

Inter Office Memo

DATE: August 22, 2023
TO: Board of Supervisors
FROM: Samantha Buck, Deputy County Administrative Officer

SUBJECT: Advance Agenda Materials for Board Agenda Item #23-0768 on September 5, 2023 Board Meeting

EXECUTIVE SUMMARY

The County Administrative Office will bring Board Agenda Item #23-0768 on your Board's Regular agenda for the September 5, 2023 Board meeting. The item is for review and approval of the County's Americans with Disabilities Act Transition Plan. The Plan includes an inventory of Facilities, Sidewalks, Curb Ramps, Crosswalks, Pedestrian Signals, and Parks and Trails within the County. Due to the large size of the file (420 pages), the Plan is being provided to your Board on a flash drive. Please let me know if you have any questions. Thank you.

Attachments: 10 Flash Drives

ADA/504 Transition Plan

Updated July 25, 2023

Created by the County of Fresno utilizing information and technical guidance produced by BlueDAG, with technical/regulatory guidance produced by the U.S. Department of Justice, the U.S. Access Board, and the State of California.

Introduction

The County of Fresno is firmly committed to upholding not only the mandates of the Americans with Disabilities Act (ADA) and the Rehabilitation Act, along with their respective amendments, but also the spirit of these landmark pieces of legislation. These laws are deeply integrated into our everyday operations and business models. Our commitment to full and equal opportunities extends to all our citizens, including those with disabilities. We understand that our community's continued vitality, strength, and vibrancy stem from the contributions of all its citizens. As such, we have developed this Transition Plan to help guide our progress from our current state to complete physical accessibility concerning all programs, services, and activities we provide to our citizens, particularly those with disabilities.

In line with our commitment, our objectives are:

1. To identify physical obstacles limiting the accessibility of our programs or activities to individuals with disabilities.
2. To describe the methods to be used to make the facilities accessible.
3. To provide a schedule for making the access modifications.
4. To identify public officials responsible for the implementation of the Transition Plan.

Our policy is to, whenever feasible, make all our facilities, services, and programs accessible to, and usable by all individuals.

ADA General Information

The ADA of 1990 and its subsequent amendments offer comprehensive civil rights protections to individuals with disabilities in the domains of employment, public accommodations, State and local government services, and telecommunications. A primary objective of the ADA is to guarantee equal participation in public life for all Americans with disabilities. Title II of the Act applies specifically to the programs, services, and activities of public entities, including the County of Fresno.

Under Title II, a public entity such as Fresno County is prohibited from denying the benefits of its programs, services, and activities to individuals with disabilities due to the presence of inaccessible facilities. Accordingly, Fresno County's programs, services, and activities must be accessible and usable by individuals with disabilities, except in situations where doing so would fundamentally alter the nature of the program, result in undue financial and administrative burdens, or endanger the historical significance of a historic property.

Section §35.130 of Title II mandates that every program, service, or activity conducted by a public entity, when viewed in its entirety, should be readily accessible to and usable by individuals with disabilities. However, it is crucial to note that this regulation does not require every existing facility of a public entity to be made accessible (§35.150(a) (1)). In contrast to Title III of the ADA, which requires public accommodations to remove architectural barriers where such removal is "readily achievable" or provide goods and services through alternative methods when those methods are "readily achievable," Title II requires a public entity to make its programs accessible in all instances, barring cases where doing so would result in a fundamental alteration in the nature of the program or pose undue financial and administrative burdens.

The U.S. Congress intended the "undue burden" standard in Title II to be more stringent than the "readily achievable" standard in Title III. Therefore, while Title II may not necessitate the removal of barriers in some cases where Title III would, the program access requirement of Title II should enable individuals with disabilities to participate in and benefit from programs, services, or activities in all but the most extraordinary cases.

History of the ADA

Adopted on July 26, 1990, the ADA is a Federal civil rights law that offers protection against discrimination for people with disabilities by both public and private entities. The ADA extends the similar protections provided by Section 504 of the Rehabilitation Act of 1973 (504).

- Section 504 mandates that entities receiving Federal financial assistance must ensure their services, programs, and activities do not discriminate against persons with disabilities.
- The ADA prohibits discrimination based on disability in operations conducted by State and local governments, as well as in facilities owned by private businesses, irrespective of whether they receive Federal financial assistance.
- Title II of the ADA requires State and local governments to ensure their services, programs, and activities are accessible to and usable by individuals with disabilities.
- Title III mandates that public accommodations and commercial facilities design and alter their buildings and sites to ensure they comply with accessibility standards.

As a public entity, the County of Fresno's operations are subject to the requirements of Title II of the ADA and Section 504 of the Rehabilitation Act, as a recipient of Federal funds.

As an employer and a provider and user of public and private services, the County of Fresno is also subject to the requirements of Title I of the ADA, which pertains to employment provisions and regulations.

The purpose of this document is to guide the County of Fresno in adhering to the ADA/504 requirements as defined by related regulations and in developing and implementing a Transition Plan.

ADA Title II Transition Plan Requirements

If structural modifications to facilities are necessary to achieve program accessibility, a public entity employing 50 or more persons should develop a transition plan outlining the steps to complete these changes. This plan should be developed within six months of January 26, 1992. The public entity should allow interested parties, including individuals with disabilities and organizations representing such individuals, to contribute to the development of the transition plan by submitting comments. A copy of the transition plan should be publicly accessible.

If a public entity has jurisdiction over streets, roads, or walkways, its transition plan must include a schedule for providing curb ramps or other sloped areas where pedestrian paths cross curbs. The plan should prioritize walkways serving entities covered by the Act, including State and local government offices and facilities, transportation facilities, places of public accommodation, and employers, followed by walkways serving other areas.

