited review, and authorizing the Building Official to administratively approve such applications (which is the current practice). See Exhibit "A" for Streamlined Solar Checklist. Attached is the Draft Ordinance which identifies the addition of Small Residential Rooftop Solar Energy Systems.

Staff has determined the proposed Ordinance is exempt under from the California Environmental Quality Act (CEQA) under Section 15061(b)(3) if the CEQA Guidelines, because it can be it can be seen with certainty that there is no possibility that the proposed Ordinance may have a significant effect on the environment. If the proposed Ordinance is adopted after a second reading, a Notice of Exemption (NOE) will be filed with the Fresno County Clerk's Office.

John Hays

Board Agenda Item 9

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: County Service Area 47-Quail Lake Request to Discontinue Sale and Transfer of Water and Wastewater Services

RECOMMENDED ACTION(S):

Consider and take action on resolution to discontinue the dissolution of County Service Area 47 and to discontinue the proposed sale of assets and transfer of service and responsibility to California Water Service Company

Adopting the proposed resolution will discontinue the proceeding to dissolve County Service Area 47 (CSA 47) and discontinue the proposed sale of CSA 47 assets and transfer of water and wastewater service responsibility to California Water Service Company (Cal Water).

ALTERNATIVE ACTION(S):

The Board may direct staff to continue with the proceeding to dissolve CSA 47 and continue working on the sale and transfer of CSA 47 assets and responsibility for water and wastewater services to Cal Water.

FISCAL IMPACT:

There is no net County cost associated with the recommended actions. Property owners in CSA 47 have paid all costs associated with the dissolution, sale, and transfer process through water and wastewater service fees. To date, the total funds expended on the dissolution, sale, and transfer process are approximately $62,300.

DISCUSSION:

CSA 47 was formed in 1995 to provide community water and wastewater services to the Quail Lake Estates Subdivision located between Ashlan and Shaw Avenues, east of McCall Avenue. CSA 47 encompasses approximately 375 acres including 707 residential lots, a community clubhouse, an elementary school, and a commercial parcel. CSA 47 currently serves approximately 704 residences, the Quail lake Clubhouse and the Quail Lake Charter School.

The proposal to dissolve CSA 47 began in late 2010, when members of the Quail Lake Homeowners Association (HOA), who also serve as the CSA 47 Citizens Advisory Committee (CAC), approached County staff about the possibility of dissolving CSA 47. Upon completion of the proposed dissolution, water and wastewater services would be transferred to Cal Water, a private utility company, which is regulated by the Public Utility Commissions (PUC).

Staff's understanding of the primary reason for the CSA 47 CAC proposal to dissolve and transfer the responsibility of water and wastewater services was to secure lower water and wastewater rates for the Quail

Lake property owners. Staff further understands that Cal Water was proposed by the CAC as the alternative provider because it demonstrated the probability, in 2010, of being able to offer lower rates and the experience and expertise to operate the water and wastewater systems in an efficient manner.

On April 24, 2012, the Board approved the process for dissolving CSA 47. This process included a public meeting on May 8, 2012. Prior to the public meeting, staff sent out a survey to all property owners to measure the level of support for the proposed dissolution and transfer of service provider responsibility to Cal Water. A total of 340 responses were received of the 710 existing and potential future customers (707 residential lots, HOA Clubhouse lot, one commercial lot, and school parcel). From those received, 306 (90%) supported and 34 (10%) opposed the transfer of service provider responsibility from CSA 47 to Cal Water. At that time, the developer of Quail Lake, Cambridge Group, LLC, owned a number of lots within CSA 47, many of which had not been developed. The developer was responsible for 145 of the 306 surveys in support of the transfer. If these 145 surveys were excluded from the total, it left 195 surveys received, from which 161 (82.6%) supported and 34 (17.4%) opposed the transfer.

On July 10, 2012, the Board adopted Resolution No. 12-285 initiating an application to the Fresno Local Agency Formation Commission (LAFCo) to dissolve CSA 47. The Board action directed staff to initiate and submit a dissolution application, and directed staff to enter into agreement negotiations with Cal Water for the purpose of transferring CSA 47 assets, infrastructure, facilities, and water and wastewater service responsibilities to Cal Water.

On March 13, 2013, LAFCo approved the dissolution, with the condition that the LAFCo Executive Officer must review and approve an agreement between the County and Cal Water, which agreement must include a plan specifying the terms, conditions, and necessary actions to be taken in order for the transfer of CSA 47 assets, liabilities, infrastructure, facilities, and service responsibilities to be complete. The dissolution is not complete until that condition is satisfied, either within one year of the LAFCo approval, or within an extension period approved by LAFCo. The County has already requested and received two one-year extensions, granted by LAFCo on January 15, 2014, and February 11, 2015. The current deadline to satisfy the condition is March 13, 2016.

Since the March 13, 2013 LAFCo approval, County staff has been working toward the sale and transfer of water and wastewater services to Cal Water. There have also been complicating issues arising from the County's Limited Obligation Improvement Bonds (Assessment District No. 282 - Quail Lake) Series 1997, which remain outstanding and are secured by assessments on CSA 47 properties. The sale agreement is near the final draft stage.

In February 2015, the CAC decided to form a Dissolution and Transfer of Services Subcommittee to provide an objective analysis of the options to transfer water and wastewater services to Cal Water, or stay with CSA 47.

In May 2015, the CAC met to discuss the subcommittee's recommendation to oppose or support the sale and transfer of water and wastewater services from CSA 47 to Cal Water. On June 4, 2015, the CAC held a community meeting for the subcommittee to objectively present their findings to the property owners. County staff and Cal Water representatives were not invited to either of the meetings.

On June 11, 2015, County staff held a public meeting at the Quail Lake Clubhouse to discuss the sale and transfer of water and wastewater services and to give the property owners an opportunity to voice their comments, questions and concerns. At the meeting, County staff also reiterated the need for a rate adjustment if the community keeps the water and wastewater services with CSA 47. Cal Water representatives were also present and provided a presentation that included many of the incentives for continuing the sale and transfer of water and wastewater services to Cal Water.

After a unanimous informal vote of the 59 residents in attendance at the County meeting to keep water and wastewater services with CSA 47, and at the request of the HOA and CAC, County staff sent a survey to all of the affected property owners on June 23, 2015. The survey was meant to gauge the desire of the Quail Lake

community to either continue the sale and transfer of water and wastewater services to Cal Water or keep services with CSA 47. From the 710 existing and potential future customers (707 residential lots, HOA Clubhouse lot, one commercial lot, and school parcel), a total of 381 responses were received. From those received, 32 (8%) expressed support, and 349 (92%) expressed an opposition to the sale and transfer of water and wastewater services to Cal Water.

Please note that the developer of Quail Lake, Lennar Homes, owns 12 lots within CSA 47, many of which are currently in development. The developer was responsible for 12 of the 32 surveys in support of the transfer. If these 12 surveys are excluded from the total, the result are 369 total surveys received, of which 20 (5%) are in support and 349 (95%) are in opposition of the sale and transfer of water and wastewater services.

Copies of the survey and results are attached as Exhibit A to this agenda item and are on file with the Clerk to the Board.

The Board is not bound to approve or disapprove the discontinuance of the dissolution, or sale and transfer of services based on this survey. The survey was conducted to measure the level of community support or opposition for the sale and transfer of water and wastewater services to Cal Water, and is strictly for informational purposes.

County staff has conferred with LAFCo on the possibility of ceasing the dissolution and have been informed that declining to file a dissolution extension and not submitting a proposed agreement with Cal Water for review by the LAFCo Executive Officer will result in the termination of the dissolution proceedings.

If the Board determines that the sale and transfer of water and wastewater services shall be discontinued, staff will abandon the dissolution and discontinue the sale and transfer of water and wastewater services to Cal Water. Staff will then begin working on a Proposition 218 proceeding to adjust the water and wastewater rates for CSA 47.

Board Agenda Item 29

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Mitigation Monitoring Reimbursement Agreement for County Staff Time for the Riverbend Project

RECOMMENDED ACTION(S):

Authorize Chairman to sign the Mitigation Monitoring Reimbursement Agreement (County Staff Time) for the Riverbend Sand and Gravel Project and adopt a Resolution establishing an account associated with Unclassified Conditional Use Permit (UCUP) No. 3390 to reimburse required mitigation monitoring.

UCUP No. 3390 was approved to mine (extract) construction grade aggregate (sand and gravel) from property located north and south of the Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. Approval of the recommended action will implement Mitigation Measures that must be satisfied prior to initiation of operations associated with Unclassified Conditional Use Permit (UCUP) No. 3390 approved by the Planning Commission February 26, 2015.

ALTERNATIVE ACTION(S):

No viable options available because without approval of the recommended action the project cannot be implemented as approved.

FISCAL IMPACT:

There is no net County cost associated with the recommended action. If approved, the Applicant would provide funding to compensate for County's staff time in reviewing and administering any materials related to Mitigation Monitoring and/or Reporting, including those prepared by the third party monitor.

DISCUSSION:

The EIR prepared for UCUP No. 3390 was certified and approved by the Planning Commission on February 26, 2015, to mine construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno. (See Exhibit "A"). The EIR identified the need for a third party to monitor the Applicant's compliance with the Project's Mitigation Measures and Conditions of Approval as provided in the Mitigation Monitoring and/or Reporting Program and Condition of Compliance Matrix (MMRP&CCM)

The purpose of a MMRP&CCM is to discuss feasible measures to avoid or substantially reduce the significant environmental impacts from a project identified in the EIR and is found to be necessary to meet the requirements of the California Environmental Quality Act (CEQA). When making findings required by Public Resources Code Section 21081 or adopting a negative declaration containing mitigation measures, the approving body shall adopt a mitigation monitoring and reporting program as proposed or modified pursuant to

this title.

Condition of Approval No. 12 for UCUP No. 3390 requires Riverbend to enter into an agreement with the County for reimbursement of County staff time associated with mitigation monitoring. As adopted by the Fresno County Planning Commission the condition reads:

> *"The Applicant shall enter into an agreement with the County of Fresno to compensate for County staff's time to review and administer any materials related to Mitigation Monitoring and/or Reporting, including those prepared by the Third Party Monitor."*

A Mitigation Monitoring Reimbursement Agreement for County Staff time is necessary to provide funding to compensate for County's staff time in reviewing and administering any materials related to Mitigation Monitoring and/or Reporting, including those prepared by the third party monitor. The County will submit a monthly invoice and Riverbend shall reimburse the County for all reasonable costs incurred by related to the monitoring.

John Hays

Board Agenda Item 29

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Agreement with the City of Reedley for the Reedley Pioneer Park Restroom, Community Development Block Grant (CDBG) Project No.15571

RECOMMENDED ACTION(S):

Approve and authorize Chairman to execute Agreement with the City of Reedley for the Reedley Pioneer Park Restroom, Community Development Block Grant Project No. 15571 ($169,944).

The Agreement provides Community Development Block Grant (CDBG) funding for the Reedley Pioneer Park Restroom Project, which is included in the County's 2015-2016 Action Plan as approved by the Board on May 5, 2015. The $169,944 agreement amount is available from the City's 2015-2016 allocation of CDBG funds as listed in the Action Plan.

ALTERNATIVE ACTION(S):

The Board may direct the City to propose a different eligible use for its CDBG funds. A different use would require an amendment to the Action Plan.

FISCAL IMPACT:

There is no net cost to the County. The total estimated project cost is $169,944. CDBG funds in the amount of $169,944 are included in the Department's adopted budget for FY 2015-16, Org 7205 for the Reedley Pioneer Park Restroom Project. The City will provide all sums of money in excess of the CDBG funds that may be necessary to complete the project.

DISCUSSION:

The U.S. Department of Housing and Urban Development (HUD) annually allocates CDBG funding to the County using a formula based on census data for the County and its partner cities. Using the same formula, the County then reallocates a portion of the CDBG funds to its partner cities through a Joint Powers Agreement (JPA) for the purpose of carrying out housing and community development activities. The JPA permits the partner Cities to select eligible projects for submission to the County for consideration. Under the JPA, the County is responsible for the overall administration of the CDBG Program and for the contract management of each project receiving CDBG funds. The Agreement contains a mutual indemnity clause consistent with the JPA.

The Reedley Pioneer Park Restroom Project, which was approved by the Board for inclusion in the 2015-2016 Action Plan, consists of the replacement of an existing old cinder block restroom that does not meet current building codes or accessibility requirements with a pre-fabricated restroom that is compliant with Americans with Disabilities Act (ADA) standards. The Project will be located at the Pioneer Park in downtown Reedley.

In addition to providing funds for the project, the Agreement requires the City of Reedley to prepare the design plans and specifications in conformance with Federal and State regulations governing Federally-funded projects. The City of Reedley will be responsible for the advertising and awarding of the project to the lowest responsible bidder and completion of the necessary construction engineering. The County agrees to review and approve the plans and specifications for compliance with Federal regulations prior to the City advertising the project for bid. The City of Reedley will be responsible for maintaining the improvements after the project is completed.

Initial Study/Environmental Assessment No. 6969 was completed for the Reedley Pioneer Park Restroom Project under the provisions of the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA). Based on the environmental review, the project is categorically exempt from the provisions of the CEQA Guidelines under Section 15301, Class 1 - Existing Facilities and Section 15302, Class 2 - Replacement or Reconstruction. Under Section 15301, a Class 1(c) exemption consists of the operation, repair, maintenance or minor alteration of existing public facilities involving negligible or no expansion of use. Under Section 15302, a Class 2(c) exemption includes replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose. It has also been determined that the project is exempt per Section 58.34 (a) (12) of the NEPA Guidelines because the project meets the requirements for a categorical exclusion under Section 58.35 (a)(1).

OTHER REVIEWING AGENCIES:

The Agreement has been reviewed and approved by the City of Reedley.

REFERENCE MATERIAL:
BAI #23 5-5-15

ATTACHMENTS INCLUDED AND/OR ON FILE:
Map
On file with Clerk - Agreement with City of Reedley

CAO ANALYST:
John Hays

Board Agenda Item 30

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Third Party Mitigation Monitoring Agreement for Unclassified Conditional Use Permit No 3390 (Riverbend Sand and Gravel Project)

RECOMMENDED ACTION(S):

1. **Make a finding that the best interests of the County would be served by the suspension of the competitive bidding process because unusual or extraordinary circumstances exist in that the recommended vendor has unique and specialized expertise in the mining field.**

2. **Authorize Chairman to sign a Third Party Mitigation Monitoring Agreement for the Riverbend Sand and Gravel Project.**

The Agreement is associated with Unclassified Conditional Use Permit (UCUP) No. 3390 approved to mine (extract) construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno (See Exhibit A, map). Approval of the recommended action will implement an approved Condition of Approval and allow for the retention of an Administrator to oversee the implementation of Mitigation Measures that must be satisfied during operations associated with UCUP No. 3390 and Environmental Impact Report (EIR) No. 6606 approved and certified by the Planning Commission on February 26, 2015.

ALTERNATIVE ACTION(S):

No viable options available because without approval of the recommended action, the project cannot be implemented as approved.

SUSPENSION OF COMPETITION/SOLE SOURCE CONTRACT:

County Administrative Policy No. 34 provides exceptions to the requirement that competitive bids or request for proposals shall be secured for all contracts for goods or services acquired by the County. Included in the exceptions is the situation when in unusual or extraordinary circumstances, the Board of Supervisors finds that the best interest of the County would be served by not securing competitive bids or issuing a request for proposal. The Suspension of Competition Acquisition Request form has been reviewed and approved by Purchasing and is included as Exhibit B to the agenda item.

FISCAL IMPACT:

There is no net County cost associated with the recommended action. If approved, Riverbend LLC would provide funding directly to the County to fund an Administrator (consultant) of their choice, to implement and administer the Mitigation Monitoring and/or Reporting Plan and Condition of Compliance Matrix (MMRP&CCM).

DISCUSSION:

EIR No. 6606 was prepared for UCUP No. 3390 and was certified and approved by the Planning Commission on February 26, 2015, to permit the mining of construction grade aggregate (sand and gravel) from property located north and south of Goodfellow Avenue between the Kings River and Riverbend Avenue in the County of Fresno.

The EIR identified the need for a third party to monitor the Applicant's compliance with the Project's Mitigation Measures and Conditions of Approval as provided in the MMRP&CCM.

The purpose of a MMRP&CCM is to discuss feasible measures to avoid or substantially reduce the significant environmental impacts from a project identified in the EIR and is found to be necessary to meet the requirements of the California Environmental Quality Act (CEQA). When making findings required by Public Resources Code Section 21081 or adopting a negative declaration containing mitigation measures, the approving body shall adopt a mitigation monitoring and reporting program as proposed or modified pursuant to this title.

Condition of Approval No. 11 of the MMRP&CCM for UCUP No.3390 requires the applicant's consultant to enter into an agreement with the County to implement and fund the MMRP&CCM via a third party Administrator. The applicant has recommended the selection of Buada Associates, Inc. for services in connection with implementing and administering the Monitoring Plan. County staff concurs that the recommended vendor possesses unique and specialized expertise in the mining field, and is the best candidate to provide the services specified in this Agreement. It should be noted that County staff will be reviewing the work of the Administrator. This action will more effectively ensure compliance with the certified EIR. As adopted by the Fresno County Planning Commission the condition reads:

"*The County of Fresno shall enter into an agreement with a Consultant to act as a Third Party Monitor and implement the Mitigation Monitoring and/or Reporting Program and Conditions Compliance Matrix in accordance with Section 21081.6 of the California Public Resources Code and Section 15097 of Title 14, Chapter 3 of the California Code of Regulations. This agreement shall cover monitoring the Project's mitigation measures and conditions of approval as provided in the Mitigation Monitoring and/or Reporting Program and Conditions Compliance Matrix, and the Applicant will pay all costs associated with the Consultant costs and Mitigation Monitoring."*

John Hays

Board Agenda Item 30

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Agreement with Reedley Trailside Terrace, LP for the Trailside Terrace Apartments in the City of Reedley

RECOMMENDED ACTION(S):

1. **Amend the County's FY 2015-16 Action Plan to add Trailside Terrace Apartments housing development located in the City of Reedley;**

2. **Approve and authorize Chairman to execute Agreement with Reedley Trailside Terrace, LP for HOME Investment Partnerships Program funds for the development of the Trailside Terrace Apartments in the City of Reedley ($1,000,000);**

3. **Authorize Director of Public Works and Planning, or his designee, to execute all loan and related documents necessary to the project, including any amendments thereto, and to approve on the County's behalf, items specified in Section XVIII of the Agreement.**

The first recommended action amends the County's FY 2015-16 Action Plan, approved by the Board on May 5, 2015, to add this specific affordable housing development project as an eligible activity under the County's HOME-funded Affordable Housing Development activity.

The second recommended action requests the Board's approval and execution of an Agreement with Reedley Trailside Terrace, Limited Partnership (LP), a California Limited Partnership, (Partnership). The Partnership currently consists of Silvercrest Inc., a nonprofit agency, which is the Managing General Partner and the Housing Authority of Fresno County, California a public body corporate and politic, which is the Administrative General Partner and the project developer. The Agreement before the Board provides a loan for $1,000,000 from the County's HOME Investment Partnerships (HOME) Program Grant to assist with the development of a low-income multi-family rental apartment complex in the City of Reedley, for which the total cost of development is expected to be $14,881,595. Trailside Terrace Apartments is a fifty-five unit rental housing project, of which eleven units will be designated HOME-assisted units.

The third recommend action requests the Board authorize the Director of Public Works and Planning, or his designee, at his discretion, to execute all loan and related documents necessary for the project, and any amendments thereto including items as specified in Section XVIII of the Agreement, which only includes non-substantive changes.

ALTERNATIVE ACTION(S):

The Board may deny the Agreement as proposed, or make any changes as appropriate consistent with the Federal regulations governing the HOME program. If HOME funds are not approved, the fifty-five unit,

low-income multi-family project may not be able to be developed.

FISCAL IMPACT:

There is no net County cost associated with the recommended actions. The Agreement before the Board reserves loan funds in the amount of $1,000,000 from the County's Federal HOME Grant. The HOME funds are included in the Department's adopted FY 2015-2016 budget, Org No. 5512/2008. The total estimated project cost for the Trailside Terrace Apartments is $14,881,595. The balance of funds needed to complete the financing of the project will be from non-County funds and will include a variety of other public and private funding sources.

DISCUSSION:

The Agreement before the Board reserves HOME funds in the amount of $1,000,000 for a pending loan that will be secured by a Promissory Note and Deed of Trust. The Agreement and Deed will both be recorded and will carry restrictions that will run with the land to enforce HOME income and rent requirements on the property for a period of twenty years.

The Agreement provides HOME funding to assist with the development of eleven units in a fifty-five unit low-income multi-family rental housing project in the City of Reedley. The Trailside Terrace Apartment Project, located at the west side of G Street and east side of H Street (see attached map), will provide affordable housing for persons earning no more than 60% of the area median income (AMI) for Fresno County. It will consist of a mix of one, two and three bedrooms units restricted to households at varying income levels that will range from 30% AMI to 60% AMI. The units must meet the HOME Program income and rent requirements for the full affordability period. Construction must meet all applicable local codes and property standards as identified in 24 CFR § 92.25 for HOME assisted new construction to ensure longevity and safety. The Agreement also provides for the Partnership to require professional liability insurance limits of $1,000,000 per incident and $2,000,000 aggregate for any professional contracts associated with this project, and secure a performance bond and labor and material bond in an amount sufficient to ensure full completion of the project.

The partners of the Reedley Trailside Terrace, LP have a strong history of affordable housing development with Fresno County and Central California. Based on criteria established under the Federal HOME Program, the Partnership is eligible to apply for HOME funding for affordable housing development projects. The Partnership, its members and the project have been reviewed by County staff and have been determined to meet the threshold criteria for funding under the County's Affordable Housing Development Program.

Release of County HOME funds is contingent upon the Partnership securing all other funding to complete financing for the project, including meeting all of the funding requirements for Low-Income Housing Tax Credits. The project is supported by the City of Reedley and is consistent with the County's General Plan, which directs residential growth to cities. The Partnership is requesting $1,000,000 of HOME funds to assist with the construction of eleven of the fifty-five rental units.

Additional funding for the estimated $14,881,595 housing project will come from a variety of funding sources that will include a loan from the Housing Authority of Fresno County and Tax Credits.

Estimated Sources of Funds:

1.	Construction Loan	$9,175,157
2.	Developer (Deferred Costs)	946,778
3.	Housing Authority of Fresno County	2,210,000
4.	County of Fresno (HOME Loan Funds)	1,000,000
5.	AHP Funds (Federal Reserve Bank)	540,000
6.	CA Tax Credit Equity	1,009,660

Estimated Total Project Costs	$14,881,595

Anticipated Permanent Loan Lien Order:
(Construction Loan Paid During Permanent Financing)

1. Housing Authority of Fresno County	$2,210,000
2. County of Fresno (HOME Loan Funds)	$1,000,000
3. AHP Funds (Federal Reserve Bank)	$540,000

Due to the complex financing and time sensitive nature of these large housing developments, it is not unusual for the project's other funding sources to change as the developer solidifies financing from a variety of public and private funding sources to complete financing for the project. The County's permanent lien position will not be lower than second lien position.

The project has already received tax credits, and is expected to commence construction in December, 2015, and be completed by March 2017.

OTHER REVIEWING AGENCIES:

The Agreement has been reviewed and approved by Reedley Trailside Terrace, LP.

Board Agenda Item 31

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Agreement with the City of Sanger for the Sanger Street Light Improvements (Phase IV), Community Development Block Grant (CDBG) Project No. 15611

RECOMMENDED ACTION(S):

Approve and authorize Chairman to execute Agreement with the City of Sanger for the Sanger Street Light Improvements (Phase IV), Community Development Block Grant Project No. 15611 ($163,567).

The Agreement provides Community Development Block Grant (CDBG) funding for the Sanger Street Light Improvements (Phase IV) Project, which is included in the County's 2015-2016 Action Plan as approved by the Board on May 5, 2015. The $163,567 agreement amount is available from the City's 2015-16 allocation of CDBG funds as listed in the Action Plan.

ALTERNATIVE ACTION(S):

The Board may direct the City to propose a different eligible use for its CDBG funds. A different use would require an amendment to the Action Plan.

FISCAL IMPACT:

There is no net cost to the County. The total estimated project cost is $260,000. CDBG funds in the amount of $163,567 are included in the Department's adopted budget for FY 2015-16, Org. No. 7205 for the Sanger Street Light Improvements (Phase IV) Project. The City will provide all sums of money in excess of the CDBG funds that may be necessary to complete the project.

DISCUSSION:

The U.S. Department of Housing and Urban Development (HUD) annually allocates CDBG funding to the County using a formula based on census data for the County and its partner cities. Using the same formula, the County then reallocates a portion of the CDBG funds to its partner cities through a Joint Powers Agreement (JPA) for the purpose of carrying out housing and community development activities. The JPA permits the partner Cities to select eligible projects for submission to the County for consideration. Under the JPA, the County is responsible for the overall administration of the CDBG Program and for the contract management of each project receiving CDBG funds. The Agreement contains a mutual indemnity clause consistent with the JPA.

The Sanger Street Light Improvements (Phase IV) Project, which was approved by the Board for inclusion in the 2015-2016 Action Plan, consists of the installation of street lights, electrical conduit, and related improvements that are either deficient or non-existent at various locations within the City. The improvements will be constructed within the area generally bounded by Edgar Avenue, "K" Street, Annadale Avenue, and Tucker

Avenue. The improvements will increase safety and benefit a service area that will principally assist low to moderate income residents.

In addition to providing funds for the project, the Agreement requires the City of Sanger to prepare the design plans and specifications in conformance with Federal and State regulations governing Federally-funded projects. The City of Sanger will be responsible for the advertising and awarding of the project to the lowest responsible bidder and completion of the necessary construction engineering. The County agrees to review and approve the plans and specifications for compliance with Federal regulations prior to the City advertising the project for bid. The City of Sanger will be responsible for maintaining the improvements after the project is completed.

Initial Study/Environmental Assessment No. 6821 was completed for the Sanger Street Light Improvements (Phase III) Project under the provisions of the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA) and includes all phases planned for the project. Based on the environmental review, the project is categorically exempt from the provisions of the CEQA Guidelines under Section 15301, Class 1 - Existing Facilities. Under Section 15301, a Class 1(c) exemption consists of the operation, repair, maintenance or minor alteration of existing public facilities involving negligible or no expansion of use, including existing highways, streets, and sidewalks. It has also been determined that the project is exempt per Section 58.34 (a)(12) of the NEPA Guidelines because the project meets the requirements for a categorical exclusion under Section 58.35 (a)(1).

OTHER REVIEWING AGENCIES:

The Agreement has been reviewed and approved by the City of Sanger.

EXHIBIT 66

Board Agenda Item 29

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Agreement with the City of Reedley for the Reedley Pioneer Park Restroom, Community Development Block Grant (CDBG) Project No.15571

RECOMMENDED ACTION(S):

Approve and authorize Chairman to execute Agreement with the City of Reedley for the Reedley Pioneer Park Restroom, Community Development Block Grant Project No. 15571 ($169,944).

The Agreement provides Community Development Block Grant (CDBG) funding for the Reedley Pioneer Park Restroom Project, which is included in the County's 2015-2016 Action Plan as approved by the Board on May 5, 2015. The $169,944 agreement amount is available from the City's 2015-2016 allocation of CDBG funds as listed in the Action Plan.

ALTERNATIVE ACTION(S):

The Board may direct the City to propose a different eligible use for its CDBG funds. A different use would require an amendment to the Action Plan.

FISCAL IMPACT:

There is no net cost to the County. The total estimated project cost is $169,944. CDBG funds in the amount of $169,944 are included in the Department's adopted budget for FY 2015-16, Org 7205 for the Reedley Pioneer Park Restroom Project. The City will provide all sums of money in excess of the CDBG funds that may be necessary to complete the project.

DISCUSSION:

The U.S. Department of Housing and Urban Development (HUD) annually allocates CDBG funding to the County using a formula based on census data for the County and its partner cities. Using the same formula, the County then reallocates a portion of the CDBG funds to its partner cities through a Joint Powers Agreement (JPA) for the purpose of carrying out housing and community development activities. The JPA permits the partner Cities to select eligible projects for submission to the County for consideration. Under the JPA, the County is responsible for the overall administration of the CDBG Program and for the contract management of each project receiving CDBG funds. The Agreement contains a mutual indemnity clause consistent with the JPA.

The Reedley Pioneer Park Restroom Project, which was approved by the Board for inclusion in the 2015-2016 Action Plan, consists of the replacement of an existing old cinder block restroom that does not meet current building codes or accessibility requirements with a pre-fabricated restroom that is compliant with Americans with Disabilities Act (ADA) standards. The Project will be located at the Pioneer Park in downtown Reedley.

In addition to providing funds for the project, the Agreement requires the City of Reedley to prepare the design plans and specifications in conformance with Federal and State regulations governing Federally-funded projects. The City of Reedley will be responsible for the advertising and awarding of the project to the lowest responsible bidder and completion of the necessary construction engineering. The County agrees to review and approve the plans and specifications for compliance with Federal regulations prior to the City advertising the project for bid. The City of Reedley will be responsible for maintaining the improvements after the project is completed.

Initial Study/Environmental Assessment No. 6969 was completed for the Reedley Pioneer Park Restroom Project under the provisions of the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA). Based on the environmental review, the project is categorically exempt from the provisions of the CEQA Guidelines under Section 15301, Class 1 - Existing Facilities and Section 15302, Class 2 - Replacement or Reconstruction. Under Section 15301, a Class 1(c) exemption consists of the operation, repair, maintenance or minor alteration of existing public facilities involving negligible or no expansion of use. Under Section 15302, a Class 2(c) exemption includes replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose. It has also been determined that the project is exempt per Section 58.34 (a) (12) of the NEPA Guidelines because the project meets the requirements for a categorical exclusion under Section 58.35 (a)(1).

OTHER REVIEWING AGENCIES:

The Agreement has been reviewed and approved by the City of Reedley.

Board Agenda Item 30

DATE: September 1, 2015

TO: Board of Supervisors

SUBMITTED BY: Alan Weaver, Director
Department of Public Works and Planning

SUBJECT: Agreement with Reedley Trailside Terrace, LP for the Trailside Terrace Apartments in the City of Reedley

RECOMMENDED ACTION(S):

1. **Amend the County's FY 2015-16 Action Plan to add Trailside Terrace Apartments housing development located in the City of Reedley;**

2. **Approve and authorize Chairman to execute Agreement with Reedley Trailside Terrace, LP for HOME Investment Partnerships Program funds for the development of the Trailside Terrace Apartments in the City of Reedley ($1,000,000);**

3. **Authorize Director of Public Works and Planning, or his designee, to execute all loan and related documents necessary to the project, including any amendments thereto, and to approve on the County's behalf, items specified in Section XVIII of the Agreement.**

The first recommended action amends the County's FY 2015-16 Action Plan, approved by the Board on May 5, 2015, to add this specific affordable housing development project as an eligible activity under the County's HOME-funded Affordable Housing Development activity.

The second recommended action requests the Board's approval and execution of an Agreement with Reedley Trailside Terrace, Limited Partnership (LP), a California Limited Partnership, (Partnership). The Partnership currently consists of Silvercrest Inc., a nonprofit agency, which is the Managing General Partner and the Housing Authority of Fresno County, California a public body corporate and politic, which is the Administrative General Partner and the project developer. The Agreement before the Board provides a loan for $1,000,000 from the County's HOME Investment Partnerships (HOME) Program Grant to assist with the development of a low-income multi-family rental apartment complex in the City of Reedley, for which the total cost of development is expected to be $14,881,595. Trailside Terrace Apartments is a fifty-five unit rental housing project, of which eleven units will be designated HOME-assisted units.

The third recommend action requests the Board authorize the Director of Public Works and Planning, or his designee, at his discretion, to execute all loan and related documents necessary for the project, and any amendments thereto including items as specified in Section XVIII of the Agreement, which only includes non-substantive changes.

ALTERNATIVE ACTION(S):

The Board may deny the Agreement as proposed, or make any changes as appropriate consistent with the Federal regulations governing the HOME program. If HOME funds are not approved, the fifty-five unit,

low-income multi-family project may not be able to be developed.

FISCAL IMPACT:

There is no net County cost associated with the recommended actions. The Agreement before the Board reserves loan funds in the amount of $1,000,000 from the County's Federal HOME Grant. The HOME funds are included in the Department's adopted FY 2015-2016 budget, Org No. 5512/2008. The total estimated project cost for the Trailside Terrace Apartments is $14,881,595. The balance of funds needed to complete the financing of the project will be from non-County funds and will include a variety of other public and private funding sources.

DISCUSSION:

The Agreement before the Board reserves HOME funds in the amount of $1,000,000 for a pending loan that will be secured by a Promissory Note and Deed of Trust. The Agreement and Deed will both be recorded and will carry restrictions that will run with the land to enforce HOME income and rent requirements on the property for a period of twenty years.

The Agreement provides HOME funding to assist with the development of eleven units in a fifty-five unit low-income multi-family rental housing project in the City of Reedley. The Trailside Terrace Apartment Project, located at the west side of G Street and east side of H Street (see attached map), will provide affordable housing for persons earning no more than 60% of the area median income (AMI) for Fresno County. It will consist of a mix of one, two and three bedrooms units restricted to households at varying income levels that will range from 30% AMI to 60% AMI. The units must meet the HOME Program income and rent requirements for the full affordability period. Construction must meet all applicable local codes and property standards as identified in 24 CFR § 92.25 for HOME assisted new construction to ensure longevity and safety. The Agreement also provides for the Partnership to require professional liability insurance limits of $1,000,000 per incident and $2,000,000 aggregate for any professional contracts associated with this project, and secure a performance bond and labor and material bond in an amount sufficient to ensure full completion of the project.

The partners of the Reedley Trailside Terrace, LP have a strong history of affordable housing development with Fresno County and Central California. Based on criteria established under the Federal HOME Program, the Partnership is eligible to apply for HOME funding for affordable housing development projects. The Partnership, its members and the project have been reviewed by County staff and have been determined to meet the threshold criteria for funding under the County's Affordable Housing Development Program.

Release of County HOME funds is contingent upon the Partnership securing all other funding to complete financing for the project, including meeting all of the funding requirements for Low-Income Housing Tax Credits. The project is supported by the City of Reedley and is consistent with the County's General Plan, which directs residential growth to cities. The Partnership is requesting $1,000,000 of HOME funds to assist with the construction of eleven of the fifty-five rental units.

Additional funding for the estimated $14,881,595 housing project will come from a variety of funding sources that will include a loan from the Housing Authority of Fresno County and Tax Credits.

Estimated Sources of Funds:

1.	Construction Loan	$9,175,157
2.	Developer (Deferred Costs)	946,778
3.	Housing Authority of Fresno County	2,210,000
4.	County of Fresno (HOME Loan Funds)	1,000,000
5.	AHP Funds (Federal Reserve Bank)	540,000
6.	CA Tax Credit Equity	1,009,660

Estimated Total Project Costs	$14,881,595

Anticipated Permanent Loan Lien Order:
(Construction Loan Paid During Permanent Financing)

1. Housing Authority of Fresno County	$2,210,000
2. County of Fresno (HOME Loan Funds)	$1,000,000
3. AHP Funds (Federal Reserve Bank)	$540,000

Due to the complex financing and time sensitive nature of these large housing developments, it is not unusual for the project's other funding sources to change as the developer solidifies financing from a variety of public and private funding sources to complete financing for the project. The County's permanent lien position will not be lower than second lien position.

The project has already received tax credits, and is expected to commence construction in December, 2015, and be completed by March 2017.

County of Fresno

DEPARTMENT OF PUBLIC WORKS AND PLANNING
ALAN WEAVER, DIRECTOR

September XX, 2015

Buada Associates, Inc.
Attn: John Buada
4872 N. Arcada Ave.
Fresno, CA 93704

Dear Mr. Buada:

SUBJECT: SITE PLAN REVIEW NO. 7946

Site Address:	14684 E. Goodfellow Ave
APN:	333-061-04 & 05, 333-160-01, 332-071-52 & 53, 350-041-12, 360-020-20
Zoning District:	AE-20 (Limited Agricultural District)
Use Approved:	Allow a sand and gravel extraction and construction and operation of aggregate processing, ready-mix concrete, asphalt, and portable recycle concrete plants and related facilities.
Legal Description of Site:	See Appendix A of the approved Reclamation Plan

The Department of Public Works and Planning (Department) has reviewed your application and determined that the required findings can be made and hereby approves Site Plan Review No. 7946 subject to the following conditions.

CONDITIONS OF APPROVAL

Approval of this application is subject to conditions as required by Section 858 and 874 of the Fresno County Zoning Ordinance and Conditional Use Permit No. 3390.

The required improvements are listed below and on the approved plans. An inspection is required prior to the issuance of a Certificate of Occupancy to assure compliance with these conditions and the approved Site Plan. Please call (559) 600-4560, Fresno County Department of Public Works and Planning, Building and Safety Section, to arrange for this inspection when required improvements are completed.

Unless otherwise specified in an individual condition, prior to any excavation, the Dedication of Right-of-Way, Financial Assurances, Required Development Clearances, On and Off-Site Improvements, and those items listed under Miscellaneous shall be completed/satisfied. (Note: Some conditions may be applicable to future phases as noted in each condition.) As used herein, the "Owner" refers to Colony Land Company, LP, and any of its agents.

I. FINANCIAL ASSURANCES

CUP 3390 approval shall be conditioned upon acceptance of Financial Assurances by the [Fresno County Planning] Director.

To ensure that the reclamation will proceed in accordance with the approved Reclamation Plan, security shall be required which will be released upon satisfactory performance. Security may be posed in the form of a surety bond, trust fund, irrevocable letter of credit from an accredited financial institution, or other method acceptable to the County and the State Mining and Geology Board (SMGB) as specified in State regulations, and which the County reasonably determines are adequate to perform reclamation in accordance with the surface mining operation's approved Reclamation Plan. Financial Assurances shall be made payable to the County of Fresno and the State Department of Conservation being an alternative payee.

Cost estimates for the Financial Assurances shall be submitted to the Department for review and approval prior to the Owner securing Financial Assurances. The Director of the Department of Public Works and Planning (Director) shall forward a copy of the cost estimates together with any documentation received supporting the amount of the cost estimates, to the State Department of Conservation (DOC) for review. If the DOC does not comment within 45 days of receipt of these estimates, it shall be assumed that the cost estimates are adequate, unless the County has reason to determine that additional costs may be incurred. The Director shall then have the discretion to approve the Financial Assurances if it meets the requirements of the Fresno County Zoning Ordinance, Surface Mining and Reclamation Act (SMARA), and State regulations.

The amount of the Financial Assurances shall be based upon the estimated costs of reclamation for the years or phases stipulated in the approved Reclamation Plan, including any maintenance of reclaimed

areas as may be required subject to adjustments for the actual amount required to reclaim lands disturbed by surface mining activities in the upcoming year. Cost estimates shall be prepared by a California registered Professional Engineer and/or other similarly licensed and qualified professional retained by the Owner and approved by the Director. The estimated amount of the Financial Assurances shall be based on an analysis of the physical activities necessary to implement the approved Reclamation Plan, the costs for each of these activities, the number of units of each of these activities, and the actual administrative costs. Financial Assurances to ensure compliance with he approved Reclamation Plan shall be based upon cost estimates that include but may not be limited to labor, equipment, materials, mobilization of equipment, administration, and reasonable profit by a commercial operator other than the permittee. A contingency factor of ten (10) percent shall be added to the cost of the Financial Assurances.

In projecting the costs of Financial Assurances, it shall be assumed without prejudice or insinuation that the surface mining operation could be abandoned by the Owner and, consequently, the County or DOC may need to contract with a third party commercial company for reclamation of the site.

The Financial Assurances shall remain in effect for the duration of the surface mining operation and any additional period until reclamation is completed including any maintenance required for reclamation in accordance with the approved Reclamation Plan.

The amount of the Financial Assurances required for any one year shall be adjusted annually to account for new lands disturbed by the surface mining operation, inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan. The Financial Assurances shall include estimates to cover reclamation for existing conditions and anticipated activities during the upcoming year, excepting that the Owner may not claim credit for reclamation scheduled for completion during the coming year. The updated cost estimates shall be considered during this Department's annual inspection and accepted thereafter if further adjustment is not required. Any changes shall be completed and submitted within 30 days of notice from the County.

Revisions to Financial Assurances shall be submitted to this Department for approval by July 1st each year. If an amendment to the reclamation plan is required, and upon receipt of and deeming the materials to be complete, the information shall be processed as a plan amendment to allow the incorporation of the changed requirements into the reclamation plan. As part of the review process, the County may provide the Department of Conservation/Office of Mine Reclamation the opportunity to

review the amended reclamation plan, in accordance with the provisions of SMARA. (858G, COAs -1 and -2)

III. REQUIRED DEVELOPMENT CLEARANCES

A. The owner(s) shall execute and record an agreement, binding upon his successors, heirs or assigns, which shall permit the County to enter the property to enforce completion of the Reclamation Plan. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (858 J.2)

B. Within 60 days after project approval or prior to the issuance of grading and building permits, whichever occurs first.

The Owner shall enter into an agreement with the County of Fresno to implement a mitigation measure and conditions of approval monitoring and reporting program to be administered by a third party in accordance with Section 21081.6 of the California Public Resources Code and Section 15097 of Title 14, Chapter 3 of the California Code of Regulations. This agreement shall cover monitoring the conditions specified herein which incorporate the adopted mitigation measures. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (COA-11)

The Owner shall enter into an agreement with the County of Fresno to provide funding to compensate for County Staff's time in reviewing and administering any materials related to condition of approval and mitigation measure monitoring and reporting, including those prepared by the third party administrator.

C. Within 60 days after project approval or prior to the issuance of grading and building permits, whichever occurs first.

The Applicant shall enter into an agreement with the County of Fresno to compensate for County staff's time to review and administer any materials related to Mitigation Monitoring and/or Reporting, including those prepared by the Third Party Monitor. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (COA-12)

D. An agreement shall be entered into indemnifying the County for legal costs associated with its approval of Unclassified Conditional Use Permit No. 3287. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (COA-13)

E. An Engineered Grading and Drainage plan shall be submitted to the Department of Public Works and Planning demonstrating how surface runoff and drainage will be controlled in accordance with Fresno County Improvements Standards. The plan must include calculation of runoff quantities generated by this development and capacity of proposed facilities. The plan must also include detailed erosion control measures designed for not less than the 20 year/1 hour Intensity storm event. The reclamation plan shall be supplemented with those elements of the Engineered Grading and Drainage plan, subject to the provisions of the Surface Mining and Reclamation Act. Engineered Grading and Drainage plan details supplementing the Reclamation Plan shall not be considered a substantial deviation of the approved reclamation plan under SMARA section 3502(d). Contact the Grading Engineer for Grading and Drainage Plan requirements at (559) 600-4022.

According to FEMA FIRM Panels 2170H, a portion of the parcels with Assessor's Parcel Numbers 333-090-06s and 333-090-17s are in Flood Zone A, subject to flooding from the 100-year storm. No work is proposed within the flood zone.

(Compliance with this condition is complete. An Engineered Grading and Drainage Plan was prepared that complies with the requirements specified herein and the plan was incorporated into the Revised Reclamation Plan that was approved by the Board of Supervisors on August 6, 2013.).

F. All driveways and parking areas to be used by motor vehicles shall be designed by an architect or civil engineer in accordance with Fresno County Standards. A complete listing of materials, costs, and quantities in place, shall be submitted to this Department for approval. A Plan Check Fee, based upon the estimated costs, will be collected upon submittal of design plans and cost estimate. . The balance of the Plan Check Fee must be paid upon approval of the cost estimate.

G. Owner shall design and install fire protection measures as required by the Fresno County Fire Protection District, which may include but are not limited to water flow requirements, water storage, fire pumps, fire hydrants, fire sprinkler systems, fire alarm systems and road access. All structures and other applicable facilities shall comply with California Code of Regulations Title 24 – Fire Code. **In addition to the two (2) construction sets submitted to Building Safety Section for review (Plan Check), three (3) sets of construction plans shall be submitted to the Site Plan Review section and date stamped prior to Fire District review.** These plans will be forwarded to the Fire District for their review. It will be the responsibility of the Owner to contact the Fire Protection District for required fire protection improvements. Contact the Fire District at (559) 493-4359 for information.

Note:

Two (2) sets of construction plans are required to be approved and stamped by the Fire District prior to building permit issuance; allow sufficient time for Fire District review.

H. A determination was made that the Project facilities meet the definition of a public water system, therefor; the applicant shall file an application for a Domestic Water Supply Permit from the Regional Water Quality Control Board. Contact the Central Valley office at 559.445.5116 or 1685 "E" Street, Fresno, Ca. 93706 for additional information (COA 15)

I. Due to the proposed project disturbing more than five acres of land, the Applicant will be required to obtain a National Pollution Discharge Elimination System (NPDES) General Construction Storm Water Permit from the Regional Water Quality Control Board. (Notes 7)

J. Prior to occupancy, the Applicant shall complete and submit either a Hazardous Materials Business Plan or a Business Plan Exemption form to the Fresno County Department of Community Health, Environmental Health Division. Contact the Certified Unified Program Agency at (559) 445-3271 for more information. (Notes 2)

K. The Owner shall obtain an Authority to Construct (ATC) and Permit to Operate (PTO) from SJVAPCD prior to the issuance of permits. The Owner shall also adhere to the equipment descriptions and conditions contained within the Authority to Construct (ATC) and Permit to Operate (PTO) authorizations issued by the SJVAPCD. (Notes 8)

IV. OFF-SITE IMPROVEMENTS (County)

A. The Project Applicant shall pay proportional fair share contributions towards the required identified improvements. (*Please refer to Section 3.12.6.8 of the DEIR for explanation of the County and Caltrans fair share formulas and Tables 3.12-16 through 3.12-18 for fair share percentages*). The Project Applicant shall enter into traffic mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements). The traffic mitigation agreements shall establish the exact payment amounts and thresholds that define the timing of the required payments. (*The required improvements are listed on pages 3.12-63 through 3.12-68 of the DEIR).* (MM TRANS-1)

B. An encroachment permit for off-site improvements at the intersection of the project site access road with Reed Avenue as specified at Condition V.D shall be obtained from the Fresno County Department of Public Works and Planning, Road Maintenance and Operations Division, and the

improvements shall be designed and installed in accordance with Fresno County Improvement Standards.

C. The Owner shall be responsible for relocation of utilities that may be necessary within the road right-of-way(s) to the correct alignment and grade affected by the improvements specified at Condition V.D.

D. The Project applicant shall make the following improvements ***prior to any product being shipped from the Project site***:

Project Driveway at Goodfellow

- Eastbound left turn and westbound right turn at the Project Driveway at Goodfellow Avenue.
- Westbound acceleration lane for trucks exiting the site. (MM TRANS-2)

E. The Project shall contribute its fair share cost for the purposes of improving the structural section of the impacted street segments.

Central Avenue

- McCall Avenue and Bethel Avenue
- Bethel Avenue and Academy Avenue
- Academy Avenue and Newmark
- Newmark Avenue and Riverbend Avenue

McCall Avenue

- SR 180 (Kings Canyon) and Jensen Avenue
- Jensen and North
- North Avenue and Central Avenue (MM TRANS-3)

V. OFF-SITE IMPROVEMENTS (CALTRANS)

A. The Project Applicant shall pay proportional fair share contributions towards the required identified improvements. (*Please refer to Section 3.12.6.8 of the DEIR for explanation of the County and Caltrans fair share formulas and Tables 3.12-16 through 3.12-18 for fair share percentages*). The Project Applicant shall enter into traffic mitigation agreements with the County (for non-SR 180 improvements) and with Caltrans (for SR 180 improvements). The traffic mitigation agreements shall establish the exact payment amounts and thresholds that define the timing of the required payments. (*The required improvements are listed on pages 3.12-63 through 3.12-68 of the DEIR)*. (MM TRANS-1)

B. For those improvements under the jurisdiction of the California Department of Transportation (Caltrans), payment of this project's proportionate share shall be made to Caltrans and verification of payment shall be submitted to this Department.

VI. ON-SITE IMPROVEMENTS

A. Parking, circulation, and loading areas shall be identified on improvement plans and reviewed and approved by the Department prior to construction. Parking for the physically disabled shall be provided as required by applicable laws.

B. Active storage, parking, and circulation areas that are not concrete or asphalt concrete paved shall be treated with a dust palliative and repeated as necessary to prevent the creation of dust by vehicles. Compliance with SVJAPCD Rules 8011 and 8071 will be deemed to satisfy this requirement.

C. The driveway shall be concrete or asphalt concrete paved a minimum width of 24 feet for the first 100 feet off of the edge of the road right-of-way.

