- i. The Specialist shall enter into the Board's Compensation and Restitution Computer System, Cares2, the final disposition status of juvenile and adult criminal cases associated with applications filed with the Board within thirty (30) calendar days of the judge imposing the restitution order and fine. This deliverable may be used in scorecard assessment on CRC effectiveness and failure to do so may impact contract funding.
- j. After sentencing has occurred, the Specialist is required to ensure that the court's final decision (via the CR-110 and/or Minute Order) is forwarded to the Board's Restitution Branch Attn: Victim Pass-Thru Unit at P.O. NOTES:

Information Security Policy

Memo Number: 17-008

Date Issued: 1/1/17

Supersedes: 15-001

Effective Date: Immediately

Expires: Indefinite

Issued By: Information Technology Division

Purpose

The Victim Compensation Board's (CalVCB) Information Security Policy defines the rules for information security that apply to our business activities. This Policy also provides a foundation for additional practices and standards that will more specifically communicate CalVCB rules related to information security.

Information Security Program

The CalVCB has established an Information Security Program to protect the confidentiality, availability, integrity, and privacy of CalVCB information and supporting assets. The Information Security Program provides an integrated set of requirements that complement the CalVCB strategic goals and securely achieves its objectives and priorities.

Responsibility

The Information Security Officer (ISO) is responsible for developing, implementing, and operating the Information Security Program. The ISO reports directly to the CalVCB ITD Chief Information Officer.

The ISO will develop and implement policies, practices, and guidelines that protect the confidentiality, availability, and integrity of all CalVCB information and supporting assets. The ISO also promotes information security awareness, measures adherence to information security policies, and coordinates the response to information security incidents.

The ISO chairs the Information Security Advisory Committee that includes members representing all CalVCB divisions. The Information Security Advisory Committee is responsible

for reviewing, advising, and recommending approval of information security practices and standards.

The Information Technology Division is responsible for the implementation and administration of CalVCB information security policies, practices, and guidelines for all CalVCB information systems and networks.

All CalVCB employees, consultants, and contractors are responsible for protecting CalVCB information assets and complying with CalVCB information security policies, practices, and guidelines. All CalVCB employees, consultants, and contractors are also responsible for reporting any suspected or known security violations or vulnerabilities to the ISO.

Compliance

All CalVCB employees, consultants, and contractors must comply with CalVCB information security policies, practices, and guidelines.

Failure to comply with CalVCB information security policies, practices, and guidelines by State employees may result in disciplinary action up to, and including, termination of State employment.

Failure to comply with CalVCB information security policies, practices, and guidelines by consultants or contractors may result in punitive action up to, and including, termination of their contract.

In some cases, the failure to comply with CalVCB information security policies, practices, and guidelines may result in additional civil and criminal penalties.

Compliance of CalVCB divisions and offices with CalVCB information security policies, practices, and guidelines must be enforced by the supervisors and managers of these divisions and offices. The CalVCB overall compliance with information security policies, practices, and guidelines will be monitored by the ISO.

Risk Management

The CalVCB will identify and mitigate risks to the confidentiality, availability, and integrity of CalVCB information assets. Information security risks must be reported to the owner of the information or the information system asset and the owner of that asset will ultimately determine the impact of the risk and the appropriate mitigation approach.

The ISO operates the Information Security Risk Management program. Under this program, the ISO participates in the development of new information systems and periodically assesses existing information systems to identify and mitigate information security risks. The ISO works with the appropriate CalVCB divisions and offices to determine the impact of the risk, identify the appropriate mitigation activities, and monitor the successful completion of the mitigation activities.

Life Cycle Planning

The CalVCB will address information security as part of new projects involving major business activities or significant enhancements to existing business.

Projects will comply with all applicable information security policies and practices, and include provisions for the effective implementation and administration of the information security processes required for compliance.

Awareness and Training

The CalVCB maintains a mandatory information security awareness program. The ISO will ensure that the appropriate information security awareness training is provided to all CalVCB employees, consultants, and contractors.

Physical Security

The CalVCB safeguards its business areas and resources to protect and preserve the availability, confidentiality, and integrity of the department's information assets. Only authorized individuals are granted physical access to sensitive CalVCB business areas.

Contingency and Disaster Preparedness

The CalVCB Business Services Section ensures that the CalVCB has sufficient plans, resources, and staff to keep critical CalVCB business functions operating in the event of disruptions.

Contingency plans must be tested at a frequency sufficient to ensure that they will work when needed.

Incident Handling

The CalVCB ISO implements practices to minimize the risk associated with violations of information security and ensure timely detection and reporting of actual or suspected incidents or violations.

All CalVCB employees, consultants, and contractors are responsible for reporting any suspected or confirmed security violations and incidents in a timely manner. The CalVCB investigates information security violations and incidents and refers them to state and federal authorities when appropriate.

Identification and Authentication

All users are individually identified to the information system(s) they use. Their identity is verified in the system by using information that is only known by the individual user and the system. The user and the system will protect this verification information with sufficient care to prevent its disclosure and ensure its integrity.

The identification and verification process must be strong enough to establish a user's accountability for their actions on the information system.

Access Control

Access to all CalVCB information systems and information assets is controlled and the owner of each system or information asset must approve all user access. Users are provided access to only those systems and information assets required to perform their current CalVCB duties.

The CalVCB information systems must have the capability to restrict a user's access to only information and/or functions necessary to perform their CalVCB duties.

