Proposal Abstract

The Fresno County Sheriff's Office is applying for continuation funding through the Internet Crimes Against Children (ICAC) Program in order to support the Central California Internet Crimes Against Children Task Force. The Central California ICAC Task Force is dedicated to locating, identifying, and arresting those who prey upon our children sexually exploit our children through the use of technology. These funds will be used to investigate computer related crimes against children by enhancing investigativ technology facilitated crimes by offenders using the internet, and other technologies. The funding will also be used to provide educational programs aimed at law enforcement officers, teachers, parents, and children; to serve as a forensic resource to law enforcement agencies within our geographical service area throughout Central California; to prosecute cases at the local, state, and federal level; and to participate in nationally-coordinated investigations.

The Central California ICAC Task Force's service area is comprised of a nine (9) county area within Central California with a total service population of more than 5 million people, many registered Indian Tribes and 84 law enforcement agencies. Progress toward achieving the stated goals and objectives will be evaluated on a monthly basis via reporting, and semi-annual basis via progress reports. Those reports will then be submitted to the Office of Juvenile Justice and Delinquency Prevention (OJJDP).

Program effectiveness of the Central California ICAC Task Force will be measured based on the number of ICAC-related arrests, number of proactive and reactive investigations completed, number of computer forensic examinations completed, amount of technical assistance provided to law enforcement agencies, number of agencies participating in the program, and number of community outreach presentations conducted.

According to a Pew Research Center report (August 10, 2022) on average, 95% percent of teens (ages 13 to 17 years of age) have access to a smartphone, and 45% say they are online “almost constantly.” The 95% is a 22% increase from the 73% of teens who said they had access to a

smartphone in 2014-2015. Smartphone ownership is nearly universal among teens of different genders, races and ethnicities and socioeconomic backgrounds. The study showed that teen internet users had risen from 92% in 2014-2015 to 97% today. The 45% of teens who say they are almost constantly online almost doubled from the 2014-2015 survey showing 24%. Another 44% say they go online several times a day, meaning roughly nine (9) in ten (10) teens go online at least multiple times a day.

The increase in technology has brought with it tremendous learning potential for our children and youth. Unfortunately, it has also brought with it the increased potential for online victimization of these same children and youth, including unwanted exposure to sexual material, unwanted sexual solicitations, and online harassment such as cyber bullying. According to a Pew Research Center report (September 27, 2018) a majority of teens have experienced some form of cyber bullying. In the study, 59% of teens admitted to one or more of the following; offensive name-calling, spreading of false rumors, receiving explicit images they didn't ask for, constant asking of where they are, what they're doing, who they're with, by someone other than a parent, physical threats and having explicit images of them shared without their consent.

Children and teens continue to receive unwanted sexual solicitations while online. Risks are higher for youngsters who are troubled, such as those who experienced a negative life event such as a death in the family, moved to a new home, had separated or divorced parents or had a parent who lost a job. Particularly disturbing trends in these solicitations are requests for youth to send sexual pictures of themselves. It is a crime, under federal and state laws, to take, distribute, or possess sexually explicit images of children younger than 18 years of age. Many of these images constitute

child pornography. When children or teens comply with these requests, they usually do not realize the potential impact of their actions. The picture(s) could be circulated online to hundreds, thousands or more people or a perpetrator could blackmail the victim for additional images, videos, and even sex. Additionally, the victim has no control of the images or videos once they have been sent out. Unfortunately, the Central California Internet Crimes Against Children (ICAC) Task Force is receiving more and more disturbing cases of this nature, which leads to more children being sexually exploited and victimized.

Considering these trends and studies, it is easy to see that children are inherently susceptible to the dangers of the Internet. The stages of child psychological development may facilitate on-line victimization. The lack of emotional maturity can make children more vulnerable to manipulation and/or intimidation. Children also have a strong desire for attention, validation, and affection, as well as a lack of caution or self-preservation. Children are taught to obey adult requests and demands and may be less likely to know when it is not appropriate to do so. In addition, children are naturally curious about sex and other “forbidden” topics. It is important to note that children may also be hesitant to tell a trusted adult if they are approached in an inappropriate way, because of a feeling of embarrassment or shame. Adolescents are widely considered by the psychological establishment to be prone to recklessness and risk-taking behavior, which can have long lasting consequences.

