Bid/Proposal Attachment regarding the Darfur Contracting Act of 2008

Effective January 1, 2009, all Invitations for Bids (IFB) or Requests for Proposals (RFP) for goods or services must address the requirements of the Darfur Contracting Act of 2008 (Act). (Public Contract Code sections 10475, et seq.; Stats. 2008, Ch. 272). The Act was passed by the California Legislature and signed into law by the Governor to preclude State agencies generally from contracting with "scrutinized" companies that do business in the African nation of Sudan (of which the Darfur region is a part), for the reasons described in Public Contract Code section 10475.

A scrutinized company is a company doing business in Sudan as defined in Public Contract Code section 10476. Scrutinized companies are ineligible to, and cannot, bid on or submit a proposal for a contract with a State agency for goods or services. (Public Contract Code section 10477(a)).

Therefore, Public Contract Code section 10478 (a) requires a company that currently has (or within the previous three years has had) business activities or other operations outside of the United States to certify that it is not a "scrutinized" company when it submits a bid or proposal to a State agency. (See # 1 on the sample Attachment).

A scrutinized company may still, however, submit a bid or proposal for a contract with a State agency for goods or services if the company first obtains permission from the Department of General Services (DGS) according to the criteria set forth in Public Contract Code section 10477(b). (See # 2 on the sample Attachment).

The following sample Attachment may be included in an IFB or RFP to satisfy the Act's certification requirements of bidders and proposers.

Therefore, to be eligible to submit a bid or proposal, please complete only one of the following three paragraphs (via initials for Paragraph # 1 or Paragraph # 2, or via initials and certification for Paragraph # 3): YOUR BID OR PROPOSAL WILL BE DISQUALIFIED UNLESS YOUR BID OR PROPOSAL INCLUDES THIS FORM WITH EITHER PARAGRAPH #1 OR #2 INITIALED OR PARAGRAPH #3 INITIALED AND CERTIFIED.

OR

7. Clearly identify the top three safety issues in your jurisdiction and describe how the requested grant will address these issues.

- Safe recovery of sunken vessels – The Fresno County Sheriff's Office Boating Unit investigates all vessel accidents within Fresno County. Additionally the Sheriff's Office Dive Team responds to numerous calls of submerged vehicles throughout the county in any given year. When the accident results in the vessel or vehicle sinking the Sheriff's Office currently does not have the industry standard equipment to safely recover the vessel or vehicle while preserving evidence.

- Proper preservation of evidence for processing vessels involved in boating accidents – Proper evidence preservation and documentation is vital in the prosecution of subjects causing injury or fatal boating accidents. In order to properly preserve evidence at the scene, a vessel must be handled with the up most care and attention to detail throughout the entire recovery process. Any damage caused during the recovery of a vessel involved in a boating accident can taint the evidence collection process and hamper the prosecution for those responsible for causing the accident.

- Resuscitation of drowning / cardiac arrest patients – The Fresno County Sheriff's Office Boating Unit responds to all drownings and medical emergencies that take place near the many waterways within Fresno County. Our County's fire and emergency medical services do not have any vessels with which to respond to medical emergencies on the waterways. They rely on our agency to locate, triage, and transport the patients to the nearest location accessible to an ambulance or fire truck. Statistics have shown the odds of surviving a drowning or cardiac arrest dramatically increase when provided with defibrillation and proper application of cardiopulmonary resuscitation (CPR). An automated external defibrillator (AED) guides deputies in the performance of CPR in a highly stressful situation, evaluates the patient for a heartbeat, and can administer a shock to restore one's heartbeat.

Misc. Equipment Items Questions (Salvage / Recovery Equipment Kit)

11. Item Details

- 11 a. Is this equipment general all-purpose gear? NOTE: person-specific items will not be funded. Yes No

- 11 b. Describe exactly what you are requesting and how this equipment will help mitigate the boating safety issues you identified in Question 7. If your requested quantity is more than one for any item, explain the need for having multiple items. (max. 2000 characters)

Unfortunately almost every year the Fresno County Sheriff's Office investigates at least one fatal vessel accident or vehicle found submerged in a waterway. Frequently during these accidents the vessel or vehicle and other large pieces of evidence sink. A critical part of the investigation is recovering the vessel or vehicle in the same condition it was in as it was sinking. The preservation of this evidence is crucial to conduct a thorough and accurate investigation.