D. The gate that provides initial access to this site shall be setback from the edge of the road right-of-way a minimum of 20 feet or the length of the longest vehicle to enter the site, whichever is greater and shall not swing outward. A 45 degree (45°) corner cut-off shall be maintained for Project related structures or other features, including berms at the Project access road intersection with Reed Avenue.

E. All outdoor lighting shall be hooded and directed so as not to shine toward public roads or the surrounding properties.

F. A 10-foot high vegetated berm shall be constructed along Riverbend Avenue adjacent to Phases 3A, 3B, 4A and 4B. An 8-foot vegetated berm shall be constructed along the south side of Goodfellow from Riverbend Avenue to 2,000 feet west of Riverbend Avenue.

The berms will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. The berms shall be constructed and planted prior to the removal of overburden in each phase (MM AES-1)

G. Orchard-like screens shall be planted on the north side of Goodfellow Avenue west of the entrance road and on the south side of Goodfellow Avenue west of the 8-foot high vegetated berm prior to overburden removal in the adjacent phases. The tree species will be evergreen trees

(e.g., olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening. (MM AES-2)

H. The dragline shall be painted a neutral-tone color to achieve the best blending with the surrounding landscape and vegetation. (MM AES-3)

VII. Construction

A. Qualified biologist shall conduct pre-construction surveys for elderberry shrubs and oversee avoidance and/or implementation of additional mitigation measures as specified.

1. Prior to the start of ground disturbing activities for the aggregate plant and each individual phase of mining (i.e. Phase 1A, 1B), surveys for elderberry shrubs shall be conducted within the mixed riparian forest community within 100 feet of the work limits. Any elderberry shrubs identified shall be located on a map and the stems inventoried in accordance with USFWS guidelines.

2. To the maximum extent practicable, all Project activities shall be set back a minimum of 100 feet from all elderberry shrubs with one or more stems of 1-inch diameter at ground level growing within the Biological Study Area (BSA) or adjacent areas. If a 100-foot setback cannot be maintained, implementation of additional mitigation measures described below shall be required in accordance with USFWS guidelines:

   a. Prior to initiation of construction, the limits of all construction, access roads, staging areas, etc., shall be staked. The staked areas shall be inspected by a qualified biologist. Based on this inspection, additional refinements to construction areas shall be performed as necessary and as feasible to ensure a minimum 20-foot setback from the dripline of all elderberry plants.

   b. Once the final limits of construction are set, brightly colored fencing (i.e., snow fencing) shall be installed at the 20-foot setback around the perimeter of each elderberry plant or plant group under the direction of a qualified biologist.

   c. Signs shall be posted every 50 feet along the edge of the VELB avoidance area with the following information: “This area is habitat for the Valley Elderberry Longhorn Beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as

amended. Violators are subject to prosecution, fines, and imprisonment."

d. Workers shall be briefed on the need to avoid damage to elderberry shrubs and the possible penalties for not complying with these requirements. All work crews shall be advised of the status of VELB and the need to protect the elderberry shrubs.

e. During the initial construction period for each phase of mining, a qualified biologist shall inspect the mining area periodically to assure that the Project is not affecting VELB. (MM BIO-3)

VIII. MISCELLANEOUS

A. Qualified biologist shall conduct pre-demolition surveys for bats as follows:

1. All buildings to be removed shall be surveyed by a qualified biologist to determine if they are being used as a roost site for bats, and if so, what type of roosting behavior is occurring (night roost vs. day/maternity roost). The survey shall be conducted in June or July when maternity roosts would be most active. (MM BIO-1(1))

2. Any buildings to be removed that are determined to support only night-roosting bats shall be removed between September 1 and October 14, or between February 16 and April 14. Removal of buildings during these periods will avoid impacts to any bats utilizing the buildings during the normal breeding season (April 15 to August 30) and winter torpor (October 15 to February 15). (MM BIO-1(2))

3. If a building is determined to support a day/maternity roost, a mitigation plan (i.e., removal plan) shall be prepared by a qualified bat biologist experienced with bat eviction and exclusion possessing a Memorandum of Understanding with the California Department of Fish and Wildlife. At a minimum, the mitigation plan shall provide for humane eviction of the existing bat population and creation of artificial day roost habitat, to mitigate impacts resulting from removal of the roost site. (MM BIO-1(3))

B. Qualified biologist shall conduct pre-demolition surveys for migratory birds and raptors and oversee avoidance of active nests during construction and ground disturbance activities as follows:

1. To the maximum extent practicable, all construction activities associated with the initiation of work on the Project site or initiation of new mining phases shall be scheduled between September 15 and February 1, which is the typical non-nesting season.

2. If the initiation of work in new areas cannot be scheduled during the non-nesting season, prior to the initiation of work on the Project site and each individual phase of mining (e.g., Phase 1A, 1B, etc.), a qualified biologist shall survey all suitable nest trees within 0.25 mile of the work limits for nesting Swainson's hawks, within 500 feet of the work limits for other raptors, and within 250 feet of the work limits for other nesting birds no more than 10 days prior to the start of ground disturbing activities. The survey will follow the methodology developed by the Swainson's Hawk Technical Advisory Committee (SWHA TAC, 2000).

3. If nesting Swainson's hawks are found within 0.25 mile, other nesting raptors are found within 500 feet, or other nesting birds are found within 250 feet of the work limits as described in Item 2 above:

    a. A qualified biologist shall evaluate the potential for the proposed work to disturb nesting activities. The evaluation criteria shall include, but not be limited to, the location/orientation of the nest in the nest tree, the distance of the nest to the work limits, the line of sight between the nest and the work limits, and the description of the proposed work. The nest shall be continually surveyed for the first 24 hours.

    b. CDFW shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities.

    c. If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities that occur during the breeding season to monitor nesting activity. The biologist shall have the authority to stop work if it is determined the Project is adversely affecting nesting activities.

4. If no nesting Swainson's hawks are found within 0.25 miles, no other nesting raptors are found within 500 feet, or no other nesting birds are found within 250 feet of the work limits as described in measure 2 above, work can proceed as planned.

5. Construction initiated during the non-nesting season and continuing into the nesting season shall not be subject to the above measures. (MM BIO-2)

C. The Project Applicant shall obtain the services of a qualified cultural and paleontological consultant to implement an education program to ensure that construction personnel are aware of potentially sensitive archaeological and paleontological resources. (MM CPR-2)

D. The Project shall designate an individual to be the contact person for noise complaints. This individual shall have access to a noise meter and be available to measure noise levels and confirm compliance with the County noise ordinance. (MM NO-3)

E. The Owner shall file a New Operator and Request for Mine ID Number from the Office of Mine Reclamation.

F. Fire protection improvements shall be in place and inspected by the Fresno County Fire Protection District prior to occupancy. Contact the District at (559) 485-7500 to arrange for an inspection. Allow 14 to 21 days for the District to complete the inspection.

G. The Civil Engineer, who prepares the on-site improvement plan, shall inspect construction of the facilities and shall certify to the Department of Public Works and Planning that the work conforms to approved plans and specifications.

IX. OPERATIONAL REQUIREMENTS

A. The processing plant and ready-mix plant shall annually renew their air quality permits and comply with their conditions. (Notes 9)

B. Prior to commencement of plant area operations, a 15-foot high vegetated berm shall be constructed along the Kings River adjacent to the Plant area (i.e., Phase 9).

The berm will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. (MM AES-4)

C. The Project shall conserve agricultural land by acquiring an agricultural conservation easement (ACE) on 351 acres of Important Farmland as classified by DOC's FMMP to mitigate for the 351 acres of Important Farmland on the Project site to be converted to non-agricultural use. The ACE would be phased in accordance with the following schedule:

- Within one year of existing agricultural land being taken out production for the Project 100 acres shall be placed in an ACE.

- Within the earlier of 5 years, or before 100 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 100 acres shall be placed in an ACE.

- Within the earlier of 10 years, or before 200 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 75 acres shall be placed in an ACE.

- Within the earlier of 15 years, or before 275 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 76 acres shall be placed in an ACE.

All ACE's entered into as described here shall have ownership transferred to an qualified Land Trust within 5 years of being established.

Temporarily taking of land out of agriculture production for normal farming purposes (e.g. rotating crops, resting soil, etc.) shall not be considered taking of existing agricultural land out of production for the Project. (MM AG-1)

D. The following design features will mitigate VOC, SVOC, and/or SO_2 emissions:

1. The type of asphaltic cement produced by on-site plants affects odorous emissions. Some cements have lower VOC/SVOC emissions than others. Therefore, cements with lower VOC/SVOC emissions shall be used to the extent feasible.

2. Periodic burner tune-ups may reduce VOC emission by about 38 percent. Therefore, periodic burner tune-ups shall be implemented.

3. Mixing drum vapors shall be routed back to the dryer burner. (MM AQ-1)

E. Each off-road engine on-site between 1/1/2015 and 12/31/2018, excluding scrapers and haul trucks, shall be model year 2015 or later. Engines in scrapers shall be no greater than ten (10) years old and shall meet the Tier 3 off-road engine standard. Engines in off-road haul trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards.

Each off-road engine on-site after 1/1/2019, excluding scrapers, shall be model year 2014 or later. Engines in scrapers shall meet Tier 3 engine standard and be model year 2010 model year or later. Off-road haul trucks

shall not be used after 1/1/2019 except during occasional repairs or during relocation of overland conveyors not to exceed five workdays in any month. In such cases, the off-road trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards. (MM AQ-2,-4)

F. Diesel trucks shall not idle greater than five (5) minutes while on-site as required by the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling (13 CCR §2485). (MM AQ-3)

G. Prior to commencement of Phase 8B, markers shall be placed at the geographic boundary coordinates delineating the 50-foot exclusion zone surrounding site CA-FRE-3591 to prevent disturbance by project activities. It is inappropriate to prescribe a specific type of markers at this time, as technological changes over the next 60 years may result in fencing/marker options not currently available. However, the markers shall fulfill the following purpose: (1) provide a clear visual indicator of the exclusion zone and (2) prevent the entry of unauthorized equipment, vehicles, and mine personnel into the exclusion zone. To facilitate the identification and delineation of the boundary and 50-foot exclusion zone for CA-FRE-3591, the site shall be surveyed and Universal Transverse Mercator (UTM) geographic coordinates provided to the County. (MM CPR-1)

H. To mitigate the risk of loss or injury potentially resulting from flooding, the operator shall implement a system to regularly monitor public announcements concerning potential Kings River flooding. At the beginning of each day that employees are to work in areas mapped within the 100-year flood hazard zone, the operator must check with the National Weather Service to determine if flood warnings are in effect. The operator must communicate the flooding potential to all employees each day. Employees must avoid working in portions of the Project site that are within the flood hazard zone. In addition, access to areas of the Project site subject to potential flooding shall be physically demarcated with signage and deterrents such as traffic barricades. (MM HWQ-1)

I. The following specific measures are required to ensure impacts associated with Project dragline excavation are less than significant:

1. The reference sound levels associated with dragline operation shall be verified through noise level measurements immediately upon commencement of dragline operations at the Project site. In the event that actual noise emissions of the dragline exceed the assumptions contained within this analysis, additional noise control measures shall be implemented. Those measures would include replacing fan motors with variable drive motors and/or installation of cooling air inlet and/or exhaust silencers directly to the dragline as required to satisfy the Fresno County Noise Ordinance standards.

2. Except during a public emergency that requires immediate production of aggregates and concrete products, excavation activities using the proposed dragline shall be limited to daytime hours when located within the following distances from noise receivers:

    a. When operating the mine and aggregates plant only:

        i. 600 ft. from R3, R4, R5, R7, R9, R10.
        ii. 900 ft. from R8.
        iii. 725 ft. from R13.
        iv. 925 ft. from R14.

    b. When operating the mine, aggregates plant and the hot mix asphalt plant and/or the ready mix concrete plant.

        i. 600 ft. from R3, R4, R5.
        ii. 750 ft. from R7, R9, R10.
        iii. 1,050 from ft. R8.
        iv. 850 ft. from R13.
        v. 975 ft. from R14.

3. Prior to mining within 900 feet of Residence Nos. 3, 4, 5, 7, & 9 along Riverbend Avenue, the proposed 10-foot tall berm shall be constructed near the western edge of the proposed 100-foot excavation setback.

4. Prior to mining within 900 feet of Residence No. 10 along Riverbend Avenue, an 11-foot tall berm shall be constructed near the western edge of the proposed 100-foot excavation setback.

5. Prior to mining within 900 feet of Residence No. 13, the proposed 8-foot tall berm shall be constructed near the southern edge of the proposed 100-foot excavation setback along the South side of Goodfellow from Riverbend Avenue to 2000 feet West of Riverbend Avenue.

6. Excavation activities within 1,000 feet of an existing residence shall be conducted such that the dragline cooling exhaust fans do not directly face the residence. (MM NO-1)

J. The following specific measures are required to ensure that impacts associated with concurrent operation of the aggregates processing plant, mine, and other activities are less than significant at Receiver 8:

1. Plant area noise at Receiver 8 shall be reduced to less than the Fresno County Noise Control Ordinance thresholds by implementing the following noise control measures:

    a. A 15-foot tall earthen berm shall be constructed near the Project western boundary in the vicinity of Receiver 8. The berm shall extend laterally to the extents shown on DEIR Figure 2-7.

    b. Prior to commencement of night-time operation, sound curtains shall be constructed adjacent to the noisiest aggregate plant equipment (i.e. crushers) in order to provide additional shielding in the direction of Receiver 8. The curtains are estimated to result in an 8 dBA reduction in noise from the aggregate plant.

2. Following implementation of the noise control measures identified in Item 1 above, noise tests shall be conducted to confirm effectiveness of the control measures and compliance with the County Noise Control Ordinance exterior noise standards. (MM NO-2)

K. The Applicant shall not exceed annual mined production of 1.6 million tons (including aggregate and overburden). (COA 5)

L. The Owner shall not exceed maximum annual marketed aggregate production of 1.25 million tons per year. (COA-6)

M. Submittal of dragline

X. NOTES

A. All conditions of approval for CUP application 3390 shall be implemented in accordance with the timeframes specified for each phase.

B. Development and operation of the use shall be in conformance with the site plan, elevation drawings, operational statement, and Reclamation Plan approved by the Commission. (COA 3)

C. Permits for structural, electrical, and plumbing work shall be obtained from the Department of Public Works and Planning, Permits Counter, prior to any construction.

D. Fresno County shall conduct an inspection of the operation once each calendar year to determine if the operation is in compliance with the

requirements of Public Resources Code Chapter 9, commencing with Section 2710. The inspection shall be completed in compliance with the provisions of SMARA and may include, but shall not be limited to adherence to reclamation requirements of the approved Reclamation Plan. The County will also inspect for compliance with conditions of approval and mitigation measures of CUP 3287 as specified herein. An inspection fee shall be paid prior to each inspection. Currently the inspection fee is $2,257.00

E. The Applicant shall implement the mitigation measures adopted by the County. (COA 4)

F. The Applicant shall comply with Fresno County noise standards applicable to construction activities associated with the Project. (COA 7)

G. At least 10 years prior to the scheduled mining of the parcels subject to Williamson Act Contract No. 6322 a Notice of Nonrenewal shall be filed with the Department of Public Works and Planning. (COA 8)

H. The Applicant shall comply with all applicable County recycling requirements. (COA 9)

I. The Applicant shall comply with all applicable federal, state, and local regulatory requirements. (COA 10)

J. The Applicant shall comply with all applicable rules and permitting requirements of the SJVAPCD. (COA 16)

K. The operator shall comply with all applicable Air Resources Board and San Joaquin Valley Air Pollution Control District regulations related to diesel-fueled trucks and equipment, which may include among others: (1) meeting more stringent emission standards; (2) retrofitting existing engines with particulate traps; (3) use of low sulfur fuel; and (4) use of alternative fuels or equipment. (Notes 10)

L. Pursuant to the provision identified in Zoning Ordinance Section 858.E.4, a Site Plan Review shall be submitted and approved for the entire area shown for the mining and reclamation plan prior to commencing mining or building. (Notes 3)

M. The Applicant shall adhere to the provisions set forth by the Office of Mine Reclamation. These provisions include regulations for compliance, reporting, and financial assurances. (Notes 11)

N. If any subsurface cultural resources, including either prehistoric or historic resources, are encountered during construction of the Project, all

construction activities in the vicinity of the encounter shall be halted until a qualified archaeologist can examine these materials and make a determination of their significance. Such finds include, but are not limited to, prehistoric grinding implements, stone tools, soapstone bowls, and ornaments (e.g., beads, pendants) as well as intact building foundations and high concentrations of historical artifacts. The Fresno County Department of Public Works and Planning shall be notified, and the owners, developers and/or successors-in-interest shall be responsible for mitigation of any significant cultural resources pursuant to the CEQA Guidelines. (MM CPR-3)

O. If paleontological resources are discovered during project-related activities, the find shall be reported immediately to the County of Fresno Planning Department, who shall provide direction to contact a paleontological monitor. The area of the find shall be avoided until the monitor is on-site. The monitor shall assess the find and make any necessary recommendations, including any procedures to further investigate or mitigate impacts to the find as required by law. (MM CPR-4)

P. In the event that unanticipated human remains are discovered, work shall immediately stop at the discovery location and any nearby area reasonably suspected to overlie adjacent human remains. The Fresno County Coroner shall immediately be contacted to determine whether the cause of death must be investigated. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours (H&SC §7050.5). At the same time, the mine operator shall immediately notify the Fresno County Department of Public Works and Planning, and a qualified archaeologist shall be contacted to evaluate the archaeological implications of the find. (MM CPR-5)

Q. The CEQA Guidelines (§15064.5) detail steps to be taken when human remains are found to be of Native American origin. If Native American remains are discovered, the operator/landowner shall work with the NAHC to develop and execute an agreement between themselves and the most likely descendant(s) of Native Americans who may be buried in the vicinity by which the human remains and associated burial items shall be treated or disposed, with appropriate dignity. The NAHC and landowner shall follow prescribed steps in Public Resources Code §5097.98, which include but are not limited to the following:

- The NAHC shall notify those persons it believes to be the most likely to have descended from the deceased Native American.

- The most likely descendant(s) may recommend to the landowner the means of treating and disposing of, with appropriate dignity, the human remains and any associated grave goods.

- The landowner shall ensure the immediate vicinity of the Native American human remains is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations. (MM CPR-6)

R. All hazardous waste shall be handled in accordance with requirements set forth in the California Health and Safety Code, Chapter 6.5. This chapter discusses proper labeling, storage and handling of hazardous wastes. (Notes 4)

S. The project shall implement applicable Best Management Practices (BMPs) presented in the Construction Site and Post-Construction Storm Water Quality Management Guidelines as necessary to reduce the release of pollutants in storm water runoff to the maximum extent practicable and in compliance with project Storm Water Pollution Prevention Plans (SWPPPs). Guidelines are available at the Fresno Metropolitan Flood Control District office, Contact the District at (559) 456-3292 for information. (Notes-6)

T. In the event that future changes in discharge regulations applicable to the project occur, the Owner shall notify the County of these changes and it shall be determined whether the changes require an amendment to the reclamation plan.

U. Required site improvements may be bonded in accordance with the provisions of Section 874-C-2 of the Fresno County Zoning Ordinance.

V. This Use Permit (CUP 3390) will become void, unless there has been substantial development within two years of the effective date of this approval.

W. This Site Plan Review approval shall expire concurrently with Conditional Use Permit No. 3287.

This approval is final, unless appealed to the Fresno County Planning Commission. In this event, you must submit a fee of $508.00 and file a written appeal setting forth your reasons for such appeal to the Commission. Such appeal shall be filed with the Director of the Department of Public Works and Planning within 15 days after the mailing of this decision and shall be addressed to:

Date: Wednesday, September 2, 2015 8:04:00 AM

Good morning Jen,

Can you verify and advise me if a Grading Plan was submitted with the Reclamation Plan for this project? I am wrapping the Site Plan Review and want to verify if grading Plan was submitted and possibly approved.

Thanks,

Hector E. Luna

John,

I'll have the file ready in the morning and send you PDF's of approval letter and approved site plans when completed. Your suggestions were helpful although some requirements such as grading review and encroachment permits are required by the Department even though not listed in the conditions of approval for the land use permit.

John,

I apologize for the delay, the SPR review is just about complete although I have been having trouble getting enough time to verify all the comments on the approval letter. CUP 3390 conditions are noted in red to assist in cross referencing the MMRP & COA for land use permit. I am setting aside time today to get it to you as soon as possible, attached is draft copy of approval letter.

John.

I am currently working on your project, comments received to date are referencing comments for approved CUP 3390 and Reclamation Plan. Attached is comment from Betsy Lichti at State Waterboards for your review. I plan on wrapping this SPR project by early next week if not sooner.

Feel free to contact me should you have any questions.

Hector,

Just checking on the status of the Riverbend SPR. Could please email me any comments as you receive them? That way I can get started on any responses or modifications that might be needed.

John,

One hard copy of related documents will suffice, electronic copies (PDF) of documents submitted is the preference. If you have not made copies of plans yet, 5 copies of plans will be fine. I am trying to move away from hard copies and utilize electronic files for easier access.

Feel free to contact me should you have any questions.

Hector,

I plan to file the SPR application for the Riverbend Sand and Gravel project (CUP 3390) tomorrow morning. I will provide 7 copies of the Site Plan sheets and a pdf file with the Site Plans and related documents. How many copies of the related documents do you need?

The application package includes the following:

- Completed application form

- SPR filing fee for $14,124 payable to the “County of Fresno”
- Deeds for the Riverbend properties
- Vehicle Statement
- Site Plan sheets incorporating approved mitigation measures and conditions of approval including:
  - Current Site Plan
  - Mine Plan
  - Reclamation Plan
- Mine and Reclamation Plan document approved with CUP 3390 as Operational Statement
- Mitigation Monitoring and Reporting Program and Condition Compliance Matrix

From: Vang, Kay
To: Pratt, Carol
Subject: Herb Lang
Date: Friday, September 11, 2015 1:55:52 PM

Carol,

I called him back and gave him your e-mail address, so he can e-mail you the tax forms. That was all he needed.

-Kay

EXHIBIT 71

Form **W-9**
(Rev. December 2014)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give Form to the requester. Do not send to the IRS.

Print or type
See Specific Instructions on page 2.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
Riverbend Sand & Gravel, LLC

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification; check only one of the following seven boxes:
☑ Individual/sole proprietor or single-member LLC ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate
☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶ _____
Note. For a single-member LLC that is disregarded, do not check LLC; check the appropriate box in the line above for the tax classification of the single-member owner.
☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):
Exempt payee code (if any) _____
Exemption from FATCA reporting code (if any) _____
(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.)
14962 E. Fantz Ave

Requester's name and address (optional)

6 City, state, and ZIP code
Parlier, CA 93648

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the instructions for line 1 and the chart on page 4 for guidelines on whose number to enter.

Social security number
[ ][ ][ ] - [ ][ ] - [ ][ ][ ][ ]

or

Employer identification number
[2][7] - [3][5][3][0][4][8][3]

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 3.

Sign Here Signature of U.S. person ▶ [signature] Date ▶ 9-11-15

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. Information about developments affecting Form W-9 (such as legislation enacted after we release it) is at *www.irs.gov/fw9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following:

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See *What is backup withholding?* on page 2.

By signing the filled-out form, you:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income, and
4. Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting, is correct. See *What is FATCA reporting?* on page 2 for further information.

YEAR

CALIFORNIA FORM

2015 Withholding Exemption Certificate 590

The payee completes this form and submits it to the withholding agent.

Withholding Agent (Type or print)

Name

Payee

Name

RIVERBEND SAND & GRAVEL, LLC

☐ SSN or ITIN ☑ FEIN ☐ CA Corp no. ☐ CA SOS file no.

27-3530483

Address (apt./ste., room, PO Box, or PMB no.)

14962 E. FANTZ AVE

City (If you have a foreign address, see Instructions.)

PARLIER

State: CA ZIP Code: 93648

Exemption Reason

Check only one reason box below that applies to the payee.

By checking the appropriate box below, the Payee certifies the reason for the exemption from the California income tax withholding requirements on payment(s) made to the entity or individual.

☐ **Individuals — Certification of Residency:**
I am a resident of California and I reside at the address shown above. If I become a nonresident at any time, I will promptly notify the withholding agent. See instructions for General Information D, Definitions.

☐ **Corporations:**
The corporation has a permanent place of business in California at the address shown above or is qualified through the California Secretary of State (SOS) to do business in California. The corporation will file a California tax return. If this corporation ceases to have a permanent place of business in California or ceases to do any of the above, I will promptly notify the withholding agent. See instructions for General Information D, Definitions.

☑ **Partnerships or Limited Liability Companies (LLCs):**
The partnership or LLC has a permanent place of business in California at the address shown above or is registered with the California SOS, and is subject to the laws of California. The partnership or LLC will file a California tax return. If the partnership or LLC ceases to do any of the above, I will promptly inform the withholding agent. For withholding purposes, a limited liability partnership (LLP) is treated like any other partnership.

☐ **Tax-Exempt Entities:**
The entity is exempt from tax under California Revenue and Taxation Code (R&TC) Section 23701 _____ (insert letter) or Internal Revenue Code Section 501(c) _____ (insert number). If this entity ceases to be exempt from tax, I will promptly notify the withholding agent. Individuals cannot be tax-exempt entities.

☐ **Insurance Companies, Individual Retirement Arrangements (IRAs), or Qualified Pension/Profit Sharing Plans:**
The entity is an insurance company, IRA, or a federally qualified pension or profit-sharing plan.

☐ **California Trusts:**
At least one trustee and one noncontingent beneficiary of the above-named trust is a California resident. The trust will file a California fiduciary tax return. If the trustee or noncontingent beneficiary becomes a nonresident at any time, I will promptly notify the withholding agent.

☐ **Estates — Certification of Residency of Deceased Person:**
I am the executor of the above-named person's estate or trust. The decedent was a California resident at the time of death. The estate will file a California fiduciary tax return.

☐ **Nonmilitary Spouse of a Military Servicemember:**
I am a nonmilitary spouse of a military servicemember and I meet the Military Spouse Residency Relief Act (MSRRA) requirements. See instructions for General Information E, MSRRA.

CERTIFICATE OF PAYEE: Payee must complete and sign below.

Under penalties of perjury, I hereby certify that the information provided in this document is, to the best of my knowledge, true and correct. If conditions change, I will promptly notify the withholding agent.

Payee's name and title (type or print) HERB LANG, Project Mgr Telephone 559) 875-6565

County of Fresno

DEPARTMENT OF PUBLIC WORKS AND PLANNING
ALAN WEAVER, DIRECTOR

September 14, 2015

Buada Associates, Inc.
Attn: John Buada
4872 N. Arcada Ave.
Fresno, CA 93704

Dear Mr. Buada:

SUBJECT: SITE PLAN REVIEW NO. 7946

Site Address:	14684 E. Goodfellow Ave
APN:	333-061-04 & 05, 333-160-01, 332-071-52 & 53, 350-041-12, 360-020-20
Zoning District:	AE-20 (Limited Agricultural District)
Use Approved:	Allow a sand and gravel extraction and construction and operation of aggregate processing, ready-mix concrete, asphalt, and portable recycle concrete plants and related facilities.
Legal Description of Site:	See Appendix B of the approved Reclamation Plan for Conditional Use Permit No. 3390.

The Department of Public Works and Planning (Department) has reviewed your application and determined that the required findings can be made and hereby approves Site Plan Review No. 7946 subject to the following conditions.

CONDITIONS OF APPROVAL

Approval of this application is subject to conditions as required by Section 858 and 874 of the Fresno County Zoning Ordinance and Conditional Use Permit No. 3390.

The required improvements are listed below and on the approved plans. An inspection is required prior to the issuance of a Certificate of Occupancy to assure compliance with these conditions and the approved Site Plan. Please call (559) 600-4560, Fresno County Department of Public Works and Planning, Building and Safety Section, to arrange for this inspection when required improvements are completed.

Unless otherwise specified in an individual condition, prior to any excavation, any required, including but not limited to, Dedication of Right-of-Way, Financial Assurances, Required Development Clearances, On and Off-Site Improvements, and those items listed under Miscellaneous shall be completed/satisfied. (Note: Some conditions may be applicable to future phases as noted in each condition.) As used herein, the "Owner" refers to Running Luck Ranch, LLP, and any of its agents.

I. FINANCIAL ASSURANCES

CUP 3390 approval shall be conditioned upon acceptance of Financial Assurances by the [Fresno County Planning] Director. (COA 1)

To ensure that the reclamation will proceed in accordance with the approved Reclamation Plan, security shall be required which will be released upon satisfactory performance. Security may be posed in the form of a surety bond, trust fund, irrevocable letter of credit from an accredited financial institution, or other method acceptable to the County and the State Mining and Geology Board (SMGB) as specified in State regulations, and which the County reasonably determines are adequate to perform reclamation in accordance with the surface mining operation's approved Reclamation Plan. Financial Assurances shall be made payable to the County of Fresno and the State Department of Conservation being an alternative payee.

Cost estimates for the Financial Assurances shall be submitted to the Department for review and approval prior to the Owner securing Financial Assurances. The Director of the Department of Public Works and Planning (Director) shall forward a copy of the cost estimates together with any documentation received supporting the amount of the cost estimates, to the State Department of Conservation (DOC) for review. If the DOC does not comment within 45 days of receipt of these estimates, it shall be assumed that the cost estimates are adequate, unless the County has reason to determine that additional costs may be incurred. The Director shall then have the discretion to approve the Financial Assurances if it meets the requirements of the Fresno County Zoning Ordinance, Surface Mining and Reclamation Act (SMARA), and State regulations.

The amount of the Financial Assurances shall be based upon the estimated costs of reclamation for the years or phases stipulated in the approved Reclamation Plan, including any maintenance of reclaimed

areas as may be required subject to adjustments for the actual amount required to reclaim lands disturbed by surface mining activities in the upcoming year. Cost estimates shall be prepared by a California registered Professional Engineer and/or other similarly licensed and qualified professional retained by the Owner and approved by the Director. The estimated amount of the Financial Assurances shall be based on an analysis of the physical activities necessary to implement the approved Reclamation Plan, the costs for each of these activities, the number of units of each of these activities, and the actual administrative costs. Financial Assurances to ensure compliance with he approved Reclamation Plan shall be based upon cost estimates that include but may not be limited to labor, equipment, materials, mobilization of equipment, administration, and reasonable profit by a commercial operator other than the permittee. A contingency factor of ten (10) percent shall be added to the cost of the Financial Assurances.

In projecting the costs of Financial Assurances, it shall be assumed without prejudice or insinuation that the surface mining operation could be abandoned by the Owner and, consequently, the County or DOC may need to contract with a third party commercial company for reclamation of the site.

The Financial Assurances shall remain in effect for the duration of the surface mining operation and any additional period until reclamation is completed including any maintenance required for reclamation in accordance with the approved Reclamation Plan.

The amount of the Financial Assurances required for any one year shall be adjusted annually to account for new lands disturbed by the surface mining operation, inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan. The Financial Assurances shall include estimates to cover reclamation for existing conditions and anticipated activities during the upcoming year, excepting that the Owner may not claim credit for reclamation scheduled for completion during the coming year. The updated cost estimates shall be considered during this Department's annual inspection and accepted thereafter if further adjustment is not required. Any changes shall be completed and submitted within 30 days of notice from the County.

Revisions to Financial Assurances shall be submitted to this Department for approval by July 1st each year. If an amendment to the reclamation plan is required, and upon receipt of and deeming the materials to be complete, the information shall be processed as a plan amendment to allow the incorporation of the changed requirements into the reclamation plan. As part of the review process, the County may provide the Department of Conservation/Office of Mine Reclamation the opportunity to

review the amended reclamation plan, in accordance with the provisions of SMARA. (858G, COA's 2 and 14)

II. REQUIRED DEVELOPMENT CLEARANCES

A. The owner(s) shall execute and record an agreement, binding upon his successors, heirs or assigns, which shall permit the County to enter the property to enforce completion of the Reclamation Plan. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (858 J.2)

B. Within 60 days after project approval or prior to the issuance of grading and building permits, whichever occurs first.

The Owner shall enter into an agreement with the County of Fresno to implement a mitigation measure and conditions of approval monitoring and reporting program to be administered by a third party in accordance with Section 21081.6 of the California Public Resources Code and Section 15097 of Title 14, Chapter 3 of the California Code of Regulations. This agreement shall cover monitoring the conditions specified herein which incorporate the adopted mitigation measures. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (COA-11)

C. Within 60 days after project approval or prior to the issuance of grading and building permits, whichever occurs first.

The Applicant shall enter into an agreement with the County of Fresno to compensate for County staff's time to review and administer any materials related to Mitigation Monitoring and/or Reporting, including those prepared by the Third Party Monitor. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (COA-12)

D. An agreement shall be entered into indemnifying the County for legal costs associated with its approval of Unclassified Conditional Use Permit No. 3287. A fee of $243.50 shall be submitted to this Department to cover the cost of the preparation of this agreement. (COA-13)

E. An Engineered Grading and Drainage plan shall be submitted to the Department of Public Works and Planning demonstrating how surface runoff and drainage will be controlled in accordance with Fresno County Improvements Standards. The plan must include calculation of runoff quantities generated by this development and capacity of proposed facilities. The plan must also include detailed erosion control measures designed for not less than the 20 year/1 hour Intensity storm event.

Contact the Grading Engineer for Grading and Drainage Plan requirements at (559) 600-4022.

(Compliance with this condition is satisfied. An Engineered Surface Water and Drainage Plan that complies with the requirements specified herein was approved by the Office of Mine Reclamation and was incorporated into the Reclamation Plan that was approved by the Planning Commission on February 26, 2015.)

F. All driveways and parking areas to be used by motor vehicles shall be designed by an architect or civil engineer in accordance with Fresno County Standards. A complete listing of materials, costs, and quantities in place, shall be submitted to this Department for approval. A Plan Check Fee, based upon the estimated costs, will be collected upon submittal of design plans and cost estimate. . The balance of the Plan Check Fee must be paid upon approval of the cost estimate.

G. Owner shall design and install fire protection measures as required by the Fresno County Fire Protection District, which may include but are not limited to water flow requirements, water storage, fire pumps, fire hydrants, fire sprinkler systems, fire alarm systems and road access. All structures and other applicable facilities shall comply with California Code of Regulations Title 24 – Fire Code. **In addition to the two (2) construction sets submitted to Building Safety Section for review (Plan Check), three (3) sets of construction plans shall be submitted to the Site Plan Review section and date stamped prior to Fire District review.** These plans will be forwarded to the Fire District for their review. It will be the responsibility of the Owner to contact the Fire Protection District for required fire protection improvements. Contact the Fire District at (559) 493-4359 for information.

Note:

Two (2) sets of construction plans are required to be approved and stamped by the Fire District prior to building permit issuance; allow sufficient time for Fire District review.

H. The State Water Resource Control Board (Fresno District) has determined the Project facilities meet the definition of a public water system, therefor; the applicant shall file an application for a Domestic Water Supply Permit from the Regional Water Quality Control Board. Contact the Central Valley office at 559.447.3300 or 1685 “E” Street, Fresno, Ca. 93706 for additional information. (COA 15)

I. A Storm water pollution prevention plan shall be submitted to the U.S. Environmental Protection Agency and administered by the California State Regional Water Quality Control Board. (COA 15)

J. Due to the proposed project disturbing more than five acres of land, the Applicant will be required to obtain a National Pollution Discharge Elimination System (NPDES) General Construction Storm Water Permit from the Regional Water Quality Control Board. (Note 7)

K. Prior to occupancy, the Applicant shall complete and submit either a Hazardous Materials Business Plan or a Business Plan Exemption form to the Fresno County Department of Community Health, Environmental Health Division. Contact the Certified Unified Program Agency at (559) 445-3271 for more information. (Note 2)

L. The Owner shall obtain an Authority to Construct (ATC) and Permit to Operate (PTO) from SJVAPCD prior to the issuance of permits. The Owner shall also adhere to the equipment descriptions and conditions contained within the Authority to Construct (ATC) and Permit to Operate (PTO) authorizations issued by the SJVAPCD. (Note 8)

III. OFF-SITE IMPROVEMENTS (County)

A. The Project Applicant shall pay proportional fair share contributions towards the required identified improvements. (*Please refer to Section 3.12.6.8 of the DEIR for explanation of the County fair share formulas and Tables 3.12-16 through 3.12-18 for fair share percentages*). The Project Applicant shall enter into a traffic mitigation agreement with the County (for non-SR 180 improvements. The traffic mitigation agreements shall establish the exact payment amounts and thresholds that define the timing of the required payments. (*The required improvements are listed on pages 3.12-63 through 3.12-68 of the DEIR).* (MM TRANS-1)

B. The necessary permits for off-site improvements shall be obtained from the Department of Public Works and Planning, Road Maintenance and Operations Division, and shall be installed in accordance with County Improvement Standards. For requirements contact RM&O at (559) 600-4240.

C. Any work performed within the County right-of-way shall require an Encroachment Permit from the Road Maintenance and Operations Division of the Fresno County Department of Public Works and Planning.

D. The Owner shall be responsible for relocating those utilities within the road right-of-way to the correct alignment and grade affected by the developer's improvements.

E. The Project applicant shall make the following improvements ***prior to any product being shipped from the Project site***:

Project Driveway at Goodfellow

- Eastbound left turn and westbound right turn at the Project Driveway at Goodfellow Avenue.
- Westbound acceleration lane for trucks exiting the site. (MM TRANS-2)

F. The Project shall contribute its fair share cost for the purposes of improving the structural section of the impacted street segments.

Central Avenue

- McCall Avenue and Bethel Avenue
- Bethel Avenue and Academy Avenue
- Academy Avenue and Newmark Avenue
- Newmark Avenue and Riverbend Avenue

McCall Avenue

- SR 180 (Kings Canyon) and Jensen Avenue
- Jensen and North Avenue
- North Avenue and Central Avenue (MM TRANS-3)

IV. OFF-SITE IMPROVEMENTS (CALTRANS)

A. The Project Applicant shall pay proportional fair share contributions towards the required identified improvements. (*Please refer to Section 3.12.6.8 of the DEIR for explanation of the Caltrans fair share formulas and Tables 3.12-16 through 3.12-18 for fair share percentages*). The Project Applicant shall enter into a traffic mitigation agreements with Caltrans (for SR 180 improvements). The traffic mitigation agreements shall establish the exact payment amounts and thresholds that define the timing of the required payments. (*The required improvements are listed on pages 3.12-63 through 3.12-68 of the DEIR)*. (MM TRANS-1)

B. For those improvements under the jurisdiction of the California Department of Transportation (Caltrans), payment of this project's proportionate share shall be made to Caltrans and verification of payment shall be submitted to this Department.

V. ON-SITE IMPROVEMENTS

A. Parking, circulation, and loading areas shall be identified on improvement plans and reviewed and approved by the Department prior to construction. Parking for the physically disabled shall be provided as required by applicable laws.

B. Active storage, parking, and circulation areas that are not concrete or asphalt concrete paved shall be treated with a dust palliative and repeated as necessary to prevent the creation of dust by vehicles.

C. The driveway shall be concrete or asphalt concrete paved a minimum width of 24 feet for the first 100 feet off of the edge of the road right-of-way.

D. The gate that provides initial access to this site shall be setback from the edge of the road right-of-way a minimum of 20 feet or the length of the longest vehicle to enter the site, whichever is greater and shall not swing outward.

E. A 45 degree (45°) corner cut-off shall be maintained at any proposed or existing driveway accessing the County right-of-way.

F. All outdoor lighting shall be hooded and directed so as not to shine toward public roads or the surrounding properties.

G. A 10-foot high vegetated berm shall be constructed along Riverbend Avenue adjacent to Phases 3A, 3B, 4A and 4B. An 8-foot vegetated berm shall be constructed along the south side of Goodfellow from Riverbend Avenue to 2,000 feet west of Riverbend Avenue.

The berms will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. The berms shall be constructed and planted prior to the removal of overburden in each phase (MM AES-1)

H. Orchard-like screens shall be planted on the north side of Goodfellow Avenue west of the entrance road and on the south side of Goodfellow Avenue west of the 8-foot high vegetated berm prior to overburden removal in the adjacent phases. The tree species will be evergreen trees (e.g., olives) planted at a minimum of four (4) rows parallel to Goodfellow Avenue, with adjacent rows off-set such that there are no gaps to ensure dense screening. (MM AES-2)

I. The dragline shall be painted a neutral-tone color to achieve the best blending with the surrounding landscape and vegetation. (MM AES-3)

VI. Construction

A. Qualified biologist shall conduct pre-construction surveys for elderberry shrubs and oversee avoidance and/or implementation of additional mitigation measures as specified.

1. Prior to the start of ground disturbing activities for the aggregate plant and each individual phase of mining (i.e. Phase 1A, 1B), surveys for elderberry shrubs shall be conducted within the mixed riparian forest community within 100 feet of the work limits. Any elderberry shrubs identified shall be located on a map and the stems inventoried in accordance with USFWS guidelines.

2. To the maximum extent practicable, all Project activities shall be set back a minimum of 100 feet from all elderberry shrubs with one or more stems of 1-inch diameter at ground level growing within the Biological Study Area (BSA) or adjacent areas. If a 100-foot setback cannot be maintained, implementation of additional mitigation measures described below shall be required in accordance with USFWS guidelines:

a. Prior to initiation of construction, the limits of all construction, access roads, staging areas, etc., shall be staked. The staked areas shall be inspected by a qualified biologist. Based on this inspection, additional refinements to construction areas shall be performed as necessary and as feasible to ensure a minimum 20-foot setback from the dripline of all elderberry plants.

b. Once the final limits of construction are set, brightly colored fencing (i.e., snow fencing) shall be installed at the 20-foot setback around the perimeter of each elderberry plant or plant group under the direction of a qualified biologist.

c. Signs shall be posted every 50 feet along the edge of the VELB avoidance area with the following information: “This area is habitat for the Valley Elderberry Longhorn Beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as amended. Violators are subject to prosecution, fines, and imprisonment.”

d. Workers shall be briefed on the need to avoid damage to elderberry shrubs and the possible penalties for not complying with these requirements. All work crews shall be advised of the status of VELB and the need to protect the elderberry shrubs.

e. During the initial construction period for each phase of mining, a qualified biologist shall inspect the mining area periodically to assure that the Project is not affecting VELB. (MM BIO-3)

VII. MISCELLANEOUS

A. Qualified biologist shall conduct pre-demolition surveys for bats as follows:

1. All buildings to be removed shall be surveyed by a qualified biologist to determine if they are being used as a roost site for bats, and if so, what type of roosting behavior is occurring (night roost vs. day/maternity roost). The survey shall be conducted in June or July when maternity roosts would be most active.

2. Any buildings to be removed that are determined to support only night-roosting bats shall be removed between September 1 and October 14, or between February 16 and April 14. Removal of buildings during these periods will avoid impacts to any bats utilizing the buildings during the normal breeding season (April 15 to August 30) and winter torpor (October 15 to February 15).

3. If a building is determined to support a day/maternity roost, a mitigation plan (i.e., removal plan) shall be prepared by a qualified bat biologist experienced with bat eviction and exclusion possessing a Memorandum of Understanding with the California Department of Fish and Wildlife. At a minimum, the mitigation plan shall provide for humane eviction of the existing bat population and creation of artificial day roost habitat, to mitigate impacts resulting from removal of the roost site. (MM BIO-1)

B. Qualified biologist shall conduct pre-construction surveys for nesting migratory birds and raptors and oversee avoidance of active nests during construction and ground disturbance activities as follows:

1. To the maximum extent practicable, all construction activities associated with the initiation of work on the Project site or initiation of new mining phases shall be scheduled between September 15 and February 1, which is the typical non-nesting season.

2. If the initiation of work in new areas cannot be scheduled during the non-nesting season, prior to the initiation of work on the Project site and each individual phase of mining (e.g., Phase 1A, 1B, etc.), a qualified biologist shall survey all suitable nest trees within 0.25 mile of the work limits for nesting Swainson's hawks, within 500 feet of the work limits for other raptors, and within 250 feet of the work limits for other nesting birds no more than 10 days prior to the start of ground disturbing activities. The survey will follow the methodology developed by the Swainson's Hawk Technical Advisory Committee (SWHA TAC, 2000).

3. If nesting Swainson's hawks are found within 0.25 mile, other nesting raptors are found within 500 feet, or other nesting birds are found within 250 feet of the work limits as described in Item 2 above:

    a. A qualified biologist shall evaluate the potential for the proposed work to disturb nesting activities. The evaluation criteria shall include, but not be limited to, the location/orientation of the nest in the nest tree, the distance of the nest to the work limits, the line of sight between the nest and the work limits, and the description of the proposed work. The nest shall be continually surveyed for the first 24 hours.

    b. California Department of Fish & Wildlife (CDFW) shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities.

    c. If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities that occur during the breeding season to monitor nesting activity. The biologist shall have the authority to stop work if it is determined the Project is adversely affecting nesting activities.

4. If no nesting Swainson's hawks are found within 0.25 miles, no other nesting raptors are found within 500 feet, or no other nesting birds are found within 250 feet of the work limits as described in measure 2 above, work can proceed as planned.

5. Construction initiated during the non-nesting season and continuing into the nesting season shall not be subject to the above measures. (MM BIO-2)

C. The Project Applicant shall obtain the services of a qualified cultural and paleontological consultant (execution of agreement) to implement an education program to ensure that construction personnel are aware of potentially sensitive archaeological and paleontological resources. (MM CPR-2)

D. The Project shall designate an individual to be the contact person for noise complaints. This individual shall have access to a noise meter and be available to measure noise levels and confirm compliance with the County noise ordinance. (MM NO-3)

E. Fire protection improvements shall be in place and inspected by the Fresno County Fire Protection District prior to occupancy. Contact the District at (559) 485-7500 to arrange for an inspection. Allow 14 to 21 days for the District to complete the inspection.

VIII. OPERATIONAL REQUIREMENTS

A. The processing plant and ready-mix plant shall annually renew or as required by the SJVAPCD renew their air quality permits and comply with their conditions. (Note 9)

B. Prior to commencement of plant area operations, a 15-foot high vegetated berm shall be constructed along the Kings River adjacent to the Plant area (i.e., Phase 9).

The berm will be planted with evergreen trees that will grow at least 15 feet high in two (2) staggered rows with one row on top of the berm. (MM AES-4)

C. The Project shall conserve agricultural land by acquiring an agricultural conservation easement (ACE) on 351 acres of Important Farmland as classified by DOC's FMMP to mitigate for the 351 acres of Important Farmland on the Project site to be converted to non-agricultural use. The ACE would be phased in accordance with the following schedule:

- Within one year of existing agricultural land being taken out production for the Project 100 acres shall be placed in an ACE.

- Within the earlier of 5 years, or before 100 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 100 acres shall be placed in an ACE.

- Within the earlier of 10 years, or before 200 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 75 acres shall be placed in an ACE.

- Within the earlier of 15 years, or before 275 acres of existing agricultural land has been taken out of agricultural production for the Project, an additional 76 acres shall be placed in an ACE.

All ACE's entered into as described here shall have ownership transferred to an qualified Land Trust within 5 years of being established.

Temporarily taking of land out of agriculture production for normal farming purposes (e.g. rotating crops, resting soil, etc.) shall not be considered taking of existing agricultural land out of production for the Project. (MM AG-1)

D. The following design features will mitigate VOC, SVOC, and/or SO_2 emissions:

1. The type of asphaltic cement produced by on-site plants affects odorous emissions. Some cements have lower VOC/SVOC emissions than others. Therefore, cements with lower VOC/SVOC emissions shall be used to the extent feasible.

2. Periodic burner tune-ups may reduce VOC emission by about 38 percent. Therefore, periodic burner tune-ups shall be implemented.

3. Mixing drum vapors shall be routed back to the dryer burner. (MM AQ-1)

E. Each off-road engine on-site between 1/1/2015 and 12/31/2018, excluding scrapers and haul trucks, shall be model year 2015 or later. Engines in scrapers shall be no greater than ten (10) years old and shall meet the Tier 3 off-road engine standard. Engines in off-road haul trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards.