The plan must, at a minimum:

1. Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
2. Provide a detailed description of the methods that will be used to make the facilities accessible;
3. Specify the schedule for the steps necessary to achieve compliance with this section. If the transition plan extends beyond one year, identify steps that will be taken during each year of the transition period; and
4. Indicate the official responsible for implementing the plan.

If a public entity has already complied with the transition plan requirement of a Federal agency regulation implementing Section 504 of the Rehabilitation Act of 1973, then the requirements of this paragraph shall apply only to those policies and practices that were not included in the previous transition plan.

Official Responsible

To ensure the formation and implementation of the Transition Plan, The County of Fresno has designated the ADA/504 Coordinator, to coordinate efforts laid out by the Transition Plan.

County of Fresno ADA/504 Coordinator
Samantha Buck, Deputy County Administrative Officer
2281 Tulare, Room 304
Fresno, CA 93721
Phone: (559) 600-1070
Email: countyoffresnoada@fresnocountyca.gov
TTY: 711

Reporting to:

Paul Nerland, County Administrative Officer
Address: 2281 Tulare Street, Room 304
Fresno, CA 93721
Phone: (559) 600-1070
Email: countyoffresnoada@fresnocountyca.gov
TTY: 711

Public Involvement

In 2019, the County of Fresno established an internal Technical Advisory Committee (TAC) to assist with decision-making processes related to accessibility. The Committee involves various divisions, offices, and departments, including the County Administrative Office, Public Works and Planning, Internal Services Department, County Counsel, and Human Resources. An extension of the TAC are the countywide ADA Coordinators responsible for ADA compliance within each County department.

In accordance with the public input and involvement provisions of Title II, the County of Fresno has actively sought public involvement in all ADA-related activities. This includes the development of new and revised notices to the public regarding the County of Fresno's ADA compliance activities. We aim to ensure that individuals with disabilities have the opportunity to provide feedback and comments on the methods and locations for such notices, methods of provision, and best practices in provision.

Citizens are encouraged and welcomed to contact and communicate with the County on the following outreach efforts:

Technical Advisory Committee (TAC): The TAC meets regularly to initiate, organize, and implement projects to develop the Transition Plan for the County.

Accommodations for Persons with Visual Impairments: The ADA Transition Plan is available to persons with visual impairments through large print text documents or other means when available. For those with software that converts text to audio, the document may be provided via email, or thumb drive. The California Access News offers a free telephone reader service, including information on the ADA Transition Plan. Additional auxiliary aids and services, tailored to the individual's needs, are available upon request by contacting the ADA Coordinator.

Website: The County of Fresno's website is fully accessible and provides the Transition Plan at <https://www.co.fresno.ca.us/departments/county-administrative-office/americans-with-disabilities-act-ada>. Through the website, the public can access information about the project's purpose, schedule, timeline, pedestrian/disability access consumer survey, archived articles, approved and revised documents, public involvement opportunities, and contact information. Both the draft and final ADA Transition Plan will be posted on the website for approximately three years after final approval and adoption.

For requests of copies of the ADA Transition Plan or to submit additional public comments, please contact the County of Fresno ADA/504 Coordinator, Samantha Buck, at 2281 Tulare, Room 304, by telephone at (559) 600-1070, or by email at countyoffresnoada@fresnocountyca.gov. For TTY services, please dial 711. The ADA Transition Plan is available in various alternative formats upon written request.

ADA Grievance Procedure

Under the stipulations of Title II of the ADA, public entities are mandated to inform the public of the protections against discrimination they are entitled to. This includes providing clear information about how these protections are implemented in their specific programs, services, and activities, as detailed in 28 C.F.R. § 35.106.

Any public entity, such as the County of Fresno, that employs 50 or more persons is obligated to establish and make known grievance procedures. These procedures must ensure a swift and fair resolution of complaints that allege any activities that could be deemed prohibited by Title II of the ADA.

The County of Fresno's recommended grievance procedures, designed to ensure compliance with these requirements, are detailed in this section. If an individual with a disability, or a parent or guardian representing a minor with a disability, believes that they have been subjected to discrimination based on disability, particularly through the denial of access to facilities, programs, or services, they have the right to file a grievance through these procedures.

The County of Fresno has established the following steps to ensure prompt and fair resolution of complaints:

1. **Initial Contact:** Any person who believes they have been subjected to discrimination on the basis of disability should contact the ADA Coordinator. Complaints must be submitted in writing within 60 days of the alleged discrimination. The complaint should describe the nature of the incident, the date and location of the incident, and any other relevant details. If the complainant needs assistance in preparing or submitting the complaint, the ADA Coordinator should provide this assistance.
2. **Investigation:** Upon receipt of the complaint, the ADA Coordinator will conduct a thorough investigation. This will involve speaking with the complainant, any witnesses, and staff members involved. The ADA Coordinator may also review relevant documents and inspect any locations involved in the complaint.
3. **Response:** Within 30 days of receiving the complaint, the ADA Coordinator shall respond in writing to the complainant. This response shall outline the findings of the investigation and any actions that the County of Fresno will take in response to the complaint.
4. **Appeal:** If the complainant is dissatisfied with the response, they may appeal the decision. Appeals must be submitted in writing to the County Administrative Officer within 15 days of receiving the ADA Coordinator's response.
5. **Review:** The County Administrative Officer will review the appeal and make a final decision within 30 days of receiving the appeal.

Please note, the use of this grievance procedure does not prevent the filing of a complaint of discrimination on the basis of disability with the U.S. Department of Justice or another appropriate Federal agency.