Audit Trail

All information system activities are subject to recording and routine review. Audit trail records must be sufficient in detail to facilitate the reconstruction of events if a compromise or malfunction occurs.

Audit trail records must be provided whenever access to a CalVCB information system is either permitted or denied; or whenever confidential or sensitive information is created or modified.

Audit trail records are created and stored with sufficient integrity and duration to hold a user accountable for their actions on a CalVCB information system.

Data Ownership

All information assets have a Data Owner who is assigned by CalVCB management. The Data Owner is responsible for authorizing access to the information, assignment of custody for the information, classifying the information, and approving any contingency plans affecting the information.

Information Classification

All CalVCB information assets are classified by their Data Owner according to the confidentiality of the information and its importance to CalVCB operations. In addition to any classification of information required for business purposes, the classification identifies if the information is confidential or subject to release as a public record as required by law. It also identifies information critical to the continuance and success of CalVCB operations.

Information System Security Practices

All CalVCB information systems and information system infrastructure elements will have specific practices, guidelines, and procedures that govern their operation relative to information security. All CalVCB information systems and information system infrastructure elements will conform to these practices, guidelines, and procedures unless the ISO has approved a specific exception.

Issued By: Legal Division

Purpose

To describe steps to be taken in the event fraud is suspected.

Policy

The California Victim Compensation Board (CalVCB) is committed to protecting the Restitution Fund against the risk of loss and will promptly investigate any suspected fraud, involving claimants, providers of service, representatives, and/or any other parties that have a business relationship with CalVCB. CalVCB will pursue every reasonable effort to obtain recovery of the losses from the offender or other appropriate sources.

This policy is not intended to address employee work performance, therefore, an employee's moral, ethical, or behavioral conduct should be resolved by the employee's supervisor/manager and the Human Resources Branch. If the suspected fraud involves another employee, the employee should contact his/her supervisor/manager immediately. If the suspected fraud involves the employee's supervisor/manager, the employee should contact the Human Resources Branch immediately.

Definition

Fraud is defined as a deception deliberately practiced in order to secure an unfair or unlawful gain. Actions constituting fraud include, but are not limited to:

- Any dishonest or fraudulent act.
- Any violation of federal, state, or local laws related to fraud.
- Forgery, unauthorized alteration, destruction, or manipulation of computer-related data or documents.

Fraud Policy

Memo Number: 17-004

How to Report Fraud

Any employee who suspects fraud or has received an external fraud complaint shall immediately report it to his or her supervisor/manager and should not attempt to conduct the investigation personally. Managers must complete an Investigation Referral Form (available on Boardnet), and submit it to the Deputy Executive Officer of their division for referral to the Provider Evaluation Team (PET).

If an employee receives a complaint of fraud from an external complainant, the employee should not attempt an investigation. The employee should gather contact information from the complainant and refer the matter to their supervisor for immediate submission to PET.

There are four reporting options available for external complainants:

1. Send an email to the fraud hotline at FraudHotline@victims.ca.gov
2. Call the toll-free fraud hotline at 1 (855) 315-6083
3. Write to the Legal Division at 400 R Street, Sacramento, CA 95811
4. Fax the complaint to (916) 491-6409

All inquiries concerning the activity under investigation from the suspected individual, his or her attorney or representative, or any other inquirer should be directed to the PET Team.

Investigations

The PET has the primary responsibility for the investigation of all suspected fraudulent acts as defined in this policy. Pertinent investigative findings will be reported to executive management. Decisions to refer the results to the appropriate law enforcement and/or regulatory agencies for further investigation and/or prosecution will be made in consultation with executive management.

Any investigative activity required will be conducted objectively regardless of the suspected individual's position, title, length of service or relationship to CalVCB.

All information received in the course of a fraud investigation is treated as confidential to the extent permitted by law. CalVCB management will be alert and responsive to any reprisal, retaliation, threat, or similar activity against an employee because that employee has in good faith reported a suspected fraudulent activity. CalVCB employees must report any alleged reprisal, retaliation, threat or similar activity immediately.

In order to maintain the integrity of the investigation, CalVCB will not disclose or discuss the investigation results with anyone other than those who have a legitimate need to know. This is also important in order to

INSTRUCTIONS FOR COMPLETING MONTHLY INVOICES

All costs in the following categories/subcategories should be included if they are necessary to perform the services under this agreement and provided for in the budget.

Operating Expenses

The following items fall within this category: rent, utilities, postage, data processing, office supplies, telephone, insurance, training, travel, and expendable equipment. All items submitted must include a description or explanation of the expense, and a receipt, if necessary.

- Do not identify your password as being a password.
- Do not include the name of the account and the dial-in telephone number of the system on the same piece of paper.
- Mix in extra characters or scramble the written version of the password in a way that you will remember, making the written version different from the real password.
- Do not attach the password to your terminal, keyboard, or any part of your computer or office furniture.
- Store a written password in a secure place like a wallet or purse.

Minimizing the Number of User Passwords

Systems shall be developed in a manner so the number of different passwords a user must know is minimized.

Change Embedded Password

Embedded passwords shall be changed when the programs they affect are also changed for routine enhancements or maintenance.

Accounts associated with stored or embedded passwords shall have account names that are difficult to guess to lessen the likelihood that these accounts can be disabled by unauthorized logon attempts as outlined in the Passwords Standards table.