Each off-road engine on-site after 1/1/2019, excluding scrapers, shall be model year 2014 or later. Engines in scrapers shall meet Tier 3 engine standard and be model year 2010 model year or later. Off-road haul trucks shall not be used after 1/1/2019 except during occasional repairs or during relocation of overland conveyors not to exceed five workdays in any month. In such cases, the off-road trucks shall be equipped with engines that meet the Interim Tier 4 emissions standards. (MM AQ-2)

F. Diesel trucks shall not idle greater than five (5) minutes while on-site as required by the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling (13 CCR §2485). (MM AQ-3)

G. Prior to commencement of Phase 8B, markers shall be placed at the geographic boundary coordinates delineating the 50-foot exclusion zone surrounding site CA-FRE-3591 to prevent disturbance by project activities. It is inappropriate to prescribe a specific type of markers at this time, as technological changes over the next 60 years may result in fencing/marker options not currently available. However, the markers shall fulfill the following purpose: (1) provide a clear visual indicator of the exclusion zone and (2) prevent the entry of unauthorized equipment, vehicles, and mine personnel into the exclusion zone. To facilitate the identification and delineation of the boundary and 50-foot exclusion zone for CA-FRE-3591, the site shall be surveyed and Universal Transverse Mercator (UTM) geographic coordinates provided to the County. (MM CPR-1)

H. To mitigate the risk of loss or injury potentially resulting from flooding, the operator shall implement a system to regularly monitor public announcements concerning potential Kings River flooding. At the beginning of each day that employees are to work in areas mapped within the 100-year flood hazard zone, the operator must check with the National Weather Service to determine if flood warnings are in effect. The operator must communicate the flooding potential to all employees each day. Employees must avoid working in portions of the Project site that are within the flood hazard zone. In addition, access to areas of the Project site subject to potential flooding shall be physically demarcated with signage and deterrents such as traffic barricades. (MM HWQ-1)

I. The following specific measures are required to ensure impacts associated with Project dragline excavation are less than significant:

1. The reference sound levels associated with dragline operation shall be verified through noise level measurements immediately upon commencement of dragline operations at the Project site. In the event that actual noise emissions of the dragline exceed the assumptions contained within this analysis, additional noise control measures shall be implemented. Those measures would include replacing fan motors with variable drive motors and/or installation of cooling air inlet and/or exhaust silencers directly to the dragline as required to satisfy the Fresno County Noise Ordinance standards.

2. Except during a public emergency that requires immediate production of aggregates and concrete products, excavation activities using the proposed dragline shall be limited to daytime hours when located within the following distances from noise receivers:

    a. When operating the mine and aggregates plant only:

i. 600 ft. from R3, R4, R5, R7, R9, R10.
ii. 900 ft. from R8.
iii. 725 ft. from R13.
iv. 925 ft. from R14.

b. When operating the mine, aggregates plant and the hot mix asphalt plant and/or the ready mix concrete plant.

i. 600 ft. from R3, R4, R5.
ii. 750 ft. from R7, R9, R10.
iii. 1,050 from ft. R8.
iv. 850 ft. from R13.
v. 975 ft. from R14.

3. Prior to mining within 900 feet of Residence Nos. 3, 4, 5, 7, & 9 along Riverbend Avenue, the proposed 10-foot tall berm shall be constructed near the western edge of the proposed 100-foot excavation setback.

4. Prior to mining within 900 feet of Residence No. 10 along Riverbend Avenue, an 11-foot tall berm shall be constructed near the western edge of the proposed 100-foot excavation setback.

5. Prior to mining within 900 feet of Residence No. 13, the proposed 8-foot tall berm shall be constructed near the southern edge of the proposed 100-foot excavation setback along the South side of Goodfellow from Riverbend Avenue to 2000 feet West of Riverbend Avenue.

6. Excavation activities within 1,000 feet of an existing residence shall be conducted such that the dragline cooling exhaust fans do not directly face the residence. (MM NO-1)

J. The following specific measures are required to ensure that impacts associated with concurrent operation of the aggregates processing plant, mine, and other activities are less than significant at Receiver 8:

1. Plant area noise at Receiver 8 shall be reduced to less than the Fresno County Noise Control Ordinance thresholds by implementing the following noise control measures:

a. A 15-foot tall earthen berm shall be constructed near the Project western boundary in the vicinity of Receiver 8. The berm shall extend laterally to the extents shown on DEIR Figure 2-7.

b. Prior to commencement of night-time operation, sound curtains shall be constructed adjacent to the noisiest aggregate plant equipment (i.e. crushers) in order to provide additional shielding in the direction of Receiver 8. The curtains are estimated to result in an 8 dBA reduction in noise from the aggregate plant.

2. Following implementation of the noise control measures identified in Item 1 above, noise tests shall be conducted to confirm effectiveness of the control measures and compliance with the County Noise Control Ordinance exterior noise standards. (MM NO-2)

K. The Owner shall not exceed annual mined production of 1.6 million tons (including aggregate and overburden). (COA 5)

L. The Owner shall not exceed maximum annual marketed aggregate production of 1.25 million tons per year. (COA-6)

IX. NOTES

A. All conditions of approval for CUP application 3390 shall be implemented including, but not limited too, mitigation measures and conditions of approval adopted by the County. (COA 4)

B. The Applicant shall adhere to all the requirements identified in Section 858 of the Fresno County Zoning Ordinance. (COA 4)

C. Development and operation of the use shall be in conformance with the site plan, elevation drawings, operational statement, and Reclamation Plan approved by the Commission. (COA 3)

D. Permits for structural, electrical, and plumbing work shall be obtained from the Department of Public Works and Planning, Permits Counter, prior to any construction.

E. Fresno County shall conduct an inspection of the operation once each calendar year to determine if the operation is in compliance with the requirements of Public Resources Code Chapter 9, commencing with Section 2710. The inspection shall be completed in compliance with the provisions of SMARA and may include, but shall not be limited to adherence to reclamation requirements of the approved Reclamation Plan. The County will also inspect for compliance with conditions of approval and mitigation measures of CUP 3390 as specified herein. An inspection fee shall be paid prior to each inspection. Currently the inspection fee is $2,257.00, subject to change.

F. The Applicant shall comply with Fresno County noise standards applicable to construction activities associated with the Project. (COA 7)

G. At least 10 years prior to the scheduled mining of the parcels subject to Williamson Act Contract No. 6322 a Notice of Nonrenewal shall be filed with the Department of Public Works and Planning. (COA 8)

H. The Applicant shall comply with all applicable County recycling requirements. (COA 9)

I. The Applicant shall comply with all applicable federal, state, and local regulatory requirements. (COA 10)

J. The Applicant shall comply with all applicable rules and permitting requirements of the SJVAPCD. (COA 16)

K. The operator shall comply with all applicable Air Resources Board and San Joaquin Valley Air Pollution Control District regulations related to diesel-fueled trucks and equipment, which may include among others: (1) meeting more stringent emission standards; (2) retrofitting existing engines with particulate traps; (3) use of low sulfur fuel; and (4) use of alternative fuels or equipment. (Note 10)

L. The Applicant shall adhere to the provisions set forth by the Office of Mine Reclamation. These provisions include regulations for compliance, reporting, and financial assurances. (Note 11)

M. If any subsurface cultural resources, including either prehistoric or historic resources, are encountered during construction of the Project, all construction activities in the vicinity of the encounter shall be halted until a qualified archaeologist can examine these materials and make a determination of their significance. Such finds include, but are not limited to, prehistoric grinding implements, stone tools, soapstone bowls, and ornaments (e.g., beads, pendants) as well as intact building foundations and high concentrations of historical artifacts. The Fresno County Department of Public Works and Planning shall be notified, and the owners, developers and/or successors-in-interest shall be responsible for mitigation of any significant cultural resources pursuant to the CEQA Guidelines. (MM CPR-3)

N. If paleontological resources are discovered during project-related activities, the find shall be reported immediately to the County of Fresno Planning Department, who shall provide direction to contact a paleontological monitor. The area of the find shall be avoided until the monitor is on-site. The monitor shall assess the find and make any

necessary recommendations, including any procedures to further investigate or mitigate impacts to the find as required by law. (MM CPR-4)

O. In the event that unanticipated human remains are discovered, work shall immediately stop at the discovery location and any nearby area reasonably suspected to overlie adjacent human remains. The Fresno County Coroner shall immediately be contacted to determine whether the cause of death must be investigated. If the coroner has reason to believe that the remains are of Native American origin, he or she will contact the NAHC by telephone within 24 hours (H&SC §7050.5). At the same time, the mine operator shall immediately notify the Fresno County Department of Public Works and Planning, and a qualified archaeologist shall be contacted to evaluate the archaeological implications of the find. (MM CPR-5)

P. The CEQA Guidelines (§15064.5) detail steps to be taken when human remains are found to be of Native American origin. If Native American remains are discovered, the operator/landowner shall work with the NAHC to develop and execute an agreement between themselves and the most likely descendant(s) of Native Americans who may be buried in the vicinity by which the human remains and associated burial items shall be treated or disposed, with appropriate dignity. The NAHC and landowner shall follow prescribed steps in Public Resources Code §5097.98, which include but are not limited to the following:

- The NAHC shall notify those persons it believes to be the most likely to have descended from the deceased Native American.
- The most likely descendant(s) may recommend to the landowner the means of treating and disposing of, with appropriate dignity, the human remains and any associated grave goods.
- The landowner shall ensure the immediate vicinity of the Native American human remains is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations. (MM CPR-6)

Q. All hazardous waste shall be handled in accordance with requirements set forth in the California Health and Safety Code, Chapter 6.5. This chapter discusses proper labeling, storage and handling of hazardous wastes. (Note 4)

R. Required site improvements may be bonded in accordance with the provisions of Section 874-C-2 of the Fresno County Zoning Ordinance.

S. Conditional Use Permit No. 3390 will become void, unless there has been substantial development within two years of the effective date of this approval. (Note 1)

T. This Site Plan Review approval shall expire concurrently with Conditional Use Permit No. 3390.

This approval is final, unless appealed to the Fresno County Planning Commission. In this event, you must submit a fee of $508.00 and file a written appeal setting forth your reasons for such appeal to the Commission. Such appeal shall be filed with the Director of the Department of Public Works and Planning within 15 days after the mailing of this decision and shall be addressed to:

Good morning John,

This SPR project has been reviewed and approved, attached are PDF copies of approval letter and approved plans for your files. An SPR package is available in our office for pick-up or may be mailed to you upon request, your incite and feedback during the review process was appreciated.

A PDF copy of the MMRP depicting reference to the SPR approval letter is attached as well for cross referencing the approval letter.

Feel free to contact me should you have any questions.

John,

County staff time agreement mentioned was mentioned twice on the approval letter, I revised the approval letter to remove the duplication.

Good morning John,

I've attached an email from Betsy Lichti from the State Water Resource Control Board stating that the application for a domestic water supply permit be submitted concurrently with construction permits to ensure adequate water supply and quality. If you would like to discuss this further with Betsy, her contact info is on the attached email and any a decision is reached to defer the application, I will note the file.

Hector,

Thank you! I will come by and pick up the SPR package on Weds.

Regarding Condition IIH:

H&S Code 116275(h)defines a "Public water system as follows:

> *"Public water system" means a system for the provision of water for human consumption through pipes or other constructed conveyances that has 15 or more service connections or regularly serves at least 25 individuals daily at least 60 days out of the year.*

Based on the estimated number of 38 employees as listed in the operational statement with all uses in operation (i.e. mining and processing, asphalt plant and ready-mixed concrete), it can be understood that the State Water Resources Control Board would conclude that the Riverbend domestic water system would qualify as public water system.

However, Riverbend will not have all the uses are in operation for number of years. Therefore, until it has 15 or more service connections or regularly serves at least 25 of the same persons for over six months per year, it will not require a Domestic Water Supply Permit

Therefore, Riverbend is requesting that Condition IIH be revised to reflect CUP Condition 15:

> *In the event that Project facilities are developed that meet the definition of a public water system, the Applicant shall obtain a Domestic Water Supply Permit from the California Department of Public Health or the State Water Resources Control Board.*

Subject: Riverbend Sand and Gravel SPR 7946 SPR Approval

Good morning John,

This SPR project has been reviewed and approved, attached are PDF copies of approval letter and approved plans for your files. An SPR package is available in our office for pick-up or may be mailed to you upon request, your incite and feedback during the review process was appreciated.

A PDF copy of the MMRP depicting reference to the SPR approval letter is attached as well for cross referencing the approval letter.

Feel free to contact me should you have any questions.

Regards,

Hector E. Luna

Subject: RE: September 22, 2015 Division Managers Meeting
Date: Monday, September 21, 2015 3:22:21 PM

What do the submitted plans have to do with the amendment? That needs to be clear in the response. If it has nothing to do with the amendment, then why are we mentioning it?
Sincerely,
Amina Flores-Becker

The bullet in question regarding the Design should read as follows:

- Status of taking the proposed TMR agreement language changes to BOS for approval?
  - **Design is currently working with Mark Wolfe (hired by TMR) to review plans submitted.**

Thank you,
Julie Zimmer-Belle, MPA

Hi Julie,
Please move forward with the amendment for revising the TMR agreement language. JT said he gave you the language changes already and that Design should not be changing anything or working on this and that we are to move forward. The item is listed below in **blue highlight and purple bold font**. Please see JT if you need further direction as I will be out for a couple days.
Sincerely,
Amina Flores-Becker

Subject: September 22, 2015 Division Managers Meeting

August 10, 2015 Division Managers Meeting
8:30AM (9/16/15)

1. Review of the September 22nd Board Agenda
   a. Please review all items (Consent and Regular) in preparation for the Division Managers Meeting. Each division manager of the author's division will make an abbreviated presentation that touches on all of the relevant points and clearly identifies the justifications for the recommendations. The presentations must include a hard copy, to be provided to me, of any graphics you will/may be utilizing during your presentation at the following Board meeting. I will ask clarification questions, if I have any, and then I will ask the rest of the meeting members to ask questions they may have. The point of this exercise is to again play stump the author and see if we can identify any pertinent issues that have not been fully clarified.
   b.
2. Three month look ahead.
3. Discuss possible Cell Phone Policy
4. Discuss upcoming meetings in next two weeks.
5. Clerical Rotation for SGMA Working Group Meetings. (M&O in May, Resources in June, DS in July, M&O in August, Resources in September) October???
6. Round Table in which each attendee provides a **brief explanation of the significant events that transpired in in their respective division over the last two weeks and what they expect to encounter this coming couple of weeks**.

Please respond to the following by end of the day on Friday 9/18/15.

John,
General:

- Status of lock out, tag out program to be implemented by 9/30/15.
- Status of Arborist's Report for 4863 Van Ness? (Uremovic)

Parks:

- How of requesting Conservancy fund the Lost Lake Trail Project? Anticipated schedule?

Solid Waste Operations/Landfills:

- Status of Personnel modifying the Job Specs and meeting with Unit 13 regarding the licensing requirements for all DSEO?
- Status of revised agreement with Toro and going to BOS to request approval to amend the Toro agreement?

Solid Waste Programs:

- When will we have the next meeting to discuss the 4th ESAP workshop? 10/16/15 What is the target date for the workshop? 10/27/15
- Status of setting up tire amnesty events at road yard 8?

Special Districts:

- All water and sewer districts to have finaled electrical inspections and repairs completed by 10/31/15.
  - Operators working on all pending items. JJC has completed their pending items.
- Status of field meeting with Nayiri, Amina, you and me at CSA 35 AH?

- Community meeting scheduled for 10/8/15 and field meeting scheduled for 10/1/15.

- Status of SGMA outreach to water districts? This is something I need your staff to document the process and eventually submit to the State for verification we did it.
  - Have not started outreach.
- Status of taking the proposed TMR agreement language changes to BOS for approval?
  - **Design is currently working with Mark Wolfe (hired by TMR) to finalize the exhibit (budget) to include in the amendment with language changes.**
- Status of obtaining a permit and final inspection for the truck stand at CSA 34?
  - Is this the stand that pulls water from the pond?
- Status of revised letter from Dawyot?
  - Never provided a letter that gave us a contact list for emergency water hauling. Bonadelle has been hauling water to use for dust control.
    - Received another analysis that includes all three misters
- Status of the Millerton infrastructure plan and implementation plan?
  - Have not received any update from Troy Ewell on the status of the updated plans.
- Status of Mister effectiveness? Are we keeping up with the inflow? Have you received anything from Bonadelle regarding who would truck the effluent? How close to the max level are we? Have you asked them to begin trucking? What is current unused capacity of basins?
  - We are keeping up with inflow. We are at 75% of capacity = 10,785,769 gallons (Max is 14.8M gallons)
- **Please update the following table with target dates to conduct a Prop 218 proceedings in FY 14/15 and FY 15/16**

District	Analyst	Public Meeting	Public Hearing	Comment
CSA 1	Jarod	Not scheduled	Not scheduled	
CSA 34	Julie	1/11/15	1/26/15	Will also have a public meeting prior to ROI at the end of May or early June
CSA 34A	Julie	12/9/15	1/5 & 1/26	Will also have a public meeting prior to ROI at the end of May or early June
CSA 34C	Julie	12/16/15	1/5 & 1/26	Will also have a public meeting prior to ROI at the end of May or early June

- Status of the decision tree for CSA dissolutions? target 1/31/15.
- Status of new PG&E service for CSA 34? How did 6/24/15 meeting go?
  - Waiting on PG&E to confirm whether they will move one of the pole locations so that we don't have to get another easement.
- Have you assigned staff to:
  - Compile and develop records and documents for Millerton New Town, and Shaver? Target completion by December 2014.
  - Develop hydraulic models and plat maps to be able to properly administer the districts? Target completion of scoping by August 2013.
    - No to both
- Status of the 5 water and/or sewer districts reports?
  - Analyst making final changes to their individual reports. Those are due from them to me today (9/18/15).
- Status of ID 173 (East Fresno Sewer System) and 217 (Shaver Sewer Bonds) to go to BOS in October 2014.
  - Will be scheduling meeting soon.

Pending

- Target April or May 2015 for COG to resume and complete final draft of the Courthouse Park walkways plan, pending completion of FAX Terminal.
- Status of setting up a revolving fund to loan $$ to Districts until they pass a rate increase? Back to DAC 6/19/15, how did it go?
  - DAC gave direction to move forward with Revolving Fund after the CSA 34 Prop 218 is complete. John Hays recommended we go back to DAC and request to bring Revolving Fund to BOS prior to that because of current available funding. May go back to DAC in October.

Steve,

- Status of charging the delay cost for the gas line to the utility owner on the Mountain View Project?
- Target Application for the LS exam by November?
- Status of Task Order with CHSR?
- Status of CHSR Maintenance Agreement?
- Status of equipment inventory you requested?
- Status of the Nebraska/Chestnut; Fowler, and Clovis AI?
- Will we be pursuing a rubberized pavement grant this year? 9/2/15 email
- Status of Coalinga Disposal Site Claim analysis and payment of agreed upon CCOs?
- Status of State's acceptance of Dr. Benson's recommendation that the ET cover is acceptable?
- Did you or staff contact and set up meeting with Mr. Bradley? 7/30 email

Stuart,

- Status of Brix Building Basement study and response to Fresno?
- What is the anticipated schedule to resolve the fire barrier issue on the 6th floor?
- Status of the Facility fees ordinance codification corrections? 7/23/15?

Bob,

- With respect to obtaining soil from the basin at Brawley and Nielson, since they have about 100,000CY are they willing to truck it around to various point in the County where we can stockpile for later use?
- Status of the Belmont Pipeline Project. When did you actually send out the letter to Fresno? 8/7/15 email?
- Did the Sheriff pay for all of the Gun Range work costs, including disposal of the treated wood?
- Status of the floor repair and related asbestos cleanup at Yard 4?
- I sent you an email request for information regarding road closures on August 3rd. Please provide the requested information no later than 9/18/15.
- What is the status of the fence violation (within ROW without permit) at 13198 Ashlan? Is it time for a citation?
- Status of the recarpeting in Suite B?
- Status of the Lincoln and McMullen Grade TSR?
- Status of catching up on the PMS inspections (% complete)? Target completion by 1/1/15. What are your contingency plans to accomplish this by 1/1/16 due to staffing issues?
- Status of the request to close Ashlan for Christmas Tree Lane and installation of two Radar Driver Feedback Signs on Ashlan? 7/20/15 email. Please provide a copy of what was sent to Dean Alexander by 9/11/15. When is the joint meeting scheduled with PD, SFO, City Traffic Staff and us?
- Status of request for at what depth and relative alignment are the Sewer and Storm Drainage facilities installed or to be installed in Temperance? Do you know the rational for allowing full closure instead of maintaining a half street? How many full closures have we approved in the last 3 years for streets that carry 4,000 ADT or higher? What is has the average permissible length of closure been? How many of the projects exceeded the permissible closure? 8/3 email.

Pending

Mo,

- What's up at COG?
- What's up at FCTA?
- Status of the Fig North FMFCD/City/County project? Status of the agreement? Proposed project construction schedule? Deadline for grant invoicing?
- What is the status of the HSR design exceptions?
- Please provide a current status of our project reimbursements that identifies each project, what cost has been incurred by 7/31/15, amount that has been reimbursed, amount pending, and date of last invoice.
- Status of Walnut widening estimate? 9/15/15 email
- Status of the HSR agreements? (ROW, Maintenance, ???)
- Status of going back to BOS for Clovis, Elkhorn and Fowler HSR crossing modifications?
- Status of Vie Del Wineries, HSR and EDC regarding Nebraska and Chestnut?
- Status of the Jensen/Drummond sewer project?
- Status of Cornerstone's request for additional payment?

Pending

- 2016-21 RIP. Due April, 2016.

Bernard,

Pending Legislation

- Please update the matrix weekly that lists the pending legislation and the issues related to County so we can easily track by inspection. Please send me an electronic copy weekly and show the updated status in a different color text for ease of identification. Please add a little more description to the Bill Description column.

General

- What's up at COG?
  - How did the Ag Mitigation discussion go?

- Outcome of 9/16 Measure C Amendment #3 Public Meeting?
- Status of setting up a workshop for the BOS to discuss Fire Codes, interpretations and enforcement options? Is this to come out of the CAO's office? We were targeting 11/17/15.
- Status of the COG Ad-hoc committee on Ag Mitigation? What have they done, discussed or proposed so far? (3/26/15)
- Status of Friant Corridor study? Target to BOS in October/November.
- Did you respond to Danilo Blanusa's survey request (8/19/15 email)
- Status of the revised Code Enforcement Ordinance granting discretion to Director to lower/waive penalties and penalties accumulation?
- Status of the County Housing Element Cycle 4 schedule, and 5th cycle? When does the State's 90 day review period expire?
- Status of Biola request for well lot? And indemnification?
- Status of the FID GSA MOU?
- Status of information requested by District 2 for their fact sheet?

Pending

Will

General:

- Status of presenting obtaining revised fence ordinance direction from BOS? Target October.
- Status of requested research, presentation outline, preparing the AI for the BOS 10/13/15 Fire workshop.
- How did the AMANDA switch go?

Rapid Response

- **Please provide an ongoing list of the companies served and an estimate of the potential jobs to be created by those companies. Please submit biweekly in your response to the Division Manager information requests**

Advance Planning:

- When will we present the GP EIR SOW and Consultant Agreement to BOS for approval? Target 10/13/15.
- Status of the Zoning Ordinance Update? (Also to include allowing RV storage in districts other than industrial) On hold pending GP resolution.

Code Enforcement:

- Status of revisit of 6537 N. Sequoia's and cleanup/CE estimate? Has County Counsel's office received approval for us to go back on site?
- Status of correcting the on-line code version regarding late fee penalties Section 1.13.120 and allowing Director discretion in waiving citation fines and penalties? Need to target 9/22/15 for first reading.
- Status of the violations that Richard Perkins was working on behalf of the violators attorney? (8530 & 8588 E. Olive) (Korenak, Diamond Paving) Bill Nebeker was to contact PO.
- Status of complaint at 27418 Sales Road regarding conversion of building to allow storage of his vehicle? 8/7/15 email

Building & Zoning:

- Status of Jeff Janes recommended modification of the County ordinance designating County Building Official. 10/13/15 1st reading, 11/17/15 2nd reading?
- Status of the SCE permitting and inspections for facilities in Camp Edison?
- What is an in-house plan check consultant?
- Have we approved any temporary water tanks in the last 3 months?
- Have we heard anything from State Fire Marshal or Ed Gravlin regarding the tempered glass issue>

Land Use & Environmental:

- Status of Response to Herb Lang regarding Riverbend costs and requirements relative to other projects?

Water:

- What have you done to keep the WAC active? Please share the meeting agenda with me.

Mapping:

- Status of the mapping backlog? How many are pending review that were submitted over 60 days ago?
- Did you speak with David McGlasson regarding contract services? (7/9/15 email)

Grading:

- Status of revised grading plan/options for Gary McDonald's TM 5955? Augie was working on this.

Building Permits:

- Status of revision of County Improvement Standards that were budgeted in FY 14/15 with completion and adopting to be obtained no later than June 1, 2015

Nicole

- Status of Vacancy/Recruitment?
- Status of Investigations?
- Did you respond to the 7/1/15 email from Beth Bandy regarding the Local 39 complaint?
- Status of evaluation training?
- Status of revised Cell Phone policy review?
- Did you document the recent grievance meeting?
- Was the property loss form completed for the Loader damaged at the gun range?
- When is the safety meeting scheduled that you want me to attend? Do you have an outline of the issues I need to address?
- Status of the retitling at American Avenue Landfill (Disposal Site Supervisor and Disposal Site Lead Supervisor?
- Status of alternative work schedules requests? 8/6/15 email
- Have you received the Personnel Commission's response to Local 39's request for findings?

Pending

Lemuel

- Pending issues/projects?
  - Status of annual Road Report? When due?
- Status of the Asset inventory? (8/4/15 email)
- Status of the GASB 51 Right Of Way Easement issues? (8/26/15 email)
- Special District Billing RFP to go out 10/1/15.
- Status of Auditors request for Auditors delinquent FCAC Forms?
- What work do you have that is delayed such as accounts payable and how far behind are you? **Working on one year-end form for 4510. A/P is slowly being caught up. We are working on invoices that have been approved for payment with dates of mid-August, but there are still a few with early August dates. June labor billing has not yet been completed. This should be completed by next week. July and August will follow. Should we consider OT to catch up?**
- Status of the 3 months past due Ameripride invoices?
- Have the KRCD Groundwater Monitoring Well project permit fees been transferred from 4360200 to pay the encroachment permit fees? Please consult with Bob Palacios on this.

Gigi

- Pending issues/projects?
- Any response from Inspector General regarding Sanger Crossing?

Juan

- Current issues?
- Status of recruitment to replace Adam Chavez?

Linda,

- Status of State of the County Breakfast signup?

Pending Items

- Status of project to prepare plot plans for all of the homes in Brighten Crest (152 buildable lots, 88 currently developed, 64 pending development) illustrating the location of the step tanks and appurtenant plumbing? (John Thompson)
- Title 15 issues, Ag Exempt to BOS in April/May 2014; Relaxation of set back and permit fee reduction for garden sheds to BOS in February 2014; Fence/Hedge to BOS in May 2014; NBOD to BOS in 7/14
- Internet usage (May 15)
- Status of CC update of fee ordinance to allow Director to waive or reduce fees, via agreement. (Sharon Lantia, Rob Solley)

Hector,

Thank you! I will come by and pick up the SPR package on Weds.

Regarding Condition IIH:

H&S Code 116275(h)defines a "Public water system as follows:

> *"Public water system" means a system for the provision of water for human consumption through pipes or other constructed conveyances that has 15 or more service connections or regularly serves at least 25 individuals daily at least 60 days out of the year.*

Based on the estimated number of 38 employees as listed in the operational statement with all uses in operation (i.e. mining and processing, asphalt plant and ready-mixed concrete), it can be understood that the State Water Resources Control Board would conclude that the Riverbend domestic water system would qualify as public water system.

However, Riverbend will not have all the uses are in operation for number of years. Therefore, until it has 15 or more service connections or regularly serves at least 25 of the same persons for over six months per year, it will not require a Domestic Water Supply Permit

Therefore, Riverbend is requesting that Condition IIH be revised to reflect CUP Condition 15:

> *In the event that Project facilities are developed that meet the definition of a public water system, the Applicant shall obtain a Domestic Water Supply Permit from the California Department of Public Health or the State Water Resources Control Board.*

Good Afternoon Nicole and Becky,

Sorry to bother you, but when we had asked the owner (Mr. Herb Lang) of Riverbend Sand & Gravel LLC to include his social security number on the attached forms (as requested below), he noted that the checks written to the County were issued from Riverbend Sand & Gravel LLC , therefore he should not have to furnish his social security number as the check we will be processing is for a refund.

I would like to furnish him a copy of the EDD statute mentioned in the email below. Do you happen to have this document handy?

Thank you for your assistance.

Carol- As long as your payments are for refunds and not payments for product or services you can use a One Time vendor. If there is a second payment you would need to create another One Time vendor for that payment, the original vendor number will automatically unapproved.

To: Reyes, Becky
Cc: Foreman, Holly; Vang, Kay; Olivas, Kevin; McDonald, Nicole
Subject: RE: Riverbend Sand & Gravel, LLC. Vendor approval.

Becky,

The One Time vendor sounds great, however there is a possibility that we may need to issue this vendor another refund. At this time, we will be issuing a refund for the legal services portion of his deposit. There is a possibility that another refund will be issued to this vendor for the other portion of his deposit with the County.

Again, this is a possibility. Can we still proceed with the One Time vendor setup?

Thank you for your response and assistance in this matter.

Carol- To approve a regular vendor we need tax forms. If you are processing a refund you can create a One Time vendor which doesn't require tax forms because the vendor number will automatically unapprove after a single use.

Becky

Subject: FW: Riverbend Sand & Gravel, LLC. Vendor approval.

Good Afternoon Nicole and Becky,

Sorry to bother you, but when we had asked the owner (Mr. Herb Lang) of Riverbend Sand & Gravel LLC to include his social security number on the attached forms (as requested below), he noted that the checks written to the County were issued from Riverbend Sand & Gravel LLC , therefore he should not have to furnish his social security number as the check we will be processing is for a refund.

I would like to furnish him a copy of the EDD statute mentioned in the email below. Do you happen to have this document handy?

Thank you for your assistance.

RECOMMENDATION:

- Approve a first one-year time extension for Unclassified Conditional Use Permit No. 3297; and

- Direct the Secretary to prepare a Resolution documenting the Commission's action.

EXHIBITS:

1. Location Map

2. Existing Land Use Map

3. Existing Zoning Map

4. Planning Commission Resolution and Staff Report dated November 17, 2011

5. Applicant's letter requesting a first one-year time extension

ENVIRONMENTAL DETERMINATION:

A Mitigated Negative Declaration prepared for Initial Study Application No. 6279 was approved by the Planning Commission in accordance with the California Environmental Quality Act (CEQA) with approval of Unclassified Conditional Use Permit Application No. 3297 on November 17, 2011.

Section 15162(b) of the CEQA Guidelines states that once a Mitigated Negative Declaration has been adopted for a project, no subsequent Environmental Impact Report (EIR) or Mitigated Negative Declaration shall be prepared unless: 1) substantial changes are proposed to the project; 2) substantial changes occur with respect to the circumstances under which the project is undertaken; or 3) new information of substantial importance is presented which was not known and could not have been known at the time the previous Mitigated Negative Declaration was adopted. This time extension request does not propose changes to the approved project, nor is there evidence of the circumstances noted in conditions 1, 2 or 3 above. Therefore, a subsequent/supplemental environmental document is not required. A letter was received by the California Department of Fish and Wildlife (DFW) identifying additional species and protocol to follow, but it was determined that the information provided is not new information and did not fit any of the three criteria listed above.

PUBLIC NOTICE:

Notices were sent to thirteen (13) property owners within 1,320 feet of the subject property, exceeding the minimum notification requirements prescribed by the California Government Code and County Zoning Ordinance.

PROCEDURAL CONSIDERATIONS:

The Fresno County Zoning Ordinance requires that a Conditional Use Permit shall become void when substantial development has not occurred within two years after approval of the permit. Zoning Ordinance Section 873-I.3 authorizes the Planning Commission to grant a maximum of two (2) one (1)-year time extensions when it can be demonstrated that circumstances beyond the control of the Applicant cause delays which do not permit compliance with the time limitation established in Section 873-I.1. However, this time limit has been extended due to a recent Zoning Ordinance Text Amendment (Ordinance No. T-087-366) approved by the County Board of Supervisors on December 6, 2011. Effective January 5, 2012, the Ordinance allows the Planning Commission to grant two additional one-year extensions in addition to the extensions currently allowed in Section 873-I.3 provided that the request for extension is filed prior to the expiration of the permit for a possible total of four (4) extensions.

BACKGROUND INFORMATION:

Unclassified Conditional Use Permit (CUP) Application No. 3297 was approved by the Fresno County Planning Commission on November 17, 2011 with that decision appealed by Fresno County Citizens for Responsible Solar, represented by the law offices of Adams Broadwell Joseph and Cardozo on December 1, 2011. At the Fresno County Board of Supervisors' January 24, 2012 hearing, the appeal was continued to a date uncertain to allow the Appellant and Applicant (SolarReserve) the opportunity to resolve concerns and come to a possible resolution that would allow the withdrawal of the appeal.

Negotiations between the Appellant and Applicant resulted in a withdrawal of the appeal by Fresno County Citizens for Responsible Solar on August 28, 2013. As 19 months elapsed between the time of the Board appeal hearing and the withdrawal of the appeal, County staff has determined the effective approval date for the land use application to be August 28, 2013. As conditional use permits are given two years of initial life, the project must either be constructed, a time extension granted, or a determination of substantial development made prior to the project expiration date of August 28, 2015 to insure the project remains active.

This first one-year time extension was filed by the Applicant on August 10, 2015. If this time extension is granted, the Applicant will have an additional year (until August 28, 2016) to achieve substantial development of the subject photovoltaic solar power generation facility.

ANALYSIS/DISCUSSION:

Unclassified Conditional Use Permit (CUP) Application No. 3297 was originally approved on November 17, 2011 concurrently with Initial Study Application No. 6279 based on a determination that the required findings could be made. Attached is a copy of the Planning Commission's Resolution and Staff Report (Exhibit 4) documenting Conditions imposed on the project.

It should be noted that the Planning Commission's jurisdiction in evaluating this request is limited to determining whether or not the Applicant should be granted an additional one year to exercise the CUP as originally approved. In a letter submitted by the Applicant's representative, the primary justification for requesting extension of the CUP approval is to allow additional time to facilitate construction of the project as well as to provide power to Pacific Gas and Electric Company (PG&E) pursuant to specific deadlines (Exhibit 5). The current CUP approval expires on August 28, 2015. The subject time extension will allow the Applicant additional time until August 28, 2016 to complete the project.

The current time extension was routed to the same agencies that reviewed this project in June 2010. None of those agencies identified any change in circumstances or the need for additional conditions. The California Department of Fish and Wildlife (DFW) has identified additional species and protocols to follow to avoid impacts on those species in a letter dated August 14, 2015. However, the information presented in the letter is not new information as defined by Section 15162(b) of the CEQA Guidelines that could not have been known to the agency at the time comments were provided for the original application. DFW comments have been provided to the Applicant.

PUBLIC COMMENT:

None

CONCLUSION:

Staff believes the first one-year time extension for Unclassified Conditional Use Permit No. 3297 should be approved, based on factors cited in the analysis above. Approval of this time extension will extend the expiration date to August 28, 2016.

PLANNING COMMISSION MOTIONS:

Recommended Motion (Approval Action)

- Move to approve the first one-year time extension for Unclassified Conditional Use Permit No. 3297; and

- Direct the Secretary to prepare a Resolution documenting the Commission's action.

Alternative Motion (Denial Action)

- Move to deny the first one-year time extension request for Unclassified Conditional Use Permit No. 3297 (state reasons for denial); and

- Direct the Secretary to prepare a Resolution documenting the Commission's action.

Tuesday, May 24, 2016 **9:00 AM** **Hall of Records**

The Fresno County Board of Supervisors welcomes you to this meeting and encourages your participation. This agenda contains a brief general description of each item to be considered. The number of the item being heard is indicated on the Clerk's desk. Please see note below regarding consent agenda items. The Chairman will call for public testimony as each item is heard. If you wish to speak to an individual item please step to the podium during this time period and state your name for the record. If you wish to speak on a matter which does not appear on the agenda, you may do so during the Public Presentation period at the end of the regular session.

All supporting documentation is available for public review in the office of the Clerk to the Board of Supervisors located in the Hall of Records building, 2281 Tulare Street, Room 301, Fresno, 93721 during regular business hours, 8:00 a.m. – 5:00 p.m., Monday through Friday. Agenda items are also available online at:

http://fresnocounty.legistar.com.

Subject: RE: Panoche Westside Farms - CUP 3423 Expired
Date: Monday, August 22, 2016 2:39:00 PM

Hello Al,

Regardless of the potential to add two additional discretionary one-year time extension opportunities for a CUP, an application for time extension would still have to be filed prior to the expiration date of the CUP.

With regard to CUP No. 3423, an application for time extension was not filed prior to March 13, 2016, which is the expiration date for the CUP.

Subject: Panoche Westside Farms - CUP 3423 Expired

Hello Al,

According to Section 873-I.1 of the Fresno County Zoning Ordinance, a Conditional Use Permit (CUP) becomes expired when substantial development of its project is not achieved within two years of CUP approval.

CUP No. 3423 was approved by the Planning Commission on March 13, 2014. Considering that the project has not completed a Plan Check, and that building permits have not been issued for the project, CUP No. 3423 is considered to be expired.

Sorry for the bad news,

Derek Chambers, Planner

Clovis, CA 93612

Dear Beal Properties:

SUBJECT: EXPENSE REPORT - FEBRUARY 21, 2014 THROUGH JUNE 19, 2016
GENERAL PLAN AMENDMENT #540

Pursuant to our agreement to provide you with an accounting of time and expenses incurred in relation to the review and processing of your project, the following Expenditure Report reflects the work performed by Fresno County staff from June 24, 2013 through June 19, 2016.

Department Salaries and Benefits	Hours	Costs Incurred
Development Services	164.70	$14,286.81
Total:	164.70	$14,286.81

Other Cost

Total Costs:	$14,286.81

The above may not include incidental charges against this project which have not yet been accumulated. Costs incurred for salaries and benefits include weighted salaries, benefits, and Department overhead.

The remaining balance of your $7,000.00 deposit is $(7,286.81).

If you have any questions, please contact me at (559) 600-4298.

Sincerely,

Lemuel Asprec
Financial Services Manager

Attachments:	RiverbendSand&Gravel.pdf

Good Afternoon Will,

I am following up on the email I had sent a couple of months ago. I could not find a response (I apologize if you had sent one).

Attached is the updated memo and letter prepared by Sherri for the Riverbend Sand & Gravel EIR 6606 project. As no additional charges have been incurred for this project, the numbers remain the same.

Before the memo and letter is finalized and sent out, do you anticipate collecting the $3,423.79 shortfall from the applicant or will this be funded by the general fund allocation in your budget?

A portion of the shortfall represents charges from Roads in the amount of $480.80. As the Road Fund needs to be reimbursed for their charges, can we bill 43600200 for this charge?

Please advise.

Thank you.

Carol Pratt

Subject: FW: Expence Reports through 6/19/16

Good Morning Will,

A portion of the $3,423.79 shortfall for staff charges for the Riverbend Sand & Gravel project (EIR #6606) represents Design Division's charges and Road Maintenance Division's charges from December 2015 in the amount of ~~$240.40~~. s/b $480.80

As the Road fund should have been reimbursed last fiscal year, may we go ahead and bill your budget 43600200 now for their charges? Assuming that Riverbend reimburses the County for this overage, the reimbursement check will be deposited into your budget to cover your division's

charges as well as Design's and Maintenance's portion.

Please confirm if the above can be processed.

Please let us know if you have any questions.

Thank you for your assistance.

Subject: FW: Expense Reports through 6/19/16

Sherri and Jesus,

Will Kettler called me this morning to let us know that they will be absorbing the overage for the Riverbend project so we will not collect the overage owed from Riverbend Sand and Gravel for Development Services's charges. He did say that Roads can charge Development Services for the amount still owed to Roads.

Jesus, please bill Org 43600200, Account 7295, Memo 130 (Riverbend Sand & Gravel EIR #6606) for the amount still owed to Roads for project number Z6606C.

Sherri, you may just file the most recent letter and memo in the Riverbend file (do not send to the applicant) and place with the other closed EIR files.

Thank you.

Subject: FW: Expence Reports through 6/19/16

Good Morning Will,

A portion of the $3,423.79 shortfall for staff charges for the Riverbend Sand & Gravel project (EIR #6606) represents Design Division's charges and Road Maintenance Division's charges from December 2015 in the amount of ~~$240.40~~. s/b $480.80

As the Road fund should have been reimbursed last fiscal year, may we go ahead and bill your budget 43600200 now for their charges? Assuming that Riverbend reimburses the County for this overage, the reimbursement check will be deposited into your budget to cover your division's charges as well as Design's and Maintenance's portion.

Please confirm if the above can be processed.

Please let us know if you have any questions.

Thank you for your assistance.

Carol Pratt
Assistant Business Manager
County of Fresno-Dept of Public Works and Planning
(559) 600-4280

"WHEN THE POWER OF LOVE OVERCOMES THE LOVE OF POWER, THE WORLD WILL KNOW PEACE"

EXHIBIT 97

SCOPE OF WORK

- PROVIDE & INSTALL ELECTRICAL PRIMARY POWER SERVICE FROM EXISTING PG&E 12KV UTILITY DISTRIBUTION FACILITIES. INSTALL (N) MEDIUM VOLTAGE OVERHEAD DISTRIBUTION SYSTEM INDICATED ON PLANS. UTILITY METERING WILL BE ACCOMPLISHED USING POLE MOUNTED CURRENT TRANSFORMERS AND METER EQUIPMENT. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLETE COORDINATION WITH THE UTILITY TO INSURE UTILITY STANDARDS ARE MAINTAINED. UTILITY RESPONSIBILITY END AT THE METER POLE & FROM THAT POINT TO UTILIZATION EQUIPMENT WILL BE AN OWNER MAINTAINED FACILITIES.

PROJECT DATA

APPLICABLE CODES:

- CALIFORNIA G.O. 95-RULES FOR OVERHEAD ELECTRICAL LINE CONSTRUCTION.
- CALIFORNIA G.O. 128-CONSTRUCTION OF UNDER GROUND ELECTRIC SUPPLY & COMMUNICATION SYSTEMS.
- 2013 CALIFORNIA ELECTRICAL CODE.
- 2013 CBC.
- 2013 CALIFORNIA ENERGY CODE.
- 2013 CMC
- 2013 CPC

APPLICABLE STANDARDS:

- PG&E INTERCONNECTION HANDBOOK.
- PG&E CONSTRUCTION MANUAL ELECTRIC OVERHEAD.
- PG&E CONSTRUCTION MANUAL ELECTRIC UNDER GROUND.

SPECIAL INSPECTIONS

- SPECIAL INSPECTIONS FOR MEDIUM VOLTAGE ELECTRICAL INSTALLATIONS (OVER 600 VOLTS) PER THE PLANS AND SPECIFICATION AND THE PROJECT DATA APPLICABLE CODES.
- A WRITTEN RECORD OF ALL INSPECTIONS SHALL BE SUBMITTED TO THE COUNTY OF FRESNO, DEPARTMENT OF PUBLIC WORKS AND PLANNING.
  1. PROVIDE INSPECTION REPORT ON THE FOLLOWING:
  2. MOCK UP OF POLES AND ASSOCIATED ATTACHMENTS.
  3. MOCKUP OF CONDUCTOR TIES TO INSULATORS.
  4. INSTALLATION AND TESTING OF RE-CLOSER AND ASSOCIATED EQUIPMENT IN CONJUNCTION WITH PG&E TESTING.
  5. UTILITY INTERFACE EQUIPMENT, BE AVAILABLE TO MEET WITH THE UTILITY REPRESENTATIVE DURING COMMISSIONING OF THE SYSTEM.
  6. BE AVAILABLE TO ADDRESS COUNTY CONCERNS.
- PROJECT INCLUDES COSTS FOR SPECIAL INSPECTIONS AS PERFORMED BY THE FOLLOWING THIRD PARTY TESTING AGENCY:
  ELECTRICAL POWER SYSTEMS, INC.
  4049 N FRESNO ST
  FRESNO, CA 93726
  CONTACT JOE PREVENDAR

ELECTRICAL SPECIFICATIONS

1. ALL WORK AND MATERIALS SHALL BE IN COMPLETE ACCORDANCE WITH THE 2013 CALIFORNIA ELECTRICAL CODE (C.E.C.) THE LATEST EDITION OF CAL/OSHA, AND ALL APPLICABLE LOCAL RULES AND REGULATIONS. OVERHEAD LINE WORK SHALL BE IN ACCORDANCE WITH CALIFORNIA GENERAL ORDER 95 (G.O. 95) AS A MINIMUM.

1.1 FURNISH LABOR AND MATERIAL AND INSTALL ELECTRICAL WORK COMPLETE AS SHOWN ON THE DRAWINGS. WORK SHALL INCLUDE ALL MATERIALS ON THE PLANS AND THAT WHICH IS NECESSARY TO MAKE A COMPLETE WORKING INSTALLATION OF THE ELECTRICAL SYSTEMS SHOWN OR DESCRIBED HEREIN.

1.2 DO ALL CUTTING, PATCHING, REPAIRING NECESSARY FOR THE PROPER INSTALLATION OF WORK AND REPAIR ANY DAMAGE DONE, COORDINATING THIS WORK WITH THAT OF OTHER CRAFTS.

CONTRACTOR SHALL BE HELD TO HAVE EXAMINED THE SITE AND COMPARED IT WITH THE SPECIFICATIONS AND PLANS AND TO HAVE SATISFIED HIMSELF AS TO THE CONDITIONS UNDER WHICH THE WORK IS TO BE PERFORMED. HE SHALL BE HELD RESPONSIBLE FOR KNOWLEDGE OF ALL EXISTING CONDITIONS WHETHER OR NOT ACCURATELY DESCRIBED. NO SUBSEQUENT ALLOWANCE SHALL BE MADE FOR ANY EXTRA EXPENSE DUE TO FAILURE TO MAKE SUCH EXAMINATION.

1.4 CONTRACTOR SHALL MEET WITH THE OWNER IN THE FIELD TO LAY OUT EXACT LOCATIONS OF (N) ELECTRICAL INSTALLATION PRIOR TO START OF PROJECT. CONTRACTOR SHALL MAKE ALL ARRANGEMENTS FOR SAID MEETING AND PROVIDE WRITTEN MEETING NOTES OF DISCUSSION FOR RECORD.

2. ALL EQUIPMENT AND MATERIALS SHALL BE INSTALLED IN A NEAT AND WORKMANLIKE MANNER. ALL MATERIALS SHALL BE NEW AND U.L. LISTED.

3. ELECTRICAL CONTRACTOR SHALL PROVIDE ALL NECESSARY FACILITIES FOR TEMPORARY CONSTRUCTION POWER. ENERGY COSTS SHALL BE PAID BY THE CONTRACTOR.

4. CONTRACTOR SHALL APPLY FOR AND PROCURE ALL LICENSES AND PERMITS NECESSARY FOR THE PROSECUTION AND COMPLETION OF ELECTRICAL WORK. THE OWNER SHALL PAY ALL FEES ASSOCIATED WITH LICENSES AND PERMITS. CONTRACTOR SHALL COORDINATE WITH OWNER TO PAY SAID FEES.

5. ELECTRICAL CONTRACTOR SHALL GUARANTEE ALL WORK AND MATERIALS INSTALLED UNDER THIS CONTRACT FOR A PERIOD OF ONE (1) YEAR FROM DATE OF ACCEPTANCE BY OWNER.

6. VERIFY EXISTING CONDITIONS IN FIELD AND MAKE ADJUSTMENTS AS REQUIRED TO SUIT SUCH CONDITIONS.

7. ALL WORK REQUIRING INTERRUPTION OF EXISTING CIRCUITS, USE OF OWNER'S FACILITIES, OR DISRUPTION OR INTERRUPTION OF ONGOING OWNER ACTIVITIES SHALL BE COORDINATED WITH THE OWNER. AT LEAST 7 DAYS PRIOR TO PLANNED INTERRUPTION.

8. AS-BUILTS: SUBMIT TO THE OWNER ONE (1) MARKED UP PRINT OF "AS-BUILT" CONDITIONS OF ALL WORK UNDER THIS SECTION. CONTRACTOR SHALL COORDINATE WITH ENGINEER OF RECORD TO PRODUCE CORRECTED ELECTRONIC COPY OF AS-BUILT CONDITIONS.

9. SAFETY PRECAUTIONS: PROVIDE AND MAINTAIN THROUGHOUT THE WORK ADEQUATE SAFEGUARDS INCLUDING BARRIERS, WARNING SIGNS, ENCLOSURES AND LIGHTS, TO PREVENT ACCIDENTAL INJURY TO PERSON OR DAMAGE TO PROPERTY.

10. PROTECTION: PROTECT ALL WORK, MATERIALS AND EQUIPMENT FROM DAMAGE FROM ANY CAUSE WHATSOEVER AND PROVIDE ADEQUATE AND PROPER STORAGE FACILITIES DURING THE PROGRESS OF THE WORK. PROVIDE FOR THE SAFETY AND GOOD CONDITION OF ALL WORK UNTIL FINAL ACCEPTANCE OF WORK BY THE OWNER, AND REPLACE ALL DAMAGED OR DEFECTIVE WORK, MATERIALS, AND EQUIPMENT BEFORE REQUESTING FINAL ACCEPTANCE.