Unfortunately, parental education with respect to Internet safety is lacking. Although techniques are available to protect children from certain content, research indicates most parents aren't using them. Although parents say they employ filtering systems on their Internet connections, many

children admit to hiding their online activities from parents and guardians. Many parents do not discuss these topics with their children and most do not have passwords and access to their children's social media information, nor the knowledge of the applications their children use.

With these things in mind, Central California ICAC takes a multi-pronged approach towards dealing with the sexual exploitation of children. The Central California ICAC Task Force realizes that being able to provide enough manpower and resources to effectively protect children from Internet predators is a nearly impossible task, so raising the awareness of Central California residents about the sexual exploitation of children and prevention education are priorities. Children who are educated in the importance of online safety are more likely to take steps to keep themselves safe online than ones who aren't educated. Learning to recognize the warning signs or risks involved with Internet usage will allow trusted adults to intervene and lessen potential negative impacts.

To promote awareness and community education, the Central California ICAC Task Force supplies task force affiliates with copies of NetSmartz Internet Safety Presentation information and literature targeting four groups: Parents and Community Groups, Middle and High School students, 3rd through 6th Grade students, and children attending Kindergarten to 2nd Grade. These age-appropriate presentations teach children, their parents and/or guardians, and educational staff how to help children avoid becoming victims. The presentations increase the safety awareness of children to prevent victimization and increase self-confidence when the children are online. Additionally, the Central California ICAC Task Force has given numerous presentations to Elementary, Middle and High School teachers and staff to assist them with

identifying victims of cyberbullying and sexual abuse, as well as to educate them of the current laws and statutes related to child sexual exploitation. Educational presentations have not been limited to schools but have also been presented during outreach events and child abuse conferences. This fiscal year, Central California ICAC Community Service Officer took part in National Night Out in the City of Del Rey and San Joaquin which were well attended by community members. The Fresno County Sheriff's Office organized two community outreach events so far this year in the communities of Calwa and Malaga, Cops Summer Kick-Off both of these events were well attended by members of the community.

The Central California ICAC Task Force currently maintains the Task Force website www.centralcaliforniaicac.org, and a Facebook page, both of which publicize arrests and operations, provides Internet safety material to the community, and provides resources to the public, such as reporting and contact information for Central California ICAC Task Force affiliates.

As a result of these proactive efforts, Central California ICAC receives countless phone calls, e-mails and referrals from parents, teachers, relatives, and other agencies regarding possible online crimes committed against children and youth. The continuous stream of tips from the public, law enforcement, and social service agencies is a direct result of the well-publicized success that the Central California ICAC Task Force has achieved and continues to achieve. Central California ICAC has received numerous positive media stories, both in print, radio, and television, which have been generated as the result of high-profile investigations, arrests and prosecutions. As a result, the public, other law enforcement agencies, and social service agencies have come to

recognize the Central California ICAC Task Force as the “first responder” to online child sexual exploitation investigative leads.

In addition to tips from members of the public and law enforcement agencies within our jurisdiction, Central California ICAC also responds to a large number of tips from the National Center for Missing and Exploited Children (NCMEC). This allows the task force to work collaboratively with NCMEC and agencies throughout the United States to quickly respond to reports of child victimizations. Often times, crimes against children do not recognize jurisdictional boundaries and a collaborative effort is imperative towards solving these crimes.

Central California ICAC continues to see a dramatic increase in the reactive investigations within our area of responsibility, from not only NCMEC, but also local police agencies and turn overs from other jurisdictions. From January 2021 through December 2021, the Central California ICAC Task Force received 4,019 CyberTips from NCMEC, an increase of approximately twenty-five percent from the same reporting period in 2020. For the first eight months of 2022, January 2022 through August 2022, Central California ICAC has already received 3,800 CyberTips, a dramatic increase compared to 2021. At our current pace, Central California ICAC will receive nearly 7,000 CyberTips for the year. This is potentially an increase of over 2,980 CyberTips from the previous year.

The Central California ICAC Task Force continues to receive documented complaints regarding the manufacture, distribution, and possession of child pornography through the general public and other law enforcement agencies. Due to these documented complaints, patrol generated cases and

proactive investigations; Central California ICAC conducted 4,786 total investigations from January 2021 through December 2021. For the first six months of 2022, January 2022 through July 2022, Central California ICAC has already conducted 4,321 investigations, an increase compared to this time in 2021.

