(Public Contract Code sections 10475, et seq.; Stats. 2008, Ch. 272). The Act was passed by the California Legislature and signed into law by the Governor to preclude State agencies generally from contracting with "scrutinized" companies that do business in the African nation of Sudan (of which the Darfur region is a part), for the reasons described in Public Contract Code section 10475.

A scrutinized company is a company doing business in Sudan as defined in Public Contract Code section 10476. Scrutinized companies are ineligible to, and cannot, bid on or submit a proposal for a contract with a State agency for goods or services. (Public Contract Code section 10477(a)).

Therefore, Public Contract Code section 10478 (a) requires a company that currently has (or within the previous three years has had) business activities or other operations outside of the United States to certify that it is not a "scrutinized" company when it submits a bid or proposal to a State agency. (See # 1 on the sample Attachment).

A scrutinized company may still, however, submit a bid or proposal for a contract with a State agency for goods or services if the company first obtains permission from the Department of General Services (DGS) according to the criteria set forth in Public Contract Code section 10477(b). (See # 2 on the sample Attachment).

The following sample Attachment may be included in an IFB or RFP to satisfy the Act's certification requirements of bidders and proposers.

Therefore, to be eligible to submit a bid or proposal, please complete only one of the following three paragraphs (via initials for Paragraph # 1 or Paragraph # 2, or via initials and certification for Paragraph # 3): YOUR BID OR PROPOSAL WILL BE DISQUALIFIED UNLESS YOUR BID OR PROPOSAL INCLUDES THIS FORM WITH EITHER PARAGRAPH #1 OR #2 INITIALED OR PARAGRAPH #3 INITIALED AND CERTIFIED.

7. Top three BOATING safety issues

This is a Federal Pass-Through 'Recreational Boating Safety Grant'. The purpose of the grant is to promote boating safety and to decrease the number of accidents, injuries, and fatalities on U.S. waters. Clearly identify the top three BOATING safety issues that affect recreational boaters in your jurisdiction and describe how the requested grant will address these issues. Your answer to this question will be referenced throughout this grant application.

In Fresno County we have identified the following issues as our major safety concerns. First is an ignorance of boating laws and water safety. Fresno County has numerous lakes and rivers that allow for boating. Every year we have seen an increase in problems with renters. On just Shaver Lake there are about 250 vessels available for the public to rent. This Lake has seen an increase in vacationers due to it being featured on various travel sites over the past few years. An increase in vacationers has led to more rentals, accidents, rescues, and violations.

Secondly, we have seen an increase in boating on our rivers. We normally encounter a variety of PWC's, but we have started to see an increase in vessels and other small powered craft. This has been problematic due to the water level of our rivers, and that we have a large population of civilians who like to float, kayak, and swim. Combining these things has led to a significant increase in violations by boaters and PWC operators.

Lastly, is the officer and public safety concerns present by our aging river patrol equipment. In recent years, we have begun expanding our river enforcement efforts. From increased patrols to brush/debris removal, we are attempting to make the river safer. However, rivers present unique problems that stagnant bodies of water do not. River patrol and rescue operations subject deputies to rapidly changing conditions.

When patrolling or responding to emergency events, possessing quality functional equipment is essential. Our river patrol vessels have aged and are unsafe for deputies and the public alike. We fear our vessels will fail during patrol operations, preventing us from providing boater safety services. It is our belief that with this new vessel we will be adequately equipped for patrols and emergency situations alike.

10. Describe what you are requesting. You may request only FIVE ITEMS TOTAL (patrol boat and equipment). You may group "like items". "Like items" are related items that work together. You need one to work with the other. Examples of "like items" include a 'patrol boat and a trailer' or 'dive masks and dive suits'."

Item	Cost	Quantity	Total	Priority	List specific items that are in the grouped 'like' items
SJX 2170 River Boat	133,416.00	1.00	133,416.00	First	Shallow water patrol boat, decals, and a shade top
TOTAL			133,416.00		

10 a. Describe exactly what you are requesting and how this equipment will help mitigate the boating safety issues you identified in Question 7.

We are seeking funding to replace our 1998 Woolridge outboard jet-propelled river patrol vessel. This vessel is 25 years old and is accumulating repair/refurbishing costs. This is causing patrol issues due to the vessel constantly being in and out of service. After speaking with numerous agencies and companies, we have determined a suitable replacement is manufactured by SJX Jet Boats Inc. The SJX 2070 vessel is a 20', aluminum V-hull, center console, patrol vessel with an inboard 310 HP jet engine. The size and layout of this vessel is ideal for patrolling the various rivers and high-altitude lakes in Fresno County.

In recent years, Fresno County has been affected by California's on-going drought, which has been apparent when operating in the Kings and San Joaquin rivers it is common for PWC's and small powered craft to operate on these river and has created constant safety issues for swimmers and boaters. Numerous operators have been cited for violations, including no boater card and negligent operation. Our current river patrol vessels and PWC's have struggled to patrol our rivers due to their topography. Often our rivers get shallow before opening into deeper pockets of water. Our current vessels are unable to cross these shallow areas, preventing patrol. Whenever we need to address an issue, we have to trailer the vessel up or down stream, and relaunch where applicable.