11. DRAWINGS: THE GENERAL ARRANGEMENT OF EQUIPMENT AND MATERIALS, AS SHOWN ON THE PLANS, IS DIAGRAMMATIC AND APPROXIMATELY CORRECT, WHERE MINOR CHANGES ARE REQUIRED BECAUSE OF FIELD CONDITIONS OR FOR THE CONVENIENCE OF THE OWNER SUCH CHANGES SHALL BE MADE WITHOUT ADDITIONAL EXPENSE TO THE OWNER. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE ACCURATE AND PROPER INSTALLATION OF ALL EQUIPMENT, MATERIALS, ETC., NO EXTRAS WILL BE ALLOWED ON ACCOUNT OF MINOR ADJUSTMENTS TO THE WORK TO ACCOMMODATE PROPER MEANS & METHODS OF CONSTRUCTION.

12. SUBMITTALS: CONTRACTOR SHALL SUBMIT A COMPLETE LIST OF ALL PROPOSED MATERIALS AND EQUIPMENT WITHIN 15 DAYS OF AWARD OF CONTRACT. CONTRACTOR SHALL MAKE NO SUBSTITUTIONS OF MATERIALS OR EQUIPMENT WITHOUT WRITTEN APPROVAL OF THE OWNER. ALL DIMENSIONAL OR ELECTRICAL CHANGES, OR CHANGES TO OTHER WORK WHICH ARE REQUIRED BY, OR ARE A RESULT OF, AN ACCEPTABLE ELECTRICAL SUBSTITUTION SHALL BE THE SOLE AND COMPLETE RESPONSIBILITY OF THE ELECTRICAL CONTRACTOR AND SHALL BE MADE AT NO ADDITIONAL COST TO THE OWNER.

13. INSPECTION: ALL WORK AND MATERIALS COVERED BY THIS SPECIFICATION SHALL BE SUBJECT TO INSPECTION AT ANY AND ALL TIMES BY REPRESENTATIVES OF THE OWNER. WORK SHALL NOT BE CLOSED IN OR COVERED BEFORE INSPECTION AND APPROVAL BY THE OWNER OR HIS REPRESENTATIVE. ANY MATERIAL FOUND NOT CONFORMING WITH THESE SPECIFICATIONS SHALL, WITHIN 3 DAYS AFTER BEING NOTIFIED BY THE OWNER, BE REMOVED FROM PREMISES; IF SAID MATERIAL HAS BEEN INSTALLED, ENTIRE EXPENSE OF REMOVING AND REPLACING SAME, INCLUDING ANY CUTTING AND PATCHING THAT MAY BE NECESSARY, SHALL BE BORNE BY THIS CONTRACTOR.

14. TESTS: UPON COMPLETION OF WORK AND ADJUSTMENT OF ALL EQUIPMENT, ALL SYSTEMS SHALL BE TESTED UNDER THE DIRECTION OF THE OWNER TO DEMONSTRATE THAT ALL EQUIPMENT FUNCTIONS ELECTRICALLY IN THE MANNER REQUIRED. ALL SYSTEMS SHALL TEST FREE FROM SHORT CIRCUITS AND GROUNDS AND SHALL BE FREE FROM MECHANICAL AND ELECTRICAL DEFECTS. ALL CIRCUITS SHALL BE TESTED FOR PROPER NEUTRAL CONNECTIONS. CONTRACTOR SHALL REMOVE AND REPLACE ALL DEFECTIVE WORKMANSHIP AND/OR MATERIALS AT NO EXPENSE TO OWNER.

15. CLEANUP: AT COMPLETION OF WORK, THIS CONTRACTOR SHALL CLEAN UP AND REMOVE ALL DEBRIS AND MATERIALS NOT INSTALLED IN WORK, LEAVING PREMISES CLEAN.

16. CONDUCTORS; (LOW VOLTAGE)

16.1 CONDUCTORS SHALL BE INSULATED COPPER, NO. 12 AWG MINIMUM SIZE, THHN/THWN, SOLID OR STRANDED (EXCEPT FOR LOW VOLTAGE WIRING AND WHERE SPECIFICALLY NOTED OTHERWISE ON THE PLAN)

ALL CONDUCTORS NO. 8 AND LARGER SHALL BE STRANDED.

16.2 WIRE COLOR CODE SHALL BE AS FOLLOWS:

	120/240V
A PHASE -	BLACK
B PHASE -	RED
C PHASE -	-
NEUTRAL -	WHITE
GROUND -	GREEN

16.3 FOR CONDUCTORS NO. 6 AND LARGER, INSULATION COLOR MAY BE BLACK WITH TAPE BANDS (COLORED PER ABOVE) LOCATED AT EACH END OF THE CONDUCTOR RUN AND AT ALL OTHER LOCATIONS REQUIRED BY THE C.E.C.

16.4 ALL CONDUCTORS SHALL BE RUN IN APPROVED RACEWAY U.O.N.

17. CONDUIT AND WIREWAYS:

17.1 ALL CONDUITS SHALL BE U.L. LISTED AND BEAR THE LABEL OF THE NATIONAL BOARD OF FIRE UNDERWRITERS. PROVIDE LONG RADIUS SWEEPS (36" RADIUS MINIMUM) FOR ALL CONDUITS 2" OR GREATER IN DIAMETER. NO CONDUIT RUN SHALL EXCEED 360° IN BENDS; WHERE MORE THAN 360° IN BENDS MAY BE EXCEEDED PROVIDE & INSTALL A CODE COMPLIANT PULLBOX.

17.2 RIGID NONMETALLIC CONDUIT: SCHEDULE 40 PVC PLASTIC FOR UNDERGROUND OR UNDER SLAB INSTALLATIONS OR WHERE CALLED FOR ON THE PLANS RATED 90 DEGREES C. WITH GLUE-ON PVC COUPLINGS AND FACTORY MADE ELBOWS AND SWEEPS; CARLON "PLUS 40".

RIGID STEEL CONDUIT (GRS): HOT-DIPPED GALVANIZED WITH THREADED ONE-PIECE COUPLINGS AND FACTORY MADE ELBOWS. NIPPLES THROUGH 12" IN LENGTH SHALL BE FACTORY MADE. CONNECTORS THREADED TYPE WITH BONDING LOCKNUT, INSULATED THROAT AND NEOPRENE O-RING. PROVIDE GRS FOR OUTDOOR INSTALLATIONS EXPOSED TO WEATHER OR WHERE CALLED FOR ON THE PLANS.

17.4 NO ELECTRICAL CONDUITS SHALL BE COVERED BEFORE INSPECTION AND APPROVAL BY THE OWNER. CONTRACTOR SHALL NOTIFY OWNER THAT CONDUITS ARE READY FOR INSPECTION PRIOR TO INSTALLATION OF CONDUCTORS.

17.5 CONDUITS SHALL BE INSTALLED IN A RIGID AND SATISFACTORY MANNER WITH SUPPORT SPACED NOT MORE THAN 8 FEET APART FOR STEEL CONDUITS. CONDUITS SHALL BE INSTALLED TO BOXES WITH LOCKNUTS AND BY BUSHING OR OTHER APPROVED DEVICES. CONDUITS SHALL BE JOINED BY APPROVED CONDUIT COUPLINGS AND SHALL HAVE ENDS BUTTED IN ALL CASES WHERE COUPLINGS ARE USED. CONDUITS SHALL BE TIGHTLY CORKED AND OTHERWISE WELL PROTECTED DURING CONSTRUCTION AND BLOWN OUT AND SWABBED BEFORE WIRES ARE PULLED. REAM ALL CONDUITS ENDS AFTER CUTTING. BENDS SHALL BE MADE WITH STANDARD CONDUIT ELBOWS OR CONDUIT BENT TO NOT LESS THAN SAME RADIUS. ALL BENDS SHALL BE FREE FROM DENTS OR FLATTENING.

17.6 PVC CONDUITS: MAKE COUPLINGS AND CONNECTORS WATERTIGHT IN ALL RUNS. UTILIZE SOLVENT CEMENT OF TYPE APPROVED BY CONDUIT MANUFACTURER. PROVIDE ADAPTERS AND LOCKNUTS WHERE CONDUIT IS ATTACHED TO METAL BOXES AND PANELS.

17.7 RACEWAY RUNS SHOWN ON DRAWINGS ARE DIAGRAMMATIC UNLESS SPECIFICALLY DIMENSIONED. DETERMINE EXACT LOCATIONS OF ALL UNDIMENSIONED RACEWAY RUNS IN FIELD.

18. GROUNDING: ALL DEVICES, FIXTURES, RACEWAY, EQUIPMENT ETC. SHALL BE GROUNDED VIA A GROUNDING CONDUCTOR RUN THROUGH THE RACEWAY OR CABLE. WIRING DEVICES SHALL BE GROUNDED THROUGH A COPPER WIRE, SIZED TO COMPLY WITH CODES. A GROUNDING CONDUCTOR SIZED TO COMPLY WITH CODES SHALL BE INSTALLED IN ALL CONDUITS AND CABLES.

18.1 U.O.N. GROUND RODS SHALL BE COPPER OR COPPER-CLAD STEEL; 3/4" DIAMETER (MIN.); PROVIDE MINIMUM 8 FOOT LONG RODS WHERE DIRECT BURIED (NON-ACCESSIBLE) AND MINIMUM 10 FOOT LONG RODS WHERE INSTALLED IN GROUND WELLS OR OTHER ACCESSIBLE LOCATIONS.

19. MEDIUM VOLTAGE SYSTEM

GENERAL REQUIREMENTS FOR WORK RELATED TO THE PROVISION AND INSTALLATION OF MEDIUM VOLTAGE DISTRIBUTION EQUIPMENT AND CABLING.

SPECIAL REQUIREMENTS:

A. THE MEDIUM VOLTAGE SYSTEM SHALL BE 15KV RATED MINIMUM THRUOUGHOUT.

B. ALL MEDIUM VOLTAGE WORK SHALL BE PERFORMED BY QUALIFIED PERSONS WITH A MINIMUM OF FIVE YEARS EXPERINCE IN INSTALLING, WORKING ON AND REPAIRING ELECTRICAL SYSTEMS OPERATING AT VOLTAGES OF UP TO 25,000 VOLTS.

C. MEDIUM VOLTAGE CABLE TERMINATIONS AND SPLICES SHALL BE MADE ONLY BY QUALIFIED CABLE SPLICERS WITH A MINIMUM OF FIVE YEARS EXPERIENCE IN PREFORMING TERMINATIONS AND SPLICES OF THE TYPES USED ON THIS PROJECT.

20. MEDIUM VOLTAGE OVERHEAD CONDUCTORS

ACSR BARE ALUMINUM CONDUCTOR MEETS THE FOLLOWING ASTM SPECIFICATIONS:
- B230 ALUMINUM 1350-H19 WIRE FOR ELECTRICAL PURPOSES.
- B232 CONCENTRIC-LAY-STRANDED ALUMINUM CONDUCTORS, COATED-STEEL REINFORCED (ACSR).
- B498 ZINC-COATED (GALVANIZED) STEEL CORE WIRE FOR USE IN OVERHEAD ELECTRICAL CONDUCTORS.
- B500 METALLIC COATED STRANDED STEEL CORE FOR USE IN OVERHEAD ELECTRICAL CONDUCTORS.

CONDUCTOR CONSTRUCTION:
- ALUMINUM 1350-H19 WIRES, CONCENTRICALLY STRANDED ABOUT A STEEL CORE. STANDARD CORE WIRE IS CLASS A GALVANIZED.
- CLASS A CORE STRANDING IS ALSO AVAILABLE IN ZINC-5% ALUMINUM-MISCHMETAL ALLOY COATING.
- SOUTHWIRE ACSR OR APPROVED EQUAL. PROVIDE PRODUCT SUBMITTAL.

21. POLES:

A. POLE CLASS AND DIMENSIONS AS NOTED ON THE CONSTRUCTION DRAWINGS. ALL POLES SHALL BE GRADE "A" OR BETTER.

B. POLES SHALL BE DOUGLAS FIR FULL TREATED PENTACHLOROPHENOL OR APPROVED EQUAL.

C. U.O.N. AVERAGE SPAN BETWEEN POLES APPROXIMATELY 190'; PLACEMENT OF POLES BETWEEN 150' TO 220' IS PERMISSIBLE DO TO FIELD CONDITIONS.

D. GUYING; POWER INSTALLED SCREW ANCHOR 10" DIAMETER MINIMUM; 3/8" DIAMETER GALVANIZED STEEL CABLE, UTILITY GRADE.

E. POLE SHALL BE LOCATED AS INDICATED ON THE PLANS. MAINTAIN MINIMUM 10' FROM ROADWAYS; COORDINATE EXACT LOCATION WITH OWNER.

F. PRIOR TO POLE INSTALLATION LAYOUT AND MARK EXACT POLE LOCATION ON THE PLAN & IN THE FIELD; THE OWNER SHALL PROVIDE WRITTEN ACCEPTANCE OF THE POLE LAYOUT PRIOR TO BEGINNING POLE INSTALLATION.

22. RECLOSER:

RECLOSER WITH POLE MOUNTING BRACKET; COOPER KYLE TYPE NOVA, 3Ø ELECTRONICALLY CONTROLLED; VACUUM INTERRUPTING AUTOMATIC CIRCUIT RECLOSER; 15KV, WITH FORM 6 MICROPROCESSOR-BASE RECLOSER CONTROL MOUNTED TO POLE; FORM 6 CONTROLLER WITH A 13 AMP-HOUR 24 VDC LEAD ACID BACK-UP BATTERY AND INTERNAL BATTERY CHARGER; PROVIDE RECLOSER WITH RECLOSER FRAME MOUNTED POTENTIAL TRANSFORMER 12KV PRIMARY - 120V SECONDARY; 1KVA; OIL INSULATED; 2 PRIMARY BUSHINGS; 2 SECONDARY EYEBOLT BUSHINGS. 125KV BIL; 12.5 KILO AMPS SHORT CIRCUIT SYMMETRICAL.

23. SUBMITTALS:

A. PROVIDE MANUFACTURE SUBMITTALS FOR EQUIPMENT AS FOLLOWS:

1. CONDUCTORS.
2. POLES.
3. GUYING HARDWARE (CABLING, ANCHORS. ETC)
4. SWITCHES.
5. CUT-OUTS.
6. INSULATORS (INCLUDING PINS AND FIBERGLASS EXTENSIONS).
7. CABLE SPLICING HARDWARE.
8. POLE CROSS ARMS.
9. GROUND RODS.
10. CONDUITS.
11. METERING EQUIPMENT THAT IS PROVIDED BY THE CONTRACTOR WITH PG&E APPROVED LAYOUT DRAWINGS.

24. OFCI EQUIPMENT SHALL BE AVAILABLE ON SITE TO THE CONTRACTOR; PRIOR TO BEGINNING OFCI EQUIPMENT INSTALLATION THE CONTRACTOR SHALL INSPECT EQUIPMENT FOR DAMAGE & PROVIDE WRITTEN ACCEPTANCE OR REJECTION OF EQUIPMENT, IF REJECTED THEN OWNER SHALL CORRECT ANY DISCREPANCIES TO INSURE EQUIPMENT IS LIKE NEW; ONCE OFCI EQUIPMENT IS ACCEPTED THEN THE CONTRACTOR IS RESPONSIBLE FOR SAID EQUIPMENT. CONTRACTOR SHALL MOVE EQUIPMENT FROM THE ONSITE STORAGE LOCATION TO THE POINT OF INSTALLATION AND INSTALL PER THE CONTRACT DOCUMENTS; OFCI EQUIPMENT IS SPECIFIED AS REFERENCE FOR THE CONTRACTOR RELATIVE TO INSPECTION AND ACCEPTANCE AS WELL AS AN INSTALLATION AID; SEE PLANS FOR OFCI EQUIPMENT.

25. THIRD PARTY TESTING:
PROVIDE INDEPENDENT THIRD PARTY TESTING OF THE INSTALLED POWER SYSTEM. TESTING SHALL BE DONE TO CONFIRM THAT INTERFACE WITH THE UTILITY OPERATES PER THE PLANS AND SPECIFICATIONS AND IS COMPATIBLE WITH PG&E REQUIREMENTS. THE OUTCOME OF THE TESTING WILL BE A WRITTEN REPORT OF THE TEST PROCEDURE AND THE TEST RESULTS. COMPLETE ANY PG&E DOCUMENTATION OF TEST RESULTS AND COORDINATE WITH PG&E FOR THEIR INSPECTION AND CONFIRMATION TESTING. ALLOW A MINIMUM OF 10 WORKING DAYS FOR PG&E INSPECTION AND CONFIRMATION TESTING. SUBMIT A COMPLETE TEST PROCEDURE FOR APPROVAL PRIOR TO BEGINNING THE CONSTRUCTION OF THIS PROJECT.

GENERAL SINGLE LINE NOTES

A. ALL ELECTRICAL SHOWN IS NEW, U.O.N.

B. ALL CIRCUIT BREAKERS ARE 3-POLE, U.O.N.

C. VOLTAGE DESIGNATIONS: (U.O.N.)
240-1 = 240/120V-1PH-3WIRE
480-1 = 480V-1PH-2WIRE
208Y = 208/120V-3PH-4 WIRE
480Y = 480/277V-3PH-4 WIRE
480Δ = 480V-3PH-3 WIRE
4160Y = 2400/4160V-3PH-4 WIRE
12KVΔ= 12.KV-3PH-3 WIRE

D. "KA" AT CIRCUIT BREAKERS DENOTES MINIMUM REQUIRED INTERRUPTING CAPACITY IN AMPS (x 1000).

E. SPD AT BREAKER DENOTES: PROVIDE MOUNTING SPACE & HARDWARE FOR FUTURE 3-POLE BREAKER OF RATINGS INDICATED.

F. Isc= AVAILABLE SHORT CIRCUIT (RMS SYM. AMPS) BASED ON 500MVA SHORT-CIRCUIT DUTY AT SERVICE XFMR PRIMARY AND 7.5% BELOW NOMINAL XFMR IMPEDENCES; VALUES ON LOAD-SIDE OF MAIN SWITCHBOARD INCLUDE MOTOR CONTRIBUTION.

FEEDER SCHEDULE

FDR No.	CONDUIT AND CONDUCTORS	REMARK

Date: Tuesday, December 13, 2016 11:24:51 AM

Good Morning Will,
During the process of closing out the Riverbend Sand and Gravel EIR 6606 project, our records show a remaining encumbered balance of $12,994 with the consultant on this project (SESPE Consulting Inc). Does your records also show this remaining balance with the consultant? Can we release this encumbrance and close out this contract?
Please advise.
Thank you.

Carol Pratt

Subject: RE: Expense Reports through 6/19/16

Let me look into this. No one should really be changing to this project anymore. I'm OK with reimbursing Roads but I need to check into the issue of collecting from the applicant.

Will Kettler
Division Manager,
Development Services Division
Fresno County Department of Public Works and Planning

Subject: RE: Expense Reports through 6/19/16

Good Afternoon Will,
I am following up on the email I had sent a couple of months ago. I could not find a response (I apologize if you had sent one).
Attached is the updated memo and letter prepared by Sherri for the Riverbend Sand & Gravel EIR 6606 project. As no additional charges have been incurred for this project, the numbers remain the same.
Before the memo and letter is finalized and sent out, do you anticipate collecting the $3,423.79 shortfall from the applicant or will this be funded by the general fund allocation in your budget?
A portion of the shortfall represents charges from Roads in the amount of $480.80. As the Road Fund needs to be reimbursed for their charges, can we bill 43600200 for this charge?
Please advise.
Thank you.

Carol Pratt

Assistant Business Manager
County of Fresno-Dept of Public Works and Planning

Subject: FW: Expence Reports through 6/19/16

Good Morning Will,

A portion of the $3,423.79 shortfall for staff charges for the Riverbend Sand & Gravel project (EIR #6606) represents Design Division's charges and Road Maintenance Division's charges from December 2015 in the amount of ~~$240.40~~. s/b $480.80

As the Road fund should have been reimbursed last fiscal year, may we go ahead and bill your budget 43600200 now for their charges? Assuming that Riverbend reimburses the County for this overage, the reimbursement check will be deposited into your budget to cover your division's charges as well as Design's and Maintenance's portion.

Please confirm if the above can be processed.

Please let us know if you have any questions.

Thank you for your assistance.

From:	Motta, Chris
To:	Patrick Mitchell
Subject:	RE: Riverbend Sand and Gravel CUP 3390
Date:	Friday, February 24, 2017 4:12:00 PM
Attachments:	2017.02.23 Letter re. Riverbend Sand and Gravel - CUP 3390 (signed) (00029207xD62CE).pdf

Pat,

I apologize for not being able to get back to you earlier, but I've been on an interview panel that has taken up some time. I would like to discuss the attached letter and a possible meeting with Counsel over the phone when you have some time (possibly Monday if you're available). In speaking with our County Counsel representative, he doesn't have a lot of availability next week for an in-person meeting (and neither do I unfortunately), but we might be able to accommodate a conference call.

Regarding the substantial development determination, I do want to discuss the attached letter with you. Our process for a formal determination of substantial development is outlined in the Fresno County Zoning Ordinance Section 873.J and reads:

> *J. APPEAL OF DIRECTOR'S DECISION AND BOARD PUBLIC HEARING AND DECISION*
> *(Added by Ord. T-241 adopted 7-28-80)*
>
> *1. Where a determination is caused to be made by the Director of Public Works & Development Services that there either has or has not been substantial development within two years after the approval of said Conditional Use Permit, a notice of such determination shall be mailed to the applicant and to owners of property adjacent the external boundaries of the property described in the application. The applicant or an adjacent property owner may appeal this decision to the Board of Supervisors by filing a written notice of appeal with the Clerk of the Board within fifteen (15) days after the mailing of notice of such decision. Such appeal shall set forth the reasons therefore.*
>
> *2. The Clerk of the Board upon receipt of such appeal shall set the hearing date for not less than fifteen (15) days nor more than forty (40) days after the filing of an appeal.*
>
> *3. The Board shall not less than ten (10) days after the legal notice of a public hearing on an appeal, hold said public hearing.*
>
> *4. The Board may approve, approve with stated conditions, or deny the appeal by resolution. A copy of the Board resolution shall be mailed to the applicant at the address shown on the application.*
>
> *5. The decision of the Board shall be final unless an appeal therefrom is filed with a court of competent jurisdiction within fifteen (15) days after the Board resolution date.*

As indicated above, the substantial development process does involve notification. Another option would have been to file a time extension, but as you are aware, based on the approval of the use permit, the latest we could accommodate receipt would likely be Monday.

I'll be out of the office the remainder of this afternoon but if we could talk early next week, that would be great.

Sincerely,

Chris Motta, Principal Planner
Development Services Division

Art/Chris,

Here is a proposed draft traffic mitigation agreement for the Riverbend site. We are proposing to resolve the prior discussion with Public Works related to actual costs estimating by the proposed bonding concept. Please review and advise.

I will be in Madera for a meeting one week from tomorrow in the morning. If it would help to have a meeting to nail this down I could meet in Fresno the afternoon of March 2 or March 3.

Thanks
Pat

RE: Agreement to Obtain Permits

The real property described on Exhibit "A" attached (the property) is owned by Running Luck Ranch, LLC (owners).

The owners have granted Riverbend Sand and Gravel, LLC the exclusive right to operate a sand and gravel mining operation, and related activities, on the property, including sand and gravel processing facilities, ready-mix concrete facilities, asphalt batching facilities, and concrete and asphalt recycling facilities, and to obtain a permit and other entitlements collectively ("Permits") required to conduct such operations.

RE: Plan Check 16-1153

The real property at 3677 S. Riverbend, Sanger, which is the subject of Plan Check 16-1153, is owned by Running Luck Ranch, LLC. The owners have granted Riverbend Sand and Gravel, LLC exclusive rights to obtain permits to operate a sand and gravel mining operation, and related activities on the property, including sand and gravel processing facilities, ready-mix concrete facilities and asphalt batching facilities and to obtain a permit and other entitlements collectively ("Permits") required to conduct such operations (see attached Agreement to Obtain Permits).

The proposed electrical installation is intended to provide power to the future plant site permitted under Conditional Use Permit (CUP) 3390 as approved February 19, 2015. The uses approved for the future plant site under CUP 3390 include an aggregate (sand and gravel) processing plant, a hot-mix asphalt plant and a ready-mix concrete plant. Building permit applications will be filed as necessary for construction of the plants.

Pat,

I wanted to provide the following response to your letter just to clarify the County's process and give your client options to consider. I apologize for the length of time this has taken due to many other items we have been working on.

Chris

Subject: Riverbend Sand and Gravel CUP 3390

Chris,

In response to your email on Friday, we would like to clarify the purpose of our letter to the County on behalf of Riverbend. As indicated in our letter, Riverbend has already spent over $294,000 to implement CUP 3390. The purpose of the letter was to inform the County of this substantial development and provide details of Riverbend's development for the record. Riverbend is not asking the County for a formal determination.

Since substantial development under CUP 3390 has commenced, there is no need for Riverbend to file an extension pursuant to County Zoning Ordinance section 873.I, as that provision is not applicable to Riverbend's circumstances. Section 873.I indicates an extension may be requested where "circumstances beyond the control of the applicant cause delays which do not permit compliance within the time limitation." In this case, Riverbend has commenced substantial development within two years, the timeframe specified in section 873.I.1. Thus, there is no need for Riverbend to seek an extension.

Also, as noted in our letter, we believe that the the Planning Commission approval date was not the trigger for the two year time limit. That is because the project opponents appealed the Planning Commission determination to the Supervisors, during which time the CUP could not be acted upon. Riverbend was informed that the BOS appeal was withdrawn on May 19, 2015. While the BOS appeal was pending, Riverbend was prohibited from commencing with construction on the Project. Thus, the two year time limit to commence construction in our view would commence on May 19, 2015. As discussed above and in our letter, Riverbend commenced construction within that two year timeframe.

Thanks,
Pat

Art/Chris,

Here is a proposed draft traffic mitigation agreement for the Riverbend site. We are proposing to resolve the prior discussion with Public Works related to actual costs estimating by the proposed bonding concept. Please review and advise.

I will be in Madera for a meeting one week from tomorrow in the morning. If it would help to have a meeting to nail this down I could meet in Fresno the afternoon of March 2 or March 3.

Thanks
Pat

Frank and Chris,

Since the utility relocation on McCall has been done under franchise once before in the past ten years, I don't think PG&E will relocate it again. The developer will have to pay the relocation costs, as well as any right of way costs that may be needed, if PG&E does not agree to relocate their facilities.

Subject: RE: Riverbend Traffic Mitigation Agreement with County

I took a quick look at the Agreement and noticed the following concerns:

1. Riverbend intends to put up a bond for their pro-rata share, with actual payment to be made prior to construction by the County. I think this is new.
2. They want to call the work on McCall a County project so that costs to relocate PG&E towers would be a PG&E expense through exercise of the County's franchise agreement.
3. They have included some estimates of cost for the various improvements, but those will

likely have to be modified according to cost estimates generated by the County. Their estimates should include some backup data demonstrating how their estimates were generated rather than just providing a lump sum amount. These estimates will also have to include costs for design and construction engineering as well as contingencies.

4. The agreement also indicated that Riverbend's final share of costs would be determined based upon actual costs of the Improvements. I think this is new.
5. I believe some of the Improvements were a condition for opening day. We argued unsuccessfully that these opening day improvements should be constructed by the applicant. The question will become what are the impacts to an actual opening day if it is contingent upon County completion of the required Improvements. The Agreement indicates that the applicant will deposit some money with the County in order to open, even if the Improvements are not constructed by opening day.
6. These Improvements will also become a net County cost for facilities that are not currently programmed in our RIP. Will the County be modifying the RIP to consider project Improvements that are specifically related to a development?
7. From a legal standpoint, I have concerns over the language that limits the County's ability to make a claim on the bonds, given that the bonds are directly related to the satisfaction of the mitigation measures.
8. The agreement states that all improvements have to be complete by 2037 or the applicant's obligation goes away. This would further commit County resources to be spent by a specific time for improvements related to a development. Who would be in default if the improvements weren't constructed, the applicant or the County?
9. The Agreement speaks to the return of unexpended funds to Riverbend, but it doesn't discuss additional deposits by Riverbend should project change order costs increase their pro-rata share.

Doesn't the County have several of these types of Agreements on file for other projects? Why does it appear that the applicant is developing a new (their own) format and content for the agreement?

TRAFFIC MITIGATION AGREEMENT (COUNTY FAIR SHARE) FOR RIVERBEND MINE AND RECLAMATION PLAN

THIS AGREEMENT is entered into ~~in 2016~~on September __, 2017 on the last date signed below ("Effective Date") between the County of Fresno, a political subdivision of the State of California, acting through its Department of Public Works & Planning, Development Services Division ("County"), and Riverbend Sand and Gravel LLC ("Riverbend"), upon the following facts and circumstances:

RECITALS

A. WHEREAS, Riverbend proposes to construct, operate, and reclaim an aggregate mine, and related processing, asphalt, ready mix concrete, hot mix asphalt plant, and portable asphalt and concrete recycling plant on 619 acres of land located in Fresno County, more commonly known as the Riverbend Sand and Gravel Project ("Project"), which will be located on certain real property more particularly described in **Exhibit A**, attached hereto and incorporated herein by reference.

B. WHEREAS, on February 26, 2015, pursuant to County Resolution, subject to the conditions listed therein, the Fresno County Planning Commission ~~("Planning Commission")~~ certified an Environmental Impact Report ("EIR") for the Project (State Clearinghouse No. 2013071097), approved Unclassified Conditional Use Permit ~~("CUP")~~ No. 3390, and adopted the CEQA findings, the mitigation measures, the Mitigation Monitoring and Reporting Program and the statement of overriding considerations.

C. WHEREAS, on May 19, 2015, the Board of Supervisors hearing on appeal from the Planning Commission was taken off calendar because the appellant withdrew his appeal.

D. WHEREAS, as part of the EIR for the Project, a Traffic Impact Study ("TIS") was prepared by VRPA Technologies, Inc. in March 2014 and revised in July 2014 and included in the EIR as Appendix K, which describes the potential traffic and circulation impacts associated with the Project.

~~D~~E. WHEREAS, the TIS and ~~Impacts of~~ the EIR ~~determined~~indicated that the Project would increase vehicle trips on public roads and could contribute to unacceptable levels of service on Fresno County roadways segments and at intersections ("Impacts"), which Impacts were considered potentially significant.

~~E~~F. WHEREAS, ~~the TIS and~~ Mitigation Measure TRANS-1 of the EIR and the Monitoring Plan also identified specific mitigation measures to mitigate for the Project's Impacts, specifically that Riverbend would contribute Riverbend's Pro Rata Share ("Pro Rata Share") of the total anticipated costs to the County for level of service ("LOS") improvements related to capacity required at the following intersections and road segment ("LOS Improvements") ~~in the following Pro Rata Shares~~as follows:

i. McCall Avenue / Jensen Avenue ~~Installation of~~Add Eastbound Left Turn Lane and Right Turn Lane, Westbound Right Turn Lane, Northbound Left Turn Lane, Through Lane and Right Turn Lane,

and Southbound Left Turn Lane, Through Lane and Right Turn Lane – 8.5%

ii. McCall Avenue / North Avenue Signalization – 18.6%

iii. Academy Avenue / Central Avenue Signalization – 17.8%

iv. McCall Avenue / Central Avenue Signalization – 23.0%

v. McCall Avenue / SR 180 Add Northbound Through Lane and Right Turn Lane, and Southbound Through Lane and Right Turn Lane – 10.0%

vi. McCall Avenue / SR 180 Add Northbound Left Turn Lane – 100% ~~(Total cost: $)~~

vii. McCall Avenue from SR 180 to Jensen Avenue add Northbound Travel Lane and Southbound Travel Lane – 16.3%

viii. ~~Jensen~~McCall Avenue from Jensen Avenue to North Avenue Northbound Travel Lane – 37.7%

~~F~~G. WHEREAS, the TIS and Mitigation Measure TRANS-3 of the EIR and Monitoring Plan also identified specific mitigation measures to mitigate for the Project's Traffic Index ~~("TI")~~ Impacts, specifically that Riverbend would contribute Riverbend's Pro Rata Share to the County for improvements related to the structural section of the impacted street segments ("Structural Improvements"):

i. Central Avenue Segments
   a. McCall Avenue ~~and~~to Bethel Avenue – 46.0%
   b. Bethel Avenue ~~and~~to Academy Avenue – 42.4%
   c. Academy Avenue ~~and~~to Newmark Avenue – 39.1%

ii. Goodfellow Avenue Segments
   a. Newmark Avenue ~~and~~to Bridge – 40.3%
   b. Bridge to Riverbend Avenue – 40.3%

iii. McCall Avenue Segments
   a. SR 180 (Kings Canyon) ~~and~~to Jensen Avenue – 61.4%
   b. Jensen Avenue ~~and~~to North Avenue – 66.7%
   c. North Avenue ~~and~~to Central Avenue – 73.8%

Riverbend's Pro Rata Share payment amounts ("Funds") for each LOS Improvement and Structural Improvement (collectively, "Improvements") to be determined based on the ~~estimated~~actual total cost of each Improvement multiplied by Riverbend's Pro Rata Share at a time proximate to the commencement of construction.

~~G. WHEREAS, Riverbend shall be fully responsible for building the entrance to the Project; and~~ H. WHEREAS, except for those amounts specified to be paid in cash or equivalent, Riverbend shall obtain bonds for the estimate of the Funds, and will remit to the County the actual cost of Riverbend's Pro Rata Share of the Improvements approximately twelve months before the actual construction of each particular Improvement.

~~H~~I. WHEREAS, the intersection at McCall Avenue and SR 180 shall be considered a County proposed project, thus PG&E should not charge for the necessary ~~movement~~relocation of the existing utilities, including PG&E ~~pole; and~~poles or towers.

J. WHEREAS, in accordance with Mitigation Measure TRANS-3 of the EIR and Monitoring Plan, Riverbend shall be 100% responsible for building the entrance to the Project.

~~I~~K. WHEREAS, Mitigation Measures TRANS-1 and TRANS-3, as conditions of Project approval, require Riverbend to enter into a traffic mitigation agreement with the County~~;~~.

~~**AGREEMENT**~~

NOW, THEREFORE, in consideration of the foregoing recitals and for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Riverbend and the County (collectively "Parties," individually "Party") agree as follows:

AGREEMENT

1. **PAYMENT ~~DUE DATES~~**. ~~Riverbend agrees to pay Funds in full, totaling $, to County prior to the first day of sale of material~~. Prior to any sold material being shipped from the Project, Riverbend shall provide the County with:

1.1 A surety bond for $1,709,000 in full satisfaction of its Pro Rata Share for the McCall Avenue / SR 180 Northbound Left Turn Lane Improvement~~, as set forth above in Recital E.~~

1.2 Payment of $217,588 in full satisfaction of its fair share contributions to the addition of northbound and southbound through lanes at McCall Avenue and Jensen Avenue, the addition of a southbound right turn lane at McCall Avenue at SR 180, the addition of a westbound right turn lane at McCall Avenue at Jensen Avenue, and the installation of a traffic signal at Academy Avenue at Central Avenue.

1.3 For all other Improvements, Riverbend shall obtain and provide to the County one or more surety bonds in the amounts set forth in **Exhibit B** ("Bonds"). Riverbend shall provide the Bonds to the County on or before the dates set forth in Exhibit B. The Bonds shall be in an industry-standard format.

1.4 ~~Riverbend further agrees to provide the remainder Funds, as follows.~~The County ~~will~~shall provide written ~~notification~~notice to Riverbend twelve (12) months prior to construction of the particular Improvement(s)~~.~~, and Riverbend ~~will then provide to the County payment for that Improvement in the Fair Share amount, as set forth above in Recital E,~~shall pay its actual Pro Rata Share for the noticed Improvement within sixty (60) days of ~~the written request by the County~~receiving said notice. Within ten (10) days of receiving Riverbend's payment, the County shall release the applicable Bond amount.

2. **SATISFACTION**. The County hereby acknowledges that upon ~~payment in full of the Funds by Riverbend~~the execution of this Agreement, Riverbend's submission of the payments described under Section 1.2, the Bonds, and later actual payments for the Improvements, Riverbend will have satisfied its mitigation obligations to the County for Project Impacts as required by Mitigation Measures TRANS-1 and TRANS-3.

3. ~~TRUST ACCOUNT~~**ALLOWABLE USE OF BONDS**. The County shall not submit a claim on a Bond, or otherwise indirectly or directly cause the Bond to be released or remitted to the County, until all of the following occur:

3.1 Riverbend has not paid the actual Pro Rata Share for the noticed Improvement within sixty (60) days of receiving the County's written request for payment as described in Section 1.4; and

3.2. The County has provided Riverbend a reasonable opportunity to cure the defect not to exceed thirty (30) days.

4. **ALLOWABLE USE OF FUNDS**. Funds provided by Riverbend to the County shall remain in a trust account until such time as the County has secured the balance of other funds necessary to implement the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3. ~~4. ALLOWABLE USE OF FUNDS.~~ The County agrees that the Funds paid by Riverbend pursuant to the terms of this Agreement shall be used only for the purposes of instituting the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3.

5. **RETURN OF FUNDS**. In the event that the Funds are not fully expended on the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3, by the County on or before January 1, ~~2036,~~2037, the County shall return to Riverbend, within sixty (60) days of receipt of Riverbend's written request, all of the then-unexpended Funds.

6. **COUNTY OBLIGATIONS**. All obligations of the County under the terms of this Agreement are subject to the appropriation and allocation of resources by the County Board of Supervisors.

7. **BINDING EFFECT AND ASSIGNMENT**. This Agreement shall be construed as a covenant running with the land and shall bind and benefit the County, its successors and assigns, and Riverbend, and its successors in interest. Riverbend shall have the right to assign this agreement to a third-party.

8. **EXPIRATION OF AGREEMENT**. This Agreement shall expire when the County has expended all of the Funds; the Funds are returned to Riverbend, in whole or in part pursuant to Section 5 of this Agreement; or on January 1, ~~2036,~~2037, whichever occurs first in time.

9. ~~ATTORNEYS~~**ATTORNEY'S FEES**. If any legal action is brought by either Party to interpret or enforce any terms or provisions of this Agreement, the prevailing party shall be entitled to its reasonable attorney fees and costs.

10. **WAIVERS**. Waiver of a breach or default under this Agreement shall not constitute a continuing waiver or a waiver of a subsequent breach of the same or any other provision of this Agreement.

11. **SEVERABILITY**. If a court of competent jurisdiction finds that any provision of this Agreement is invalid or unenforceable, such determination shall not affect the validity and enforceability of any other provision of this Agreement.

12. **INTERPRETATION**. The titles to the sections of this Agreement are for convenience only and shall have no effect upon the construction or interpretation of any part of this Agreement. The Parties agree that this Agreement has been arrived at through negotiation and neither Party is to be deemed the Party which prepared this Agreement ~~for the purposes of California Civil Code Section 1654~~.

13. **ENTIRE AGREEMENT.** This Agreement constitutes the entire agreement of the Parties with respect to the matters set forth herein. This Agreement may be amended only by a written document signed by both Parties.

14. **RECORDATION.** Upon execution of this Agreement, the County shall cause recordation thereof with the County Recorder's Office.

15. **JURISDICTION**. This Agreement shall be administered and interpreted under the laws of the State of California without regard to its choice of law rules. Jurisdiction and venue of litigation arising from this Agreement shall be in the County of Fresno, State of California.

16. **NOTICES**. Notices required by this Agreement shall be personally delivered, mailed, postage prepaid, or mailed via nationally-recognized overnight courier as follows:

Documents for Review and Request for Comments—uCUP 3390

The Department of Public Works and Planning, Development Services Division, is reviewing the subject aggregate mining project submitted by Buada Associates, Inc. on behalf of Riverbend Sand and Gravel, LLC proposing to allow the establishment of an Unclassified Conditional Use Permit (UCUP) and a Reclamation Plan to develop and reclaim an aggregate mine and related processing plant, concrete and asphalt plants, and a recycling plant on 619 acres of a 833-acre site adjacent to the Kings River to be operated by Riverbend Sand and Gravel, LLC ("Operator"). The remaining 214 acres, including the entire existing riparian habitat along the Kings River, are excluded from the Project. The Project site is currently occupied by walnut and olive orchards and grape vineyards with several farm residences nearby. Reclamation of the Project site will create approximately 268 acres of reclaimed farmland and approximately 351 acres of open space, riparian and open water wildlife habitat. Anticipated annual processing of material would be 1.6 million tons/year with annual sales at approximately 1.25 million tons/year.

The site is located approximately 1.5 miles southwest of the City of Sanger between the Kings River and Riverbend Avenue. East Goodfellow Avenue bisects the Project site, which is composed of seven parcels. The Project site is located in Township 14 South, Range 22 East, Sections 25 and 36; Township 14 South, Range 23 East, Sections 19, 30 and 31; and Township 15 South, Range 22 East, Section 1 (Mt. Diablo Baseline and Meridian) on the Sanger and Wahtoke 7.5 minute U.S. Geological Survey (USGS) topographic quadrangles.

NOTE: THE DRAFT ENVIRONMENTAL IMPACT REPORT (DEIR - ENVIRONMENTAL IMPACT REPORT NO. 6606 – STATE CLEARINGHOUSE NO. 2013071097) WAS RELEASED ON JULY 17, 2014 AND MUCH OF THE PROJECT INFORMATION WAS MADE AVAILABLE WITH THAT DOCUMENT WHICH WAS PREVIOUSLY MADE AVAILABLE TO YOUR AGENCY FOR REVIEW UNDER THE PROVISIONS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA).

THE PURPOSE OF THIS ROUTING IS TO SOLICIT ADDITIONAL COMMENTS FROM YOUR AGENCY/ORGANIZATION SPECIFIC TO UNCLASSIFIED CONDITIONAL USE PERMIT NO. 3390.

The Project's Environmental Impact Report - State Clearinghouse No. 2013071097 may also be reviewed for reference purposes at:

http://www.co.fresno.ca.us/departmentpage.aspx?id=54051

The Project's proposed Reclamation Plan may be reviewed for reference purposes at:

http://www.co.fresno.ca.us/ViewDocument.aspx?id=61406

Based upon this review, in conjunction with comments received from the associated Environmental Impact Report, a determination will be made regarding conditions to be imposed on the project, including necessary on-site and off-site improvements.

We must have your comments by **November 3, 2014**. Any comments received after this date may not be used.

NOTE - THIS WILL BE OUR ONLY REQUEST FOR WRITTEN COMMENTS. If you do not have comments, please provide a "no comment" response to our office by the above deadline (e-mail is also acceptable, see email address below).

Please address any correspondence, questions or issues related to Unclassified Conditional Use Permit No. 3390 to me, Eric VonBerg, Senior Planner, Current Planning Unit, Development Services Division, Fresno County Department of Public Works and Planning, 2220 Tulare Street, Sixth Floor, Fresno, CA 93721, or call (559) 600-4569, or email evonberg@co.fresno.ca.us.

Subject: Lead Agency Inspection Notice Pursuant to PRC 2774(b)
Date: December 22, 2017
Mine ID: 91-10-0031

I certify that the surface mining operation is in compliance with SMARA (mining operation is permitted costs, and no violations were cited on the MRRC-1 inspection form*) and does not have a review of its reclamation plan, financial assurances, or an interim management plan pending under subdivision (b), (c), (d), or (h) of Section (2770), or an appeal pending before the board or lead agency governing body under subdivision (e) or (h) of Section 2770. The completed MRRC-1 inspection form and any supporting documentation, including, but not limited to any inspection report prepared by the licensed geologist, civil engineer, landscape architect or forester, who conducted the inspection is attached.

Sincerely,

Glenn Allen, REHS, M.S.
Division Manager

500 0 250 500 1,000

ORIGINAL 1 INCH = 500 FEET

GENERAL NOTES:

1. AGGREGATE TO BE EXCAVATED BY ELECTRIC DRAGLINE AND TRANSPORTED TO PROCESSING PLANT BY LAND CONVEYOR.
2. TECHNOLOGICAL IMPROVEMENTS AND CHANGES ENCOUNTERED IN MINING CONDITIONS MAY DICTATE CHANGES IN MINING METHODS.
3. SLOPES WILL BE MINED AT 2:1 (H:V).
4. EXCAVATION DEPTHS ARE BASED ON THE ESTIMATED DEPTH OF THE AGGREGATE RESOURCE.
5. NO EXCAVATION WITHIN:
   - 25 FT OF ANY PROPERTY LINE
   - 100 FT OF ANY PUBLIC RIGHT-OF-WAY
   - 100 FEET FROM THE TOP OF THE KINGS RIVER BANK, OR 50 FEET FROM THE DESIGNATED FLOODWAY OR THE DRIPLINE OF RIPARIAN VEGETATION OR MATURE OAK TREE
   - WHICHEVER IS GREATER;
6. NO STOCKPILES OF SOIL OR OVERBURDEN WILL BE PLACED CLOSER THAN 25 FT OF ANY PROPERTY LINE EXPCEPT FOR THE VISUAL/SOUND BERMS.
7. LOCATION OF TOPSOIL STOCKPILES IS TYPICAL. SINCE RECLAMATION WILL PROCEED CONCURRENT WITH MINING, TOPSOIL STOCKPILES WILL ROTATE WITH EACH AREA MINED.

9	52	2081	Riparian & Open Water Habitat	2090
Total	**619**			

Note the late anticipated commencement dates for these phases.

[1] Dates are estimates only. Actual excavation and reclamation dates will vary with permit approval date, market demand and actual depth and volume of marketable material.

[2] Gross acres, includes farm roads.

[3] Actual final reclamation of each phase will depend on the volume and availability of overburden and process fines occurring on site.

[4] To be used for portable plant during mining of plant site (Phase 9)

The aggregate processing plant will have an anticipated annual process rate of 1.6 million tons and proposed annual sales of construction aggregate products (rock, sand and gravel) produced by the plant at approximately 1.25 million tons. The aggregate products will be produced to supply a Ready-Mix Concrete (RMC) plant (150,000 cubic yards/year) and a Hot Mix Asphalt (HMA) concrete plant (250,000 tons/year) located on-site or sold to outside customers. The facility will also include periodic use of a portable plant to recycle concrete and asphalt debris (including imported) into Crushed Miscellaneous Base (CMB) (100,000 tons/year) and Recycled Asphalt Product (RAP) (25,000 tons/year). RAP will facilitate use of recycled asphalt in HMA mix designs. Operations are anticipated to ramp-up over a five year period with initial sales in 2015 to be 350,000 tons, sales in 2017 to be 700,000 tons and full operations in 2019 with sales of 1.25 million tons. Total production from the Project Site is estimated to be 90 million tons with total sales estimated to be 70 million tons. Operations are expected be on-going for at least 75 years. A Mine and Reclamation Plan Summary is shown on Table 3.

The plant site will be mined last. Material from plant site will be processed by a portable plant located on Phase 2B, which will have been filled with overburden and processing fines. The portable plant will utilize relocated components of the original processing plant or will be a separate portable processing plant.

Table 3
Mine and Reclamation Plan Summary

Item/Activity	Description[1]
Mining Acres	Approximately 619 acres
Mining Method	Topsoil and overburden removal by scrapers. Wet mining of aggregate by electric dragline. Blasting will not be used.
Mining Depth	Approximately 100 feet below natural ground surface level
Processing	Aggregate processing plant, hot-mix asphalt plant, ready-mix concrete plant, portable plant to recycle concrete and asphalt debris (including imported)
Estimate Aggregate Volume	90 million tons
Estimated Total Sales	70 million tons
Annual Processed Volume	1.6 million tons
Annual Sales Volume	1.25 million tons
Estimated Annual Sales Per Plant[2]	
Aggregate	765,000 Tons
Hot Mix Asphalt	250,000 Tons
Ready-Mix Concrete	150,000 Cubic Yards
Concrete and Asphalt Recycling	125,000 Tons
Depth to Groundwater	15-20 feet below natural ground surface level
Reclamation End uses	
Reclaimed Farmland[3]	Approximately 268 acres
Open Space, Riparian and Open Water Habitat[3]	Approximately 351 acres
Project Life	Approximately 75 years

1. All values are approximate

2. Typical mix of products. Actual sales mix will vary based on demand. Total annual sales of aggregate will not exceed 1.25 million tons

3. Actual final reclamation and areal extent of each end use will depend on the volume and availability of overburden and process fines suitable for use as fill occurring on site.