The County of Fresno assures that retaliation or coercion will not be used against anyone who asserts their rights under the ADA. All documents, complaints, and records will be kept on file with the ADA Coordinator for at least 3 years.

To file an ADA grievance, complaint, or for more information, please contact the County of Fresno ADA/504 Coordinator, Samantha Buck, at 2281 Tulare, Room 304, by telephone at (559) 600-1070, or by email at countyoffresnoada@fresnocountyca.gov. For TTY services, please dial 711. An ADA Grievance Form can be requested in-person, via telephone or email, or found online at [Americans with Disabilities Act \(ADA\) - County of Fresno \(fresnocountyca.gov\)](https://www.fresnocountyca.gov/Departments/County-Administrative-Office/Americans-With-Disabilities-Act) (<https://www.fresnocountyca.gov/Departments/County-Administrative-Office/Americans-With-Disabilities-Act>)

Inventory/Discovery Efforts: Public Buildings, Sites and Facilities

The County of Fresno acknowledges the need to assess each of its programs, services, and activities to determine whether physical barriers to access exist. We aim to identify the necessary steps that will enable these programs to be fully accessible. If structural modifications are required, these changes will be incorporated into the Plan. Furthermore, if the program Self-Evaluation determines that physical alterations to existing facilities are required, those changes will also be included in the Plan.

As part of the County of Fresno's Self-Evaluation process, we've identified a need to conduct field surveys of public buildings, facilities, and pedestrian structures to identify potential barriers to the County's programs, services, and activities. A "Public Facility" is defined here as any building or other facility owned or operated by the County of Fresno, which is open to the public or houses County departments or private businesses that meet with or conduct business with the public from that location. This definition includes parks, trails, and pedestrian features within the public right of way, such as sidewalks, curb ramps, crosswalks, pedestrian signals, and other related features or facilities.

In the Transition Plan, we will list specific facilities that have undergone this evaluation process. In conducting these evaluations, the County followed the ADA Standards for Accessible Design and other applicable Federal and State regulations to identify any existing barriers to access.

For a complete list of public buildings and sites owned or operated by the County of Fresno, please see Appendix 1: Public Buildings and Managed Sites.

Sidewalks, Curb Ramps, Crosswalks, and Pedestrian Signals

The County of Fresno maintains and upgrades over 3,479 miles of public streets and 6,127 intersections. A top priority for us is to improve accessibility for all pedestrians, including individuals with disabilities, through the expansion of an accessible sidewalk network. In addressing the enormous system needs for accessibility, the County of Fresno has implemented various programs and policies, and developed funding mechanisms that include:

1. Ensuring all new transportation capital projects include pedestrian access and comply with the current ADA design standards, as amended, and the State building code.
2. Annually updating the Transportation Street Standards to address changes and clarifications on ADA design from the Federal Access Board and better incorporating pedestrian facilities.
3. Allocating funding for all pavement management overlay projects to construct missing or repair existing ADA curb ramps and sidewalks.
4. Mandating that all new developments and site expansions or improvements include ADA facilities and accessible features.
5. Establishing an ongoing funding source for completing projects identified in the system inventory, and to address specific citizen requests and grievances.
6. Working towards the development of a revised Comprehensive Self-Evaluation with policies aiming to meet the requirements of the ADA.
7. Continuously seeking a funding program to complete the projects identified in the Capital Facilities Plan.
8. Sustaining efforts to fully comply with all aspects of the ADA and Section 504, including administrative requirements such as designating a responsible employee to oversee ADA and Section 504 compliance activities, providing public notice, developing and using a grievance procedure, and developing and implementing a Self-Evaluation and a Transition Plan.

The County conducted field surveys on the 3,479 miles of roadway to identify features that are inconsistent with adopted accessibility standards and code. These surveys collected data on existing curb ramps, whether they meet ADA standards (including slope, lip, ramp width, side flare slopes, and landing area), and inconsistencies at crosswalks, pedestrian traffic signals, and other pedestrian features. This data allowed us to generate a list of missing curb ramps and identify existing curb ramps that don't comply with the standards or pose barriers to individuals with disabilities.

Due to budget constraints, we recognize that not all identified issues can be addressed immediately upon discovery. Thus, we have prioritized the data collected, focusing primarily on intersections on arterial roadways without existing curb ramps. The following criteria will be used to determine which intersections will receive attention first:

- Proximity to government facilities
- Streets with high traffic volumes
- Streets with public transit service
- Streets near pedestrian attractors like schools, parks, and shopping centers
- Proximity to medical facilities
- Improved system connectivity

The County of Fresno retains the right to make exceptions to these criteria if doing so ensures public safety, enhances efficiency, maximizes overall benefits, or utilizes public funds in the most effective way.

For a complete list of public right-of-way owned or operated by the County of Fresno, please see Appendix 2: Sidewalks, Curb Ramps, Crosswalks, and Pedestrian Signals.

Parks and Trails

The County of Fresno has several key responsibilities concerning parks and trails that include:

1. The County is responsible for acquiring land and properties for the purpose of creating new parks and trails. This could involve purchasing land directly or facilitating the transfer of land from private to public ownership.
2. The County conducts careful planning to ensure new parks and trails, are suitably located and appropriately designed to cater to the needs and safety of the public. This includes assessing the demographic needs, environmental impact, and accessibility requirements.
3. The County oversees the design and construction process for new parks and trails. This includes ensuring that these public spaces meet design standards, are ADA compliant, and are environmentally sustainable.
4. The County operates and makes major improvements to existing parks and trails. This includes updating facilities to ensure they remain safe and accessible, making necessary repairs, and enhancing amenities based on public feedback and usage patterns.
5. The County provides and maintains various amenities in these public spaces, such as restrooms, picnic shelters, and water features. These amenities are essential for ensuring these spaces are convenient and enjoyable for the public to use.
6. The County is also responsible for the daily maintenance of the parks and trails. This includes tasks such as cleaning, landscaping, trash removal, and addressing wear and tear or vandalism to ensure these public spaces are clean, safe, and attractive for community members and visitors.