While education and community involvement is a very important step towards reducing the victimization of children, this alone will not fully eliminate the problem. Increasing the investigative and prosecutorial capacities of its member affiliates is crucial towards fulfilling our mission. In continuing our multi-pronged approach, the Central California ICAC Task Force provides ongoing training opportunities for investigators, forensic examiners and prosecutors involved with ICAC investigations. Member agencies can receive exclusive training for their members, generally at no cost, at locations throughout the United States. Central California ICAC Task Force presently provides training and support to sixty-four (64) cooperating affiliate agencies that have signed Memorandum of Understandings (MOU) to be part of the Central California ICAC Task Force.

The Central California ICAC Task Force has provided technological equipment and inter-agency assistance to its member agencies throughout its existence. The Central California ICAC Task Force offers many other resources to enhance law enforcement's responses to Internet related crimes committed against children, including: de-confliction databases, contact lists, email updates about cases, legislative updates and issues, and future training sessions. The Central California ICAC Task Force continues to provide information for templates of search warrants, court orders and other commonly used paperwork. Along with contact information for Internet Service

Providers, links to other related sites, law enforcement agencies and other information useful for our members. If an agency is smaller or unfamiliar with ICAC investigations, we will even facilitate by providing investigators to assist the agency in need and help serve search warrants.

The Central California ICAC Task Force is also focusing efforts on proactively combating the manufacture and distribution of child pornography via Peer to Peer (P2P) file sharing software. Presently, millions of persons throughout the world use Peer to Peer file sharing networks to share child pornography files amongst each other. Peer to Peer file sharing of child pornography is perpetuating the cycle of sexual abuse. In many cases, people who sexually abuse children will memorialize their abuse by documenting it through images and video. These same people will provide these images and videos via Peer to Peer file sharing software so other people can view it. Through the investigation of people who utilize Peer to Peer file sharing software to view and trade child pornography, law enforcement has been able to rescue and save countless victims of child sexual abuse.

The Central California ICAC Task Force currently conducts proactive Peer to Peer investigations using software tools to monitor the activity. Central California ICAC also recognizes the increase in usage of Peer to Peer networks such as BitTorrent. The Central California ICAC Task Force has conducted numerous proactive BitTorrent investigations this year and will continue to conduct them in an attempt to identify and arrest the child predators abusing and preying upon our children. With the primary focus being to identify those child predators who are committing hands on sexual abuse.

In the most recent grant-reporting period beginning January 2021 through December 2021, the Central California ICAC Task Force has conducted numerous Peer to Peer investigations. A four-day operation resulted in the arrest of several predators, with charges being filed federal and state. However, with the increase in CyberTips and overall investigations Task Force wide, less time is left to initiate proactive Peer to Peer investigations. The Central California ICAC Task Force hopes to increase the number of proactive cases for the upcoming grant period as more affiliated agencies become trained and take on a more active role participating in proactive investigations, rather than merely handling reactive CyberTips. The Central California ICAC Task Force fully intends to continue to sponsor trainings for affiliates and supplementing those trained affiliates with the necessary equipment needed to adequately perform child exploitation investigations.

Notably, the Central California ICAC Task Force continues to experience a significant increase in forensic examinations each year. This can likely be attributed to the increase in reactive cases as well as the increase in the training, knowledge, and ability of our current forensic examiners. The accessibility of computer media with the ability to store large amounts of data is also a factor negatively impacting the timely completion forensic examinations. The Task Force is committed to assisting investigators within affiliated agencies to become certified forensic examiners. Thus far in 2021-2022, the Central California ICAC Task Force purchased the following items and software to assist with investigations. OS Forensics for extraction of data from computers and Greykey software to assist with extracting cell phone information; Cellebrite Premium which is a forensic tool to extract data from cellphones using the latest technologies. Central California ICAC has utilized Cellebrite for numerous affiliates. This has resulted in retrieval of information which would have normally been lost or not located.