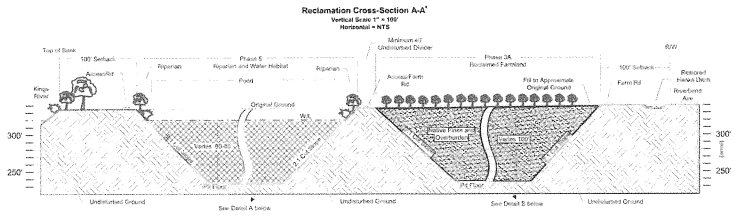
As previously described an aggregate mining and processing site adjacent to the project site, i.e. to the east and southeast of Riverbend proposed Phases 6A, 6B and 7, currently operates under Fresno County CUP 3052. In the future operators of CUP 3052 may be interested in an agreement with Riverbend to mine Phases 6A, 6B and 7 and process the excavated material at the CUP 3052 plant. If such an agreement were made, and if CUP 3052 were amended to import material from the Riverbend site, the aggregate in the Riverbend proposed Phases 6A, 6B and 7 would be excavated by an electric dragline and transported to the CUP 3052 plant by overland conveyor for processing in the same manner as if it was mined by Riverbend and conveyed to the Riverbend aggregate plant.

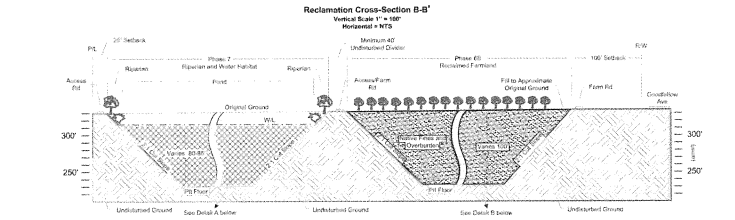
Riverbend's own Operational Statement discusses amending UCUP 3052.

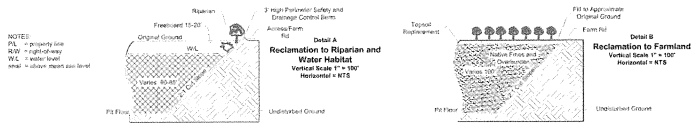
B. Reclamation Plan

The reclamation plan (Exhibit F) is designed to return as much land as possible back to farmland. Overburden together with processing fines will be used to fill selected phases. The filled phases will be topped with three feet of topsoil and reclaimed back to farmland to approximate original grade. Approximately 268 acres are anticipated to be reclaimed as farmland in this manner. The reclaimed lands would be reclaimed to farmland of equal or better quality of that currently existing on the site.

Prime agricultural land on the Project site, as classified by US Natural Resources Conservation Service, includes Grangeville fine sandy loam and Hanford fine sandy loam (Hm). For such prime land, where distinct soil horizons are present, topsoil will be salvaged and stockpiled by defined A, B, and C soil







Reclamation End Uses and Estimated Schedule[1]

Phase	Acres[2,3] Pre-Mining	Farmland	Open Water	Riparian	Complete Reclamation
1A	23	23			2028
1B	18	18			2032
2A[4]	27	27			2043/2090
2B	27		23	4	2026
3A	67	67			2054
3B	68	68			2090
4A	38		34	4	2050
4B	29		26	3	2053
5	37		33	4	2090
6A	34	34			2069
6B	31	31			2083
7	80		73	7	2072
8A	44		41	3	2077
8B	44		39	5	2083
9	52		49	3	2090
Totals	**619**	**268**	**318**	**33**	

[1] Dates are estimates only. Actual excavation and reclamation dates will vary with permit approval date, market demand and actual depth and volume of marketable material.
[2] Gross acres, includes farm roads.
[3] Actual final reclamation and areal extent of each end use will depend on the volume and availability of overburden and process fines suitable for use as fill
[4] To be used for portable plant during mining of plant site (Phase 9)

Some of these phases may still be subject to a Williamson Act Contract; so timing of non-renewal is critical for the operator.

Subject: RE: Request for meeting to discuss CUPs 3052 and 3390

Glenn,

See attached which are excerpts from Riverbend's Operational Statement approved in 2015. The following are some potential issues:

- Language in the statement indicates UCUP 3052 would need to be amended to accommodate this request.
- The timing for mining these proposed phases wasn't anticipated to start for over 30 years.
- The operator of UCUP 3052 would inherit many of the requirements for UCUP 3390 including berming, landscaping, mitigation monitoring agreements with retention of a 3rd party, etc.
- While it doesn't appear the parcels associated with Phases 6A, 6B and 7 are subject to a Williamson Act Contract, we should still confirm the locations and APNs with proposed operator.

I think it would be a good idea to have an internal meeting before we discuss with CMI representatives.

Chris

Subject: FW: Request for meeting to discuss CUPs 3052 and 3390

Good morning,

Terry Marshall contacted me last week to inquire regarding the information below and would like to schedule a meeting to discuss. Can you look into the request on the CUP side of things and them maybe we could discuss internally before scheduling the requested meeting? I got the feeling they were on a tight time line and would like to meet sooner than later.

Thanks,

Subject: Request for meeting to discuss CUPs 3052 and 3390

Hello Glenn, thanks for taking a few minutes with me this morning to briefly discuss CUPs 3390 and 3052. As I mentioned CMI (CUP 3052) is in discussions with Riverbend Sand and Gravel (CUP 3390) to mine several phases south of Goodfellow Avenue; possibly all phases depending on negotiations. The EIR for CUP 3390 included the option for Calaveras Materials Inc. to mine several phases south of Goodfellow Avenue.

The purpose of a meeting is to discuss with the County any steps that may be necessary to ensure we are all covered should CMI proceed with mining material from 3390 then transporting it to the adjacent CMI processing plant covered under 3052. We can discuss the details when we meet but in general, here are the basics:

1) At this time, we are not proposing to increase throughput or production beyond that of the limits of CMI's permit. Should the future market be favorable, we would increase it to the limits of Riverbend's permit limit of 1.25mt.
2) Riverbend would not construct a plant; therefore, potential environmental impacts would be less than half of what was contemplated by both EIRs.
3) There would be no new environmental conditions created by the proposal; i.e., no new impacts above and beyond analyzed in either CUP EIR's.

Thank you and please let me know when you may be available for a meeting.

We can discuss the details when we meet but in general, here are the basics:

1) At this time, we are not proposing to increase throughput or production beyond that of the limits of CMI's permit. Should the future market be favorable, we would increase it to the limits of Riverbend's permit limit of 1.25mt.
2) Riverbend would not construct a plant; therefore, potential environmental impacts would be less than half of what was contemplated by both EIRs.
3) There would be no new environmental conditions created by the proposal; i.e., no new impacts above and beyond analyzed in either CUP EIR's.

Thank you and please let me know when you may be available for a meeting.

Date: Monday, April 2, 2018 2:25:32 PM
Attachments: Pages from Riverbend Staff Report Final.pdf

Glenn,

See attached which are excerpts from Riverbend's Operational Statement approved in 2015. The following are some potential issues:

- Language in the statement indicates UCUP 3052 would need to be amended to accommodate this request.
- The timing for mining these proposed phases wasn't anticipated to start for over 30 years.
- The operator of UCUP 3052 would inherit many of the requirements for UCUP 3390 including berming, landscaping, mitigation monitoring agreements with retention of a 3rd party, etc.
- While it doesn't appear the parcels associated with Phases 6A, 6B and 7 are subject to a Williamson Act Contract, we should still confirm the locations and APNs with proposed operator.

I think it would be a good idea to have an internal meeting before we discuss with CMI representatives.

Good morning,

Terry Marshall contacted me last week to inquire regarding the information below and would like to schedule a meeting to discuss. Can you look into the request on the CUP side of things and them maybe we could discuss internally before scheduling the requested meeting? I got the feeling they were on a tight time line and would like to meet sooner than later.

Thanks,

Subject: Request for meeting to discuss CUPs 3052 and 3390

Hello Glenn, thanks for taking a few minutes with me this morning to briefly discuss CUPs 3390 and 3052. As I mentioned CMI (CUP 3052) is in discussions with Riverbend Sand and Gravel (CUP 3390) to mine several phases south of Goodfellow Avenue; possibly all phases depending on negotiations. The EIR for CUP 3390 included the option for Calaveras Materials Inc. to mine several phases south of Goodfellow Avenue.

The purpose of a meeting is to discuss with the County any steps that may be necessary to ensure we are all covered should CMI proceed with mining material from 3390 then transporting it to the adjacent CMI processing plant covered under 3052. We can discuss the details when we meet but in general, here are the basics:

1) At this time, we are not proposing to increase throughput or production beyond that of the limits of CMI's permit. Should the future market be favorable, we would increase it to the limits of Riverbend's permit limit of 1.25mt.
2) Riverbend would not construct a plant; therefore, potential environmental impacts would be less than half of what was contemplated by both EIRs.

EXHIBIT 122

From: Patrick Mitchell
To: Roberson, Kyle
Cc: Wille, Arthur; Anne Badasci
Subject: RE: Riverbend Traffic Mitigation Agreement
Date: Wednesday, August 22, 2018 12:45:03 PM

Kyle,

It is the Riverbend Sand and Gravel Mine out by the Kings River. The site is south of 180, a few miles west of Reed Avenue, and east of the river. The project was approved by Fresno County in the past few years and project development has been ongoing. The Traffic Mitigation Agreement with the county is one of the mitigation requirements for the project.

I have been involved since the beginning so if you need any additional info I'd be glad to provide it to you.

Thanks
Pat

Hi Kyle,

Following up on this, please find attached the Traffic Mitigation Agreement. If possible, can you let me know if you have an idea when we can expect your revisions or comments? Within the next couple of weeks would be great, so that Riverbend can move forward with the project as expeditiously as possible.

Thank you,

Anne Badasci

Good morning Anne,

Yes. I have taken over the land use assignment from Art. At this stage, it is not necessary to CC anyone else with the County. I would like to review your proposed agreement and I will forward it to staff as necessary.

If I may ask, what project is this agreement related? Is there an open application submitted by your client for discretionary approvals from the County?

Respectfully,

Subject: Riverbend Traffic Mitigation Agreement

Good afternoon Kyle,

I'm working with Pat Mitchell, who represents Riverbend Sand and Gravel. We have a finalized copy of the traffic mitigation agreement (an earlier copy was sent in early 2017, so this one has revisions incorporated). Art Wille shared your contact info with me; if you could let me know if 1) you are the

appropriate person to send the agreement on to, and 2) if there are any other parties who should be CC'd on that submission, that would be super helpful!

Thanks so much, and don't hesitate to call with any questions,

Anne Badasci

Hi Kyle,

Just wanted to check in on the status of your review of the Traffic Mitigation Agreement. We'd appreciate your comments as soon as possible so we can continue moving on the project.

Thanks,

Anne Badasci

Hi Kyle,

Following up on this, please find attached the Traffic Mitigation Agreement. If possible, can you let me know if you have an idea when we can expect your revisions or comments? Within the next couple of weeks would be great, so that Riverbend can move forward with the project as expeditiously as possible.

Thank you,

Anne Badasci

Good morning Anne,

Yes. I have taken over the land use assignment from Art. At this stage, it is not necessary to CC anyone else with the County. I would like to review your proposed agreement and I will forward it to staff as necessary.

If I may ask, what project is this agreement related? Is there an open application submitted by your client for discretionary approvals from the County?

Subject: Riverbend Traffic Mitigation Agreement

Good afternoon Kyle,

I'm working with Pat Mitchell, who represents Riverbend Sand and Gravel. We have a finalized copy of the traffic mitigation agreement (an earlier copy was sent in early 2017, so this one has revisions incorporated). Art Wille shared your contact info with me; if you could let me know if 1) you are the appropriate person to send the agreement on to, and 2) if there are any other parties who should be CC'd on that submission, that would be super helpful!

Thanks so much, and don't hesitate to call with any questions,

Anne Badasci

Exhibit B Mitigation Measures.pdf

Pat,

Attached is the traffic mitigation agreement with my revisions and comments. We are close. However, the point of concern from the County is tethering the payment of bonds to prior to the first day of sale of material from the Project. This would be difficult for the County to confirm. I suggest the threshold to be prior to the submittal of Site Plan Review. I also have concerns regarding the timing for the bonds in your Exhibit B-3 to be prior to August 1, 2033. This date is too far into the future. I suggest we breakdown issuance of the these bonds to sequential project milestones.

I have also attached the Mitigation Measures Trans-1, Trans-2 and Trans-3 as the example of the new Exhibit B I propose to include the agreement.

TRAFFIC MITIGATION AGREEMENT (COUNTY FAIR SHARE) FOR RIVERBEND MINE AND RECLAMATION PLAN

THIS AGREEMENT is entered into on [Month] __, 2018 on the last date signed below ("Effective Date") between the County of Fresno, a political subdivision of the State of California, acting through its Department of Public Works & Planning, Development Services Division ("County"), and Riverbend Sand and Gravel LLC ("Riverbend"), upon the following facts and circumstances:

RECITALS

A. WHEREAS, Riverbend proposes to construct, operate, and reclaim an aggregate mine, and related processing, asphalt, ready mix concrete, hot mix asphalt plant, and portable asphalt and concrete recycling plant on 619 acres of land located in Fresno County, more commonly known as the Riverbend Sand and Gravel Project ("Project"), which will be located on certain real property more particularly described in **Exhibit A**, attached hereto and incorporated herein by reference.

B. WHEREAS, on February 26, 2015, pursuant to County Resolution, subject to the conditions listed therein, the Fresno County Planning Commission certified an Environmental Impact Report ("EIR") for the Project (State Clearinghouse No. 2013071097), approved Unclassified Conditional Use Permit No. 3390, and adopted the CEQA findings, the mitigation measures, the Mitigation Monitoring and Reporting Program and the statement of overriding considerations.

C. WHEREAS, on May 19, 2015, the Board of Supervisors hearing on appeal from the Planning Commission was taken off calendar because the appellant withdrew his appeal.

D. WHEREAS, as part of the EIR for the Project, a Traffic Impact Study ("TIS") was prepared by VRPA Technologies, Inc. in March 2014 and revised in July 2014 and included in the EIR as Appendix K, which describes the potential traffic and circulation impacts associated with the Project.

E. WHEREAS, the TIS and the EIR indicated that the Project would increase vehicle trips on public roads and could contribute to unacceptable levels of service on Fresno County roadways segments and at intersections ("Impacts"), which Impacts were considered potentially significant.

F. WHEREAS, Mitigation Measure TRANS-1 of the EIR and the Monitoring Plan also identified specific mitigation measures to mitigate for the Project's Impacts, specifically that Riverbend would contribute Riverbend's Pro Rata Share ("Pro Rata Share") of the total anticipated costs to the County for level of service ("LOS") improvements related to capacity required at the following intersections and road segment ("LOS Improvements") as follows:

i. McCall Avenue / Jensen Avenue Add Eastbound Left Turn Lane and Right Turn Lane, Westbound Right Turn Lane, Northbound Left Turn Lane, Through Lane and Right Turn Lane, and

Southbound Left Turn Lane, Through Lane and Right Turn Lane – 8.5%

ii. McCall Avenue / North Avenue Signalization – 18.6%
iii. Academy Avenue / Central Avenue Signalization – 17.8%
iv. McCall Avenue / Central Avenue Signalization – 23.0%
v. McCall Avenue / SR 180 Add Northbound Through Lane and Right Turn Lane, and Southbound Through Lane and Right Turn Lane – 10.0%
vi. McCall Avenue / SR 180 Add Northbound Left Turn Lane – 100%
vii. McCall Avenue from SR 180 to Jensen Avenue add Northbound Travel Lane and Southbound Travel Lane – 16.3%
viii. McCall Avenue from Jensen Avenue to North Avenue Northbound Travel Lane – 37.7%

G. WHEREAS, the TIS and Mitigation Measure TRANS-3 of the EIR and Monitoring Plan also identified specific mitigation measures to mitigate for the Project's Traffic Index Impacts, specifically that Riverbend would contribute Riverbend's Pro Rata Share to the County for improvements related to the structural section of the impacted street segments ("Structural Improvements"):

i. Central Avenue Segments
    a. McCall Avenue to Bethel Avenue – 46.0%
    b. Bethel Avenue to Academy Avenue – 42.4%
    c. Academy Avenue to Newmark Avenue – 39.1%
ii. Goodfellow Avenue Segments
    a. Newmark Avenue to Bridge – 40.3%
    b. Bridge to Riverbend Avenue – 40.3%
iii. McCall Avenue Segments
    a. SR 180 (Kings Canyon) to Jensen Avenue – 61.4%
    b. Jensen Avenue to North Avenue – 66.7%
    c. North Avenue to Central Avenue – 73.8%

As set forth herein, Riverbend's Pro Rata Share payment amounts ("Funds") for each LOS Improvement and Structural Improvement (collectively, "Improvements") were determined based on the actual total cost of each Improvement multiplied by Riverbend's Pro Rata Share.

H. WHEREAS, except for those amounts specified to be paid in cash or equivalent, Riverbend shall obtain bonds for the estimate of the Funds, and will remit to the County the actual cost of Riverbend's Pro Rata Share of the Improvements approximately twelve months before the actual construction of each particular Improvement.

I. WHEREAS, the intersection at McCall Avenue and SR 180 shall be considered a County proposed project, thus PG&E should not charge for the necessary relocation of the existing utilities, including PG&E poles or towers.

J. WHEREAS, in accordance with Mitigation Measure TRANS-2 of the EIR and Monitoring Plan, Riverbend shall be 100% responsible for building the entrance to the Project.

K. WHEREAS, Mitigation Measures TRANS-1 and TRANS-3, as conditions of Project approval, require Riverbend to enter into a traffic mitigation agreement with the County as adopted as EIR, each of which is set forth in Exhibit "B," which are attached hereto and incorporated herein by reference.

NOW, THEREFORE, in consideration of the foregoing recitals and for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Riverbend and the County (collectively "Parties," individually "Party") agree as follows:

AGREEMENT

1. **PAYMENT**. Riverbend shall provide the County with payment or surety bonds as set forth in **Exhibit C** and described below:

1.1 Prior to submittal of a Site Plan Review for the Project payment of $217,588 in full satisfaction of Riverbend's fair share contributions to the addition of northbound and southbound through lanes at McCall Avenue and Jensen Avenue, the addition of a southbound right turn lane at McCall Avenue at SR 180, the addition of a westbound right turn lane at McCall Avenue at Jensen Avenue, and the installation of a traffic signal at Academy Avenue at Central Avenue as set forth in **Exhibit C-1**, attached hereto and incorporated by this reference.

1.2 Prior to submittal of a Site Plan Review for the Project, a surety bond issued to County on behalf of Riverbend by a surety authorized to transact business and issue surety bonds in the State of California for $1,709,000 in full satisfaction of its Pro Rata Share for the McCall Avenue / SR 180 Northbound Left Turn Lane Improvement as set forth in **ExhibitC-2**, attached hereto and incorporated by this reference

1.3 For all other Improvements, Riverbend shall obtain and provide to the County one or more surety bonds issued to the County on behalf of Riverbend by a surety authorized to transact business and issue surety bonds in the State of California in the amounts set forth in **ExhibitC-3**, attached hereto and incorporated by this reference. The surety bonds identified in subsections 1.2 and 1.3 are referred to collectively referred to as "Bonds." Riverbend shall provide the Bonds to the County on or before August 1, 2033. The Bonds shall be in an industry-standard format.

1.4 The County shall provide written notice to Riverbend twelve (12) months prior to construction of the particular Improvement(s), and Riverbend shall pay its actual Pro Rata Share for the noticed Improvement within sixty (60) days of receiving said notice. Within ten (10) days of receiving Riverbend's payment, the County shall release the applicable Bond amount.

2. **SATISFACTION**. The County hereby acknowledges that upon the execution of this Agreement, Riverbend's submission of the payments described under Section 1.2, the Bonds, and later actual payments for the Improvements, Riverbend will have satisfied its mitigation obligations to the County for Project Impacts as required by Mitigation Measures TRANS-1 and TRANS-3.

3. **ALLOWABLE USE OF BONDS**. The County shall not submit a claim on a Bond, or otherwise indirectly or directly cause a Bond to be released or remitted to the County, until all of the following occur:

3.1 Riverbend has not paid the actual Pro Rata Share for the noticed Improvement within sixty (60) days of receiving the County's written request for payment as described in Section 1.4; and

3.2. The County has provided Riverbend a reasonable opportunity to cure the defect not to exceed thirty (30) days after the sixty (60) day period to remit payment of the actual Pro Rata Share

4. **ALLOWABLE USE OF FUNDS**. Funds provided by Riverbend to the County shall remain in a trust account until such time as the County has secured the balance of other funds necessary to implement the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3. The County agrees that the Funds paid by Riverbend pursuant to the terms of this Agreement shall be used only for the purposes of instituting the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3.

5. **RETURN OF FUNDS**. In the event that the Funds are not fully expended on the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3, by the County on or before August 1, 2037, the County shall return to Riverbend, within sixty (60) days of receipt of Riverbend's written request, all of the then-unexpended Funds.

6. **COUNTY OBLIGATIONS**. All obligations of the County under the terms of this Agreement are subject to the appropriation and allocation of resources by the County Board of Supervisors.

7. **BINDING EFFECT AND ASSIGNMENT**. This Agreement shall be construed as a covenant running with the land and shall bind and benefit the County, its successors and assigns, and Riverbend, and its successors in interest. Riverbend shall have the right to assign this agreement to a third-party.

8. **EXPIRATION OF AGREEMENT**. This Agreement shall expire when the County has expended all of the Funds; the Funds are returned to Riverbend, in whole or in part pursuant to Section 5 of this Agreement; or on August 1, 2037, whichever occurs first in time.

9. **ATTORNEY'S FEES**. If any legal action is brought by either Party to interpret or enforce any terms or provisions of this Agreement, the prevailing party shall be entitled to its reasonable attorney fees and costs.

10. **WAIVERS**. Waiver of a breach or default under this Agreement shall not constitute a continuing waiver or a waiver of a subsequent breach of the same or any other provision of this Agreement.

11. **SEVERABILITY**. If a court of competent jurisdiction finds that any provision of this Agreement is invalid or unenforceable, such determination shall not affect the validity and enforceability of any other provision of this Agreement.

12. **INTERPRETATION**. The titles to the sections of this Agreement are for convenience only and shall have no effect upon the construction or interpretation of any part of this Agreement. The Parties agree that this Agreement has been arrived at through negotiation and neither Party is to be deemed the Party which prepared this Agreement.

13. **ENTIRE AGREEMENT.** This Agreement constitutes the entire agreement of the Parties with respect to the matters set forth herein. This Agreement may be amended only by a written document signed by both Parties.

14. **RECORDATION.** Upon execution of this Agreement, the County shall cause recordation thereof with the County Recorder's Office.

15. **JURISDICTION**. This Agreement shall be administered and interpreted under the laws of the State of California without regard to its choice of law rules. Jurisdiction and venue of litigation arising from this Agreement shall be in the County of Fresno, State of California.

16. **NOTICES**. Notices required by this Agreement shall be personally delivered, mailed, postage prepaid, or mailed via nationally-recognized overnight courier as follows:

Kyle,

In response to your email to me dated November 2, 2018 please be advised as follows.

1. The site plan was already approved by Fresno County on September 14, 2015 so we cannot use the future site plan approval as a reference date.
2. Instead we have pegged the early dates to the final building permit review signoff.
3. In addition, we believe that the annual county SMARA inspection will indicate to the county once sales have commenced. In any event, we have added interim dates to Exhibit C-3 as you requested in your email and in your comment in the document.

I enclose a redline and clean of the document.

Please review and advise.

Thanks,
Pat

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

State Prevailing Wage Rates (SPWR) ((General Prevailing Wage Determination Made by the Director of Industrial relations, Pursuant to California Labor Code Part 7, Article 2, Sections 1770, 1773, and 1773.1), effective through mid-2019

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

CalTrans Equipment Rates (Labor Surcharge and Equipment Rental Rates (Cost of Equipment and Ownership)), effective April 1, 2017 through March 31, 2019.

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Handbook (Caterpillar Performance Handbook, Edition 47) to determine equipment capacity and cycle times.
RS Means Heavy Construction Cost Data, 30 th Annual Edition, 2018 (Means);
Third party cost estimates;.

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2019.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2019, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2019. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease •

The reclamation cost for the site was calculated to be $ 259,309. The previous reclamation cost estimate was $196,901

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2019 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost

				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913

					-
				Total	**-**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal

Miscellaneous plant equipment, parts and rubishe must be removed

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Site Grading	
Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2019. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:
- Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
- Prepare annual report (biologist, 4 hours).

Dear Ms. Law:

SUBJECT: Riverbend Sand and Gravel Site (#91-10-0031)
45-Day Financial Assurance Estimate Director Review

Attached for your review and comment is the Riverbend Sand and Gravel site (#91-10-0031) Financial Assurance Cost Estimate (FACE). Fresno County, as lead agency, has reviewed the FACE and determined it to be adequate and consistent with the requirements provided in the Surface Mine and Reclamation Act Sections 2770 and 2773.1.

If you have any questions or need further information, please feel free to contact me by telephone at (559) 600-4251 or by e-mail at rjjimenez@fresnocountyca.gov.

Sincerely,

Roy Jimenez Jr., Planner

Date: 2015

Amount: $ 196,901

Amount of existing Financial Assurance Mechanism(s)

Date:

Amount: $

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

State Prevailing Wage Rates (SPWR) ((General Prevailing Wage Determination Made by the Director of Industrial relations, Pursuant to California Labor Code Part 7, Article 2, Sections 1770, 1773, and 1773.1), effective through mid-2019

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

CalTrans Equipment Rates (Labor Surcharge and Equipment Rental Rates (Cost of Equipment and Ownership)), effective April 1, 2017 through March 31, 2019.

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Handbook (Caterpillar Performance Handbook, Edition 47) to determine equipment capacity and cycle times.
RS Means Heavy Construction Cost Data, 30 th Annual Edition, 2018 (Means);
Third party cost estimates;.

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2019.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2019, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2019. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease •

The reclamation cost for the site was calculated to be $ 259,309. The previous reclamation cost estimate was $196,901

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2019 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Demo Structures	Grove RT 625 40t Crane	1	80.00	68.43	5,474

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	85	Tons	22.5	1,913
				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913
Total	**5,571**

Task V.4 - Mobile Equipment Removal

Mobile equipment mau incude CAT 140 Motorgrader, CAT 980 Front End Loader, Cat 349 Excavator, Kamatsu 750 Excavator, CAT D9 Dozer, CAT Skid Steer, Ford F-650 Water Truck, Volvo A40E Haul Truck, JLG Skytrak Forklift

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Load Equipment	Grove RT 525 40t Crane	1	5	59.50	298
Haul Truck	Semi Truck	2	12	69.24	1,662
Haul Small Equip.	3-axle Lowbed trailer	1	6	23.36	140
Haul Large Equip.	6-axle Lowbed Trailer	1	6	64.29	386
Pilot Car	Pilot Car	1	6	22.02	132
				Total	**2,617**

Source: *CalTrans Labor Surcharge and Equipment Rental Rates*

Source: *State of California Prevailing Wage Rate Determinations - Northern California*

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal

Miscellaneous plant equipment, parts and rubishe must be removed

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 7 loads (175 tons) of miscellaneous plant equipment and rubbish may be located around the site. it is assumed that all equipment and rubbish will be loaded into an end dump trailer and hauled to the County Landfill. Each load will require approximately two hours including loading, unloading, and travel time.

Total Cost Summary

Item	Cost
Equipment	2,422
Labor	2,836
Other Costs	3,938

				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Site Grading	
Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

					-
				Total	-

Assumptions and Calculations

Production rates for a D9 bulldozer equipped with a V-blade equipment used to are derived from the methods identified in the Caterpillar Handbook. This production estimate assumes a D9R Dozer with an average production rate of 3.0 acres/hr. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	4,888
Labor	2,410
Other Costs	0
Total	**7,298**

Task VI.2 Finish Grading

Finish grading will be required in order to prepare the 52-acre plant site for revegetation.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Ripping	CAT 160H Motor Grader	1	18	92.22	1,660

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2019. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067
				Total	**1,067**

C. Material Costs

Activity	Seed Species	Common Name	% of Mix	Lbs in Mix	Price/lb	Extension
Seed Mix	*Bromus mollis*	Blando Brome	30	390		
	Vulpia myros	Zorfro Annual Fescue	25	325		
	Trifolium hurtium	Hykon Rose Clover	45	585		
			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Equipment	Quantity	Hours	Years	$/Hour	Cost

					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:
- Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
- Prepare annual report (biologist, 4 hours).

Rhonda Law, Reporting Unit Analyst
California Department of Conservation
Office of Mine Reclamation
801 K Street, MS 0906
Sacramento, CA 95814

Dear Mrs. Law:

SUBJECT: Lead Agency Inspection Notice Pursuant to PRC 2774(b)
Date: October 2, 2018
Mine ID: 91-10-0031

I certify that the surface mining operation is in compliance with SMARA (mining operation is permitted costs, and no violations were cited on the MRRC-1 inspection form*) and does not have a review of its reclamation plan, financial assurances, or an interim management plan pending under subdivision (b), (c), (d), or (h) of Section (2770), or an appeal pending before the board or lead agency governing body under subdivision (e) or (h) of Section 2770. The completed MRRC-1 inspection form and any supporting documentation, including, but not limited to any inspection report prepared by the licensed geologist, civil engineer, landscape architect or forester, who conducted the inspection is enclosed.

Sincerely,

Roy Jimenez, Jr., Planner
Water and Natural Resources Division

Kyle,

Here is a redline of the traffic mitigation agreement comparing the 2017 version to the 2016 version. As you can see, the primary changes related to the bonding issue.

My client would really like to get this agreement final and signed by both Riverbend and Fresno County.

Please let me know when you think we can make that happen.

Thanks
Pat

Thanks Chrissy,
Chris says we should try alternative EIR/Consultant List process.
Thanks,
mm

Subject: Third Party Monitoring Processes

Hi Marianne,

I took a look through a couple of the more recent EIR projects that we've processed and in every case an exemption from the RFP process was used. I couldn't find any justification for EIR 6174 Carmelita, but Riverbend and Tranquillity refer back to the Agenda Item which authorized the alternate EIR process.

Here are my notes from that research:

> **Unclassified Conditional Use Permit (UCUP) No. 3390 and Environmental Impact Report (EIR) No. 6606 Riverbend Sand and Gravel:** Exempted from RFP process by administrative policy 36 based on a determination that the best interest of the County would not be served by security competitive bids because "AN RFP was done for the original proposal. The project has since been approved and one of their conditions of approval in the Mitigation Monitoring and Reporting Program is to pay for a 3rd party administrator so that County staff doesn't have to do the monitoring." They further reference the Alternative EIR process (BOS item #24 at the 2/24/14 Hearing "item #24") as justification for selecting someone off the consultant list.
>
> > *Side note: Item #24 authorizes applicants to select an EIR consultant of their choice from our Consultant List in lieu of RFP. The wording isn't explicit about whether or not the alternative process would extend to additional contracts required by the EIR (such as these), but that seems to have been the interpretation thus far.*
>
> **Unclassified Conditional Use Permit (UCUP) No. 3287 and Environmental Impact Report (EIR) No. 6174 Carmelita Resources-Gerawan Farms:** the AI had this to say: "Colony Land shall be solely responsible for selection of the Administrator and by February 1st of each year starting in 2015, submit to the County proof that Colony Land has paid for the Administrators services for the preceding year as contemplated by the Agreement." The suspension of competition indicates that "the intent of the condition of approval for the 3rd party administrator is that they would be chosen by the applicant"
>
> **Unclassified Conditional Use Permit (UCUP) No. 3451 and Environmental Impact Report (EIR) No. 6730 Tranquillity 1:** RFP was done for the original proposal, reference Item #24 to allow

applicants to select the consultant of their choice. For Tranquillity 8, the RFP was exempted because the applicant proposed to hire the same monitor as Tranquillity 1.

Subject: Riverbend Sand and Gravel Project - Traffic Mitigation Agreement

Good afternoon Patrick,

Attached is the revised Traffic Mitigation Agreement. Fresno County Public Works and Planning, Design Division staff reviewed the traffic mitigation obligations listed the agreement against the County's identified mitigation obligations for this project. As part of this review, staff recalculated Riverbend's total traffic mitigation obligation to be $5,505,722, which is lower than the current total of $5,603,558 listed in the agreement. Attached along with the revised agreement is County staff's table for the breaking down Riverbend's various improvement obligations with staff's recalculations in red.

Please contact me if you would like to discuss any of the revisions or comments listed in the attached draft agreement.

Respectfully,

Kyle R. Roberson

Kyle,

We have accepted the County's proposed changes and revised the agreement per the County's Mitigation Fees Table and County suggestions. We also propose to attach the Mitigation Fees Table as Exhibit C-4. Please find attached a redline and clean copy of the agreement. Riverbend is ready to execute the revised agreement.

Please let us know if you have any questions.

EXHIBIT 147

F Daniele - List of Outstanding Items - Rev 06-06-19	
Road Maintenance Agreements	
Central USD	For water line on McKinley between high school and elementary school (Dickenson to Jameson). Dealing with QK Inc as engineer (Initially Fred Lusk, then Leonard Brum). Had a "final" agreement as reviewed by Jane Smith in County Counsel. Upon her departure, a new direction was taken for these road repair agreements with Brian Melikian. Likely need to change project info on sample agreement for Double L and forward or route to Central USD. Project construction has already been completed under permit. See 4510RdMaint folder under FDaniele/Agenda Items/Agreements/Central Unified SD.
Washington USD	For water line on Lincoln between high school and elementary school. Also Fig/Lincoln improvements that include some street lights in the County right of way. Believe they might be maintained by Easton CSD. County has an existing Agreement with Washington USD for initial improvements (Phase 1). Phase 2 - more street work. Need to amend or develop new agm't for the water line (Phase 3) and street light improvements for stadium paving (Phase 4). Alan Mok Engineering for Phase 4 still in plan review. Similar scenario for agm't as Central USD. See 4510RdMaint/FDaniele/Agenda Items/Agreements/Washington Unified SD. See permit file for engineer and contractor info.
City of Fresno	Admin and County Counsel supposed to be working on master agreement for encroachments.
	Directors to be given authority to add projects to exhibit. Believe draft rests with County Counsel. Should recapture and replace any existing agreements on road maintenance for various city projects, e.g. Belmont raw water line, recycled water, etc.
Westlands Water District	For construction of irrigation line in road right of way for Washoe Avenue (Malaga alignment to Central alignment plus tie-in at Washoe/North intersection). This portion of Washoe is a dirt road. WWD reviewing draft agm't based upon Double L agm't. They are supposed to submit proposal for suggested revisions to agm't. Contact at Westlands WD is Antonio Solorio (asolorio@westlandswater.org). See 4510RdMaint folder for Referrals\Westlands Water District\Lateral Interconnect on Washoe.
Fresno Irrigation District	FID\Dry Creek Canal Pipeline.
	Pipeline is part of Fresno County Stream Group maintenance agreement. County share in cost for replacement?? See two hard copy files about FID stream group. Nadia also has a whole box of files on the Stream Group. See 4510RdMaint directory for Referrals - FID\Dry Creek Canal Pipeline. Proposal is to relocate pipelines in the vicinity of North and Del Norte Avenues.
Fresno Irrigation District	FID wants ditch relocation for Temperance R-O-W north of Belmont. Temporary relocation for sub'd improvements.
	Waiting to hear back from FID re: fee title of ditch area and invalidation of previous irrevocable road easement offer. This work is associated with City of Fresno subdivision (Tract 5434). See 4510RdMaint\Referrals - City of Fresno\2012-2018\TT5434 - NEC Temperance-McKinley.
Land Use Application Reviews	
Little Bear Solar Project	Transportation Management Plan submitted to Dev Services for review. Should be routed through RMO also.
	Proponent is supposed to overlay 1-mile of California Avenue (Derrick to Ohio) and maintain 2-mile frontage on
	California Avenue (includes Ohio to San Benadino) throughout project construction period. These mitigations
	should be set forth in an Agreement (by Dev Svcs), but status of agreement is unknown. Engineer for Little Bear Solar recently submitted a construction plan for the overlay of California Avenue, which is the traffic mitigation for the project.
Riverbend Sand & Gravel	Traffic mitigation agreement to be reviewed. Re: CUP 3390. Agreement is different than others in that it commits the County to construct improvements with the applicant only providing their fair share of the cost. Other agencies would typically require the applicant to construct the improvemnts if they were an opening day mitigation and then enter into a reimbursement agreement with the agency. This decision was by Dev Svcs and County Counsel over the objection of Transportation Planning and Road Maintenance. Applicant is also proposing to put up the bond for the work the day before they open, leaving the responsibility for the timing of the design and construction for the mitigation up to the County. PG&E Transmission pole likely not eligible for relocation under franchise provisions.
Derrel's Mini Storage (Shaw-McCall)	Re: CUP 3618. Revised traffic impact study (5-31-19) submitted by applicant (6-7-19) for review by Transportation Planning and Road Maintenance.
Plan Check Reviews	Plan check reviews are coordinated through the permit engineer. A database is available to review status of plan checks. The projects are tracked on the basis of who the design engineer is. Current plan checks for FLD review will be completed before departure.
City of Fresno/Clovis USD	Shields/Locan traffic signal and paving plan. Shields/DeWolf TS and paving plan.
City of Fresno/Willdan Engr	Traffic signal at Clinton/Valentine (labeled as 100% submittal) is in need of a lot of work.
Fresno Humane Society	Received 4th submittal on 6-6-19. Engineer is Hal Lore (Lore Engineering).
Agenda Items	
Right-of-Way	No outstanding agenda items. Process is being transferred to Design Division. Right of way items are in blue folders on FLD desk and/or brown box adjacent thereto.
Tract 5587 - Brawley & McKinley	Have a legal description and proposed deed from Yamabe & Horn, but no fee and no letter from City of Fresno.
Washinton USD - Lincoln & Fig	Have a legal description and proposed deed from Alan Mok. Deed County road to County. No action needed from Board, other than acceptance by Director after road easement is signed by Washington USD.
Road Closure SOP	Apparently this item has been dropped from the Master Fee Schedule update and will instead be handled through the permitting process and specific project agreements.
Traffic Control Plan Reviews	
SR 180 Phase 3 Extension	Road closures for Oliver, Trimmer Springs, Rio Vista, Piedra, Reed and Frankwood. Phased approach.
	Rio Vista is currently closed. Trimmer Springs is closed permanently.
Speed Ordinance Studies	FLD has signed speed studies that have been prepared and are set to go to Board on 6-18-19 for first reading. 2nd reading is 8-6-19.
Existing Permit Issues	
Kings River Pipeline	Garney not performing punch list items. Road crews provided $112k estimate to complete repairs.
	City has not decided on use of County forces. If approved, City to withhold funds from final payment to Garney
	Drainage issue for R Flake still outstanding. Water percolating out of embankment due to trench cut in Trimmer.
	Belmont Ave monumentation; Also monumentation concerns/trench patch for RTM on Temperance.
Traffic Signal Maintenance	Blanket purchase orders for Sebestian and A-C Electric set to expire on 6-30-19. Still need new RFQ. Plan to extend blanket PO to 9-30-19.
	Ryan continuously working on updates to maintenance list of traffic signals. Updated lists sent to John T. and cities.
	Reedley not interested in maintaining County signals near city limits.
	Plan to amend TS maintenance agm't with City of Fresno/Caltrans/Clovis. Fresno amendment in draft form.
	Draft RFQ for signal maintenance currently under review. Ryan providing updates. Signal list to include:
	Jayne Ave at State Prison (by Coalinga) and Mountain View/Golden State (includes battery backup with RR signal). List of signals along Manning and Mountain View to be on list of locations likely to be transferred to County maintenance in near future.
	Also include safety lighting in former Caltrans ROW for Elm Avenue. Other misc safety lighting.
Road/TS Maintenance Agreements	
All other cities in county.	Traffic signal cost sharing agreement. Needed with Clovis, Reedley, Parlier and Kingsburg.
	Also 50-50 road maintenance on boundary streets.
	Need joint project agreement with City of Fresno (similar to City of Clovis agm't).
Road Vacations	Coordinate with Wendy and Design. Process being reassigned to Design Div.
Sky Harbour	For TMR. Al for approval in works. Retained by RMO for final action.
Cole Avenue	For Dry Creek Preserve area in Clovis sphere
Lac Jac	Dead end road serving multiple parcels
Kings River Road	By Area 10 yard - Dead end road maybe located outside of street right of way
Wilson Avenue	In Old Fig area adjacent to canal. 2nd hearing scheduled for May 7.
Dunlap Road	Retained by RMO for final action. Adjacent properties may be impacted differently by vacation.
Calwa Alley	
County Capital Projects	
Sanger joint project agreement	Overlay/reconstruction of Central Avenue from Academy to Newmark. On the 19-20 overlay list??
Chip/Slurry Lists	Chip seals bid and awarded. About to start construction. Slurry seals budgeted ($700k) but no project specs to date.
Overlays	SB-1 list and AB 720 list went to Board on 4-23-19. By Design Division. Overlays currently at 60% design review.
Lincoln CIR	Currently at 30% design review.
Biola Sidewalks	Currently under construction.
American Ave CMAQ by AADS	Currently at 60% design review.
	Copies of these plans are in FLD inbox.
TMR Millerton Rd Design	AECOM has submitted 90% plans to County for review. County may reject 90% plan because it is not complete.
	Augie Ramirez and Sebastian Artal are point people for County on this project.
	Some background material on Millerton Road design by TMR 10 years ago in FLD inbox.
High Speed Rail	
Administration	Traffic management plan approval; assessment of permit fees; haul route mitigations re: PCI; street closure policy
	Transporation Planning tasked with developing fee program or road imp requirements for HSR hauling impacts
Right of Way Agreement for CP-02,03	Approved by Board on 1-8-19. Seems to have some conflicts with HSR operations to maintain roads.
CP-02,03 Utility Easement	For PG&E facilities outside of road right of way; options for construction? Lease expiration => stay in franchise
Imp Permit for South Ave	For overpass construction and road closure - to be issued to DFJV - effective May 2019???
	TCP split into 3 phases - Cedar to Maple closure; Cedar/South closure; Maple/South closure.
	CID ditch relocation and culvert reconstruction - Impacts on haul routes
	Utility relocations by separate permit.
CP-01	American Ave overpass - Utility relocation plan is impacting road plans by change in slope from 4:1 to 3:1 to provide room in existing acquired R-O-W for utilities. Permit extensions approved by Director with No LD's.
	Also working with TPZP on haul routes and PCI investigations and mitigations
Cul-de-sac Plans	And associated road vacations. See ROW agmt for exhibit showing areas to be vacated. Draft plans (8-8-18) in FLD inbox.
Davis Ave Overpass	Connects to 17' wide County road - 3 miles in length (Fowler to Highland (SR 43)). Consider CIP for road widening.
Elkhorn Ave Overpass	100% submittal currently in review.

THE INDIVIDUAL SIGNING BELOW CERTIFIES THAT THE FOREGOING STATEMENTS ARE TRUE AND CORRECT AND THAT THE SIGNATORY IS AUTHORIZED TO SIGN AND DELIVER THIS STATEMENT ON BEHALF OF THE DEPARTMENT OF CONSERVATION, AND THAT A COPY OF THIS STATEMENT HAS BEEN FORWARDED BY CERTIFIED MAIL OR COURIER SERVICE TO THE COUNTY OF FRESNO CALIFORNIA.

CALIFORNIA STATE DEPARTMENT OF CONSERVATION

BY: _____

NAME: _____

TITLE: _____"

THIS LETTER OF CREDIT SHALL BE IN FULL FORCE AND EFFECT UNTIL THE EARLIER TO OCCUR OF OUR RECEIPT OF A WRITTEN STATEMENT BY A DULY AUTHORIZED REPRESENTATIVE OF THE COUNTY OF FRESNO CALIFORNIA OR THE DEPARTMENT OF CONSERVATION THAT ALL OF THE OBLIGATIONS SECURED HEREBY HAVE BEEN PERFORMED OR UNTIL PAYMENT OF DRAWINGS TOTALING THE FULL AMOUNT AVAILABLE HEREUNDER PURSUANT TO THE PRECEDING PARAGRAPHS OR UNTIL THE EXPIRATION DATE HEREUNDER.

THE LETTER OF CREDIT SHALL EXPIRE 07/05/2020 AT THE COUNTERS OF WELLS FARGO BANK, N. A., 794 DAVIS STREET, 2ND FLOOR, SAN LEANDRO, CA 94577-6922, ATTN: STANDBY LETTER OF CREDIT DEPT., OR ANY EXTENDED DATE AS HEREINAFTER PROVIDED. IT IS A CONDITION OF THIS LETTER OF CREDIT THAT IT SHALL BE AUTOMATICALLY EXTENDED FOR ADDITIONAL PERIODS, EACH OF ONE YEAR, UNLESS AT LEAST ONE HUNDRED TWENTY (120) DAYS PRIOR TO THE THEN RELEVANT EXPIRATION DATE WELLS FARGO BANK, N. A., HAS ADVISED THE COUNTY OF FRESNO CALIFORNIA AND THE DEPARTMENT OF CONSERVATION BY REGISTERED OR CERTIFIED MAIL OR EXPRESS COURIER AT THEIR ABOVE ADDRESSES THAT WELLS FARGO BANK, N. A., ELECTS NOT TO EXTEND. IN THAT EVENT, THE COUNTY OF FRESNO CALIFONRIA AND/OR THE DEPARTMENT OF CONSERVATION MAY DRAW HEREUNDER ON OR PRIOR TO THE THEN RELEVANT EXPIRATION DATE, UP TO THE FULL AMOUNT AVAILABLE HEREUNDER, AGAINST THE SIGHT DRAFT(S) ON WELLS FARGO BANK, N. A., BEARING THE NUMBER OF THIS LETTER OF CREDIT WITHOUT IT BEING NECESSARY THAT SUCH SIGHT DRAFT(S) BE ACCOMPANIED BY THE SIGNED AND DATED STATEMENT(S) QUOTED ABOVE OR THE ORIGINAL OF THIS LETTER OF CREDIT.

WE ARE FURTHER INFORMED THAT THE AMOUNT OF THIS LETTER OF CREDIT MAY BE REDUCED IN ACCORDANCE TO CONDITIONS SET FORTH IN THE ABOVE REFERENCED MINING/RECLAMATION PLAN NUMBER **91-10-0031,** PROVIDED THAT ANY SUCH REDUCTION SHALL BE MADE ONLY WITH THE WRITTEN APPROVAL OF A DULY AUTHORIZED REPRESENTATIVE OF THE COUNTY OF FRESNO CALIFORNIA AND/OR THE DEPARTMENT OF CONSERVATION.

THIS LETTER OF CREDIT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF CALIFORNIA. AS TO MATTERS NOT COVERED BY THE LAWS OF THE STATE OF CALIFORNIA, THIS CREDIT SHALL BE SUBJECT TO THE UNIFORM CUSTOMS AND PRACTICE FOR DOCUMENTARY CREDITS (2007 REVISION), INTERNATIONAL CHAMBER OF COMMERCE PUBLICATION NUMBER 600 NOTWITHSTANDING ARTICLE 36 OF SAID PUBLICATION. IF THIS LETTER OF CREDIT EXPIRES DURING AN INTERRUPTION OF BUSINESS AS DESCRIBED IN ARTICLE 19, WELLS FARGO BANK, N. A., IS HEREBY SPECIFICALLY AUTHORIZED AND AGREE TO EFFECT PAYMENT IF THE LETTER IS DRAWN WITHIN THIRTY (30) DAYS AFTER THE RESUMPTION OF BUSINESS.

WE HEREBY ENGAGE WITH THE BENEFICIARIES THAT ALL DRAWINGS PRESENTED UNDER AND IN COMPLIANCE WITH THE TERMS OF THIS LETTER OF CREDIT WILL BE DULY HONORED.

LADIES AND GENTLEMEN:

WE HAVE BEEN INFORMED BY RIVERBEND SAND AND GRAVEL LLC, BUT DO NOT INDEPENDENTLY VERIFY THAT THIS LETTER OF CREDIT IS ISSUED TO MEET THE OBLIGATIONS OF RIVERBEND SAND AND GRAVEL LLC TO ESTABLISH AND PERFORM A RECLAMATION PLAN AND MITIGATION MEASURES PURSUANT TO MINING/ RECLAMATION PLAN NUMBER **91-10-0031** APPROVED BY COUNTY OF FRESNO CALIFORNIA ON (*****PLEASE PROVIDE PRIOR TO ISSUANCE*****). THE PRECEDING SENTENCE IS INSERTED IN THIS LETTER OF CREDIT FOR INFORMATIONAL PURPOSES ONLY AND WILL NOT AFFECT, OR BECOME A PART OF, THE TERMS AND CONDITIONS OF THIS LETTER OF CREDIT.