Our current practice is to contract with a local tow company or marina to raise a sunken vessel. The marina's technique for raising a vessel is to use a winch to bring it near the surface, then tow the vessel partially submerged to the dock. The inability to completely raise the vessel and then dragging it under the water causes critical evidence to be lost or destroyed.

The tow company has the equipment we are requesting, however, they charge a minimum of \$600 per hour for vessel recoveries. Relying on a tow company with the proper recovery equipment has previously caused several issues for the Sheriff's Department. In addition to the high cost, the tow companies have little regard for, nor understand the critical importance of evidence preservation. An example of such carelessness was evident when a tow company recovered a vessel for our agency and ultimately ended up crushing the vessel like an aluminum can, drug it through trees, and destroyed valuable evidence.

We are therefore requesting to purchase a Dive Rescue International Salvage / Recovery Kit. This kit includes inflatable lift bags and all the associated hardware to safely recover a sunken vessel. The Sheriff's Office has recently been trained in the use of this equipment and has the ability to use it to its full potential.

This equipment will improve the quality of accident investigations, aid in accurately prosecuting those responsible for accidents, and provide on-going cost savings for the Sheriff's Office.

11 c. Describe any negative impacts to boating safety and/or boating enforcement if you do not get this grant.

Without this salvage equipment the Fresno County Sheriff's Office will continue to use third party services to recover sunken vessels involved in boating accidents. This has, and will continue to compromise accident investigation by further damaging involved vessels during recovery operations. This impacts boating safety by inhibiting an investigator's ability to conclude who is at fault for an accident and, if warranted, properly prosecuting them for a crime.

11 d. Classify this request

Classify this request by choosing one of the following options and present a strong justification for the request

- "Critical" (operations would cease without it)
- "Increased efficiency" (if it would save staff time, identify how much time)
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade structure, hoists to get the vessels out of the water, etc. to extend longevity)

Justification - include the percentage of time the equipment will be used for boating safety activities and the percentage of time it will be used for search and rescue. (max. 300 characters)

Just below critical - 50% Boating Safety and 50% SAR - We currently have no way to recover sunken vessels other than contracting with third parties. This equipment will greatly improve the investigation and prosecution of crime related to boating accidents.

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? Yes No

If yes, what percentage can you supplement?

11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.

We are only aware of one other agency in our region that has the ability to recover sunken vessels. Performing these recoveries in a safe manner requires ongoing training and familiarity with the equipment. Using borrowed equipment that we are not able to continually train with poses a large and unacceptable safety risk to our divers. When using borrowed and unfamiliar equipment chances of injury or death to our divers is at a greatly increased risk. It is imperative that members of our agency know how to operate and regularly train on the equipment that they will be using in the field. It is also crucial that our agency be confident in the maintenance and upkeep of such equipment, which cannot be guaranteed when borrowing equipment from another agency.

11 g. How and why did you select this particular model? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.

We chose this particular recovery package because it includes all the equipment we would need to conduct an operation safely and properly. This is the same equipment that we were recently trained to use and were pleased with its quality and performance. These lift bags are industry standard for recovering vessels. They are used by other public safety agencies and private contractors throughout the United States.

Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION

We are not aware of less expensive versions. We have looked into purchasing all the needed hardware and lift bags separately to reduce cost but purchasing everything as a package is the most cost effective way to obtain this equipment.

- 11 i. Will this equipment be used for anything besides Recreational Boating Safety Enforcement (ie. Junior lifeguard, swimming rescues, enforcing commercial activities, etc.)? Yes No
- If so, list activities and percentage of time vs. Recreational Boating Safety Enforcement (max. 1024 characters)
- 11 j. Select the PRIMARY purpose this equipment will be used for:
- Search and rescue
 - Enforcement of state and local measures

Misc. Equipment Items Questions (Defibrillators, batteries, and pads)

11. Item Details

- 11 a. Is this equipment general all-purpose gear? NOTE: person-specific items will not be funded. Yes No
- 11 b. Describe exactly what you are requesting and how this equipment will help mitigate the boating safety issues you identified in Question 7. If your requested quantity is more than one for any item, explain the need for having multiple items. (max. 2000 characters)

The Fresno County Sheriff's Office Boating Enforcement Unit is often times the first on the scene of medical emergencies and injured persons on the waterways of Fresno County. Without having emergency medical service personnel nearby it is imperative deputies be equipped with one of the most useful life saving devices on the market, an AED. To potentially help save ones life we are requesting to purchase nine Zoll AED Pro Semi-Auto defibrillators. Additionally we are requesting to purchase nine lithium battery packs to power the defibrillators, nine adult CPR stat pads, and nine pediatric pads. The AEDs will be issued to all our seasonal and full time boating deputies, the boating unit sergeant, the Huntington Lake contract deputy, and the last will be stored in our dive trailer for dive team medical related emergencies.