This vessel would alleviate this problem due to its ability to operate in conditions as shallow as 3 inches. This will allow us to patrol all season regardless of shallow water conditions. Having a vessel that can traverse this body of water in its entirety would allow for a stronger patrol presence and allow us to increase boater safety through proactive patrols. Furthermore, the construction of this vessel would allow us to patrol our high-altitude lakes. We currently do not possess an adequate vessel to patrol these lakes, this vessel would allow us to do so furthering boater safety.

10 b. Describe any negative impacts to boating safety and/or boating enforcement if you do not get this grant.

Without this grant, we would continue to operate in a limited capacity. As mentioned previously, our current vessels are insufficient due to their limited operational capabilities. With the increase in boaters, small craft, and PWC's, we are concerned about our inability to properly patrol the areas they operate. The increase in vessel traffic combined with the increase in negligent operation has led us to identify this as an immediate concern. However, we are not equipped to address these problems head on. Having this vessel will allow us to directly combat this issue for years to come and make our waterways safer for all.

Secondly, we worry our aging river patrol vessels will incur further malfunctions. Recently we have retired our PWCs due to critical mechanical problems. This retirement of our PWC has left us under equipped. Moreover, one of our Woolridge's has previously experienced a critical transmission malfunction that caused the vessel to lose propulsion. Losing power while in the river was extremely dangerous and nearly caused deputies to abandon ship.

This has since been repaired, but this vessel continues to age, and new issues are appearing. Operating in rivers can be perilous and we want to ensure our deputies are equipped with a quality vessel that will allow them to patrol safely.

10 c. Classify this request by choosing one of the following options and present a strong justification for the request.

Classify this request by choosing one of the following options.

- "Critical" (operations would cease without it)
- "Increased efficiency" (if it would save staff time, identify how much time)
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade tents, hoists to get the vessels out of the water, etc. to extend longevity)

Justify your classification of this request. (max. 300 characters)

We have classified this request as critical due to the state of our river patrol equipment. With our older vessels breaking down and our PWCs being retired, we need this vessel to continue patrol efforts.

Percentage of time on the water this vessel will be used for:

Activity	Percentage
Boating Safety Activities	70.00
Search and Rescue Activities	25.00
Other Activities	5.00
TOTAL	100.00

List any other activities this vessel will be used for:

Parades, school events, boater safety education, and water safety presentations.

10 d. If you are not awarded your full request, would your agency be able to supplement the difference? Yes No

If yes, what percentage can you supplement?

10 e. How and why did you select this particular vessel? Explain if this is a standard patrol boat or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.

We have selected the SJX Jet Boats model 2170 V-aluminum hull inboard jet-propelled river boat. This is not a standard vessel and includes specific upgrades to meet our needs. We plan to use this vessel on the Kings River, the San Joaquin River, and various high-altitude lakes. These rivers are characterized by narrow/shallow streaks before opening into larger areas. The topography of our rivers has created major issues for our current river boats. The most pronounced issue is they cannot operate in extreme shallow water conditions. This has hindered patrol efforts and restricted us to patrolling a minimal amount of the river.

We also encounter this issue when patrolling high altitude lakes with shallow launching areas. These lakes often have "Jon Boats" or other powered craft operating on them. This SJX has been specifically designed to address these issues. This vessel's one of a kind hull can cross fallen debris and operate in water as shallow as 3 inches. Our cost estimate includes the vessel, law enforcement decals, and a shade cover.

We researched other companies, such as Woolridge, G3, Inmar, Zodiac, and Rogue Jet. None of these companies offer a vessel with comparable power, maneuverability, and shallow water abilities. To ensure this was the perfect vessel for us, we contacted agencies to see if anyone uses something similar. We discovered that the Butte County Sheriff's Office Search and Rescue Team uses an SJX like the one we were researching. We traveled to their

Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION

jurisdiction and attended a strenuous test of the vessel's abilities. This test showed us how effective this vessel was in shallow water and how it performs in fast flowing rivers. After testing this vessel in conditions like we encounter, we confirmed this would meet our needs. We currently do not have any additional funding sources available to assist in the purchase of this vessel.

10 m. Has the vessel being replaced ever had it's engine or electronics replaced? Yes No

If yes, how many times? Explain. (max. 1024 characters)
The vessel received a new engine approximately 10 years ago.

10 n. Explain why you are not requesting a repower of this vessel. (max. 1024 characters)

We are not requesting to repair/repower this vessel due to its age and various non engine related issues. The gauges are failing, the interior is dilapidated, the floor needs a complete replacement, and the electronics are

Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION

showing major wear and tear. Also, the vessel cannot operate in shallow water. It is our opinion that any money spent on the vessel would not extend its lifetime.