Subject: RE: Annual Inspection Report and FACE Review (Riverbend Sand and Gravel)

Dear Roy:

Thank you for submitting the financial assurance cost estimate (FACE) for Riverbend Sand and Gravel, LLC Mine, Mine ID# 91-10-0031. It has been received and will be submitted for processing. If you do not receive a response from us by 4/13/2019, please continue with your agency's approval process.

Our records indicate that currently there is not a financial assurance mechanism (FAM) in place for this operation. Once the proposed FACE is approved, an appropriate financial assurance mechanism will need to be submitted to DMR for review.

Also, as a reminder, there are new Financial Assurance Mechanism (FAM) forms that has been adopted by the State Geology Mining Board (SGMB). Below are some links to where you can find the new forms and information on how to submit them:

https://www.conservation.ca.gov/smgb/Pages/Forms.aspx

https://www.conservation.ca.gov/smgb/Pages/Rulemaking/Approved-Package-10.aspx

Please let me know if you have any questions, and thank you for your assistance.

Sincerely,

Rhonda Law

Gents,

Could you have staff and determine if we requested a reviewed LOC for Riverbend Sand and Gravel or if this is a new submittal? We may not have received one before from the operator, but in my brief review, it appears to be tied to the project's reclamation plan.

Thanks for your help!

Lemuel,

Because this is a surface mining project (not a solar farm) reclamation plans should be handled through Glen Allen's Division. That's why I forwarded because they keep those files. Just an FYI.

Joseph,

We can process an amendment to update that but please note if we do that there are additional changes in the language that will need to be changed as well.

1. Both Beneficiaries would need to provide a statement in order to draw so the below paragraph would be amendment to read per the below with the highlighted removed:

AT THE REQUEST AND FOR THE ACCOUNT OF RIVERBEND SAND AND GRAVEL LLC, 14962 E FANTZ AVE, PARLIER, CALIFORNIA 93648, WE HEREBY ESTABLISH OUR IRREVOCABLE LETTER OF CREDIT NO. IS000088901U IN FAVOR OF THE ABOVE NAMED BENEFICIARIES IN THE AMOUNT OF TWO HUNDRED FIFTY NINE THOUSAND THREE HUNDRED NINE AND 00/100 UNITED STATES DOLLARS (USD 259,309.00). THE LETTER OF CREDIT IS AVAILABLE WITH US AT OUR ABOVE OFFICE BY YOUR SIGHT DRAFT AND EITHER OF THE FOLLOWING DOCUMENTS:

2. The multiple Beneficiary language would need to be removed which is below:

DRAWINGS MADE UNDER THIS LETTER OF CREDIT BY ANY OF THE ABOVE-NAMED BENEFICIARIES WILL BE HONORED BY US IN THE ORDER THEY ARE RECEIVED BY US AT THE PRESENTATION OFFICE SPECIFIED ABOVE. ANY DRAWING MADE BY A BENEFICIARY SHALL BE BINDING ON ALL OTHER BENEFICIARIES. IN NO EVENT WILL WE HONOR DRAWINGS WHICH EXCEED THE MAXIMUM STATED AMOUNT AVAILABLE UNDER THIS LETTER OF CREDIT AT THE TIME SUCH DRAWING IS PRESENTED TO US. DRAWINGS HEREUNDER MUST BE ACCOMPANIED BY THE ORIGINAL OF THIS LETTER OF CREDIT FOR ENDORSEMENT ON THE REVERSE HEREOF OF THE AMOUNTS OF SUCH DRAWINGS. THE ORIGINAL OF THIS LETTER OF CREDIT WILL BE RETURNED TO THE BENEFICIARY WHO PRESENTED THE DRAWING.

Please review and if the Beneficiary is accepting the above then please have the applicant fill out the amendment application.

Regards,

Terah Skidmore-North

TRAFFIC MITIGATION AGREEMENT (COUNTY FAIR SHARE) FOR RIVERBEND MINE AND RECLAMATION PLAN

THIS AGREEMENT is entered into in _____2019 on the last date signed below ("Effective Date") between the County of Fresno, a political subdivision of the State of California, acting through its Department of Public Works & Planning, Development Services Division ("County"), and Riverbend Sand and Gravel LLC ("Riverbend"), upon the following facts and circumstances:

RECITALS

A. WHEREAS, Riverbend proposes to construct, operate, and reclaim an aggregate mine, and related processing, asphalt, ready mix concrete, hot mix asphalt plant, and portable asphalt and concrete recycling plant on 619 acres of land located in Fresno County, more commonly known as the Riverbend Sand and Gravel Project ("Project"), which will be located on certain real property more particularly described in **Exhibit A**, attached hereto and incorporated herein by reference.

B. WHEREAS, on February 26, 2015, pursuant to County Resolution, subject to the conditions listed therein, the Fresno County Planning Commission certified an Environmental Impact Report ("EIR") for the Project (State Clearinghouse No. 2013071097), approved Unclassified Conditional Use Permit No. 3390, and adopted the CEQA findings, the mitigation measures, the Mitigation Monitoring and Reporting Program and the statement of overriding considerations.

C. WHEREAS, on May 19, 2015, the Board of Supervisors hearing on appeal from the Planning Commission was taken off calendar because the appellant withdrew his appeal.

D. WHEREAS, as part of the EIR for the Project, a Traffic Impact Study ("TIS") was prepared by VRPA Technologies, Inc. in March 2014 and revised in July 2014 and included in the EIR as Appendix K, which describes the potential traffic and circulation impacts associated with the Project.

E. WHEREAS, the TIS and the EIR indicated that the Project would increase vehicle trips on public roads and could contribute to unacceptable levels of service on Fresno County roadways segments and at intersections ("Impacts"), which Impacts were considered potentially significant.

F. WHEREAS, Mitigation Measure TRANS-1 of the EIR and the Monitoring Plan also identified specific mitigation measures to mitigate for the Project's Impacts, specifically that Riverbend would contribute Riverbend's Pro Rata Share ("Pro Rata Share") of the total anticipated costs to the County for level of service ("LOS") improvements related to capacity required at the following intersections and road segment ("LOS Improvements") as follows:

i. McCall Avenue / Jensen Avenue Signalization; Add Eastbound Left Turn Lane and Right Turn Lane, Westbound Right Turn Lane, Northbound Left Turn Lane, Through Lane and Right Turn Lane,

Southbound Left Turn Lane, Through Lane and Right Turn Lane, and Right of Way Acquisition – 8.5%

ii. McCall Avenue / North Avenue Signalization – 18.6%
iii. Academy Avenue / Central Avenue Signalization – 17.8%
iv. McCall Avenue / Central Avenue Signalization – 23.0%
v. McCall Avenue / SR 180 Add Northbound Through Lane and Right Turn Lane, and Southbound Through Lane and Right Turn Lane – 10.0%
vi. McCall Avenue / SR 180 Add Northbound Left Turn Lane – 100%
vii. McCall Avenue from SR 180 to Jensen Avenue add Northbound Travel Lane and Southbound Travel Lane – 16.3%
viii. McCall Avenue from Jensen Avenue to North Avenue Northbound Travel Lane – 37.7%

G. WHEREAS, the TIS and Mitigation Measure TRANS-3 of the EIR and Monitoring Plan also identified specific mitigation measures to mitigate for the Project's Traffic Index Impacts, specifically that Riverbend would contribute Riverbend's Pro Rata Share to the County for improvements related to the structural section of the impacted street segments ("Structural Improvements"):

i. Central Avenue Segments
   a. McCall Avenue to Bethel Avenue – 46.0%
   b. Bethel Avenue to Academy Avenue – 42.4%
   c. Academy Avenue to Newmark Avenue – 39.1%
ii. Goodfellow Avenue Segments
   a. Newmark Avenue to Bridge – 40.3%
   b. Bridge to Riverbend Avenue – 40.3%
iii. McCall Avenue Segments
   a. SR 180 (Kings Canyon) to Jensen Avenue – 61.4%
   b. Jensen Avenue to North Avenue – 66.7%
   c. North Avenue to Central Avenue – 73.8%

As set forth herein, Riverbend's Pro Rata Share payment amounts ("Funds") for each LOS Improvement and Structural Improvement (collectively, "Improvements") were determined based on the actual total cost of each Improvement multiplied by Riverbend's Pro Rata Share.

H. WHEREAS, except for those amounts specified to be paid in cash or equivalent, Riverbend shall obtain bonds for the estimate of the Funds, and will remit to the County the actual cost of Riverbend's Pro Rata Share of the Improvements approximately twelve months before the actual construction of each particular Improvement.

I. WHEREAS, the intersection at McCall Avenue and SR 180 shall be considered a County proposed project, thus PG&E should not charge for the necessary relocation of the existing utilities, including PG&E poles or towers.

J. WHEREAS, in accordance with Mitigation Measure TRANS-2 of the EIR and Monitoring Plan, Riverbend shall be 100% responsible for building the entrance to the Project.

K. WHEREAS, Mitigation Measures TRANS-1 and TRANS-3, as conditions of Project approval, require Riverbend to enter into a traffic mitigation agreement with the County as adopted in the EIR, each of which mitigation measures is set forth in Exhibit "B," which are attached hereto and incorporated herein by reference.

NOW, THEREFORE, in consideration of the foregoing recitals and for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Riverbend and the County (collectively "Parties," individually "Party") agree as follows:

AGREEMENT

1. **PAYMENT**. Riverbend shall provide the County with payment or surety bonds as set forth in **Exhibit C** and described below:

1.1 Prior to final inspection of building permits for the aggregate processing plant for the Project, payment of $352,915 in full satisfaction of Riverbend's fair share contributions to the addition of northbound and southbound through lanes at McCall Avenue and Jensen Avenue, the addition of a southbound right turn lane at McCall Avenue at SR 180, the addition of a westbound right turn lane at McCall Avenue at Jensen Avenue, and the installation of a traffic signal at Academy Avenue at Central Avenue as set forth in **Exhibit C-1 and C-4**, attached hereto and incorporated by this reference.

1.2 Prior to final inspection of building permits for the aggregate processing plant for the Project, a surety bond issued to County on behalf of Riverbend by a surety authorized to transact business and issue surety bonds in the State of California for $1,594,000 in full satisfaction of its Pro Rata Share for the McCall Avenue / SR 180 Northbound Left Turn Lane Improvement as set forth in **Exhibit C-2 and C-4**, attached hereto and incorporated by this reference.

1.3 For all other Improvements, Riverbend shall obtain and provide to the County one or more surety bonds issued to the County on behalf of Riverbend by a surety authorized to transact business and issue surety bonds in the State of California in the amount of $3,558,807 as set forth in **Exhibit C-3 and C-4**, attached hereto and incorporated by this reference. The surety bonds identified in subsections 1.2 and 1.3 are collectively referred to as "Bonds." Riverbend shall provide the Bonds to the County on or before August 1, 2033. The Bonds shall be in an industry-standard format.

1.4 The County shall provide written notice to Riverbend twelve (12) months prior to construction of the particular Improvement(s), and Riverbend shall pay its actual Pro Rata Share for the noticed Improvement within sixty (60) days of receiving said notice. Within ten (10) days of receiving Riverbend's payment, the County shall release the applicable Bond amount.

2. **SATISFACTION**. The County hereby acknowledges that upon the execution of this Agreement, Riverbend's submission of the payments described under Section 1, the payments, the Bonds, and later actual payments for the Improvements, Riverbend will have satisfied its mitigation obligations to the County for Project Impacts as required by Mitigation Measures TRANS-1 and TRANS-3.

3. **ALLOWABLE USE OF BONDS**. The County shall not submit a claim on a Bond, or otherwise indirectly or directly cause a Bond to be released or remitted to the County, until all of the following occur:

3.1 Riverbend has not paid the actual Pro Rata Share for the noticed Improvement within sixty (60) days of receiving the County's written request for payment as described in Section 1.4; and

3.2. The County has provided Riverbend a reasonable opportunity to cure the defect not to exceed thirty (30) days after the sixty (60) day period to remit payment of the actual Pro Rata Share.

4. **ALLOWABLE USE OF FUNDS**. Funds provided by Riverbend to the County shall remain in a trust account until such time as the County has secured the balance of other funds necessary to implement the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3. The County agrees that the Funds paid by Riverbend pursuant to the terms of this Agreement shall be used only for the purposes of instituting the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3.

5. **RETURN OF FUNDS**. In the event that the Funds are not fully expended on the Improvements or another equivalent project that would offset the Project Impacts that are the subject of Mitigation Measures TRANS-1 and TRANS-3, by the County on or before August 1, 2037, the County shall return to Riverbend, within sixty (60) days of receipt of Riverbend's written request, all of the then-unexpended Funds.

6. **COUNTY OBLIGATIONS**. All obligations of the County under the terms of this Agreement are subject to the appropriation and allocation of resources by the County Board of Supervisors.

7. **BINDING EFFECT AND ASSIGNMENT**. This Agreement shall be construed as a covenant running with the land and shall bind and benefit the County, its successors and assigns, and Riverbend, and its successors in interest. Riverbend shall have the right to assign this agreement to a third-party.

8. **EXPIRATION OF AGREEMENT**. This Agreement shall expire when the County has expended all of the Funds; the Funds are returned to Riverbend, in whole or in part pursuant to Section 5 of this Agreement; or on August 1, 2037, whichever occurs first in time.

9. **ATTORNEY'S FEES**. If any legal action is brought by either Party to interpret or enforce any terms or provisions of this Agreement, the prevailing party shall be entitled to its reasonable attorney fees and costs.

10. **WAIVERS**. Waiver of a breach or default under this Agreement shall not constitute a continuing waiver or a waiver of a subsequent breach of the same or any other provision of this Agreement.

11. **SEVERABILITY**. If a court of competent jurisdiction finds that any provision of this Agreement is invalid or unenforceable, such determination shall not affect the validity and enforceability of any other provision of this Agreement.

12. **INTERPRETATION**. The titles to the sections of this Agreement are for convenience only and shall have no effect upon the construction or interpretation of any part of this Agreement. The Parties agree that this Agreement has been arrived at through negotiation and neither Party is to be deemed the Party which prepared this Agreement.

13. **ENTIRE AGREEMENT.** This Agreement constitutes the entire agreement of the Parties with respect to the matters set forth herein. This Agreement may be amended only by a written document signed by both Parties.

14. **RECORDATION.** Upon execution of this Agreement, the County shall cause recordation thereof with the County Recorder's Office.

15. **JURISDICTION**. This Agreement shall be administered and interpreted under the laws of the State of California without regard to its choice of law rules. Jurisdiction and venue of litigation arising from this Agreement shall be in the County of Fresno, State of California.

16. **NOTICES**. Notices required by this Agreement shall be personally delivered, mailed, postage prepaid, or mailed via nationally-recognized overnight courier as follows:

To Riverbend:

~~RE Riverbend Sand and Gravel CUP 3390 - Traffic Mitigation Agreement.msg~~
~~Riverbend Traffic Mitigation Fees.xlsx~~
~~image001.png~~

Good Morning Mohammad,

As promised, here is my latest understanding of the project status:

- The latest draft agreement (attached) needs to be reviewed for language and fee collection clarity.
- The latest mitigation fee estimate (also attached) needs to be updated. Roy is currently working on the construction unit costs and once completed I will update the rest of the estimate. I have asked Roy to have at least one mitigation item updated so that we can get an idea of what kind of cost increase we have at hand.
    - One of the mitigations requires intersection improvements that will be impacted by the existing large PG&E pole at HWY 180 and McCall. Roy and I both agree it would be really difficult to estimate this cost without engaging PG&E. We don't want to open Pandora's Box until we get the green light from Steve.
    - Another mitigation requires intersection improvements at McCall & Central that will be impacted by the diagonal FID crossing. Again to estimate this would be difficult without engaging FID as it is Roy's understanding that FID does not allow diagonal crossings meaning one or more of the four corners will require a lot more ROW acquirement.
- The remaining attachment should be obsolete at this point, however I included it in case it comes up in the discussion. There were several large discrepancies between the Tri-City estimate and the County's estimate, however as you said we are not concerned with Tri-City's estimate. The e-mail describes my findings of differences between the two.

This should get the conversation rolling and while solutions aren't required tomorrow, we need direction and agreement on how to move forward in the most efficient way possible. I am sure this will feel like a step backwards to most, however it should position us to make a great leap forward.

Subject: RE: Riverbend Sand and Gravel Project - Traffic Mitigation Agreement

Good Morning Andrea,

I have completed my review and revision of the language and terms in the agreement to address Public Works and Planning Management's concerns. Management also had concerns that the dollar amounts listed in agreement were based on old 2015 cost estimates. County staff is revising and updating these dollar amounts to more current 2019 cost estimates, which are needed to provide the County a more secured position in this agreement. I have asked for an ETA on this update. I will provide you status once I have this ETA.

Subject: Riverbend Sand and Gravel Project - Traffic Mitigation Agreement

Good afternoon Patrick,

Attached is the revised Traffic Mitigation Agreement. Fresno County Public Works and Planning, Design Division staff reviewed the traffic mitigation obligations listed the agreement against the County's identified mitigation obligations for this project. As part of this review, staff recalculated Riverbend's total traffic mitigation obligation to be $5,505,722, which is lower than the current total of $5,603,558 listed in the agreement. Attached along with the revised agreement is County staff's table for the breaking down Riverbend's various improvement obligations with staff's recalculations in red.

Please contact me if you would like to discuss any of the revisions or comments listed in the attached draft agreement.

Respectfully,

Doing good! Just thought I would loop you in on this conversation as you may get a call. There is a considerable distance between his house and the processing area of this mine site, such that I really don't think there could be any exceedance of the noise ordinance occurring from back up alarms. Oh and I earned yesterday that Cemex is planning an expansion on Friant Road and will be required to do an EIR. They have already completed their acoustical analysis in anticipation, which will be coming your way for review and comment, at some point in the not so distant future.

So, who's the next DM? Any guesses or bets????

Hi John,

Roy and I spoke with Sebastian and he is on board with the final changes. Please review the attached file. Once I get the green light from you I will formalize it in a PDF version.

Respectfully,

Brian Spaunhurst | **Senior Planner**

Hi Sebastian,

Roy and I went through this one more time and we think we are finally ready. We have one section to review with you before we can give John our final thumbs up.

John the link to the file is below in case you wat to start to get eyes on it on your end.

Respectfully,

Brian Spaunhurst| **Senior Planner**

Subject: Riverbend link

Hello Sebastian,
I have attached the link below:
\\design2\Projects\Transportation Planning\Traffic Engineering\!Current projects\!!!Traffic Impact Study Reviews\Pending TIS Reviews\Riverbend Exhibits
Also, after reviewing the amount being charged on the mitigation cost, the reason the segment between SR180 to Jensen is less than the Traffic Impact Overlays is because the fair share percentage is less in the SR180 to Jensen Ave segment.

SURFACE MINING INSPECTION REPORT

VII. Non-SMARA facility operations conditions solely of local concern (e.g. hours of operation) do not need to be noted here. See Instructions for Block VII.

[Use separate sheet(s) where necessary. Refer to item numbers below]

Potential Reclamation Plan Requirements	List Reclamation Plan Requirements (Recommended to be filled out prior to field inspection)	Note current site observations. Describe site conditions and aspects of the operation that are or may be inconsistent with the reclamation plan or SMARA. (Note additional comments on Section VIII as necessary)
L) Closure of Adits	None.	Non-operational.
M) Other Reclamation Plan Requirements	None.	Non-operational.

VIII. A. Use this space to describe general observations and sketches of the operation:

Additional observations/sheets/documents/sketches/photographs attached? ☐ Yes ☑ No

B. Describe areas of the operation that have been disturbed since the last inspection:

No new areas have been disturbed since last inspection.

Approximate total disturbed acreage since last inspection: None

Approximate total acreage of mined lands: None

C. Describe areas of the operation that have been reclaimed since the last inspection:

None.

Approximate reclaimed acreage since last inspection: None

Approximate total reclaimed acreage:

D. Describe areas where the operator plans to conduct operations in the upcoming year:

Continue preparation for construction of the aggregate processing plant.

E. Describe the extent of mined lands with respect to the permitted/approved reclamation plan boundaries: 6/15/16

Date Inspection Conducted:	CA Mine ID Number:
January 24, 2020	91- 10-0031

SURFACE MINING INSPECTION REPORT

F. Describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

G. Describe any limitations encountered during the inspection:

None.

H. Describe conditions or aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA:

N/A

I. Do any of those conditions or aspects require further evaluation?

☑ No

☐ Yes, describe (For example, further evaluation or analysis may be required by a state-licensed professional or specialist):

J. Was a Notice of Violation issued for any of the above?

☑ No, describe:

☐ Yes, describe:

K. Describe remedial activities for any pre-existing or existing enforcement actions:

None.

L. Duration of Inspection: Not in Operation Yet
Start Time: Sections Finish Time: 11:30 am

M. Weather Code(s):	N. Status of Mine Code(s):

Certification Expiration Date: June 25, 2023	**Date Signed:**	Not in Operation Yet

STATE OF CALIFORNIA
DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION

SURFACE MINING INSPECTION REPORT, FORM MRRC-1, INSTRUCTIONS

GENERAL INFORMATION

This report form is intended to comply with the requirements of California's Surface Mining and Reclamation Act of 1975 (SMARA – Public Resources Code §§ 2710 et seq., and the associated California Code of Regulations found in Title 14, Division 2, commencing with § 3500, hereinafter respectively "PRC" or "CCR") and specifically PRC § 2774(b) and CCR § 3504.5 for surface mining operations (operation).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

INSTRUCTIONS FOR COMPLETING THE SURFACE MINING INSPECTION REPORT FORM MRRC-1

PLEASE TYPE OR PRINT ALL INFORMATION REQUESTED

NOTE: YOU MUST WRITE THE DATE INSPECTION CONDUCTED AND THE CALIFORNIA MINE ID NUMBER AND AT THE TOP OF PAGE 1

1. **BLOCK I**: Enter the name of the mine as indicated on the Annual Report.

2. **BLOCK II**: Enter the name and mailing address of the Mine Operator (Operator), the name of the person serving as the onsite contact, their email address and phone number.

3. **BLOCK III**: For "Lead Agency," enter the name of the SMARA Lead Agency that is conducting this inspection, the name of the inspector and contact information. For "Entity or Organization," enter the name of the entity or organization that employs the inspector.

4. **BLOCK IV**: Enter information with respect to the currently approved reclamation plan, permit and/or vested right and Interim Management Plan. Check Not Applicable as appropriate. In cases where a Reclamation Plan Number has not been assigned by the lead agency, enter any unique lead agency assigned identifier for the approved reclamation plan.

5. **BLOCK V**: Indicate if the operation is located on Federal land. Please identify any government entities or agencies, other than the Lead Agency noted above, that accompanied the inspection.

Inspecting Agency Codes: (can choose multiple)

None	=	None	DFW	=	Department of Fish and Wildlife
BLM	=	Bureau of Land Management	NPS	=	National Park Service
USFS	=	U.S. Forest Service	DOC	=	Department of Conservation
RB	=	Regional Water Quality Control Board	O	=	Other (list Agency)

Reason for Inspection: (can choose multiple)

AI	=	Annual Inspection	RE	=	Re-inspection
PC	=	Public Concern	O	=	Other Reason
OA	=	Other Agency Request	AR	=	Acknowledgement of Reclamation

Provide the land use designation or the zoning information for the parcels on which the mined lands are located.

6. **BLOCK VI**: “Financial Assurances” consist of a current approved Financial Assurance Cost Estimate and a Financial Assurance Mechanism that is at least equal to the current approved Financial Assurance Cost Estimate (PRC § 2736).

The Financial Assurance amount must be reviewed and approved once each calendar year to account for new lands disturbed by surface mining operations and lands to be disturbed in coming year, inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan (PRC § 2773.1(a)(3) and the State Mining and Geology Board (SMGB) Financial Assurance Guidelines). In order to determine what adjustments, if any, are appropriate to the Financial Assurance Mechanism amount, each mine operator must submit once each calendar year a revision of the written Financial Assurance Cost Estimate to the Lead Agency (CCR § 3804(c)). An Operator shall provide an updated annual Financial Assurance Cost Estimate to the Lead Agency for review within 30-days of conducting of the annual inspection (PRC § 2773.4(d)(1)(A). Provide the date and amount of the currently approved Financial Assurance Cost Estimate.

Use the Financial Assurance "Other" and "Explanation" blocks to provide any other pertinent information regarding the status of Financial Assurance(s). If the operation does not have a current Financial Assurance Cost Estimate and/or Financial Assurance Mechanism, explain in detail. A Financial Assurance Cost Estimate is considered current if it has been approved in accordance with applicable requirements of PRC § 2773.4 within the current or previous calendar year.

Type of Financial Assurance Mechanism(s): Fill in the type of mechanism(s) that are on file. CCR § 3803 and the SMGB Financial Assurance Guidelines describe Surety Bonds, Trust Funds, or Irrevocable Letters of Credit as acceptable financial assurance mechanisms for non-governmental entity operators. For surface mining operations owned and operated by state and local government entities, Surety Bonds, Trust Funds, Irrevocable Letters of Credit, Pledges of Revenue, and a Budget Set Aside are acceptable financial assurance mechanisms.

State the Financial Assurance Mechanism(s) document number(s). State the dollar amount of each Financial Assurance Mechanism~~(s)~~ currently on file. State the date of expiration of the Financial Assurance Mechanism(s) currently on file. State the date of approval for the most recent lead agency approved Financial Assurance Mechanism~~(s)~~ on file. State the total dollar amount of the mechanism(s) held for reclamation of mined lands.

7. BLOCK VII:

INSTRUCTIONS FOR EACH DATA COLUMN:

Potential Reclamation Plan Requirements (Column 1)**:** Under PRC § 2772 and CCR §§ 3501, 3502, and as described in the Guidance Document for Surface Mine Inspectors in CCR § 3504.6 inspections may include the following: the operation's horizontal and vertical dimensions, volumes of materials stored on the site; slope angles of stock piles, waste piles and quarry walls; effects of sidecasting and potential geological hazards; equipment and other facilities; samples of materials; photographic or other electronic images of the operation; any measurements or observations deemed necessary by the inspector or the lead agency to ensure the operation is in compliance with SMARA, and specifically the approved reclamation plan. Column 1 provides a list of items that may be included in the approved reclamation plan, either expressly or by reference as described in PRC §§ 2772 and 2772.1, which may include conditions of approval, other permit requirements and supplementary documents, including environmental documents, prepared for the project pursuant to the California Environmental Quality Act (CEQA) (Division 13 (commencing with Section 21000)).

It is not expected that all reclamation plans will include each item of Section ~~VIII~~VII or be limited to the items listed. Items in Column 1 that are not in the reclamation plan may not need to be addressed in the inspection. In instances where the reclamation plan lacks specific details for the reclamation of mined lands, the inspector may need to consider if additional reclamation requirements or specifics are needed to achieve the proposed use after reclamation. Reclamation plan requirements not listed in Items ~~1~~A through ~~12~~L may be listed in Item ~~13~~M, under "Other Reclamation Plan Requirements."

Reclamation Plan Requirements (Column 2)**:** Prior to conducting the field inspection, the inspector must review the approved reclamation plan, any amendments, and other reclamation requirements as part of a permit application for the operation that were used to satisfy the requirements of PRC §§ 2772(c), 2773 and 2773.3 and Article 1 (commencing with § 3500) and Article 9 (commencing with § 3700) of Subchapter 1 of Chapter 8 of Division 2 of Title 14 of the California Code of Regulations and any approved modifications contained in permit conditions of approval (COA) or binding mitigation measures adopted pursuant to the CEQA included by reference in the approved reclamation plan pursuant to PRC §§ 2772(d) and 2772.1(b). The most recently approved Financial Assurance Cost Estimate and any pending or ongoing enforcement actions should also be reviewed. Conditions of Approval (COA) that relate to facility

operations solely of local concern, such as hours of operation, noise, and dust control are not subject to the inspection.

Column 2 is intended to provide the inspector a place to match any items noted in Column 1 with those items included in the approved reclamation plan either expressly or by reference, as described above, in PRC §§ 2772 and 2772.1. Also note any Interim Management Plan (IMP) requirements where the mine is subject to an IMP pursuant to PRC § 2770(h).

Indicate the source document for the reclamation plan requirements at the end of the entry in parenthesis; i.e. (COA) Plan of Operations (POO), Environmental Impact Report (EIR), Waste Discharge Report (WDR), Stormwater Pollution Prevention Program (SWPPP), etc. If items listed in Column 1 of Section ~~VIII~~VII of the form are not included in the reclamation plan or other documents included by reference, write not applicable or "NA" in Column 2.

Specific reclamation requirements may not apply to an operation at the time of inspection, but they are important to ensure current activity at the site will not prohibit reclamation in accordance with the approved reclamation plan.

Site Observations and Compliance Issues (Column 3)**:** Use this space to note current site observations and to describe site conditions and aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA, if any, noted for both operating and reclaimed surfaces that pertain to the reclaimed condition of mined lands.

Site conditions that are or may be inconsistent with SMARA include unanticipated but actual conditions encountered as the mining operation progresses, for which mitigation measures were not fully addressed in the reclamation plan and which affect any aspect of reclamation or calculation of the FACE, as described in the approved reclamation plan.

8. BLOCK VIII: The inspector responds to the statements or questions in the space provided for (A) through (O). Additional instructions are provided below for (A), (F), (G), (I), (J), (L), (M), (N), and (O).

(A) If additional space is required to record observations, photographs, etc., please check the corresponding box in (A) and attach documentation to the MRRC-1.

(F) Requires the inspector to describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

(G) Requires the inspector to describe limitations encountered during the inspection. These limitations may include, but are not limited to: inaccessibility to certain areas due to weather, blasting, excavating, etc.

(I) Requires checking a "Yes" or "No" box. Conditions or aspects identified in (H) requiring further evaluation should be described further.

(J) Requires checking a "Yes" or "No" box. A description of why or why not a Notice of Violation was issued for conditions or aspects identified in (H) should be provided.

(L) For "Duration of Inspection," indicate the start and end times of the inspection (do not include travel time).

(M) Weather Codes

CR	=	Clear
CL	=	Cloudy
SN	=	Snow
RN	=	Rain
WD	=	Windy

(N) SMARA Status of Mine Codes (based on annual report and reported production under CCR §3695, indicate the appropriate status code):

NP	=	Newly Permitted (surface mining operation not begun)
Active	=	Operation Not Idle (per PRC § 2727.1)
I	=	Idle (per PRC § 2727.1)
AB	=	Abandoned (per PRC §2700(h)(6))

(O) Attendees: Provide the names and affiliations of parties in attendance at the inspection.

9. **BLOCK IX**: Provide the Inspector's "Certificate of Completion of Inspection Workshop" Number and expiration date. Sign and date the Inspection Report. If applicable, include the inspector's certification (Professional Engineer (PE), Professional Geologist (PG), Licensed Landscape Architect, Registered Professional Forester, Professional Land Surveyor (PLS), etc.) and license number. The lead agency shall cause an inspection to be conducted by a state-licensed geologist, state-licensed civil engineer, state-licensed landscape architect, or state-licensed forester, or a qualified lead agency employee pursuant to PRC § 2774(b)(1).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report (form MRRC-1) and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (form NOCI-1) (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

Andrea,

Thank you for your inquiry. I looked into this matter for you.

The 2015 cost estimate was already quite dated when Kyle initially shared the document with you. Indeed, it is dated 5/15/2015. It also incomplete, where it includes a placeholder which states "Total Cost for this Mitigation does not include any cost associated with Utilities Relocation." Kyle informed you in October of last year that the Department of Public Works an Planning would be "revising and updating these dollar amounts to more current 2019 cost estimates, which are needed to provide the County a more secured position in this agreement." (See attached email.)

That said, I understand that the increased cost is a result of several factors. The first and most significant factor is that, in preparing the 2019 estimate, the County's engineer was able to estimate the cost to relocate a major power pole and several other utilities poles located at State Route 180 and McCall Avenue. Thus, the 2019 estimate substituted the estimated cost of $500,000 for the previously-mentioned placeholder from the 2015 document which stated "Total Cost for this Mitigation does not include any cost associated with Utilities Relocation." Other factors include an increase in the cost of raw materials and updated right of way costs.

The basis for the increased costs are reflected in the attached Excel workbook. I will follow this email up with further information if and as it becomes available to me.

Please let me know if you have any further questions.

Thanks,
Bryan

Hi Bryan,

Thank you for the attached 2019 calculation sheet, and clarification on the values we had been using. Could you provide specific reasons the cost estimates doubled in 4 years? Since we were working with 2015 estimates less than a year ago, our presumption was that the amounts were current estimates, and it is troubling that the 2019 amounts have changed drastically from the 2015 amounts.

Andrea,

I had staff look into this. You were looking at the 2015 calculations. Attached is the updated 2019 calculation sheet, on which staff correlated the dollar amounts to the exhibit in which they are referenced.

I hope that this clears everything up.

Hi Bryan,

We have been reviewing the revised agreement with our client. Before we get revisions back to you, we wanted to get more information about the County's cash/bond calculations in Exhibits C-1, C-2, and C-3. I have attached the last draft of these exhibits that we sent to the County in May 2019, along with a fee table Kyle Roberson shared with us around that time.

Could you provide a cost breakdown to show how the County came up with each of the payment amounts the Exhibits?

FINANCIAL ASSURANCE COST ESTIMATE

FOR

RIVERBEND SAND AND GRAVEL

CA Mine ID# 91-10-0031

Reclamation Plan #/Name 3390 Riverbend Sand and Gravel

Prepared by: *(Name & Affiliation)*	This financial assurance cost estimate and submitted pursuant to (choose one):
Buada Associates, Inc. 4872 N Arcade Ave Fresno, Ca 93704 559-269-1376 Date: April 30, 2020	☐ A new or amended reclamation plan approved on (Date): An annual mine inspection performed on ☒ (Date): January 24, 2020 ☐ Other: Please Specify:

Most Recent Approved Financial Assurance Cost Estimate

Date: 4/17/2019

Amount: $ 259,309

Amount of existing Financial Assurance Mechanism(s)

Date: 4/17/2019

Amount: $ 259,309

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

State Prevailing Wage Rates (SPWR) ((General Prevailing Wage Determination Made by the Director of Industrial relations, Pursuant to California Labor Code Part 7, Article 2, Sections 1770, 1773, and 1773.1), effective through mid-2019

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

CalTrans Equipment Rates (Labor Surcharge and Equipment Rental Rates (Cost of Equipment and Ownership)), effective April 1, 2017 through March 31, 2019.

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Handbook (Caterpillar Performance Handbook, Edition 47) to determine equipment capacity and cycle times.
RS Means Heavy Construction Cost Data, 30 th Annual Edition, 2018 (Means);
Third party cost estimates;.

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

1. Figure
2. Division of Mine Reclamation Graphs
3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2020.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2020, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2020. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease •

The reclamation cost for the site was calculated to remain $ 259,309 since subsequent to the last cost estimate no disturbance has ocurred and no additional activties are anticipated other than were already included in the last estimate.

(add additional pages as needed)

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2020 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2020 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2020, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Demo Structures	Grove RT 625 40t Crane	1	80.00	68.43	5,474
Haul Structures	Semi-truck with 3-axle low-boy	2	40.00	23.36	1,869

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	85	Tons	22.5	1,913
				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913
Total	**5,571**

Task V.4 - Mobile Equipment Removal

Mobile equipment mau incude CAT 140 Motorgrader, CAT 980 Front End Loader, Cat 349 Excavator, Kamatsu 750 Excavator, CAT D9 Dozer, CAT Skid Steer, Ford F-650 Water Truck, Volvo A40E Haul Truck, JLG Skytrak Forklift

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal

Miscellaneous plant equipment, parts and rubishe must be removed

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Site Grading	
Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

					-
				Total	-

Assumptions and Calculations

Production rates for a D9 bulldozer equipped with a V-blade equipment used to are derived from the methods identified in the Caterpillar Handbook. This production estimate assumes a D9R Dozer with an average production rate of 3.0 acres/hr. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	4,888
Labor	2,410
Other Costs	0
Total	**7,298**

Task VI.2 Finish Grading

Finish grading will be required in order to prepare the 52-acre plant site for revegetation.

Equipment Cost

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2019. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067
				Total	**1,067**

	Vulpia myros	Zorfro Annual Fescue	25	325		
	Trifolium hurtium	Hykon Rose Clover	45	585		
			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Equipment	Quantity	Hours	Years	$/Hour	Cost

				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:
- Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
- Prepare annual report (biologist, 4 hours).

D, Total Direct Cost of Monitoring (Sum A+B+C)

Equipment Cost + Labor Cost + Other Cost = **10,433**

Roy,

Attached is the 2019 Financial Assurance Cost Estimate for Riverbend Sand and Gravel. In accordance with14 CCR § 3805 please review and submit to the Department of Conservation, Division of Mine Reclamation (DMR) for DMR's 45-day review.

If you have any questions or need any additional information please contact me by phone at 559-269-1376 or by email at jcbuada@buada.com.

EXHIBIT 169

State of California
DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION
NOCI-1 (2019)

NOTICE OF COMPLETION OF INSPECTION

Date of Notice: 05 / 05 /20 20

To:	From:
California Department of Conservation Division of Mine Reclamation Attention: Reporting Unit 801 K Street, MS 09-06 Sacramento, California 95814	County of Fresno (Lead Agency Name) Roy Jimenez Jr (Lead Agency Contact Name) 2220 Tulare Street, 6th Floor (Lead Agency Address) Fresno CA 93721 (Lead Agency City, State, Zip Code)

Mine Name: Riverbend Sand and Gravel	CA Mine ID Number: 91- 10-0031

This submittal serves as the Lead Agency notice of completion of the annual inspection to the Division of Mine Reclamation (DMR) as required by the Surface Mining and Reclamation Act of 1975 (SMARA), specifically Public Resources Code (PRC) section 2774(b)(1), for the above referenced surface mining operation. A completed copy of the Surface Mine Inspection Report, form MRRC-1 and any other reports or documents prepared in support of this inspection are attached.

(I) Date the annual inspection was conducted: 01 / 24 /20 20

(II) Upon completion of the annual inspection, were aspects of this surfacing mining operation found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan?

☑ **No**. Please check "Not Applicable" for box (IV), (V) and (VI), and complete remainder of form.
☐ **Yes**. Please complete box (IV), (V) and (VI), as appropriate, and complete remainder of form.

(III) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with the SMARA, including the approved reclamation plan and were corrected before submission of the Inspection Report to the Division of Mine Reclamation:

☑ Not Applicable

(IV) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan and were not corrected before submission of the Inspection Report to the Division of Mine Reclamation:

*(Box (V) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☑ Not Applicable

(V) Upon completion of the annual inspection, the Lead Agency has determined this surface mining operation to be:

☑ **Compliant** with SMARA, including the approved reclamation plan.
☐ **Not Compliant** with SMARA, including the approved reclamation plan.

(VI) The following statement describes the Lead Agency's intended response to any aspects of this surface mining operation found to be inconsistent with SMARA, including the approved reclamation plan, but were not corrected before submission of the Inspection Report to the Division of Mine Reclamation. This includes whether a Notice of Violation or Order to Comply has been issued or will be issued or whether other enforcement actions under the lead agency's local mining ordinances has or will be initiated:

*(Box (VI) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☑ Not Applicable

(VII) The following statement describes whether the surface mining operation is out of compliance with an order to comply or stipulated order to comply issued by the lead agency.

☑ Not Applicable

(VIII) Has a financial assurance cost estimate required under PRC section 2773.4(d) been provided by the operator? If not, please explain.

☑ **Yes** ☐ **No**

(IX) Does this surface mining operation have a review of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the Lead Agency under PRC section 2770(b) or (h)?

☐ **Yes** ☑ **No**

(X) Does this surface mining operation have an appeal of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the State Mining and Geology Board or the lead agency governing body under PRC section 2770(e) or (h)?

☐ **Yes** ☑ **No**

SURFACE MINING INSPECTION REPORT

VII. Non-SMARA facility operations conditions solely of local concern (e.g. hours of operation) do not need to be noted here. See Instructions for Block VII.
[Use separate sheet(s) where necessary. Refer to item numbers below]

Potential Reclamation Plan Requirements	List Reclamation Plan Requirements (Recommended to be filled out prior to field inspection)	Note current site observations. Describe site conditions and aspects of the operation that are or may be inconsistent with the reclamation plan or SMARA. (Note additional comments on Section VIII as necessary)
L) Closure of Adits	None.	Non-operational.
M) Other Reclamation Plan Requirements	None.	Non-operational.

VIII. A. Use this space to describe general observations and sketches of the operation:

Additional observations/sheets/documents/sketches/photographs attached? ☐ Yes ☑ No

B. Describe areas of the operation that have been disturbed since the last inspection:

No new areas have been disturbed since last inspection.

Approximate total disturbed acreage since last inspection: None

Approximate total acreage of mined lands: None

C. Describe areas of the operation that have been reclaimed since the last inspection:

None.

Approximate reclaimed acreage since last inspection: None

Approximate total reclaimed acreage: None

D. Describe areas where the operator plans to conduct operations in the upcoming year:

Continue preparation for construction of the aggregate processing plant.

E. Describe the extent of mined lands with respect to the permitted/approved reclamation plan boundaries: None.

Date Inspection Conducted:	CA Mine ID Number:
January 24, 2020	91- 10-0031

SURFACE MINING INSPECTION REPORT

F. Describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

Consistent.

G. Describe any limitations encountered during the inspection:

None.

H. Describe conditions or aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA:

N/A

I. Do any of those conditions or aspects require further evaluation?

☑ No

☐ Yes, describe (For example, further evaluation or analysis may be required by a state-licensed professional or specialist):

J. Was a Notice of Violation issued for any of the above?

☑ No, describe:

☐ Yes, describe:

K. Describe remedial activities for any pre-existing or existing enforcement actions:

None.

SUBJECT: RIVERBEND SAND & GRAVEL (#91-10-0031)
45-Day Financial Assurance Estimate Director Review

To Whom It May Concern:

Attached for your review and comment is the Riverbend Sand & Gravel (#91-10-0031) Financial Assurance Cost Estimate (FACE). Fresno County, as lead agency, has reviewed the FACE and determined it to be adequate and consistent with the requirements provided in the Surface Mine and Reclamation Act Sections 2770 and 2773.1.

If you have any questions or need further information, please feel free to contact me by telephone at (559) 600-4251 or by e-mail at rjjimenez@fresnocountyca.gov.

Sincerely,

Roy Jimenez Jr., Planner
Water and Natural Resources Division

Enclosure: Financial Assurance Cost Estimate

FINANCIAL ASSURANCE COST ESTIMATE

FOR

RIVERBEND SAND AND GRAVEL

CA Mine ID# 91-10-0031

Reclamation Plan #/Name 3390 Riverbend Sand and Gravel

Prepared by: *(Name & Affiliation)*	This financial assurance cost estimate and submitted pursuant to (choose one):
Buada Associates, Inc. 4872 N Arcade Ave Fresno, Ca 93704 559-269-1376 Date: April 30, 2020	☐ A new or amended reclamation plan approved on (Date): An annual mine inspection performed on ☒ (Date): January 24, 2020 ☐ Other: Please Specify:

Most Recent Approved Financial Assurance Cost Estimate

Date: 4/17/2019

Amount: $ 259,309

Amount of existing Financial Assurance Mechanism(s)

Date: 4/17/2019

Amount: $ 259,309

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

State Prevailing Wage Rates (SPWR) ((General Prevailing Wage Determination Made by the Director of Industrial relations, Pursuant to California Labor Code Part 7, Article 2, Sections 1770, 1773, and 1773.1), effective through mid-2019

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

CalTrans Equipment Rates (Labor Surcharge and Equipment Rental Rates (Cost of Equipment and Ownership)), effective April 1, 2017 through March 31, 2019.

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Handbook (Caterpillar Performance Handbook, Edition 47) to determine equipment capacity and cycle times.
RS Means Heavy Construction Cost Data, 30 th Annual Edition, 2018 (Means);
Third party cost estimates;.

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

1. Figure
2. Division of Mine Reclamation Graphs
3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2020.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2020, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2020. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease •

The reclamation cost for the site was calculated to remain $ 259,309 since subsequent to the last cost estimate no disturbance has ocurred and no additional activties are anticipated other than were already included in the last estimate.

(add additional pages as needed)

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2020 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2020 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2020, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Demo Structures	Grove RT 625 40t Crane	1	80.00	68.43	5,474

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	85	Tons	22.5	1,913
				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913
Total	**5,571**

Task V.4 - Mobile Equipment Removal

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal

Miscellaneous plant equipment, parts and rubishe must be removed

Equipment Cost

	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	175	Tons	22.5	3,938
				Total	**3,938**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 7 loads (175 tons) of miscellaneous plant equipment and rubbish may be located around the site. it is assumed that all equipment and rubbish will be loaded into an end dump trailer and hauled to the County Landfill. Each load will require approximately two hours including loading, unloading, and travel time.

Total Cost Summary

Item	Cost
Equipment	2,422
Labor	2,836

Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2019. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067

			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:
- Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
- Prepare annual report (biologist, 4 hours).

Andrea,

It was good to talk to you earlier today. I am glad that we were able to connect and understand our clients' respective positions on the traffic mitigation cost estimates.

As we discussed, the Department of Public Works and Planning did quite a bit of work in preparing the current 2019 cost estimates, including the preparation of tentative schematics showing the improvements required by the project's mitigation measures. I have attached a couple of sample schematics showing the intersections of Jensen/McCall and McCall/SR-180. However, the Department has more of these.

This detailed review, which appears to have exceeded the scope the review done to prepare the 2015 estimate, revealed several larger cost items, including but not limited to:

- The relocation of large power poles near the McCall/SR-180 interchange, which would lie within the expanded right of way.
- The relocation or improvement of two railroad crossings along McCall between SR-180 and Jensen.
- The acquisition and demolition/relocation of numerous buildings which would lie within or too near the expanded right of way.
- The potential realignment of McCall at Jensen to allow expansion of McCall to the east in order to avoid a PG&E substation at the intersection. Such realignment would require removal or relocation of an existing building to the northeast of that intersection.

The Department believes that the estimate provided is reasonable and proportionate to the costs imposed on County infrastructure by the project. If you have any more questions, please do not hesitate to ask.

Andrea,

Thank you for your inquiry. I looked into this matter for you.

The 2015 cost estimate was already quite dated when Kyle initially shared the document with you. Indeed, it is dated 5/15/2015. It also incomplete, where it includes a placeholder which states "Total Cost for this Mitigation does not include any cost associated with Utilities Relocation." Kyle informed you in October of last year that the Department of Public Works an Planning would be "revising and updating these dollar amounts to more current 2019 cost estimates, which are needed to provide the County a more secured position in this agreement." (See attached email.)

That said, I understand that the increased cost is a result of several factors. The first and most significant factor is that, in preparing the 2019 estimate, the County's engineer was able to estimate the cost to relocate a major power pole and several other utilities poles located at State Route 180 and McCall Avenue. Thus, the 2019 estimate substituted the estimated cost of $500,000 for the previously-mentioned placeholder from the 2015 document which stated "Total Cost for this Mitigation does not include any cost associated with Utilities Relocation." Other factors include an increase in the cost of raw materials and updated right of way costs.

The basis for the increased costs are reflected in the attached Excel workbook. I will follow this email up with further information if and as it becomes available to me.

Please let me know if you have any further questions.

Thanks,
Bryan

Hi Bryan,

Thank you for the attached 2019 calculation sheet, and clarification on the values we had been using. Could you provide specific reasons the cost estimates doubled in 4 years? Since we were working with 2015 estimates less than a year ago, our presumption was that the amounts were current estimates, and it is troubling that the 2019 amounts have changed drastically from the 2015 amounts.

Andrea,

I had staff look into this. You were looking at the 2015 calculations. Attached is the updated 2019 calculation sheet, on which staff correlated the dollar amounts to the exhibit in which they are referenced.

I hope that this clears everything up.

Hi Bryan,

We have been reviewing the revised agreement with our client. Before we get revisions back to you, we wanted to get more information about the County's cash/bond calculations in Exhibits C-1, C-2, and C-3. I have attached the last draft of these exhibits that we sent to the County in May 2019, along with a fee table Kyle Roberson shared with us around that time.

Could you provide a cost breakdown to show how the County came up with each of the payment amounts the Exhibits?

Andrea, please find the County's revised agreement attached. As I indicated, it is being sent clean (i.e. not redlined), as I am uncertain of the provenance of the agreement and the prior changes.

If you would like to discuss, we can speak when I am back in the office on Tuesday.

FACE Approval Letter 062520.pdf

Gentlemen,

Fresno County, as lead agency, has reviewed the FACE and determined it to be adequate and consistent with the requirements provided in the Surface Mine and Reclamation Act Sections 2770 and 2773.1.

Please submit an updated Financial Assurance Mechanism (FAM) equivalent to the approved FACE directly to the CA Department of Conservation at DMR-Submittals@conservation.ca.gov (please copy the County).

If you have any questions or need further information, please feel free to contact me at (559) 600-4251.