As a part of the Transition Plan, all these activities will be reviewed and adjusted, if necessary, to ensure that they comply with the requirements of the ADA and that our parks and trails are enjoyable for all members of our community, including those with disabilities.

The County of Fresno is committed to ensuring accessibility to all public facilities. As part of our commitment to the ADA, we conducted comprehensive field surveys in parks and trails. The goal of these surveys was to assess and document any elements within these spaces that may currently be inconsistent with accessibility standards and codes. The International Building Code, California Building Code, the 2010 ADA Standards, and guidance from the U.S. Access Board are all used as reference points to assess compliance.

In the course of these field surveys, we documented and assessed each aspect of our parks and trails that might pose a barrier to accessibility. This included, but was not limited to, examining parking facilities, restrooms, picnic areas, playground equipment, signage, pathways, and other amenities for compliance with ADA guidelines.

After conducting the field surveys, we compiled the data and identified a list of features that are inconsistent with the adopted standards and codes. This list also included any identified barriers that might limit access for individuals with disabilities.

Given the significant number of facilities that the County is responsible for and the potential costs associated with remedying all discovered barriers, we have recognized that we may not have the immediate funds to address all issues identified during the surveys.

To deal with this limitation, we prioritized the corrections based on a set of criteria. The main priority is high volume areas, which are facilities or parts of facilities that see the highest footfall and usage. However, this focus may be shifted if the change maximizes public safety, efficiency, and the overall benefit, while also making the best use of public funds.

In this way, the County of Fresno is committed to taking a responsible and practical approach to ensure that all residents, regardless of their physical abilities, can enjoy and fully participate in the outdoor public spaces provided by the County. Our commitment to accessibility remains a top priority, and we will continue to work diligently to ensure we meet our responsibilities under the ADA and State regulations.

For a complete list of parks and trails owned or operated by the County of Fresno, please see Appendix 3: Parks and Trails.

Maintenance and Reporting Procedures

The County of Fresno is committed to maintaining the accessibility of its facilities, equipment, and spaces, in compliance with Section 35.133 of Title II of the ADA, and the Access Board's "Accessible Rights of Way: A Design Guide".

Section 35.133:

A public entity shall maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by persons with disabilities by the Act or this part. This section does not prohibit isolated or temporary interruptions in service or access due to maintenance or repairs.

We aim to ensure that all features required for access by persons with disabilities are kept in operable working condition. This includes the timely repair of any damage or wear that could compromise the accessibility or safety of these features.

The commitment to accessibility includes our responsibility to maintain the condition of sidewalks, parks, trails, buildings, and other public facilities. However, due to the vast scale of our County's infrastructure, we rely heavily on the community's input to identify and prioritize necessary repairs or improvements.

Please note that property owners abutting sidewalks within the County of Fresno are responsible for maintaining these sidewalks free of defects and obstructions. For sidewalks abutting properties owned by the City, it is the City's responsibility to maintain them.

The County of Fresno encourages all citizens to report any issues that could affect accessibility. If you notice a maintenance issue at a park, trail, building, or other public facility, we want to hear about it. Priority is always given to addressing issues that impact safety and accessibility.

To report a maintenance issue that affects accessibility, please contact our ADA/504 Coordinator, Samantha Buck. She can be reached at (559) 600-1070 or by email at countyoffresnoada@fresnocountyca.gov. When reporting an issue, please provide as much detail as possible to help us understand and address the problem efficiently.

We appreciate your assistance in maintaining the accessibility of our community and are grateful for your continued support and understanding. Together, we can ensure that Fresno County is a safe, accessible, and inclusive environment for all.

Methodology

The County of Fresno employed a comprehensive, systematic approach during the field survey process to collect relevant data regarding the accessibility of all County buildings, facilities, and pedestrian features. Our methodology, as outlined below, ensures consistency and accuracy in the data collected.

Training and Tools: Before commencement of field surveys, all surveyors received extensive training in data collection methods, procedures, ADA principles, and the utilization of BlueDAG, a software application designed to assist with data collection and analysis. Detailed training was also provided on the field survey web-based tool found in BlueDAG. BlueDAG's application is based on the approved Accessibility Surveyor's Manual to ensure uniformity in the survey process.

Field Surveys: Surveyors, equipped with BlueDAG, followed a standard procedure to assess the accessibility of County of Fresno buildings, facilities, and other pedestrian features. The software allowed for real-time data entry, making the process efficient and accurate.

Data Consolidation: Completed data was automatically downloaded into BlueDAG's master database upon the completion of each assessment activity. This software organized the collected data into tables that can be sorted by data types, locations, structural feature types, and priority, among other categories.

Transition Plan: BlueDAG automatically incorporated the collected data into the County of Fresno's Transition Plan for each evaluated building, park, street, etc. These individual site evaluations were then integrated into the overarching County of Fresno Transition Plan.

Data Protection and Inventory: All collected data is securely stored in cloud-based storage by BlueDAG to ensure its protection. In addition to the identification of inconsistent features (barriers), we have developed a comprehensive inventory of all physical features of buildings or facilities owned or operated by the County of Fresno. This inventory includes all public spaces and houses agency departments or private businesses that interact with the public.

By using this methodology, the County of Fresno can systematically address and prioritize accessibility improvements throughout the County. Our goal is to provide an environment that is accessible and inclusive for everyone in our community. The information gathered from these surveys and consolidated in the Transition Plan forms the basis of our ongoing commitment to improving accessibility across Fresno County.