Boating Enforcement Unit deputies who would be issued an AED would have better odds of saving one's life if faced with a medical emergency while enroute to their assigned waterway, while patrolling the waterway, or while on their way back home. Boating Enforcement Unit deputies can unfortunately count on having to perform CPR on an unsuspecting person at some point in time during the summer boating season. By being equipped with an AED deputies can be provided with automated instructions to assist them in the performance of CPR during a highly stressful and dynamic situation. Additionally deputies can be provided with a secondary means of patient evaluation to guide them in the performance of their duties. Most importantly an AED can provide a deputy with the one of the only capable means of restarting one's heartbeat.

An AED is one of the most priceless and beneficial tools available to assist with officer and public safety. The procurement of an AED is an investment whose return cannot be measured in monetary value but in the priceless value of a human life. The life of a parent, child, friend, or spouse is without measure.

11 c. Describe any negative impacts to boating safety and/or boating enforcement if you do not get this grant.

As previously mentioned Fresno County's emergency medical services and fire personnel do not have the means by which to respond to medical emergencies that take place on the waterways within the County. Additionally they are not stationed close to the rural areas in which the waterways of Fresno County are located and wait times for emergency medical personnel to arrive on scene can often exceed a half hour. Statistics have shown that survival rates for those who suffers a cardiac arrest can diminish by 7 to 10 percent for every minute that CPR is not performed. If not equipped with AEDs deputies would continue to respond to medical emergencies in the field without up to date equipment and rely on memory to properly perform CPR in stressful, time sensitive situations. The public's and our agencies own personnel's lives would be at risk if not properly equipped with today's technology.

11 d. Classify this request

Classify this request by choosing one of the following options and present a strong justification for the request

- "Critical" (operations would cease without it)
- "Increased efficiency" (if it would save staff time, identify how much time) [Increase performance of CPR and lifesaving abilities by 50 to 80 percent.]
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade structure, hoists to get the vessels out of the water, etc. to extend longevity)

Justification - include the percentage of time the equipment will be used for boating safety activities and the percentage of time it will be used for search and rescue.
(max. 300 characters)

50% Boating Safety / 50% SAR. The AEDs will be carried on all patrol vessels while patrolling the waterways. The waterways we patrol have minimal land access resulting in extended access to advanced first aid. An AED will greatly increase the chances of recovery during a cardiac arrest or drowning.

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? Yes No

If yes, what percentage can you supplement?

11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.

Fresno County fire and emergency medical services are equipped with AEDs, however their response time to remote areas of the County can be prolonged. Our unit has a close relationship with the County's emergency medical services (American Ambulance) and has attempted to acquire older AEDs from their agency that are being replaced, however this has never come to fruition after multiple attempts. AEDs are rather expensive, have a great necessity in the medical field and are not an item that can easily be "borrowed".

11 g. How and why did you select this particular model? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.

The majority of fire and emergency medical services in Fresno County carry Zoll AED Pro's to use in the event of a medical emergency. By choosing to deploy with Zoll AED Pros this would allow for a multi-agency interoperability. Zoll AEDs allows first responders and medical personnel to transition quickly between defibrillators. This will allow for continuity of care and reduces the risk to patient safety. If an AED were to be used in the field our agency would be provided with replacement shock pads by EMS, which would reduce the cost to our agency. Studies have shown that Zoll AEDs are water resistance and continue to work after being fully submerged in water.

Our unit briefly looked at the cost of all reputable AEDs designed for first responders and medical personnel and found them to all be comparatively equal to one another. Due to the benefits and reasons described above for choosing the Zoll AEDs we did not further pursue another brand of AED.

11 i. Will this equipment be used for anything besides Recreational Boating Safety Enforcement (ie. Junior lifeguard, swimming rescues, enforcing commercial activities, etc.)? Yes No