Thank you.

Parlier, CA 93648

Dear Mr. Lange:

SUBJECT: Riverbend Sand and Gravel (CA Mine ID # 91-10-0031)
Financial Assurance Cost Estimate (FACE) Approval

Fresno County, as lead agency, has reviewed the FACE and determined it to be adequate and consistent with the requirements provided in the Surface Mine and Reclamation Act Sections 2770 and 2773.1.

Please submit an updated Financial Assurance Mechanism (FAM) equivalent to the approved FACE directly to the CA Department of Conservation , Division of Mine Reclamation at DMR-Submittals@conservation.ca.gov (please copy the County).

If you have any questions or need further information, please feel free to contact me by telephone at (559) 600-4251 or by e-mail at rjjimenez@fresnocountyca.gov.

Sincerely,

Roy Jimenez, Jr., Planner

FINANCIAL ASSURANCE COST ESTIMATE

FOR

RIVERBEND SAND AND GRAVEL

CA Mine ID# 91-10-0031

Reclamation Plan #/Name 3390 Riverbend Sand and Gravel

Prepared by: *(Name & Affiliation)*	This financial assurance cost estimate and submitted pursuant to (choose one):
Buada Associates, Inc. 4872 N Arcade Ave Fresno, Ca 93704 559-269-1376 Date: April 30, 2020	☐ A new or amended reclamation plan approved on (Date): An annual mine inspection performed on ☒ (Date): January 24, 2020 ☐ Other: Please Specify:

Most Recent Approved Financial Assurance Cost Estimate

Date: 4/17/2019

Amount: $ 259,309

Amount of existing Financial Assurance Mechanism(s)

Date: 4/17/2019

Amount: $ 259,309

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

State Prevailing Wage Rates (SPWR) ((General Prevailing Wage Determination Made by the Director of Industrial relations, Pursuant to California Labor Code Part 7, Article 2, Sections 1770, 1773, and 1773.1), effective through mid-2019

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

CalTrans Equipment Rates (Labor Surcharge and Equipment Rental Rates (Cost of Equipment and Ownership)), effective April 1, 2017 through March 31, 2019.

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Handbook (Caterpillar Performance Handbook, Edition 47) to determine equipment capacity and cycle times.
RS Means Heavy Construction Cost Data, 30 th Annual Edition, 2018 (Means);
Third party cost estimates;.

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

2. Division of Mine Reclamation Graphs
3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2020.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2020, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2020. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease •

The reclamation cost for the site was calculated to remain $ 259,309 since subsequent to the last cost estimate no disturbance has ocurred and no additional activties are anticipated other than were already included in the last estimate.

(add additional pages as needed)

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2020 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2020 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2020, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Demo Structures	Grove RT 625 40t Crane	1	80.00	68.43	5,474

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	85	Tons	22.5	1,913
				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913
Total	**5,571**

Task V.4 - Mobile Equipment Removal

Mobile equipment mau incude CAT 140 Motorgrader, CAT 980 Front End Loader, Cat 349 Excavator, Kamatsu 750 Excavator, CAT D9 Dozer, CAT Skid Steer, Ford F-650 Water Truck, Volvo A40E Haul Truck, JLG Skytrak Forklift

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost

Source: *State of California Prevailing Wage Rate Determinations - Northern California*

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal

Miscellaneous plant equipment, parts and rubishe must be removed

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Load Material	Grove RT 525 25t Crane	1	8.00	59.80	478

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Total Cost Summary

Item	Cost
Equipment	4,172
Labor	5,465

Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2019 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2019, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Grading	CAT D9 Dozer	1	18	217.85	3,921
Dust Control	4,000-gal Water Truck	1	18	53.72	967
				Total	**4,888**

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Production rates for a D9 bulldozer equipped with a V-blade equipment used to are derived from the methods identified in the Caterpillar Handbook. This production estimate assumes a D9R Dozer with an average production rate of 3.0 acres/hr. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	4,888
Labor	2,410
Other Costs	0
Total	**7,298**

Task VI.2 Finish Grading

Finish grading will be required in order to prepare the 52-acre plant site for revegetation.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Ripping	CAT 160H Motor Grader	1	18	92.22	1,660
Ripping	Ripper Attachment	1	18	16.20	292

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	**-**

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2019. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067
				Total	**1,067**

Source: *CalTrans Labor Surcharge and Equipment Rental Rates*

B. Labor Cost

C. Material Costs

Activity	Seed Species	Common Name	% of Mix	Lbs in Mix	Price/lb	Extension
Seed Mix	*Bromus mollis*	Blando Brome	30	390		
	Vulpia myros	Zorfro Annual Fescue	25	325		
	Trifolium hurtium	Hykon Rose Clover	45	585		
			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Equipment	Quantity	Hours	Years	$/Hour	Cost
Site maintenance	Pickup Truck	1	24	3	82.11	5,912
Field Monitoring	Pickup Truck	1	2	5	82.11	821
					Total	**6,733**

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:
- Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
- Prepare annual report (biologist, 4 hours).

D, Total Direct Cost of Monitoring (Sum A+B+C)

Equipment Cost + Labor Cost + Other Cost = **10,433**

IX. Summary of Costs

Subject: CMI Call/Herb Lang

Steve,

I contacted Herb Lang yesterday afternoon at your request and spoke with him for some time regarding his concerns. His overarching concern is that CMI is not following the limitations of their conditional use permit, specifically hours of operation. This has been a concern he has expressed to the County previously. Some of his general comments:

- CMI is operating on Saturdays after 9:00pm
- On Saturdays, there have been excavation activities, crushing and trucking
- Key dates include March 2, 2019 Saturday operation; January 31, 2020 lights moving on the site after 7:00 pm; February 8, 2020 activities until 9:30 pm
- He has stated that it is difficult to get photographs due to darkness of site at night, also stated he's not going to sit in a chair and monitor the site regularly

As is standard practice, I have kept Herb Lang's concerns confidential from CMI, not advising CMI of the complaining party. After I spoke with Herb yesterday I did receive another call from a neighboring property owner who requested my contact information and was going to provide me a list of concerns with CMI.

I have included the approved operational hours (highlighted and attached) which allows for the ready-mix plant to operate on Saturdays from 7:00am to 2:00pm. Also, major public works projects effecting the health and safety of the community may be permitted 24-hours a day, and that these projects may also require loading beyond the established hours.

Due to prior complaints related to operational hours, CMI has been sending me updates on these public works projects. We do not receive these notification from other surface mining operations in the County, and CMI's conditions do not specifically require them to notify the County of these operations. I forwarded a copy of this information to Mr. Lang yesterday. His response is attached in which he states that it explains the Saturday work, but not work until 9:00 pm last Thursday.

This morning I spoke with Andy Burgin of Lehigh Hanson, who is our primary contact for plant operations at this site. He stated that last Thursday 7/23 the processing plant was shut down before 7:00 pm, but CMI did have a maintenance crew working with a manlift and a forklift, and checking and changing conveyor belts until 9:30pm that evening. I have advised Mr. Lang of this response.

Andy Burgin also stated that CMI has been trying to change some of their operations to avoid back vehicles at night so equipment doesn't have to deploy its backing warning beepers as much. This is to address a concern Mr. Lang raised last year regarding beeper noise not allowing him to sleep.

Mr. Lang stated he had contacted me in late January and that I never got back to him. I checked my e-mails and have no record of an e-mail from him and I do not recollect that I owed him a call. I did apologize if there was a misunderstanding and he can always follow-up he if believes he's owed something.

Let me know if you need any additional information or would like to discuss.

Sincerely,

Chris W. Motta, MURP| **Principal Planner**

Supervisor,

The following is a detailed recap compiled by Chris Motta Principal Planner with PWP. It looks like there is a long standing disagreement between CMI and Mr. Lang. We will keep you updated on any/all responses from either party. This issue has been a long standing issue between both parties , PWP has not found a violation to date.

Roy Jimenez Jr., County of Fresno

IX. Inspector's "Certificate of Completion of Inspection Workshop" Number:	Inspectors Signature:	If the inspector is a State-licensed person or a contractor for the lead agency, provide license type and number:
18072	Roy Jimenez Jr. Digitally signed by Roy Jimenez Jr. Date: 2021.05.12 09:51:14 -07'00'	
Certification Expiration Date: 06/25/2023	**Date Signed:** 05/12/2021	

STATE OF CALIFORNIA
DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION

SURFACE MINING INSPECTION REPORT, FORM MRRC-1, INSTRUCTIONS

GENERAL INFORMATION

This report form is intended to comply with the requirements of California's Surface Mining and Reclamation Act of 1975 (SMARA – Public Resources Code §§ 2710 et seq., and the associated California Code of Regulations found in Title 14, Division 2, commencing with § 3500, hereinafter respectively "PRC" or "CCR") and specifically PRC § 2774(b) and CCR § 3504.5 for surface mining operations (operation).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

INSTRUCTIONS FOR COMPLETING THE SURFACE MINING INSPECTION REPORT FORM MRRC-1

PLEASE TYPE OR PRINT ALL INFORMATION REQUESTED

NOTE: YOU MUST WRITE THE DATE INSPECTION CONDUCTED AND THE CALIFORNIA MINE ID NUMBER AND AT THE TOP OF PAGE 1

1. **BLOCK I**: Enter the name of the mine as indicated on the Annual Report.

2. **BLOCK II**: Enter the name and mailing address of the Mine Operator (Operator), the name of the person serving as the onsite contact, their email address and phone number.

3. **BLOCK III**: For "Lead Agency," enter the name of the SMARA Lead Agency that is conducting this inspection, the name of the inspector and contact information. For "Entity or Organization," enter the name of the entity or organization that employs the inspector.

4. **BLOCK IV**: Enter information with respect to the currently approved reclamation plan, permit and/or vested right and Interim Management Plan. Check Not Applicable as appropriate. In cases where a Reclamation Plan Number has not been assigned by the lead agency, enter any unique lead agency assigned identifier for the approved reclamation plan.

5. **BLOCK V**: Indicate if the operation is located on Federal land. Please identify any government entities or agencies, other than the Lead Agency noted above, that accompanied the inspection.

   Inspecting Agency Codes: (can choose multiple)

None	=	None	DFW	=	Department of Fish and Wildlife
BLM	=	Bureau of Land Management	NPS	=	National Park Service
USFS	=	U.S. Forest Service	DOC	=	Department of Conservation
RB	=	Regional Water Quality Control Board	O	=	Other (list Agency)

   Reason for Inspection: (can choose multiple)

AI	=	Annual Inspection	RE	=	Re-inspection
PC	=	Public Concern	O	=	Other Reason
OA	=	Other Agency Request	AR	=	Acknowledgement of Reclamation

   Provide the land use designation or the zoning information for the parcels on which the mined lands are located.

6. **BLOCK VI**: “Financial Assurances” consist of a current approved Financial Assurance Cost Estimate and a Financial Assurance Mechanism that is at least equal to the current approved Financial Assurance Cost Estimate (PRC § 2736).

   The Financial Assurance amount must be reviewed and approved once each calendar year to account for new lands disturbed by surface mining operations and lands to be disturbed in coming year, inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan (PRC § 2773.1(a)(3) and the State Mining and Geology Board (SMGB) Financial Assurance Guidelines). In order to determine what adjustments, if any, are appropriate to the Financial Assurance Mechanism amount, each mine operator must submit once each calendar year a revision of the written Financial Assurance Cost Estimate to the Lead Agency (CCR § 3804(c)). An Operator shall provide an updated annual Financial Assurance Cost Estimate to the Lead Agency for review within 30-days of conducting of the annual inspection (PRC § 2773.4(d)(1)(A). Provide the date and amount of the currently approved Financial Assurance Cost Estimate.

Use the Financial Assurance "Other" and "Explanation" blocks to provide any other pertinent information regarding the status of Financial Assurance(s). If the operation does not have a current Financial Assurance Cost Estimate and/or Financial Assurance Mechanism, explain in detail. A Financial Assurance Cost Estimate is considered current if it has been approved in accordance with applicable requirements of PRC § 2773.4 within the current or previous calendar year.

Type of Financial Assurance Mechanism(s): Fill in the type of mechanism(s) that are on file. CCR § 3803 and the SMGB Financial Assurance Guidelines describe Surety Bonds, Trust Funds, or Irrevocable Letters of Credit as acceptable financial assurance mechanisms for non-governmental entity operators. For surface mining operations owned and operated by state and local government entities, Surety Bonds, Trust Funds, Irrevocable Letters of Credit, Pledges of Revenue, and a Budget Set Aside are acceptable financial assurance mechanisms.

State the Financial Assurance Mechanism(s) document number(s). State the dollar amount of each Financial Assurance Mechanism~~(s)~~ currently on file. State the date of expiration of the Financial Assurance Mechanism(s) currently on file. State the date of approval for the most recent lead agency approved Financial Assurance Mechanism~~(s)~~ on file. State the total dollar amount of the mechanism(s) held for reclamation of mined lands.

7. **BLOCK VII**:

INSTRUCTIONS FOR EACH DATA COLUMN:

Potential Reclamation Plan Requirements (Column 1)**:** Under PRC § 2772 and CCR §§ 3501, 3502, and as described in the Guidance Document for Surface Mine Inspectors in CCR § 3504.6 inspections may include the following: the operation's horizontal and vertical dimensions, volumes of materials stored on the site; slope angles of stock piles, waste piles and quarry walls; effects of sidecasting and potential geological hazards; equipment and other facilities; samples of materials; photographic or other electronic images of the operation; any measurements or observations deemed necessary by the inspector or the lead agency to ensure the operation is in compliance with SMARA, and specifically the approved reclamation plan. Column 1 provides a list of items that may be included in the approved reclamation plan, either expressly or by reference as described in PRC §§ 2772 and 2772.1, which may include conditions of approval, other permit requirements and supplementary documents, including environmental documents, prepared for the project pursuant to the California Environmental Quality Act (CEQA) (Division 13 (commencing with Section 21000)).

It is not expected that all reclamation plans will include each item of Section ~~VIII~~VII or be limited to the items listed. Items in Column 1 that are not in the reclamation plan may not need to be addressed in the inspection. In instances where the reclamation plan lacks specific details for the reclamation of mined lands, the inspector may need to consider if additional reclamation requirements or specifics are needed to achieve the proposed use after reclamation. Reclamation plan requirements not listed in Items ~~1~~A through ~~12~~L may be listed in Item ~~13~~M, under "Other Reclamation Plan Requirements."

Reclamation Plan Requirements (Column 2)**:** Prior to conducting the field inspection, the inspector must review the approved reclamation plan, any amendments, and other reclamation requirements as part of a permit application for the operation that were used to satisfy the requirements of PRC §§ 2772(c), 2773 and 2773.3 and Article 1 (commencing with § 3500) and Article 9 (commencing with § 3700) of Subchapter 1 of Chapter 8 of Division 2 of Title 14 of the California Code of Regulations and any approved modifications contained in permit conditions of approval (COA) or binding mitigation measures adopted pursuant to the CEQA included by reference in the approved reclamation plan pursuant to PRC §§ 2772(d) and 2772.1(b). The most recently approved Financial Assurance Cost Estimate and any pending or ongoing enforcement actions should also be reviewed. Conditions of Approval (COA) that relate to facility

operations solely of local concern, such as hours of operation, noise, and dust control are not subject to the inspection.

Column 2 is intended to provide the inspector a place to match any items noted in Column 1 with those items included in the approved reclamation plan either expressly or by reference, as described above, in PRC §§ 2772 and 2772.1. Also note any Interim Management Plan (IMP) requirements where the mine is subject to an IMP pursuant to PRC § 2770(h).

Indicate the source document for the reclamation plan requirements at the end of the entry in parenthesis; i.e. (COA) Plan of Operations (POO), Environmental Impact Report (EIR), Waste Discharge Report (WDR), Stormwater Pollution Prevention Program (SWPPP), etc. If items listed in Column 1 of Section ~~VIII~~VII of the form are not included in the reclamation plan or other documents included by reference, write not applicable or "NA" in Column 2.

Specific reclamation requirements may not apply to an operation at the time of inspection, but they are important to ensure current activity at the site will not prohibit reclamation in accordance with the approved reclamation plan.

Site Observations and Compliance Issues (Column 3)**:** Use this space to note current site observations and to describe site conditions and aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA, if any, noted for both operating and reclaimed surfaces that pertain to the reclaimed condition of mined lands.

Site conditions that are or may be inconsistent with SMARA include unanticipated but actual conditions encountered as the mining operation progresses, for which mitigation measures were not fully addressed in the reclamation plan and which affect any aspect of reclamation or calculation of the FACE, as described in the approved reclamation plan.

8. **BLOCK VIII**: The inspector responds to the statements or questions in the space provided for (A) through (O). Additional instructions are provided below for (A), (F), (G), (I), (J), (L), (M), (N), and (O).

   (A) If additional space is required to record observations, photographs, etc., please check the corresponding box in (A) and attach documentation to the MRRC-1.

   (F) Requires the inspector to describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

   (G) Requires the inspector to describe limitations encountered during the inspection. These limitations may include, but are not limited to: inaccessibility to certain areas due to weather, blasting, excavating, etc.

   (I) Requires checking a "Yes" or "No" box. Conditions or aspects identified in (H) requiring further evaluation should be described further.

   (J) Requires checking a "Yes" or "No" box. A description of why or why not a Notice of Violation was issued for conditions or aspects identified in (H) should be provided.

   (L) For "Duration of Inspection," indicate the start and end times of the inspection (do not include travel time).

(M) Weather Codes

CR	=	Clear
CL	=	Cloudy
SN	=	Snow
RN	=	Rain
WD	=	Windy

(N) SMARA Status of Mine Codes (based on annual report and reported production under CCR §3695, indicate the appropriate status code):

NP	=	Newly Permitted (surface mining operation not begun)
Active	=	Operation Not Idle (per PRC § 2727.1)
I	=	Idle (per PRC § 2727.1)
AB	=	Abandoned (per PRC §2700(h)(6))

(O) Attendees: Provide the names and affiliations of parties in attendance at the inspection.

9. **BLOCK IX**: Provide the Inspector's "Certificate of Completion of Inspection Workshop" Number and expiration date. Sign and date the Inspection Report. If applicable, include the inspector's certification (Professional Engineer (PE), Professional Geologist (PG), Licensed Landscape Architect, Registered Professional Forester, Professional Land Surveyor (PLS), etc.) and license number. The lead agency shall cause an inspection to be conducted by a state-licensed geologist, state-licensed civil engineer, state-licensed landscape architect, or state-licensed forester, or a qualified lead agency employee pursuant to PRC § 2774(b)(1).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report (form MRRC-1) and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (form NOCI-1) (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

EXHIBIT 177

FINANCIAL ASSURANCE COST ESTIMATE

FOR

RIVERBEND SAND AND GRAVEL

CA Mine ID# 91-10-0031

Reclamation Plan #/Name 3390 Riverbend Sand and Gravel

Prepared by: *(Name & Affiliation)*	This financial assurance cost estimate and submitted pursuant to (choose one):
Buada Associates, Inc. 4872 N Arcade Ave Fresno, Ca 93704 559-269-1376 Date: May 4, 2021	☐ A new or amended reclamation plan approved on (Date): An annual mine inspection performed on ☒ (Date): January 26, 2021 ☐ Other: Please Specify:

Most Recent Approved Financial Assurance Cost Estimate

Date: 4/17/2019

Amount: $ 259,309

Amount of existing Financial Assurance Mechanism(s)

Date: 4/17/2019

Amount: $ 259,309

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

California Department of Industrial Relations, General Prevailing Wage Determinations made by the Director of Industrial Relations, Index 2020-2, Northern California, Area 2

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

Caltrans Labor Surcharge and Equipment Rental Rates, April 1, 2020 - March 31, 2021

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Performance Handbook

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

1. Figure
2. Division of Mine Reclamation Graphs
3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2021.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2020, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2021. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease

The reclamation cost for the site was calculated to remain $ 259,309 since subsequent to the last cost estimate no disturbance has occurred and no additional activities are anticipated other than were already included in the last estimate.

(add additional pages as needed)

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2021 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2021 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2021, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Demo Structures	Grove RT 625 40t Crane	1	80.00	68.43	5,474

				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913

				Total	-

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Source: Fresno County American Avenue Landfill

Assumptions and Calculations
Approximately 7 loads (175 tons) of miscellaneous plant equipment and rubbish may be located around the site. it is assumed that all equipment and rubbish will be loaded into an end dump trailer and hauled to the County Landfill. Each load will require approximately two hours including loading, unloading, and travel time.

Total Cost Summary

Item	Cost
Equipment	2,422
Labor	2,836
Other Costs	3,938
Total	**9,196**

Task V.6 - Underground Pipe Removal
Underground piping will have to be removed.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Expose/Load Pipe	CAT 315L Excavator	1	40.00	49.80	1,992
Load Pipe/Fill Trench	CAT 938G Wheel Loader	1	20.00	82.11	1,642
Haul Material	4 axle On highway Dump Truck	1	2.00	69.24	138

Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Total Cost Summary

Total Labor Cost	16,015

C. Materilas: See following sheets VI.1 to VI.2	Cost
Site Grading	
Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2021 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2021, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Grading	CAT D9 Dozer	1	18	217.85	3,921
Dust Control	4,000-gal Water Truck	1	18	53.72	967

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Production rates for a D9 bulldozer equipped with a V-blade equipment used to are derived from the methods identified in the Caterpillar Handbook. This production estimate assumes a D9R Dozer with an average production rate of 3.0 acres/hr. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	4,888
Labor	2,410
Other Costs	0
Total	**7,298**

Task VI.2 Finish Grading

Finish grading will be required in order to prepare the 52-acre plant site for revegetation.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Ripping	CAT 160H Motor Grader	1	18	92.22	1,660
Ripping	Ripper Attachment	1	18	16.20	292

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2021. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067
				Total	**1,067**

Source: *CalTrans Labor Surcharge and Equipment Rental Rates*

B. Labor Cost

C. Material Costs

Activity	Seed Species	Common Name	% of Mix	Lbs in Mix	Price/lb	Extension
Seed Mix	*Bromus mollis*	Blando Brome	30	390		
	Vulpia myros	Zorfro Annual Fescue	25	325		
	Trifolium hurtium	Hykon Rose Clover	45	585		
			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Equipment	Quantity	Hours	Years	$/Hour	Cost
Site maintenance	Pickup Truck	1	24	3	82.11	5,912
Field Monitoring	Pickup Truck	1	2	5	82.11	821

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:

Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
Prepare annual report (biologist, 4 hours).

D, Total Direct Cost of Monitoring (Sum A+B+C)

Equipment Cost + Labor Cost + Other Cost = **10,433**

State of California
DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION
NOCI-1 (2019)

NOTICE OF COMPLETION OF INSPECTION

Date of Notice: 05/12/2022

To:	From:
California Department of Conservation Division of Mine Reclamation Attention: Reporting Unit 801 K Street, MS 09-06 Sacramento, California 95814	County of Fresno (Lead Agency Name) Roy Jimenez Jr. (Lead Agency Contact Name) 2220 Tulare Street, 6th Floor (Lead Agency Address) Fresno CA 93621 (Lead Agency City, State, Zip Code)

Mine Name: Riverbend Sand and Gravel	CA Mine ID Number: 91- 10-0031

This submittal serves as the Lead Agency notice of completion of the annual inspection to the Division of Mine Reclamation (DMR) as required by the Surface Mining and Reclamation Act of 1975 (SMARA), specifically Public Resources Code (PRC) section 2774(b)(1), for the above referenced surface mining operation. A completed copy of the Surface Mine Inspection Report, form MRRC-1 and any other reports or documents prepared in support of this inspection are attached.

(I) Date the annual inspection was conducted: 01/26/2022

(II) Upon completion of the annual inspection, were aspects of this surface mining operation found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan?

☒ **No**. Please check "Not Applicable" for box (IV), (V) and (VI), and complete remainder of form.
☐ **Yes**. Please complete box (IV), (V) and (VI), as appropriate, and complete remainder of form.

(III) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with the SMARA, including the approved reclamation plan and were corrected before submission of the Inspection Report to the Division of Mine Reclamation:

☒ Not Applicable

(IV) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan and were not corrected before submission of the Inspection Report to the Division of Mine Reclamation:

(*Box (V) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(V) Upon completion of the annual inspection, the Lead Agency has determined this surface mining operation to be:

☒ **Compliant** with SMARA, including the approved reclamation plan.
☐ **Not Compliant** with SMARA, including the approved reclamation plan.
☐ Not Applicable

(VI) The following statement describes the Lead Agency's intended response to any aspects of this surface mining operation found to be inconsistent with SMARA, including the approved reclamation plan, but were not corrected before submission of the Inspection Report to the Division of Mine Reclamation. This includes whether a Notice of Violation or Order to Comply has been issued or will be issued or whether other enforcement actions under the lead agency's local mining ordinances has or will be initiated:

(*Box (VI) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(VII) The following statement describes whether the surface mining operation is out of compliance with an order to comply or stipulated order to comply issued by the lead agency.

☒ Not Applicable

05/12/2021 ___
CA Mine ID Number: 91- 10-0031

(VIII) Has a financial assurance cost estimate required under PRC section 2773.4(d) been provided by the operator? If not, please explain.

☒ **Yes** ☐ **No**

(IX) Does this surface mining operation have a review of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the Lead Agency under PRC section 2770(b) or (h)?

☐ **Yes** ☒ **No**

(X) Does this surface mining operation have an appeal of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the State Mining and Geology Board or the lead agency governing body under PRC section 2770(e) or (h)?

☐ **Yes** ☒ **No**

ONLINE MINING OPERATION ANNUAL REPORT FOR THE **RIVERBEND SAND AND GRAVEL, LLC** , CALIFORNIA MINE ID# **91-10-0031**

The Department of Conservation's, Division of Mine Reclamation (DMR) has received the electronic submission of the Online Mining Operation Annual Report (Annual Report) form number MRRC-2, as required by Public Resources Code Section 2207.

In addition to submitting your Annual Report online, you are encouraged to make your payment online at the following address no later than 11:59 p.m. on July 1, 2021:

https://www.govone.com/PAYCAL/DOC/

If submitting your payment by mail, please include a copy of your 'Statement of Fees Due' with your check or money order payable to Department of Conservation/DMR postmarked on or before July 1, 2021.

Once your Annual Report is processed, you will be notified of any discrepancies. If discrepancies are found, you will be required to submit the requested corrections to the DMR within thirty (30) days. Failure to do so may subject your operation to administrative penalties as provided in PRC Section 2774.1(c).

If you have any questions, you may contact the DMR Reporting Unit by email at DMR-Reporting@conservation.ca.gov , or by phone at (916) 323-9198.

Thank you for your submittal(s).

Subject: RE: CUP 3628

Good morning Christine,

CUP 3628 is still in effect. The uses approved must be developed in accordance with the timelines below. There are currently several applications for structures which have been submitted for review so the development phase is still active.

I. TIME LIMIT FOR DEVELOPMENT

Each Conditional Use Permit approved either before or after the effective date of this amendment shall become void when:

1. There has not been substantial development within two years after the approval of said Conditional Use Permit or the effective date of this amendment, whichever date is later. However, in the case of a Conditional Use Permit authorizing a tentative map, expiration of said permit shall be concurrent with the expiration date of the tentative or vesting map and may be extended in the same manner as said map; or

   (Amended by Ord. T-241 adopted 7-28-80; Ord. T-026-287 adopted 11-12-85)

2. There is a cessation in the occupancy or use of land or structures authorized by said Conditional Use Permit for a period in excess of two years; except where the structure or land is limited to a single purpose use.

3. Where circumstances beyond the control of the applicant cause delays which do not permit compliance with the time limitation established in Section 873-I.1, the Commission may grant a maximum of four one (1)-year extensions. Application for such time extension must be set forth in writing, including the reasons for the extension, and be filed with the Public Works and Planning Department before the expiration of the Conditional Use Permit. Such request shall be acted upon by the Commission at a public hearing. The Commission's decision shall be appealable to the Board of Supervisors. The required public

hearing(s) shall be subject to the public notice requirements and procedures set forth in Section 873-D, E, G, and H.

(Amended by Ord. T-091-374 adopted 8-23-16)

Thank you,

James Anders| Senior Planner

CAUTION!!! - EXTERNAL EMAIL - THINK BEFORE YOU CLICK

Good Afternoon-
Our office is appraising the property located at 3316 S. Clovis Avenue in Fresno (APN: 331-030-58). It is our understanding that CUP 3628 was approved in 2019. We wanted to verify that the CUP still is in effect.

Thank you for your time and help.

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

California Department of Industrial Relations, General Prevailing Wage Determinations made by the Director of Industrial Relations, Index 2022-1, Northern California, Area 2

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

Caltrans Labor Surcharge and Equipment Rental Rates, April 1, 2021 - March 31, 2022

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Performance Handbook

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

1. Figure
2. Division of Mine Reclamation Graphs
3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2022.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2022, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2022. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease

The reclamation cost for the site was calculated to remain $ 259,309 since subsequent to the last cost estimate no disturbance has occurred and no additional activities are anticipated other than were already included in the last estimate.

(add additional pages as needed)

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2022 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2022 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2022, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	85	Tons	22.5	1,913
				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913
Total	**5,571**

Task V.4 - Mobile Equipment Removal

Mobile equipment mau incude CAT 140 Motorgrader, CAT 980 Front End Loader, Cat 349 Excavator, Kamatsu 750 Excavator, CAT D9 Dozer, CAT Skid Steer, Ford F-650 Water Truck, Volvo A40E Haul Truck, JLG Skytrak Forklift

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost

Labor	Laborer Group 3	1	6	53.49	321
				Total	**2,485**

Source: *State of California Prevailing Wage Rate Determinations Northern California*

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal
Miscellaneous plant equipment, parts and rubishe must be removed

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Total Cost Summary

Item	Cost
Equipment	4,172
Labor	5,465
Other Costs	563

Total Labor Cost	16,015

C. Materilas: See following sheets VI.1 to VI.2	Cost
Site Grading	
Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2022 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2022, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2022. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067

Activity	Seed Species	Common Name	% of Mix	Lbs in Mix	Price/lb	Extension
Seed Mix	*Bromus mollis*	Blando Brome	30	390		
	Vulpia myros	Zorfro Annual Fescue	25	325		
	Trifolium hurtium	Hykon Rose Clover	45	585		
			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Equipment	Quantity	Hours	Years	$/Hour	Cost
Site maintenance	Pickup Truck	1	24	3	82.11	5,912
Field Monitoring	Pickup Truck	1	2	5	82.11	821
					Total	**6,733**

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:

Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
Prepare annual report (biologist, 4 hours).

D, Total Direct Cost of Monitoring (Sum A+B+C)

Equipment Cost + Labor Cost + Other Cost = **10,433**

IX. Summary of Costs

V Total of Plant Structures and Equipment Removal Costs	109,676
VI Total of all Primary Reclamation Costs	31,410
VII Total of all Revegetation Costs	6,442
VIII Total of all Monitoring Costs	10,433
Total Direct Costs	**157,961**

X. Supervision/Profit & Overhead/Contingencies/Mobilization

(A) Supervision	5.5%	8,688
(B) Profit/Overhead	11.5%	18,166
(C) Contingencies	7.0%	11,057
(D) Mobilization	3.0%	4,739
Total Indirect Costs		42,649
Total Direct & Indirect Costs		200,610
(E) Lead Agency and//or Dept. of Conservation Administrative Costs	8%	16,049
Total Estimated Cost of Reclamation		**259,309**

DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION
NOCI-1 (2019)

NOTICE OF COMPLETION OF INSPECTION

Date of Notice: 05/03/2022

To:	From:
California Department of Conservation Division of Mine Reclamation Attention: Reporting Unit 801 K Street, MS 09-06 Sacramento, California 95814	County of Fresno (Lead Agency Name) Roy Jimenez Jr. (Lead Agency Contact Name) 2220 Tulare Street, 6th Floor (Lead Agency Address) Fresno CA 93621 (Lead Agency City, State, Zip Code)

Mine Name: Riverbend Sand and Gravel	CA Mine ID Number: 91- 10-0031

This submittal serves as the Lead Agency notice of completion of the annual inspection to the Division of Mine Reclamation (DMR) as required by the Surface Mining and Reclamation Act of 1975 (SMARA), specifically Public Resources Code (PRC) section 2774(b)(1), for the above referenced surface mining operation. A completed copy of the Surface Mine Inspection Report, form MRRC-1 and any other reports or documents prepared in support of this inspection are attached.

(I) Date the annual inspection was conducted: 12/17/2021

(II) Upon completion of the annual inspection, were aspects of this surface mining operation found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan?

☒ **No**. Please check "Not Applicable" for box (IV), (V) and (VI), and complete remainder of form.
☐ **Yes**. Please complete box (IV), (V) and (VI), as appropriate, and complete remainder of form.

(III) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with the SMARA, including the approved reclamation plan and were corrected before submission of the Inspection Report to the Division of Mine Reclamation:

☒ Not Applicable

(IV) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan and were not corrected before submission of the Inspection Report to the Division of Mine Reclamation:

(*Box (V) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(V) Upon completion of the annual inspection, the Lead Agency has determined this surface mining operation to be:

☒ **Compliant** with SMARA, including the approved reclamation plan.
☐ **Not Compliant** with SMARA, including the approved reclamation plan.
☐ Not Applicable

(VI) The following statement describes the Lead Agency's intended response to any aspects of this surface mining operation found to be inconsistent with SMARA, including the approved reclamation plan, but were not corrected before submission of the Inspection Report to the Division of Mine Reclamation. This includes whether a Notice of Violation or Order to Comply has been issued or will be issued or whether other enforcement actions under the lead agency's local mining ordinances has or will be initiated:

(*Box (VI) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(VII) The following statement describes whether the surface mining operation is out of compliance with an order to comply or stipulated order to comply issued by the lead agency.

☒ Not Applicable

(VIII) Has a financial assurance cost estimate required under PRC section 2773.4(d) been provided by the operator? If not, please explain.

☒ **Yes** ☐ **No**

(IX) Does this surface mining operation have a review of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the Lead Agency under PRC section 2770(b) or (h)?

☐ **Yes** ☒ **No**

(X) Does this surface mining operation have an appeal of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the State Mining and Geology Board or the lead agency governing body under PRC section 2770(e) or (h)?

☐ **Yes** ☒ **No**

FINANCIAL ASSURANCE COST ESTIMATE REVIEW
CARMELITA MINE (CALIFORNIA MINE ID #91-10-0028)

Dear Mr. Jimenez,

The Department of Conservation's Division of Mine Reclamation (Division) received an annual financial assurance cost estimate (FACE) in the amount of $148,773 for the Carmelita Mine on May 3, 2022. The County of Fresno is the Lead Agency under the Surface Mining and Reclamation Act of 1975 (Public Resources Code [PRC] Section 2710 et seq.). This mine is operated by Carmelita Resources LLC.

In addition to the review of the FACE submittal, Division staff conducted a review of the mine file, and has no comments that would substantially alter the financial assurance cost estimate at this time.

The Division looks forward to receiving the County's 30-days' notice of intent to approve, and subsequent approved FACE pursuant to Public Resource Code Section 2773.4

If you have any questions regarding this letter, please contact Mike Luksic at 916-764-8171.

Sincerely,

John

Fresno County, as lead agency, has reviewed the FACE and determined it to be adequate and consistent with the requirements provided in the Surface Mine and Reclamation Act Sections 2770 and 2773.1.

Please submit an updated Financial Assurance Mechanism (FAM) equivalent to the approved FACE directly to the CA Department of Conservation , Division of Mine Reclamation at DMR-Submittals@conservation.ca.gov (please copy the County).

If you have any questions or need further information, please feel free to contact me by telephone at (559) 600-4251 or by e-mail at rjjimenez@fresnocountyca.gov

Thank you.

San Diego, CA 92123

E-Mail Address: george.kenline@martinmarietta.com

RE: *Public Records Act Request No. 22-567, dated December 16, 2022*

Dear George Kenline,

This correspondence concerns your Public Records Act ("PRA") request, dated December 16, 2022 ("Your Request"), and received by the Department that same date. Please be aware that, because Your Request is presented broadly and requires Department staff to make assumptions about your request, it is possible that Department staff might not have found every record you might be intending to seek.

You have requested records as follows:

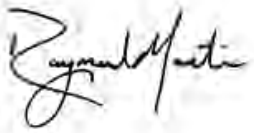
- […] for Riverbend Sand and Gravel (CA Mine #91-10-0031) conditional use permit and reclamation documents, including but not limited to, the Draft EIR and Final EIR, Planning Commission Staff Report, Conditions of Approval, CUP application, and all related findings, maps studies and technical documents

  SCH Number: 2013071097
  Location Coordinates 36°40'45"N 119°31'9"W
  Cross Streets: Goodfellow Avenue & Riverbend Avenue,
  Total Acres: 619
  Parcel #s: 333-160-01, -04-05, 360-020-20 ...
  Township: 14/15S
  Range: 22/23E
  Sections: 25,36

Based on our understanding of Your Request, the Department currently expects that any responsive public records that existed as of December 16, 2022, which is the date of your request, will be provided on or before January 9, 2022. We will inform you as soon as we can if our expectation changes.

Should you wish to amend the PRA request in Your Letter to narrow the scope of the Department's review, Department staff will further assist you to "make a focused and effective request that reasonably describes an identifiable record or records." (Gov. Code, § 6253.1, subd. (a).) To do so, please coordinate with Raymond Martin, at rmartin@fresnocountyca.gov or phone number (559) 600-4305.

Sincerely,



Raymond Martin, Staff Analyst
Department of Public Works and Planning
County of Fresno

Good Morning Michelle,

Thank you for the documents. I have successfully downloaded all of the posted documents.

In reviewing all of the documents, I can't seem to identify a copy of the Draft EIR? The July 30, 2014 public meeting was held for the Riverbend Sand and Gravel Project Draft EIR (dated July 17, 2014). I have the appendices, but not the DEIR-titled document. Is that available?

NOTE: THE DRAFT ENVIRONMENTAL IMPACT REPORT (DEIR - ENVIRONMENTAL IMPACT REPORT NO. 6606 – STATE CLEARINGHOUSE NO. 2013071097) WAS RELEASED ON JULY 17, 2014 AND MUCH OF THE PROJECT INFORMATION WAS MADE AVAILABLE WITH THAT DOCUMENT WHICH WAS PREVIOUSLY MADE AVAILABLE TO YOUR AGENCY FOR REVIEW UNDER THE PROVISIONS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA).

THE PURPOSE OF THIS ROUTING IS TO SOLICIT ADDITIONAL COMMENTS FROM YOUR AGENCY/ORGANIZATION SPECIFIC TO UNCLASSIFIED CONDITIONAL USE PERMIT NO. 3390.

The Project's Environmental Impact Report - State Clearinghouse No. 2013071097 may also be reviewed for reference purposes at:

http://www.co.fresno.ca.us/departmentpage.aspx?id=54051

Thank you for your assistance.

CAUTION!!! - EXTERNAL EMAIL - THINK BEFORE YOU CLICK

Good Morning Raymond,

I hope the new year is going well for you and the tasks carried over from December have diminished. Given the status of the attached email notices, is it safe to say the request is still open?

Thank you for your assistance.

George Kenline, PG CEG CHG

Hey Michelle.

I added the draft EIR to the docs approved for release.

Could you upload it?

Subject: RE: Public Records Act Request No. 22-567, dated December 16, 2022

Good Morning Michelle,

Thank you for the documents. I have successfully downloaded all of the posted documents.

In reviewing all of the documents, I can't seem to identify a copy of the Draft EIR? The July 30, 2014 public meeting was held for the Riverbend Sand and Gravel Project Draft EIR (dated July 17, 2014). I have the appendices, but not the DEIR-titled document. Is that available?

NOTE: THE DRAFT ENVIRONMENTAL IMPACT REPORT (DEIR - ENVIRONMENTAL IMPACT REPORT NO. 6606 – STATE CLEARINGHOUSE NO. 2013071097) WAS RELEASED ON JULY 17, 2014 AND MUCH OF THE PROJECT INFORMATION WAS MADE AVAILABLE WITH THAT DOCUMENT WHICH WAS PREVIOUSLY MADE AVAILABLE TO YOUR AGENCY FOR REVIEW UNDER THE PROVISIONS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA).

THE PURPOSE OF THIS ROUTING IS TO SOLICIT ADDITIONAL COMMENTS FROM YOUR AGENCY/ORGANIZATION SPECIFIC TO UNCLASSIFIED CONDITIONAL USE PERMIT NO. 3390.

The Project's Environmental Impact Report - State Clearinghouse No. 2013071097 may also be reviewed for reference purposes at:

http://www.co.fresno.ca.us/departmentpage.aspx?id=54051

Thank you for your assistance.

Good Morning,

I apologize for not calling you back. I uploaded the documents individually vs. the link and it was able upload like that. Please take a look at the documents and let me know that you can now view them. Once I get confirmation that you can view I will go ahead and close out your request.

Thank you,

FINANCIAL ASSURANCE COST ESTIMATE

FOR

RIVERBEND SAND AND GRAVEL

CA Mine ID# 91-10-0031

Reclamation Plan #/Name 3390 Riverbend Sand and Gravel

Prepared by: *(Name & Affiliation)*	This financial assurance cost estimate and submitted pursuant to (choose one):
Buada Associates, Inc. 4872 N Arcade Ave Fresno, Ca 93704 559-269-1376 Date: January 26, 2023	☐ A new or amended reclamation plan approved on (Date): An annual mine inspection performed on ☒ (Date): November 28, 2023 ☐ Other: Please Specify:

Most Recent Approved Financial Assurance Cost Estimate

Date: 6/29/2023

Amount: $ 259,309

Amount of existing Financial Assurance Mechanism(s)

Date: 4/17/2019

Amount: $ 259,309

I. SUPPORTING DOCUMENTS

This estimate represents the cost of conducting and completing reclamation in accordance with the Surface Mining and Reclamation Act (SMARA) and the following supporting documents:

Reclamation Plan Approval Date and Number

Surface Mining and Reclamation Plan for Unclassified Conditional use Permit No. 3390 approved February,26, 2015

Permits and/or Environmental Documents Approved as, or Conditional upon, the Reclamation Plan

FEIR, SCH# 2013071097

Other Agency Financial Assurances Securing Reclamation of Disturbed Lands

None

Wage Rates used in Cost Estimate* *(cost estimates are required to use current 'General prevailing wage determinations made by the director of industrial relations' where applicable (http://www.dir.ca.gov/OPRL/PWD/index.htm) with employer labor surcharge added, or greater)*

California Department of Industrial Relations, General Prevailing Wage Determinations made by the Director of Industrial Relations, Index 2022-2, Northern California, Area 2

Equipment Rates used in Cost Estimates* *(use current 'Labor Surchage and Equipment Rental Rates (Cost of Equipment Ownership)' equipment rates published by Caltrans (http://www.dot.ca.gov/hq/construc/equipmnt.html) or other*

Caltrans Labor Surcharge and Equipment Rental Rates, April 1, 2023 - March 31, 2024.

Equipment Production Rates used in Cost Estimate *(Use of current Caterpillar Performance Handbook or equivalent published production rates is required)*

Caterpillar Performance Handbook 49

**Many mine sites are remote projects that require hours of travel (to and from) and sometimes require additional time to prepare for even the simplest of tasks. In accordance with labor Code Sections 1773.1 and 1773.9, contractors are required to make travel and/or subsistence (per diem) payments to each worker to execute the work. These arrangements can be quite variable and site specific.*

Attachments:

1. Figure
2. Division of Mine Reclamation Graphs
3. Supporting Information

II. Description of Current Site Conditions

(i.e., disturbed acres, slope conditions, excavation depths, topsoil and overburden stockpiles, equipment and facilities, reclamation in progress, erosion control status, required corrective actions, etc.)

The Riverbend Sand and Gravel site is located in Fresno County, California, approximately 1.5 miles southeast of the City of Sanger and includes portions of Sections 25 and 36 of T14S/R22E, Section 1 of T15S/R22E, and Sections 19, 30 and 31 of T14S/R23E. Access to the site is north from Goodfellow Ave.

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres cleared for future stockpiles.

This estimate includes completion of all reclamation activities that are necessary to achieve safe and stable conditions at the site based on current site conditions plus the anticipated conditions for a one year period or through 2022.

Reclamation of the site will include removal of mobile equipment and structures, removal of footings and pavement, backfilling, and finish grading using overburden and topsoil from previous grading. The plant site is scheduled to be mined as the last mining phase in about 70 years. Therefore, if reclamation of the plant site is required to be reclaimed following 2022, the plant area will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

III. Description of Anticipated Site Conditions (12 months from date of estimate)

(i.e., increase of disturbed acres, increase of depth, increases in amount of equipment and/or facilities, required corrective actions, etc.)

Groundbreaking in preparation for construction of the aggregate processing plant may be initiated in 2024. The processing facilities are to be located on the 52 acres of Phase 9. Potential processing equipment would consist of crushers, screens, material conveyors and stackers.

IV. Description/Justification of Cost Increase/Decrease

The reclamation cost for the site was calculated to remain $ 259,309 since subsequent to the last cost estimate no disturbance has occurred and no additional activities are anticipated other than were already included in the last estimate.

(add additional pages as needed)

V. PLANT STRUCTURES AND EQUIPMENT REMOVAL *(use multiple sheets as needed)*

Provide documentation showing that rates, prices, and wages are available locally to all persons, including the lead agency and/or the Department.

Current Site Condition:

The 619 acre site is relatively flat and is currently in walnut and olive orchards and grape vineyards with several farm residences. Currently the only area disturbed for mining activity are 26 acres of the future 52 acres plant site cleared for future stockpiles.

Reclamation Plan Performance Standard (End Use):

The reclamation plan is designed to return as much land as possible back to farmland. For the remaining phases, where there is not sufficient overburden and processing fines to fill the phases, reclamation will be to riparian and open water wildlife habitat. The only potential disturbed land during 2024 would be groundbreaking of the 52 acre plant site (Phase 9) in preparation for construction of the aggregate processing plant and the access road from Goodfellow Avenue.. The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2024 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2024, the plant site will be will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Describe tasks:

Plant structure and ancillary equipment removal tasks are described on the following sheets.

Equipment on site wholly owned by operator?: [X] [ ] NO

(if no, please provide the name/s and contact information for any lien holder)

(add additional pages as needed)

V. Plant Structures & Equipment Removal

A. Equipment: See following sheets V.1 to V.6	Cost
Plant Removal	19,254
Support Structures Removal	6,167
Concrete Removal	1,635
Mobile Equipment Removal	2,617
Miscellaneous Rubish Removal	2,422
Underground Pipe Removal	4,172
Total Equipment Cost	36,267

B. Labor: See following sheets V.1 to V.6	Cost
Plant Removal	25,335
Support Structures Removal	6,350
Concrete Removal	2,024
Mobile Equipment Removal	2,485
Miscellaneous Rubish Removal	2,836
Underground Pipe Removal	5,465
Total Labor Cost	44,495

C. Demolition: See following sheets V.1 to V.6	Cost
Plant Removal	
Support Structures Removal	22,500
Concrete Removal	1,913
Mobile Equipment Removal	
Miscellaneous Rubish Removal	3,938
Underground Pipe Removal	563
Total Demolition Costs	28,914

D, Total Direct Cost of Structure and Equipment Removal (Sum A+B +C)

Equipment Cost + Labor Cost + Demolition Cost = 109,676

E. Net Salvage Value* (Supported by properly prepared third party estimate, bid, or cost calculation)

Net Salvage Value = 0

F. Total Cost of Structure and Eqjuipment Removal (Subtract Line D from Line E)

Total Cost of Structure and Equipment Removal = **109,676**

NOTE: Above Total Cost will display $0.00 if net of entered removal costs and salvage value is negative.

*Note: Salvage value may only be used to offset the direct cost of removing the single item for which salvage value is being claimed. Salvage value shall not be used to offset any other demolition, general cleanup, or reclamation costs.

Task V.1 - Plant Removal

All plant equipment will need to be removed from the site. Plant equipment on the site could include a processing plant with multiple crushers, hoppers, screens, and conveyors.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Demo Structures	Grove RT 625 40t Crane	1	80.00	68.43	5,474

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	85	Tons	22.5	1,913
				Total	**1,913**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

According to the CAT Handbook, an H120c hydraulic hammer attached to a 315L excavator can demolish approximately 230 cubic yards (yd3) of reinforced concrete within 8 hours. Based on an estimated 85 yd3 concrete it will take 3 hours to demolish the concrete. Once the concrete has been broken into pieces that are 2-feet in diameter or smaller, a Caterpillar 980 Loader will be used to load the concrete pieces into haul trucks. It will take approximately 1 hour for the loader to load 85 yd3 into the trucks. It is estimated that each truckload will have a capacity of 17 yd3. To increase the efficiency of the loading operation 5 haul trucks will be used. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	1,635
Labor	2,024
Other Costs	1,913
Total	**5,571**

Task V.4 - Mobile Equipment Removal

Mobile equipment mau incude CAT 140 Motorgrader, CAT 980 Front End Loader, Cat 349 Excavator, Kamatsu 750 Excavator, CAT D9 Dozer, CAT Skid Steer, Ford F-650 Water Truck, Volvo A40E Haul Truck, JLG Skytrak Forklift

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

It is assumed that all of the mining equipment will be in good repair and can be loaded directly onto a lowboy trailer and removed from the site. Removing equipment as large as the Kamatsu 750 Excavator and the haul trucks will require a six axle lowboy trailer, pilot cars and CHP escorts. Smaller equipment will only require a three axle lowboy trailer and no pilot cars. It is estimated that 3 hours will be required to remove the larger pieces of equipment and two hours will be required for the smaller pieces of equipment from the site.
A majority of the vehicles and excavation machinery have a salvage value that exceeds the costs incurred in their removal; however, to remain conservative, no salvage value was assumed in this estimate.