Prioritization of Field-Collected Data (Probable Physical Barriers)

After the field surveys and data collection process, the County of Fresno systematized the data according to a priority scheme defined in the master database. The prioritization follows three levels: Priority Level 1 (High Priority), Priority Level 2 (Medium Priority), and Priority Level 3 (Lower Priority). Each level corresponds to certain criteria determined by the master database. Below are the specific criteria and a description for each priority level:

High Priority – Priority Level 1

1. The County of Fresno-owned or -operated buildings, parks, and trails determined to have high-density public activity, including facilities frequently visited by individuals with disabilities.
2. Pedestrian facilities within the rights-of-way along major roadways (Arterials or thoroughfares with a minimum 80-foot-wide right-of-way) and all pedestrian facilities within these rights-of-way, including but not limited to intersections and sidewalks along these arterials or thoroughfares.
3. Intersections and roadway segments serving Level 1 facilities, including:
 - a. The County of Fresno-owned buildings, parks, and trails.
 - b. Public schools, hospitals, health clinics, and health centers, including those which serve individuals with disabilities.
 - c. Public housing, homeless shelters, senior facilities, rehabilitation facilities, and various facilities that specifically serve individuals with disabilities, such as group homes.
 - d. Law enforcement facilities, transportation hubs, public agency service facilities, jails, and prisons.

Medium Priority – Priority Level 2

1. Street rights-of-way with a minimum 60-foot wide right-of-way and other roadways, and all pedestrian facilities within the right-of-way including, but not limited to, intersections and sidewalks along these highways.
2. Intersections and roadways serving Level 2 facilities, including:
 - a. ADA Title III Public Accommodations, such as supermarkets, strip retail markets, and retail centers.
 - b. Major employment sites.
 - c. Housing complexes and apartments.

Lower Priority – Priority Level 3

1. The right-of-way along roadways serving industrial areas, single-family residential areas, and other right-of-way not listed in higher priorities.

These priority levels assist the County of Fresno in effectively and systematically addressing accessibility barriers. By focusing first on areas of high priority, the County ensures that places of high public activity and those frequently visited by individuals with disabilities are accessible, thereby promoting equal access for all community members.

Accessibility (Physical Barriers) and Inventory Collection Items

As a part of the effort to identify and address accessibility barriers, field surveyors equipped with the BlueDAG mobile application collected extensive information during their field assessments. The collection of data encompasses all features within public rights-of-way, buildings, and facilities that fail to comply or are inconsistent with adopted accessibility standards and codes, otherwise referred to as ADA barriers. The information collected is automatically added to the master database and this Transition Plan in real-time.

The following elements, among others, were included in the data collection:

1. Crosswalks: Presence, width, type, alignment, tactile warnings (truncated domes), islands, and accessibility.
2. Curb Ramps: Presence at intersection corners.
3. Intersection Geometry: Standard right angle, T-shaped, Y-shaped, skewed, other irregular shapes, pedestrian islands, right turn lanes.
4. Sidewalk Conditions: Abrupt changes in level, running slopes, cross slopes, width, obstructions.
5. Pedestrian Signals: Presence, type, size, height, location of actuator buttons, and location parameters (e.g., "at curb," "on landing," "on ramp slope - arm length").
6. Sidewalks: Presence leading to and from the curb.
7. Tactile Guide Strips: Presence at crosswalks, location, height, width, color.
8. Traffic Control Devices: Presence of traffic signals, stop signs, yield controls, roundabouts, or no control.
9. Transit Stop Type: None, light rail, bus, or other.
10. Measurements: All measurements pertaining to curb ramps, crosswalks, pedestrian traffic signals, sidewalks, transit stops, etc., as defined by the BlueDAG accessibility checklist.
11. Facilities and Facility Features: All measurements of facilities and facility features of all buildings, parks, and trails as defined by the BlueDAG accessibility checklist. This includes, but is not limited to, parking, exterior pedestrian routes, exterior entrances, restrooms, counters, tables, doors, signage, play features, etc.
12. Programs and Services Self-Evaluations: In 2020, working with departmental ADA Coordinators, internal and external counsel, the County's ADA Coordinator drafted and distributed a questionnaire on countywide accessibility for County provided programs and services. The responses to the questionnaire were updated in 2023.

This exhaustive inventory of features will assist the County of Fresno in understanding the scope of existing accessibility barriers and subsequently developing a comprehensive plan to eliminate these barriers, thus ensuring that all County services, programs, and activities are fully accessible to all individuals, including those with disabilities.

Field Survey Assignment Development

Field survey assignments in the County of Fresno were distributed based on the locations and addresses of buildings, parks, and trails. This systematic approach ensured comprehensive coverage of all relevant sites within the County for accessibility and inventory assessment.

Field investigation staff employed the BlueDAG mobile application tool for efficient data collection. This advanced tool automatically generated longitude and latitude coordinates for each assignment, ensuring precise location tracking for each identified feature or barrier.

As the data was gathered, the mobile application plotted the assignments onto a master database mapping tool. This real-time mapping allowed the ADA Coordinator to monitor the data collection progress and review the information as it was collected. This provided a thorough spatial perspective on the location and extent of accessibility barriers and features.

In addition to the master database mapping tool, the data collected could also be exported into a Microsoft Excel spreadsheet. This feature facilitated further data analysis, as well as the generation of reports and the development of the overall Transition Plan. The utilization of these modern technologies ensured a high degree of accuracy and efficiency in the data collection process, contributing to the successful execution of the County of Fresno's accessibility enhancement strategy.

