California's Long Term Caregivers

Dear Fresno County Board of Supervisors

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Dana Thomas

Dear Fresno County Board of Supervisors

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Montoya Winston

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Philavanh Phongssavanh

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities— a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Isaac Torres

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

William Romero

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Pamela Shaw

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Parveen Kaur

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Evette Anderson

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day ---- they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities---- a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Gerald Shaia

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Nehla Buchanan

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independantly as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Sue Yeon Cho

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Desiree Bustamante

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Elizabeth Anne Renzetti

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities — a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Michael Lockridge

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Yvet Arellano Arellano

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities — a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Wing Fang

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Aleya Morris

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Mariam Topachikyan

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Laura Diaz

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities — a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Tianna Hutchinson