Total Cost Summary

Item	Cost
Equipment	2,617
Labor	2,485
Other Costs	
Total	**5,102**

Task V.5 - Miscelleanous Rubbish Removal
Miscellaneous plant equipment, parts and rubishe must be removed

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Load Material	Grove RT 525 25t Crane	1	8.00	59.80	478

Other Costs

	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	175	Tons	22.5	3,938
				Total	**3,938**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations
Approximately 7 loads (175 tons) of miscellaneous plant equipment and rubbish may be located around the site. it is assumed that all equipment and rubbish will be loaded into an end dump trailer and hauled to the County Landfill. Each load will require approximately two hours including loading, unloading, and travel time.

Total Cost Summary

Item	Cost
Equipment	2,422
Labor	2,836
Other Costs	3,938
Total	**9,196**

Task V.6 - Underground Pipe Removal
Underground piping will have to be removed.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Expose/Load Pipe	CAT 315L Excavator	1	40.00	49.80	1,992
Load Pipe/Fill Trench	CAT 938G Wheel Loader	1	20.00	82.11	1,642

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
Disposal	Landfill Fee	25	Tons	22.5	563
				Total	**563**

Source: Fresno County American Avenue Landfill

Assumptions and Calculations

Approximately 3,800 feet of 2-inch PVC underground pipe may need to be dug up and removed. A Cat 315 excavator will be used to unearth the pipe and maneuver the sections of pipe. All of the pipe will then be dismantled into smaller 50-foot segments and loaded onto a flatbed truck. A Cat 938 loader will be used to fill in the trench and assist in loading the sections of pipe. It is anticipated that one truck load will be required to transport the pipe from the site to a landfill.

Total Cost Summary

Item	Cost
Equipment	4,172
Labor	5,465
Other Costs	563
Total	**10,200**

VI. Primary Reclamation Activity

A. Equipment: See following sheets VI.1 to VI.2	Cost
Site Grading	4,888
Finish Grading	10,507
Total Equipment Cost	15,395

B. Labor: See following sheets VI.1 to VI.2	Cost
Site Grading	2,410
Finish Grading	13,605
Total Labor Cost	16,015

C. Materilas: See following sheets VI.1 to VI.2	Cost
Site Grading	
Finish Grading	
Total Materials Costs	0

D, Total Direct Cost of Primary Reclamation Activity (Sum A+B+C)

Equipment Cost + Labor Cost + Materials Cost = **31,410**

Task VI.1 Site Grading

The planned reclaimed end use for the plant site in 75 years is to be open water wildlife habitat following mining of the site. However, the plant site will not have been mined in 2022 so reclamation to open water habitat would not be feasible. Therefore, if reclamation was required at the end of 2022, the 52-acre plant site will be revegetated with native species for erosion control. The reclamation plan indicates the paved access road will remain as access for farming operations.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Production rates for a D9 bulldozer equipped with a V-blade equipment used to are derived from the methods identified in the Caterpillar Handbook. This production estimate assumes a D9R Dozer with an average production rate of 3.0 acres/hr. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	4,888
Labor	2,410
Other Costs	0
Total	**7,298**

Task VI.2 Finish Grading

Finish grading will be required in order to prepare the 52-acre plant site for revegetation.

Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Ripping	CAT 160H Motor Grader	1	18	92.22	1,660

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Approximately 52 acres of the site may be disturbed in 2023. It is assumed the use of a dozer with an average finish grading and ripping rate of one acre per hour. Additional equipment and time has also been added to account for a dozer equipped with a ripper to decompact areas of the site that require decompaction for revegetation. It is estimated that approximately 1/3 of the site will require ripping to decompact soils. A dozer is preferred over a wheel type tractor because its track impressions will resist erosion, retain water and seeds, and therefore, will be more effective at ensuring successful revegetation. Additional time has been added to account for equipment warm-up and mobilization.

Total Cost Summary

Item	Cost
Equipment	10,507
Labor	13,605
Other Costs	0
Total	**24,112**

Task VII Revegetation

After final grading is completed disturbed areas of the site will be revegetated. The Reclamation Plan calls for the application of the native seed mix to all disturbed areas of the site.

A. Equipment Cost

Activity	Equipment	Quantity	Hours	$/Hour	Cost
Broadcast Seed	CAT 938G Wheel Loader	1	13.00	82.11	1,067
				Total	**1,067**

C. Material Costs

Activity	Seed Species	Common Name	% of Mix	Lbs in Mix	Price/lb	Extension
Seed Mix	*Bromus mollis*	Blando Brome	30	390		
	Vulpia myros	Zorfro Annual Fescue	25	325		
	Trifolium hurtium	Hykon Rose Clover	45	585		
			100	1,300	3.40	4,420
					Total	**4,420**

Source: S&S Seeds

Assumptions and Calculations

Approximately 52 acres may be impacted from plant site operations. The recommended method of distributing seeds is broadcast seed spreader pulled by a CAT D4 Dozer.A production rate of four (4) acres per hour will be used for this estimate. Additional time has been added to account for equipment warm-up and mobilization.

D. Total Direct Cost of Revegetation

Equipment + Labor + Materials = **6,442**

Task VIII Monitoring

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer to conduct maintenance activities for three (3) years. Revegetation monitoring consists of a biologist visiting the reclamation area on an annual basis for a five year period. The biologist will conduct an evaluation of the revegetated area to insure that the goals of the revegetation requirements are achieved.

Equipment Cost

Activity	Equipment	Quantity	Hours	Years	$/Hour	Cost

Other Costs

Activity	Description	Quantity	Unit	Unit Cost	Cost
					-
				Total	-

Assumptions and Calculations

Site maintenance (weed control and general maintenance) will be conducted on the vegetation installed at the site by a landscape maintenance laborer (6 days, 4 hrs/visit) for three (3) years. Revegetation monitoring costs have been included to account for annual monitoring site visits and report preparation by a qualified biologist for five (5) years. The biologist will conduct an evaluation of the revegetated area to ensure that the goals of the revegetation requirements are achieved. The following activity level was assumed:

Prepare for and conduct annual site visit (biologist, 2 hours / visit; and
Prepare annual report (biologist, 4 hours).

D, Total Direct Cost of Monitoring (Sum A+B+C)

Equipment Cost + Labor Cost + Other Cost = **10,433**

IX. Summary of Costs

V Total of Plant Structures and Equipment Removal Costs	109,676

DIVISION OF MINE RECLAMATION
NOCI-1 (2019)

NOTICE OF COMPLETION OF INSPECTION

Date of Notice: 05/30/2022

To:	From:
California Department of Conservation Division of Mine Reclamation Attention: Reporting Unit 801 K Street, MS 09-06 Sacramento, California 95814	County of Fresno (Lead Agency Name) Roy Jimenez Jr (Lead Agency Contact Name) 2220 Tulare Street, 6th Floor (Lead Agency Address) Fresno CA 93721 (Lead Agency City, State, Zip Code)

Mine Name: Reverbend Sand & Gravel	CA Mine ID Number: 91- 10-0031

This submittal serves as the Lead Agency notice of completion of the annual inspection to the Division of Mine Reclamation (DMR) as required by the Surface Mining and Reclamation Act of 1975 (SMARA), specifically Public Resources Code (PRC) section 2774(b)(1), for the above referenced surface mining operation. A completed copy of the Surface Mine Inspection Report, form MRRC-1 and any other reports or documents prepared in support of this inspection are attached.

(I) Date the annual inspection was conducted: 12/12/2022

(II) Upon completion of the annual inspection, were aspects of this surface mining operation found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan?

☒ **No**. Please check "Not Applicable" for box (IV), (V) and (VI), and complete remainder of form.
☐ **Yes**. Please complete box (IV), (V) and (VI), as appropriate, and complete remainder of form.

(III) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with the SMARA, including the approved reclamation plan and were corrected before submission of the Inspection Report to the Division of Mine Reclamation:

☒ Not Applicable

(IV) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan and were not corrected before submission of the Inspection Report to the Division of Mine Reclamation:

(*Box (V) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(V) Upon completion of the annual inspection, the Lead Agency has determined this surface mining operation to be:

☒ **Compliant** with SMARA, including the approved reclamation plan.
☐ **Not Compliant** with SMARA, including the approved reclamation plan.
☐ Not Applicable

(VI) The following statement describes the Lead Agency's intended response to any aspects of this surface mining operation found to be inconsistent with SMARA, including the approved reclamation plan, but were not corrected before submission of the Inspection Report to the Division of Mine Reclamation. This includes whether a Notice of Violation or Order to Comply has been issued or will be issued or whether other enforcement actions under the lead agency's local mining ordinances has or will be initiated:

(*Box (VI) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(VII) The following statement describes whether the surface mining operation is out of compliance with an order to comply or stipulated order to comply issued by the lead agency.

☒ Not Applicable

(VIII) Has a financial assurance cost estimate required under PRC section 2773.4(d) been provided by the operator? If not, please explain.

☒ **Yes** ☐ **No**

(IX) Does this surface mining operation have a review of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the Lead Agency under PRC section 2770(b) or (h)?

☐ **Yes** ☒ **No**

(X) Does this surface mining operation have an appeal of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the State Mining and Geology Board or the lead agency governing body under PRC section 2770(e) or (h)?

☐ **Yes** ☒ **No**

Subject: Request for EIRs - related to surface mining

CAUTION!!! - EXTERNAL EMAIL - THINK BEFORE YOU CLICK

Hello Chris,

Would it be possible to obtain the following EIRs as they relate to some mining projects in Fresno County? Someone named Briza Sholars was listed as the contact person on CEQA-NET, however, when I emailed her, I got a bounce back message. Unfortunately, there are no digital document available on CEQA-NET due to their age:

- Final EIR for the Riverbend Sand and Gravel Project (SCH Number 2013071097)
- Draft EIR for Carmelita Mine & Reclamation Project (SCH Number 2010081037)
- Final EIR for the Kings River Sand and Gravel Project (SCH Number 2004081114)

I did see this page on the planning website, but it seems like they are only showing current EIRs. Would you be able to point me in the right direction on this? Really, I'm just wanting to see maps that depict the exact boundaries of these surface mining activities.

Thank you! (if I look familiar, you helped me before by giving me information about proposed projects in the area)
Dan

STATE OF CALIFORNIA
DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION

SURFACE MINING INSPECTION REPORT, FORM MRRC-1, INSTRUCTIONS

GENERAL INFORMATION

This report form is intended to comply with the requirements of California's Surface Mining and Reclamation Act of 1975 (SMARA – Public Resources Code §§ 2710 et seq., and the associated California Code of Regulations found in Title 14, Division 2, commencing with § 3500, hereinafter respectively "PRC" or "CCR") and specifically PRC § 2774(b) and CCR § 3504.5 for surface mining operations (operation).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

INSTRUCTIONS FOR COMPLETING THE SURFACE MINING INSPECTION REPORT
FORM MRRC-1

PLEASE TYPE OR PRINT ALL INFORMATION REQUESTED

NOTE: YOU MUST WRITE THE DATE INSPECTION CONDUCTED AND THE CALIFORNIA MINE ID NUMBER AND AT THE TOP OF PAGE 1

1. **BLOCK I**: Enter the name of the mine as indicated on the Annual Report.

2. **BLOCK II**: Enter the name and mailing address of the Mine Operator (Operator), the name of the person serving as the onsite contact, their email address and phone number.

3. **BLOCK III**: For "Lead Agency," enter the name of the SMARA Lead Agency that is conducting this inspection, the name of the inspector and contact information. For "Entity or Organization," enter the name of the entity or organization that employs the inspector.

4. **BLOCK IV**: Enter information with respect to the currently approved reclamation plan, permit and/or vested right and Interim Management Plan. Check Not Applicable as appropriate. In cases where a Reclamation Plan Number has not been assigned by the lead agency, enter any unique lead agency assigned identifier for the approved reclamation plan.

5. **BLOCK V**: Indicate if the operation is located on Federal land. Please identify any government entities or agencies, other than the Lead Agency noted above, that accompanied the inspection.

   Inspecting Agency Codes: (can choose multiple)

None	=	None	DFW	=	Department of Fish and Wildlife
BLM	=	Bureau of Land Management	NPS	=	National Park Service
USFS	=	U.S. Forest Service	DOC	=	Department of Conservation
RB	=	Regional Water Quality Control Board	O	=	Other (list Agency)

   Reason for Inspection: (can choose multiple)

AI	=	Annual Inspection	RE	=	Re-inspection
PC	=	Public Concern	O	=	Other Reason
OA	=	Other Agency Request	AR	=	Acknowledgement of Reclamation

   Provide the land use designation or the zoning information for the parcels on which the mined lands are located.

6. **BLOCK VI**: “Financial Assurances” consist of a current approved Financial Assurance Cost Estimate and a Financial Assurance Mechanism that is at least equal to the current approved Financial Assurance Cost Estimate (PRC § 2736).

   The Financial Assurance amount must be reviewed and approved once each calendar year to account for new lands disturbed by surface mining operations and lands to be disturbed in coming year, inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan (PRC § 2773.1(a)(3) and the State Mining and Geology Board (SMGB) Financial Assurance Guidelines). In order to determine what adjustments, if any, are appropriate to the Financial Assurance Mechanism amount, each mine operator must submit once each calendar year a revision of the written Financial Assurance Cost Estimate to the Lead Agency (CCR § 3804(c)). An Operator shall provide an updated annual Financial Assurance Cost Estimate to the Lead Agency for review within 30-days of conducting of the annual inspection (PRC § 2773.4(d)(1)(A). Provide the date and amount of the currently approved Financial Assurance Cost Estimate.

Use the Financial Assurance “Other” and “Explanation” blocks to provide any other pertinent information regarding the status of Financial Assurance(s). If the operation does not have a current Financial Assurance Cost Estimate and/or Financial Assurance Mechanism, explain in detail. A Financial Assurance Cost Estimate is considered current if it has been approved in accordance with applicable requirements of PRC § 2773.4 within the current or previous calendar year.

Type of Financial Assurance Mechanism(s): Fill in the type of mechanism(s) that are on file. CCR § 3803 and the SMGB Financial Assurance Guidelines describe Surety Bonds, Trust Funds, or Irrevocable Letters of Credit as acceptable financial assurance mechanisms for non-governmental entity operators. For surface mining operations owned and operated by state and local government entities, Surety Bonds, Trust Funds, Irrevocable Letters of Credit, Pledges of Revenue, and a Budget Set Aside are acceptable financial assurance mechanisms.

State the Financial Assurance Mechanism(s) document number(s). State the dollar amount of each Financial Assurance Mechanism(s) currently on file. State the date of expiration of the Financial Assurance Mechanism(s) currently on file. State the date of approval for the most recent lead agency approved Financial Assurance Mechanism(s) on file. State the total dollar amount of the mechanism(s) held for reclamation of mined lands.

7. **BLOCK VII**:

INSTRUCTIONS FOR EACH DATA COLUMN:

Potential Reclamation Plan Requirements (Column 1)**:** Under PRC § 2772 and CCR §§ 3501, 3502, and as described in the Guidance Document for Surface Mine Inspectors in CCR § 3504.6 inspections may include the following: the operation’s horizontal and vertical dimensions, volumes of materials stored on the site; slope angles of stock piles, waste piles and quarry walls; effects of sidecasting and potential geological hazards; equipment and other facilities; samples of materials; photographic or other electronic images of the operation; any measurements or observations deemed necessary by the inspector or the lead agency to ensure the operation is in compliance with SMARA, and specifically the approved reclamation plan. Column 1 provides a list of items that may be included in the approved reclamation plan, either expressly or by reference as described in PRC §§ 2772 and 2772.1, which may include conditions of approval, other permit requirements and supplementary documents, including environmental documents, prepared for the project pursuant to the California Environmental Quality Act (CEQA) (Division 13 (commencing with Section 21000)).

It is not expected that all reclamation plans will include each item of Section VIIIVII or be limited to the items listed. Items in Column 1 that are not in the reclamation plan may not need to be addressed in the inspection. In instances where the reclamation plan lacks specific details for the reclamation of mined lands, the inspector may need to consider if additional reclamation requirements or specifics are needed to achieve the proposed use after reclamation. Reclamation plan requirements not listed in Items 1A through 12L may be listed in Item 13M, under “Other Reclamation Plan Requirements.”

Reclamation Plan Requirements (Column 2)**:** Prior to conducting the field inspection, the inspector must review the approved reclamation plan, any amendments, and other reclamation requirements as part of a permit application for the operation that were used to satisfy the requirements of PRC §§ 2772(c), 2773 and 2773.3 and Article 1 (commencing with § 3500) and Article 9 (commencing with § 3700) of Subchapter 1 of Chapter 8 of Division 2 of Title 14 of the California Code of Regulations and any approved modifications contained in permit conditions of approval (COA) or binding mitigation measures adopted pursuant to the CEQA included by reference in the approved reclamation plan pursuant to PRC §§ 2772(d) and 2772.1(b). The most recently approved Financial Assurance Cost Estimate and any pending or ongoing enforcement actions should also be reviewed. Conditions of Approval (COA) that relate to facility

operations solely of local concern, such as hours of operation, noise, and dust control are not subject to the inspection.

Column 2 is intended to provide the inspector a place to match any items noted in Column 1 with those items included in the approved reclamation plan either expressly or by reference, as described above, in PRC §§ 2772 and 2772.1. Also note any Interim Management Plan (IMP) requirements where the mine is subject to an IMP pursuant to PRC § 2770(h).

Indicate the source document for the reclamation plan requirements at the end of the entry in parenthesis; i.e. (COA) Plan of Operations (POO), Environmental Impact Report (EIR), Waste Discharge Report (WDR), Stormwater Pollution Prevention Program (SWPPP), etc. If items listed in Column 1 of Section VII of the form are not included in the reclamation plan or other documents included by reference, write not applicable or “NA” in Column 2.

Specific reclamation requirements may not apply to an operation at the time of inspection, but they are important to ensure current activity at the site will not prohibit reclamation in accordance with the approved reclamation plan.

Site Observations and Compliance Issues (Column 3)**:** Use this space to note current site observations and to describe site conditions and aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA, if any, noted for both operating and reclaimed surfaces that pertain to the reclaimed condition of mined lands.

Site conditions that are or may be inconsistent with SMARA include unanticipated but actual conditions encountered as the mining operation progresses, for which mitigation measures were not fully addressed in the reclamation plan and which affect any aspect of reclamation or calculation of the FACE, as described in the approved reclamation plan.

8. **BLOCK VIII**: The inspector responds to the statements or questions in the space provided for (A) through (O). Additional instructions are provided below for (A), (F), (G), (I), (J), (L), (M), (N), and (O).

   (A) If additional space is required to record observations, photographs, etc., please check the corresponding box in (A) and attach documentation to the MRRC-1.

   (F) Requires the inspector to describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

   (G) Requires the inspector to describe limitations encountered during the inspection. These limitations may include, but are not limited to: inaccessibility to certain areas due to weather, blasting, excavating, etc.

   (I) Requires checking a “Yes” or “No” box. Conditions or aspects identified in (H) requiring further evaluation should be described further.

   (J) Requires checking a “Yes” or “No” box. A description of why or why not a Notice of Violation was issued for conditions or aspects identified in (H) should be provided.

   (L) For "Duration of Inspection," indicate the start and end times of the inspection (do not include travel time).

(M) Weather Codes

CR	=	Clear
CL	=	Cloudy
SN	=	Snow
RN	=	Rain
WD	=	Windy

(N) SMARA Status of Mine Codes (based on annual report and reported production under CCR §3695, indicate the appropriate status code):

NP	=	Newly Permitted (surface mining operation not begun)
Active	=	Operation Not Idle (per PRC § 2727.1)
I	=	Idle (per PRC § 2727.1)
AB	=	Abandoned (per PRC §2700(h)(6))

(O) Attendees: Provide the names and affiliations of parties in attendance at the inspection.

9. **BLOCK IX**: Provide the Inspector's "Certificate of Completion of Inspection Workshop" Number and expiration date. Sign and date the Inspection Report. If applicable, include the inspector's certification (Professional Engineer (PE), Professional Geologist (PG), Licensed Landscape Architect, Registered Professional Forester, Professional Land Surveyor (PLS), etc.) and license number. The lead agency shall cause an inspection to be conducted by a state-licensed geologist, state-licensed civil engineer, state-licensed landscape architect, or state-licensed forester, or a qualified lead agency employee pursuant to PRC § 2774(b)(1).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report (form MRRC-1) and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (form NOCI-1) (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

Good afternoon, Gentlemen,

I wanted to let you know that I was in the area last week and conducted my annual inspection on Tuesday, November 28th. Please submit the FACE within 30 days for review and approval.

Should you have any questions, please feel free to contact me. Thank you.

SURFACE MINING INSPECTION REPORT

VII. Non-SMARA facility operations conditions solely of local concern (e.g. hours of operation) do not need to be noted here. See Instructions for Block VII.

[Use separate sheet(s) where necessary. Refer to item numbers below]

Potential Reclamation Plan Requirements	List Reclamation Plan Requirements (Recommended to be filled out prior to field inspection)	Note current site observations. Describe site conditions and aspects of the operation that are or may be inconsistent with the reclamation plan or SMARA. (Note additional comments on Section VIII as necessary)
L) Closure of Adits	None	None
M) Other Reclamation Plan Requirements	None	None

VIII. A. Use this space to describe general observations and sketches of the operation:

Additional observations/sheets/documents/sketches/photographs attached? ☐ Yes ☒ No

B. Describe areas of the operation that have been disturbed since the last inspection:

Approximate total disturbed acreage since last inspection: None

Approximate total acreage of mined lands: None

C. Describe areas of the operation that have been reclaimed since the last inspection:

Approximate reclaimed acreage since last inspection: None

Approximate total reclaimed acreage: None

D. Describe areas where the operator plans to conduct operations in the upcoming year:

Continue preparation for construction of the aggregate processing plant.

E. Describe the extent of mined lands with respect to the permitted/approved reclamation plan boundaries:

None

Date Inspection Conducted:	CA Mine ID Number:
12/12/2023	91- 10-0031

SURFACE MINING INSPECTION REPORT

F. Describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

Consistent

G. Describe any limitations encountered during the inspection:

None

H. Describe conditions or aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA:

N/A

I. Do any of those conditions or aspects require further evaluation?

☒ No

☐ Yes, describe (For example, further evaluation or analysis may be required by a state-licensed professional or specialist):

J. Was a Notice of Violation issued for any of the above?

☒ No, describe:

☐ Yes, describe:

K. Describe remedial activities for any pre-existing or existing enforcement actions:

N/A

L. Duration of Inspection:

Start Time: 11:00 am Finish Time: 11:30 am

M. Weather Code(s):	N. Status of Mine Code(s):
CR	NP

O. Inspection Attendees and Affiliations

Roy Jimenez Jr., County of Fresno

IX. Inspector's "Certificate of Completion of Inspection Workshop" Number:	Inspectors Signature:	If the inspector is a State-licensed person or a contractor for the lead agency, provide license type and number:
18072	Roy Jimenez Jr. Digitally signed by Roy Jimenez Jr. Date: 2023.05.30 15:16:26 -07'00'	
Certification Expiration Date: 06/25/2023	**Date Signed:** 05/30/2023	

STATE OF CALIFORNIA
DEPARTMENT OF CONSERVATION
DIVISION OF MINE RECLAMATION

SURFACE MINING INSPECTION REPORT, FORM MRRC-1, INSTRUCTIONS

GENERAL INFORMATION

This report form is intended to comply with the requirements of California's Surface Mining and Reclamation Act of 1975 (SMARA – Public Resources Code §§ 2710 et seq., and the associated California Code of Regulations found in Title 14, Division 2, commencing with § 3500, hereinafter respectively "PRC" or "CCR") and specifically PRC § 2774(b) and CCR § 3504.5 for surface mining operations (operation).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

INSTRUCTIONS FOR COMPLETING THE SURFACE MINING INSPECTION REPORT
FORM MRRC-1

PLEASE TYPE OR PRINT ALL INFORMATION REQUESTED

NOTE: YOU MUST WRITE THE DATE INSPECTION CONDUCTED AND THE CALIFORNIA MINE ID NUMBER AND AT THE TOP OF PAGE 1

1. **BLOCK I**: Enter the name of the mine as indicated on the Annual Report.

2. **BLOCK II**: Enter the name and mailing address of the Mine Operator (Operator), the name of the person serving as the onsite contact, their email address and phone number.

3. **BLOCK III**: For "Lead Agency," enter the name of the SMARA Lead Agency that is conducting this inspection, the name of the inspector and contact information. For "Entity or Organization," enter the name of the entity or organization that employs the inspector.

4. **BLOCK IV**: Enter information with respect to the currently approved reclamation plan, permit and/or vested right and Interim Management Plan. Check Not Applicable as appropriate. In cases where a Reclamation Plan Number has not been assigned by the lead agency, enter any unique lead agency assigned identifier for the approved reclamation plan.

5. **BLOCK V**: Indicate if the operation is located on Federal land. Please identify any government entities or agencies, other than the Lead Agency noted above, that accompanied the inspection.

   Inspecting Agency Codes: (can choose multiple)

None	=	None	DFW	=	Department of Fish and Wildlife
BLM	=	Bureau of Land Management	NPS	=	National Park Service
USFS	=	U.S. Forest Service	DOC	=	Department of Conservation
RB	=	Regional Water Quality Control Board	O	=	Other (list Agency)

   Reason for Inspection: (can choose multiple)

AI	=	Annual Inspection	RE	=	Re-inspection
PC	=	Public Concern	O	=	Other Reason
OA	=	Other Agency Request	AR	=	Acknowledgement of Reclamation

   Provide the land use designation or the zoning information for the parcels on which the mined lands are located.

6. **BLOCK VI**: “Financial Assurances” consist of a current approved Financial Assurance Cost Estimate and a Financial Assurance Mechanism that is at least equal to the current approved Financial Assurance Cost Estimate (PRC § 2736).

   The Financial Assurance amount must be reviewed and approved once each calendar year to account for new lands disturbed by surface mining operations and lands to be disturbed in coming year, inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan (PRC § 2773.1(a)(3) and the State Mining and Geology Board (SMGB) Financial Assurance Guidelines). In order to determine what adjustments, if any, are appropriate to the Financial Assurance Mechanism amount, each mine operator must submit once each calendar year a revision of the written Financial Assurance Cost Estimate to the Lead Agency (CCR § 3804(c)). An Operator shall provide an updated annual Financial Assurance Cost Estimate to the Lead Agency for review within 30-days of conducting of the annual inspection (PRC § 2773.4(d)(1)(A). Provide the date and amount of the currently approved Financial Assurance Cost Estimate.

Use the Financial Assurance “Other” and “Explanation” blocks to provide any other pertinent information regarding the status of Financial Assurance(s). If the operation does not have a current Financial Assurance Cost Estimate and/or Financial Assurance Mechanism, explain in detail. A Financial Assurance Cost Estimate is considered current if it has been approved in accordance with applicable requirements of PRC § 2773.4 within the current or previous calendar year.

Type of Financial Assurance Mechanism(s): Fill in the type of mechanism(s) that are on file. CCR § 3803 and the SMGB Financial Assurance Guidelines describe Surety Bonds, Trust Funds, or Irrevocable Letters of Credit as acceptable financial assurance mechanisms for non-governmental entity operators. For surface mining operations owned and operated by state and local government entities, Surety Bonds, Trust Funds, Irrevocable Letters of Credit, Pledges of Revenue, and a Budget Set Aside are acceptable financial assurance mechanisms.

State the Financial Assurance Mechanism(s) document number(s). State the dollar amount of each Financial Assurance Mechanism(s) currently on file. State the date of expiration of the Financial Assurance Mechanism(s) currently on file. State the date of approval for the most recent lead agency approved Financial Assurance Mechanism(s) on file. State the total dollar amount of the mechanism(s) held for reclamation of mined lands.

7. **BLOCK VII**:

INSTRUCTIONS FOR EACH DATA COLUMN:

Potential Reclamation Plan Requirements (Column 1)**:** Under PRC § 2772 and CCR §§ 3501, 3502, and as described in the Guidance Document for Surface Mine Inspectors in CCR § 3504.6 inspections may include the following: the operation’s horizontal and vertical dimensions, volumes of materials stored on the site; slope angles of stock piles, waste piles and quarry walls; effects of sidecasting and potential geological hazards; equipment and other facilities; samples of materials; photographic or other electronic images of the operation; any measurements or observations deemed necessary by the inspector or the lead agency to ensure the operation is in compliance with SMARA, and specifically the approved reclamation plan. Column 1 provides a list of items that may be included in the approved reclamation plan, either expressly or by reference as described in PRC §§ 2772 and 2772.1, which may include conditions of approval, other permit requirements and supplementary documents, including environmental documents, prepared for the project pursuant to the California Environmental Quality Act (CEQA) (Division 13 (commencing with Section 21000)).

It is not expected that all reclamation plans will include each item of Section VIIIVII or be limited to the items listed. Items in Column 1 that are not in the reclamation plan may not need to be addressed in the inspection. In instances where the reclamation plan lacks specific details for the reclamation of mined lands, the inspector may need to consider if additional reclamation requirements or specifics are needed to achieve the proposed use after reclamation. Reclamation plan requirements not listed in Items 1A through 12L may be listed in Item 13M, under “Other Reclamation Plan Requirements.”

Reclamation Plan Requirements (Column 2)**:** Prior to conducting the field inspection, the inspector must review the approved reclamation plan, any amendments, and other reclamation requirements as part of a permit application for the operation that were used to satisfy the requirements of PRC §§ 2772(c), 2773 and 2773.3 and Article 1 (commencing with § 3500) and Article 9 (commencing with § 3700) of Subchapter 1 of Chapter 8 of Division 2 of Title 14 of the California Code of Regulations and any approved modifications contained in permit conditions of approval (COA) or binding mitigation measures adopted pursuant to the CEQA included by reference in the approved reclamation plan pursuant to PRC §§ 2772(d) and 2772.1(b). The most recently approved Financial Assurance Cost Estimate and any pending or ongoing enforcement actions should also be reviewed. Conditions of Approval (COA) that relate to facility

operations solely of local concern, such as hours of operation, noise, and dust control are not subject to the inspection.

Column 2 is intended to provide the inspector a place to match any items noted in Column 1 with those items included in the approved reclamation plan either expressly or by reference, as described above, in PRC §§ 2772 and 2772.1. Also note any Interim Management Plan (IMP) requirements where the mine is subject to an IMP pursuant to PRC § 2770(h).

Indicate the source document for the reclamation plan requirements at the end of the entry in parenthesis; i.e. (COA) Plan of Operations (POO), Environmental Impact Report (EIR), Waste Discharge Report (WDR), Stormwater Pollution Prevention Program (SWPPP), etc. If items listed in Column 1 of Section VII of the form are not included in the reclamation plan or other documents included by reference, write not applicable or “NA” in Column 2.

Specific reclamation requirements may not apply to an operation at the time of inspection, but they are important to ensure current activity at the site will not prohibit reclamation in accordance with the approved reclamation plan.

Site Observations and Compliance Issues (Column 3)**:** Use this space to note current site observations and to describe site conditions and aspects of the operation that are or may be inconsistent with the approved reclamation plan or SMARA, if any, noted for both operating and reclaimed surfaces that pertain to the reclaimed condition of mined lands.

Site conditions that are or may be inconsistent with SMARA include unanticipated but actual conditions encountered as the mining operation progresses, for which mitigation measures were not fully addressed in the reclamation plan and which affect any aspect of reclamation or calculation of the FACE, as described in the approved reclamation plan.

8. **BLOCK VIII**: The inspector responds to the statements or questions in the space provided for (A) through (O). Additional instructions are provided below for (A), (F), (G), (I), (J), (L), (M), (N), and (O).

   (A) If additional space is required to record observations, photographs, etc., please check the corresponding box in (A) and attach documentation to the MRRC-1.

   (F) Requires the inspector to describe the fee category reported in the most recent Annual Report and its consistency with the conditions observed during the inspection.

   (G) Requires the inspector to describe limitations encountered during the inspection. These limitations may include, but are not limited to: inaccessibility to certain areas due to weather, blasting, excavating, etc.

   (I) Requires checking a “Yes” or “No” box. Conditions or aspects identified in (H) requiring further evaluation should be described further.

   (J) Requires checking a “Yes” or “No” box. A description of why or why not a Notice of Violation was issued for conditions or aspects identified in (H) should be provided.

   (L) For "Duration of Inspection," indicate the start and end times of the inspection (do not include travel time).

(M) Weather Codes

CR	=	Clear
CL	=	Cloudy
SN	=	Snow
RN	=	Rain
WD	=	Windy

(N) SMARA Status of Mine Codes (based on annual report and reported production under CCR §3695, indicate the appropriate status code):

NP	=	Newly Permitted (surface mining operation not begun)
Active	=	Operation Not Idle (per PRC § 2727.1)
I	=	Idle (per PRC § 2727.1)
AB	=	Abandoned (per PRC §2700(h)(6))

(O) Attendees: Provide the names and affiliations of parties in attendance at the inspection.

9. **BLOCK IX**: Provide the Inspector's "Certificate of Completion of Inspection Workshop" Number and expiration date. Sign and date the Inspection Report. If applicable, include the inspector's certification (Professional Engineer (PE), Professional Geologist (PG), Licensed Landscape Architect, Registered Professional Forester, Professional Land Surveyor (PLS), etc.) and license number. The lead agency shall cause an inspection to be conducted by a state-licensed geologist, state-licensed civil engineer, state-licensed landscape architect, or state-licensed forester, or a qualified lead agency employee pursuant to PRC § 2774(b)(1).

DISTRIBUTION INSTRUCTIONS

The Lead Agency shall forward to the Operator a copy of the Notice of Completion of Inspection (form NOCI-1), the completed Inspection Report (form MRRC-1), and any other supporting documentation (PRC § 2774(b)(2)).

The Lead Agency shall retain the original copy of the Inspection Report (form MRRC-1) and submit one copy of this Inspection Report, along with the Notice of Completion of Inspection (form NOCI-1) (PRC § 2774(b)(1)), within 90-days of conducting the inspection, to:

Department of Conservation
Division of Mine Reclamation
801 K Street, MS 09-06
Sacramento, CA 95814-3529

If any part of the operation or mined lands inspected is on Federal land, one copy of this Inspection Report and Notice of Completion of Inspection shall be forwarded to the appropriate Federal entity, i.e. the BLM or USFS regional office.

NOCI-1 (2019)

NOTICE OF COMPLETION OF INSPECTION

Date of Notice: 03/07/2024

To:	From:
California Department of Conservation Division of Mine Reclamation Attention: Reporting Unit 715 P Street, MS 19-05 Sacramento, California 95814	County of Fresno (Lead Agency Name) Roy Jimenez Jr. (Lead Agency Contact Name) 2220 Tulare Street, 6th Floor (Lead Agency Address) Fresno CA (Lead Agency City, State, Zip Code)

Mine Name: Riverbend Sand & Gravel	CA Mine ID Number: 91- 10-0031

This submittal serves as the Lead Agency notice of completion of the annual inspection to the Division of Mine Reclamation (DMR) as required by the Surface Mining and Reclamation Act of 1975 (SMARA), specifically Public Resources Code (PRC) section 2774(b)(1), for the above referenced surface mining operation. A completed copy of the Surface Mine Inspection Report, form MRRC-1 and any other reports or documents prepared in support of this inspection are attached.

(I) Date the annual inspection was conducted: 11/28/2023

(II) Upon completion of the annual inspection, were aspects of this surface mining operation found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan?

☒ **No**. Please check "Not Applicable" for box (IV), (V) and (VI), and complete remainder of form.
☐ **Yes**. Please complete box (IV), (V) and (VI), as appropriate, and complete remainder of form.

(III) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with the SMARA, including the approved reclamation plan and were corrected before submission of the Inspection Report to the Division of Mine Reclamation:

☒ Not Applicable

(IV) The following aspects of this surface mining operation were found by the Lead Agency to be inconsistent with SMARA, including the approved reclamation plan and were not corrected before submission of the Inspection Report to the Division of Mine Reclamation:

(*Box (V) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(V) Upon completion of the annual inspection, the Lead Agency has determined this surface mining operation to be:

☒ **Compliant** with SMARA, including the approved reclamation plan.
☐ **Not Compliant** with SMARA, including the approved reclamation plan.
☐ Not Applicable

(VI) The following statement describes the Lead Agency's intended response to any aspects of this surface mining operation found to be inconsistent with SMARA, including the approved reclamation plan, but were not corrected before submission of the Inspection Report to the Division of Mine Reclamation. This includes whether a Notice of Violation or Order to Comply has been issued or will be issued or whether other enforcement actions under the lead agency's local mining ordinances has or will be initiated:

(*Box (VI) **must** be completed if aspects remain that were not corrected prior to submission of the Inspection Report.)*

☒ Not Applicable

(VII) The following statement describes whether the surface mining operation is out of compliance with an order to comply or stipulated order to comply issued by the lead agency.

☒ Not Applicable

03/07/2024 ___
CA Mine ID Number: 91- 10-0031
NOCI-1 (2019) Page 3 of 3

(VIII) Has a financial assurance cost estimate required under PRC section 2773.4(d) been provided by the operator? If not, please explain.

☒ **Yes** ☐ **No**

(IX) Does this surface mining operation have a review of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the Lead Agency under PRC section 2770(b) or (h)?

☐ **Yes** ☒ **No**

(X) Does this surface mining operation have an appeal of its reclamation plan, plan amendment, financial assurances, or interim management plan pending before the State Mining and Geology Board or the lead agency governing body under PRC section 2770(e) or (h)?

☐ **Yes** ☒ **No**

Hello Supervisor,

Per our discussion – please see attached. This letter identifies options for the applicant to keep the application active since the anniversary date of expiration was approaching. The letter was prepared in consultation with County Counsel. Action by the applicant team was not taken and the approval expired. Let me know if you have any questions.

Thanks,

Chris,

12-104925 - The CUP 3390 was approved through resolution 12492 on 2/26/20215.
See copy of pre-app 38279 and application letter.

17-100917 - This was a permit that we issued. See permit and plans attached.

23-014345 - Well permits are issued through Environmental Health. I am not able to view this permit.
We issue ag pump / electrical permits
and domestic well / electrical permits only.

Let me know when you want to discuss further.

Thanks

Vicinity and Land Use Exhibit B v3.pdf

James,

We're working with County Counsel on a matter related to a surface mining project that was approved but not developed. Trying to determine if any encroachment permits or road improvement plans were submitted or submitted and approved for a section of Goodfellow between Riverbend Avenue and the Kings River. One of the project mitigation measures (MM TRANS-2) reads:

Project Driveway at Goodfellow

- *Eastbound left turn and westbound right turn at the Project Driveway at Goodfellow Avenue.*
- *Westbound acceleration lane for trucks exiting the site.*

Location:
APN: 33207153 and 33207152
14684 and 14865 E GOODFELLOW AVE
Sanger 93657

Our permit tracking records and Site Plan Review Files show nothing. Just want to confirm there's not something out there that our records aren't picking up.

Thanks for your help,

Subject: RE: [External] Contact and inquiry - serpentinite mines/quarries in Fresno County

Hi Roy.

I'm not after a formal spreadsheet, a simple table of information will suffice. The other counties have sent me their spreadsheets that list the basic info of their SMARA sites. Our main interest is the quarries current "status" (active, idle, closed etc) and the material they are extracting which I cross check against the geology datasets and so on, looking for possible serpentinite. Sometimes the county info differs from the state and often it is more detailed. I have found some errors in the state dataset/s which is why I am checking them against the County information. Additionally, when I first started this exercise, the state told me to contact the counties directly as the counties manage the mines and quarries under SMARA.

Regards
Erik

Subject: RE: [External] Contact and inquiry - serpentinite mines/quarries in Fresno County

Hi Roy.

Thanks for your email. Augustine stated below that:

The County oversees the permitting and reclamation of somewhere around fifteen active quarry sites (Roy to confirm). Those sites are primarily for sand and gravel extractions with the exception of one in our eastern foothills that is black granite for dimensional stone.

According to the state, the County of Fresno is the designated SMARA / LAS for 28 active, closed and reclaimed mine/quarry sites. Insomuch are you able to provide any information on the following 2 active sites please:

Academy Quarry – producing "dimension stone" and
CARMELITA MINE –producing "Stone".

Best regards
Erik.

Eric,

We currently don't have a spreadsheet of the current SMARA mines/quarries; however, DMRs website has a very helpful interactive map with extensive information of all sites in California. Here is the link: https://www.conservation.ca.gov/dmr Click Interactive Map.
If you have any questions, please feel free to contact me. Thanks.

Good morning Erik,

My Senior Planner in charge of our surface mine program, Roy Jimenez, is out of the office this week but can provide you the requested information when he returns. The County oversees the permitting and reclamation of somewhere around fifteen active quarry sites (Roy to confirm). Those sites are primarily for sand and gravel extractions with the exception of one in our eastern foothills that is black granite for dimensional stone. I'm not aware of a current or recently closed quarry that mines or mined serpentine as its primary resources. Roy may be able to provide you additional information beyond this when he returns.

Subject: FW: Contact and inquiry - serpentinite mines/quarries in Fresno County

CAUTION!!! - EXTERNAL EMAIL - THINK BEFORE YOU CLICK

Dear Roy/Glenn/Bernard.

I came across your names Roy (both senior and junior) and Glenn on a list of SMARA contacts, and you Bernard on the County website. I am trying to get in contact with your Department of Planning.

I am unsure if this email will be received as I don't have the email addresses, only for you Bernard. So as a back-up, I also emailed the general county website asking they put me in touch with the planning department.

In a nutshell I am hoping that your department can please send me a spreadsheet of the current SMARA mines/quarries in your county with other details spreadsheet of the current SMARA mines/quarries in your county with other details, like status (active/inactive etc), commodity/material/product, co-ords, operator, contact details etc. My initial email (below) explains the background to this inquiry. As I never received a reply I presume the (email) address was incorrect or it got lost in cyberspace or blocked as spam due to my IP address.

I look forward to your replies in one way or another.

Regards and all the best,
Erik.

Subject: Contact and inquiry - serpentinite mines/quarries in your County

Dear Sir/M'am.

Firstly, I apologise if I have written to the incorrect county department. I am writing to the most suitable (or only) email addresses that I could find online. Additionally, I cannot access some County websites and email addresses, probably due to my IP address being outside North America.

In the case that I have contacted the incorrect section or department, I am hoping that you can please forward my request to the appropriate person or department.

By way of background, I am a geologist working for MCI Carbon, an Australian based, clean-tech company with a registered office in Ogden, Utah. MCi Carbon developed proprietary technology that blends carbon dioxide ("CO2") gas emissions) with serpentinite rock ("feedstock"), to create new raw materials for the building and construction industry, through the mineral carbonation process. We operate a pilot plant and are currently constructing a larger demonstration plant in Newcastle Australia that will directly take emissions directly from a commercial fertiliser facility. We are also constructing a plant in Europe that will abate 50,000t pa of CO2 with a view to expanding the facility to abate 250,000 tonnes (of CO2) per annum.

I am researching potential serpentinite feedstock in California. My primary focus is to compile a list of operating or recently closed mines/quarries that produced serpentinite, either directly or indirectly. After looking into the geology of California I have located vast tracts so serpentinite/ultramafic rocks. Additionally, serpentinite also hosts (or occurs proximal to) gold, chromite, magnesite, and asbestos mines/quarries. Consequently, serpentinite could be excavated indirectly from these operations.

So far, I have identified and contacted 2 operating serpentinite quarries in California, and suspect that there must be more due to the abundance of this rock which is used for both decorative stone and as aggregate (usually listed as "crushed stone" in the "material type" lists and databases). To date, I haven't been able to obtain a current list of operating serpentinite quarries in CA from the state government department/s, as this seems to be controlled at the county/city level.

I approached the government at both the federal and state levels and was informed that mining and quarrying are controlled by the local county or city. Subsequently, I am contacting you with this inquiry. I am hoping that you can share with me any basic information on your current and former quarries or mines that produced serpentinite that are possible potential serpentinite feedstocks. There are numerous former asbestos mines across the state that quarried serpentinite – we are open to these as potential feedstock but understand the significant safety and environmental issues associated with these.

I look forward to hearing from you soon.

Best regards
Erik.

Hi Katy,

Nothing is being revoked. It is the Depts. position is that the CUP (approved in 2015) has expired. Lang's attorney has sent in documentation which County Counsel is reviewing at this time. We are awaiting Counsels determination.

Pat,

Good afternoon. I got a call to my direct line just a moment ago from Herb Lang. I understand that he is the project manager for the Riverbend project (CUP 3390). It sounded like he had a question regarding County ordinances which was prompted by a discussion he had with Supervisor Brian Pacheco. I am a little unclear how I came into the discussion, and do not know what his question is. I only informed Mr. Lang that I would reach out to you, as I know that Riverbend is represented by your office. If you want to discuss further, I have some availability. However, you will likely receive an official response to your April 23, 2024 letter directly from the Department of Public Works and Planning, not from the County Counsel's office.

Thank you,
Bryan

Subject: RE: Key Riverbend 2017 email with county counsel

Pat,

Thanks for this information. In your email below from last night, a line jumped out at me:

> Art agreed that Riverbend had already substantially developed the site.

I do not see this reflected in your March 22, 2017 email to your client. At first blush, it seems an odd thing for an attorney to state, given that the Zoning Ordinance did not give the County Counsel's office authority to make these kinds of determinations on behalf of the County. I do see the following comment from your March 22, 2017 email, to which you may have been referring:

> Art stated, "We are on the same page regarding substantial development. I am glad that the project is moving forward."

Do you have any further evidence of your statement that Art agreed that the project site was substantially developed? Do you have any other evidence of how to interpret your quoted text? Was any of this sent or confirmed in an email from Art, or is it just your recollection at the time you sent your email to your client? If the latter, how long after the call did you send the email?

As I stated on our call last week, I am just assisting PWP in gathering facts and information which could help PWP interpret and assess your letter from last month. Any official communication from the County regarding the status of CUP3390 will come from PWP, not from me or from anyone else in the County Counsel's office, as the County Counsel is not an administrator of the Zoning Ordinance.

Thanks again,
Bryan

CAUTION!!! - EXTERNAL EMAIL - THINK BEFORE YOU CLICK

Bryan,

Per our recent call please find attached an extremely pertinent email from 3-22-17 which I sent to my client summarizing my 3-22-17 telephone call with Art Wille regarding Chris Motta's 3-21-17 letter. I found this email since our Friday call via an email archive search.

I believe that the county counsel's office serious consideration of this email, that was contemporaneous at the time, of some of the key events is critical.

My client Herb Lang has authorized me to share this otherwise privileged email.

On that call I discussed with Art and he agreed that nothing in the county code required that an applicant who had already substantially developed a site request a county determination on that point, rather that county process was an option not a requirement. Art stated on that call that Motta's (3-21-17) letter was just trying to make that clear.

Art agreed that Riverbend had already substantially developed the site.

I believe that Art's interpretation was then and still is correct.

Thanks,
Pat

Parlier, CA 93648

Subject: Annual SMARA Inspection / County Field Review

Dear Mr. Lang:

An on-site inspection will be required at Riverbend Sand and Gravel Mine ID# 91-10-0031 for the 2024 Year. The County of Fresno surface mining annual administrative fee is $2,257.00 per site. This fee is for staff's time to review cost estimates, financial assurance, interim management plans, and conduct an on-site inspection. This administrative fee should be received prior to your mining inspection. Please find the enclosed invoice for your payment request.

Please make your check payable to "County of Fresno" and mail your remittance to:

Department of Public Works and Planning
Water and Natural Resources Division
Attention: Roy Jimenez Jr.
2220 Tulare Street, Sixth Floor
Fresno, CA 93721-2104

A receipt will be mailed to you following processing of your payment.

To schedule your annual mine inspection, please contact me at rjjimenez@fresnocountyca.gov or call (559) 600-4251.

Sincerely,

Roy Jimenez Jr., Senior Planner
Water and Natural Resources Division