Barrier Removal Methods, Schedule, and Funding

In line with the ADA's Rules and Regulations, the County of Fresno aims to operate its services, programs, and activities to ensure they are accessible and usable by individuals with disabilities, unless to do so would fundamentally alter the nature of the service, program, or activity; or, cause undue financial and administrative burdens. Various methods may be used to provide program accessibility without making actual physical changes to facilities, provided they comply with strict procedures outlined in the ADA.

Understanding this, the first step in determining necessary structural changes to existing facilities is to gain an understanding of the specific public programs and activities taking place at the County of Fresno's existing facilities. This section aims to describe the access barriers at County owned or operated facilities, and in the public right-of-way. It should be noted that this section does not intend to be a Self-Evaluation as described in the ADA, which includes an analysis of all programs and services offered by a public entity. Such a Self-Evaluation may encompass aspects like communications, publications, employment, and many other factors that are separate from proposed structural or physical modifications to facilities.

A schedule for barrier removal has been developed based on priority areas identified during field surveys and assessments. Budget allocation for barrier removal will also follow this priority-based approach, with funds being allocated in an efficient manner that maximizes the impact of improvements. The County of Fresno will continue to seek additional funding sources and partnerships to accelerate the pace of accessibility improvements, aiming to improve the lives of all residents and visitors.

ADA Coordinator Established Technical Advisory Committee

To ensure robust and effective implementation of barrier removal, the County of Fresno established a Technical Advisory Committee (TAC). This Committee is tasked with reviewing and assisting in determining how a barrier can be removed through either structural or programmatic modifications.

The Committee is comprised of staff members from the County Administrative Office, County Counsel, departmental ADA Coordinators, Internal Services Department, and the Public Works and Planning Department, providing valuable insights and quality control over the barrier removal methods. The members' collective understanding of various elements of program access is crucial to making effective and informed decisions.

The first step in determining barrier removal involves examining barriers in detail to understand how each one affects overall program accessibility. The Committee will assess whether program accessibility can be achieved without removing the barrier or if other means of program accessibility exist.

Decisions regarding barrier removal in existing facilities should be made prior to the start of any barrier removal construction projects. It should be noted that in many cases, physical construction will be necessary to ensure program access and barrier removal. However, the Committee will consider program access to help ensure the most efficient usage of public funds.

For barriers that require construction activities and programs that cannot be made accessible through alternate means, the barrier removal methods and transitioning will be guided by a set of strategies. The BlueDAG web-based program provides detailed information pertaining to each barrier and the corrective action needed to make each facility or element accessible where construction is required. These deficiencies will be addressed in upcoming modifications, which may be administered through internal departments or contracted means.

The TAC serves a crucial role in the County of Fresno's commitment to improving accessibility, ensuring that the ADA Transition Plan is implemented effectively and efficiently.

Barrier Removal Methods

Barrier removal in the County of Fresno is overseen by the ADA Coordinator, who holds the responsibility and authority to fully execute the barrier removal procedures as outlined in the finalized Transition Plan. The ADA Coordinator works closely with the Technical Advisory Committee to utilize various county departments and offices to implement capital improvements and maintenance programs aimed at barrier removal.

It's important to understand that the primary objective of a Transition Plan is to transition from a state of inaccessibility to one of full accessibility, as defined by the ADA and Section 504. The methods adopted by the County of Fresno for barrier removal are largely determined by the ADA Coordinator, with invaluable input from the public, individuals with disabilities, organizations representing individuals with disabilities, and the Technical Advisory Committee.

The ADA Coordinator and related staff are granted the flexibility to deviate from the predetermined barrier removal methods if such deviation ensures public safety, enhances efficiency, maximizes overall benefits, and optimizes the use of public funds. This approach provides the flexibility required to effectively manage the diverse range of accessibility issues that may arise in various public spaces and facilities.

The departments, offices, and related construction programs that are instrumental in the implementation of barrier removal include, but are not limited to, the County Administrative Office, County Counsel, departmental ADA Coordinators, Internal Services Department, and the Public Works and Planning Department. Their expertise and resources will be harnessed to accomplish the crucial task of making the County of Fresno fully accessible to all its residents and visitors.

Barrier Removal Priorities

To ensure an effective and efficient approach to barrier removal, the County of Fresno has established the following priority ranking:

Priority 1: The top priority for barrier removal will be addressing grievances from the public, particularly individuals with disabilities. This applies to any building or facility owned, operated, or operated by the County of Fresno, where the grievance is reported.

Priority 2: The second priority for barrier removal will be physical locations that have been identified as problematic through public involvement, consumer surveys, and feedback during the Transition Plan comment period.

Priority 3: The third priority tier includes:

- County of Fresno owned or operated buildings, parks, and trails identified as having high public activity density, including facilities known to be frequented by individuals with disabilities.
- Pedestrian facilities within the right-of-ways along major roadways (arterials or thoroughfares with a minimum 80-foot wide right-of-way) and all pedestrian facilities within these right-of-ways, including, but not limited to, intersections and sidewalks along these arterials or thoroughfares.
- Intersections and roadway segments serving Priority Level 3 buildings and facilities such as public schools, hospitals, health clinics and health centers (including those serving individuals with disabilities), public housing, homeless shelters, senior facilities, rehabilitation facilities, and other facilities specifically catering to individuals with disabilities.

Priority 4: The fourth priority tier includes:

- Street right-of-ways with a minimum 60-foot wide right-of-way and other roadways, and all pedestrian facilities within these right-of-ways, including intersections and sidewalks along these highways.
- Intersections and roadways serving Level 2 facilities, including ADA Title III Public Accommodations like supermarkets, retail markets and centers, major employment sites, and housing complexes and apartments.
- Right-of-way along roadways serving industrial areas, single-family residential areas, and other right-of-ways not listed in higher priorities.
- Buildings and facilities owned, or operated by the County of Fresno that aren't defined in the third and fourth priorities.

