California's Long Term Caregivers

Dear Fresno County Board of Supervisors

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Rachelle Kimball

Dear Fresno County Board of Supervisors

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Domingo Jimenez

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Ruth Grogan

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities — a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Diana Reischer

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Kashama Lankster

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Malinda Newmark

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Glenn Rodgers

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Vaida Bomberly

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Jingxin Wu

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Traci Pelton

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Gloria Aguilar

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Wilma Woods

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities— a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Gustavo Gonzalez

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Arman Chapa

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Mary Grace Barrios

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Danielle Cortez

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Christine Espinoza

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Michelle Gonzalez

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Tim Morstad

IHSS caregivers provide vital care to seniors and people living with disabilities, allowing them to live safely and as independently as possible at home in the Fresno community. These caregivers support our community's aging residents every day — they deserve our support for a livable and respectable wage.

We hope the Fresno county Board of Supervisors puts wages and benefits on a path to \$20 like other counties in California.

IHSS providers work on the front lines, caring for Fresno County's aging population and others in need of in-home care. IHSS providers risk their lives daily, keeping our elderly and disabled out of the hospital. Let's begin to acknowledge each caregiver's valuable compassion and work on a worthy living wage. Let's avoid a crisis in our communities—a shortage of caregivers that's only getting worse and use this opportunity to retain workers for the future.

We're calling on the Fresno Board of Supervisors to put low wages at the center and improve the lives of many IHSS providers in the county. It's time that Fresno County invests in IHSS workers.

By investing in the IHSS program now, we will not only raise wages for thousands of home care workers, but we will also bring in additional State and Federal funding and help meet the increasing need for cost-effective long-term care.

Invest in caregivers today!

Sincerely,

Brenda Navarro