By setting these priorities, the County of Fresno ensures a systematic, organized, and comprehensive approach to removing barriers and promoting accessibility.

Barrier Removal Schedule

The finalized barrier removal schedule is contingent upon the availability of funding. One of the primary roles of the Transition Plan Technical Advisory Committee (TAC) is to work alongside the ADA Coordinator and the County's Budget Manager in identifying annual funding sources. Once funding has been secured, the following barrier removal schedule and activities will act as a guide for construction projects:

Detailed descriptions of proposed access improvement projects can be found in the BlueDAG Master Database. The County of Fresno plans to allocate approximately \$500,000 annually, subject to funding availability, to implement the ADA Transition Plan and remove identified barriers to programs. Additionally, efforts will be made to apply for competitive funds to expedite the transition process.

A summary of the yearly projects is depicted in Appendix 4: Past, Current and Future ADA Projects.

Access improvement projects will be divided by fiscal year as part of a multi-year implementation plan. It's projected that this period will allow for compliance in accordance with the Barrier Removal Methods priorities #1, #2 and #3. A detailed breakdown of projects beyond these periods isn't advisable due to the numerous potential changes over such a long-time span. Full compliance with all Condition Priorities is anticipated to be achieved within a 25 to 30-year period.

Work locations are subject to review and recommendations by the County of Fresno, the ADA Coordinator, the TAC, and the public. It's likely that specific locations and project groupings will need adjustments over the years, pending a more thorough review by the agency's departments, offices, and related construction programs. Other breakdowns of proposed work locations and extents will be available, including by types of work or funding sources.

The detailed and summary tables of improvement projects should be seen as approximate costs, based on the unit costs and estimating parameters developed specifically for this ADA Transition Plan. These costs cover all incidental soft costs, such as engineering, bidding, permitting costs, utilities, and other contingencies.

The detailed table of improvement projects doesn't necessarily show the precise locations of all sidewalk, driveway repair, or building and facility work that will be undertaken as part of the ADA Transition Plan. Much of this work will be dictated by public input requests and will be evaluated in conjunction with intersection work or other construction projects.

For information on the Transition Plan for right-of-way, buildings, or other facility types, please refer to the following link:
<https://fresnoco.portal.bluedag.com/access/barriers/f8W19mNb5CvekYVR4DOrBy6Vy2wOpGQj>

Funding

The ADA Transition Plan Implementation Program is designed to make maximum use of existing and anticipated funding programs and sources. Accessibility improvements and barrier removals will be financed through a variety of funding sources, whether as standalone projects or as minor components of broader transportation improvement initiatives. Potential funding programs and sources could include:

County of Fresno General Fund: The County's General Fund is comprised of the following sources: Use of Money & Property; Fines, Forfeitures, & Penalties; Miscellaneous Revenues; Other Government Aid; Licenses, Permits, & Franchises; Charges for Services; Fund Balance; State Aid; Federal Aid; and Fresno County Taxes.

County of Fresno Tax Increment: This refers to the increase in tax revenue that results from increases in property values within a specific area. Tax increment financing is a public financing method that is used as a subsidy for redevelopment, infrastructure, and other community-improvement projects. In this scenario, the County of Fresno could set aside the additional tax revenue from the increased property values to finance barrier removal and accessibility improvements.

State and Federal Grants: Various State and Federal agencies provide grants that can be used for accessibility improvements. These grants may be competitive, requiring the County to submit applications detailing the planned improvements, or they may be formula-based, with funding amounts determined by factors such as population or need.

Bond Issues: At the direction of the Board of Supervisors, the County has the ability to issue bonds to raise funds for large-scale accessibility improvement projects. These bonds would be repaid over time, typically from property tax revenues or other County income.

Internal Services Department – Facility Services Division: The Facility Services Division of the Internal Services Department is responsible for the mechanical, electrical, structural, and custodial maintenance of County owned facilities. In addition to the routine and preventive maintenance, remodeling and modifications of County facilities, this Division plans and performs furniture moves, as requested by departments.

Internal Service Fund: A proprietary-type fund used to account for the financing of goods or services provided by one department to other departments of the County, or to other governmental units, on a cost reimbursement basis.

Public Works & Planning: The Public Works and Planning Department is responsible for public works, planning, land development, and resource management services, which involve administration of the County's General Plan and enforcement of building and land use standards including inspections and the issuance of building and land use permits. The Department provides services related to environmental analysis, plan reviews, code enforcement, County Surveyor activities, growth management issues, regional and cooperative planning, ground and surface water management and planning, and mineral and natural resource management. The Department also provides for the administration, design and implementation of the County's Capital Projects program and includes funding for the administration of the Fresno County

Blossom Trail and the Fruit Trail. In addition, although primarily funded in other budgets, the Department provides services in support of maintaining and operating the County public road system, housing, community development, solid and hazardous waste management, County Service Area and Waterworks District administration, transportation, and parks and grounds. Various revenue sources to include Federally funded maintenance projects.

Proposition 172: Proposition 172 is the byproduct of California budget deficits and the resulting Education Revenue Augmentation Fund (ERAF), which shifted property tax dollars away from local governments to school funding. Voters approved a half-cent sales tax in 1993 dedicated to local public safety – Proposition 172.

Library: The Fresno County Public Library, under the governance of the Board of Supervisors, provides informational, cultural, and recreational services to the public. Library is a member of the San Joaquin Valley Library System (SJVLS) and serves as its fiscal and operational agent. The Coalinga-Huron Library District is a separate special district and not covered in this budget. Funding is primarily provided from two sources, property taxes and Measure B Sales Tax revenue. The Measure B Sales Tax Ordinance was passed by the voters in November 1998, renewed in 2004 and 2012, and will expire March 31, 2029, if not renewed prior to that date.

It should be noted that the actual funding strategy will depend on the County's budget situation, the availability of grant funds, and other factors. As such, the funding sources listed here should be considered potential sources, not guaranteed ones.

Construction Monitoring and Status Reporting

Monitoring and reporting on construction activities are crucial for ensuring compliance with all relevant codes and standards, and for demonstrating a good faith effort to fulfill legislative and regulatory mandates. The methods and procedures for monitoring these activities and tracking ADA Transition Plan compliance within the County of Fresno are detailed below:

1. The ADA Coordinator, together with the Technical Advisory Committee, will establish a robust monitoring system. This system should include protocols for regular site visits, assessment of ongoing construction projects, and reporting on any issues or deviations from approved plans.
2. Regular reports will be generated to track the progress of construction and to provide updates on the status of improvements. These reports can help identify any delays or challenges, allowing for corrective action to be taken promptly.
3. Detailed records of all construction activities, including designs, specifications, contracts, construction documents, inspection reports, and modifications, will be kept. This will provide a transparent and traceable record of compliance with the ADA Transition Plan.
4. Ensuring that staff and contractors are well-trained and understand the accessibility requirements and standards is essential. Training programs can be implemented to ensure all parties involved are aware of their responsibilities and the procedures for ensuring compliance.
5. Updates about the progress of the ADA Transition Plan implementation, including completed projects and upcoming work, will be made publicly available. This could be done through the County's website, public meetings, or other appropriate channels.
6. The County of Fresno will have a system in place for receiving and addressing public feedback about the construction projects and their compliance with accessibility standards. This system will provide a channel for community members to report any concerns or barriers they encounter.

These methods and procedures are subject to modification based on the input of the ADA Coordinator, the Transition Plan Technical Advisory Committee, and the public. They will be continually evaluated and refined to ensure that the ADA Transition Plan is being effectively implemented and that all construction activities align with accessibility standards.

Field Construction Inspections and Monitoring

All Transition Plan accessibility improvements currently being constructed under the jurisdiction of the County of Fresno are required to be evaluated by inspectors either employed or under contract with the agency. The types of projects under which improvements are or will be constructed and inspected are the following:

Roadway Reconstruction: These projects involve the complete rebuilding of roadway surfaces, curbs, and sidewalks to ensure they are ADA compliant.

Pedestrian Facility Improvements: This includes construction and improvement of sidewalks, crosswalks, pedestrian signals, and other features to enhance accessibility.

Public Building Renovations: This involves the alteration of existing public buildings, such as County offices, libraries, and recreation centers, to improve their accessibility.

New Construction: Any new public buildings or facilities being constructed will be subject to inspection to ensure they are built to ADA compliance standards from the outset.

Public Transportation Facilities: Improvements and construction of bus stops, transit stations, and related facilities are subject to ADA inspections. (Note: the County currently does not have public transportation facilities).

Public Parks and Recreational Facilities: This includes improvements to trails, playgrounds, restrooms, and other amenities in public parks to ensure they are accessible.

Parking Facilities: Construction or improvement of public parking lots and garages, including the provision of designated accessible parking spaces, will be inspected for ADA compliance.

Traffic Signal Upgrades: Any modifications to traffic signals, such as the addition of auditory signals or countdown timers, will require inspection for ADA compliance.

Curb Ramp Installations and Improvements: Any projects involving the installation of new curb ramps or improvements to existing ramps are subject to inspection.

Public Service Facilities: Public facilities such as public restrooms, drinking fountains, and telephones should be accessible and are subject to inspection.

All these construction projects will be subject to ongoing monitoring and inspection to ensure that they meet the required ADA standards. These inspections will be conducted by qualified personnel who are trained to understand and apply the standards set out in the ADA.

Accessibility Standards and Codes

The County of Fresno currently utilizes all State and Federal accessibility standards and codes in the on-site surveys and remedial efforts. This includes but is not limited to:

2010 ADA Design Standards: These standards outline requirements for making buildings and facilities more accessible to people with disabilities.

1991 Accessibility Guidelines for Buildings and Facilities: Although they have been largely replaced by the 2010 ADA Design Standards, these guidelines still provide useful context and background for accessibility requirements.

2015 Architectural Barriers Act (ABA) Accessibility Standards: These standards apply to facilities designed, built, altered, or leased with certain Federal funds.

2011 Public Right-of-Way Accessibility Guidelines (PROWAG): These guidelines outline the requirements for making public rights-of-way accessible to all pedestrians, including those with disabilities.

2022 California Building Code: This is the most recent set of building codes in the State of California, which contain specific requirements for accessibility in a range of buildings and facilities.

Continual attention to these standards and codes, as well as any updates to them, will be essential for maintaining and improving accessibility in the County of Fresno. It's recommended that all relevant personnel, including designers, builders, inspectors, and administrators, be provided with the appropriate training and resources to effectively apply these standards in their work.

Appendix 1: Public Buildings and Managed Sites

Evaluation Title	Address	City
668 - DSS Pontiac Building 5 CWS and Parking lot	380 W Ashlan Ave	Clovis
641 - DBH Air-Fresno	2719 N Air-Fresno Dr	Fresno
642 - Recorder's Office	1250 Van Ness Ave	Downtown
633 - Hedges (Parking lot)	5520 E Hedges Ave	Fresno