The Central California ICAC Task Force is currently housed at the HSI Fresno Office of Investigations. The Central California ICAC Task Force includes HSI Special Agents, four full-time Fresno County Sheriff's detectives, a full time Fresno County Sheriff's Community Service Officer and a full time Fresno Police Detective. Prior to this year the task force had only 4 detectives in total but was able to increase it by 25% due to such high demand and funding allocations through grants. With this full-time staffing, Central California ICAC is better able to serve the citizens of our community and increase our ability to protect children from sexual predators.

Since the formation of the Central California ICAC Task Force in the fall of 2007, the task force has enjoyed tremendous success in the investigation, apprehension, and prosecution of child sexual predators. Additionally, the task force has rescued numerous children from active sexual abuse as a direct result of their ongoing efforts to combat the sexual exploitation of children.

Through this grant, the Central California ICAC Task Force will continue to address the following needs:

- To investigate both proactive and reactive cases involving the online victimization of children and youth.
- To assist with the effective prosecution of online child predators.
- To serve as a forensic resource throughout the ICAC Task Force's service area, providing documented evidence to assist with investigations and prosecutions.

- To educate children and youth on Internet safety practices and reporting protocols should they, or someone they know, become a victim.
- To educate parents, teachers, and other caregivers on Internet safety, filtering and monitoring software, and reporting protocols should they become aware of online victimization.
- To educate other law enforcement agencies on recognizing and investigating online crimes perpetrated against children.
- To engage other agencies as formal partners.

Project/Program Design and Implementation

The Central California ICAC Task Force is a multi-jurisdictional program consisting of investigators from various local, state, and federal law enforcement and prosecutorial agencies throughout our nine-county area of responsibility. Participating agencies operate under a formal, signed Memorandum of Understanding (MOU). The Task Force began receiving funding under the Internet Crimes Against Children Task Force's Urban Expansion Program in October 2007. Since that time, the Task Force has used the ICAC grant to fully fund one investigator and one Community Service Officer (two other investigators assigned to the Task Force are partially funded by a grant from the State of California). The residual of the grant is directed towards training, travel expenses, and equipment for both full time ICAC personnel and our affiliate agencies.

The Central California ICAC Task Force will investigate internet crimes against children utilizing the protocols and national standards, as the Attorney General sets them forth, to the extent they are consistent with the law of the state of California. Central California ICAC will ensure all ICAC investigators assigned to the Task Force are adhering to the standards at all times.

Central California ICAC Task Force services will be directed at citizens within our multi-county service area. Services will be provided to children/youth, teachers, parents, other concerned citizens, and law enforcement agencies. Crimes committed by suspects residing in our service area will be investigated. Cases involving suspects residing outside of our service area/jurisdiction will be referred to the appropriate law enforcement agency for investigation.

A detailed action plan for meeting each of our objectives is outlined in the Program Narrative

section this application. Law enforcement agencies at the state and local level have expressed a desire to commit personnel and resources to the Central California ICAC Task Force. A listing of those agencies seeking Task Force technical assistance, forensic assistance, or investigative assistance with ICAC-related cases will be compiled. Those agencies will be targeted and will be contacted about establishing a formal relationship with the ICAC Program. The benefits of being part of an ICAC Task Force will be discussed and an MOU for signature will be provided to each agency, along with a copy of the ICAC Task Force Investigative Standards. These agencies will also be invited to attend meetings hosted by the Central California ICAC Task Force to discuss Task Force issues, developments, and training. With these measures, the Task Force goal is to increase the number of partner agencies by one (1) agency throughout the 12-month grant period.

On a monthly basis, Central California ICAC investigators will submit statistical reporting forms to the Sheriff's Detective Sergeant, who is also the Commander of the Central California ICAC Task Force. These statistical report forms will be submitted for investigations, forensics, technical assistance, and presentations. The Commander of Central California ICAC Task Force will compile a report showing the number of investigations completed, number of arrests, the number of forensic examinations completed, the number and type of presentations given each month, the number of people trained, the number of technical assistance provided, and the number of times the Task Force served as a resource to the community and other law enforcement agencies.

On a semi-annual basis, the Commander of Central California ICAC Task Force will prepare a report detailing the Task Force's status toward achieving the stated goals and objectives. This report will list each objective as shown in this application, each goal associated with the individual

objectives, and our status to date. The report will detail what goals have been achieved, and any progress towards meeting our stated goals and objectives. Those areas where we were unable to meet our stated goals will be reviewed and resources will be reallocated to those areas to insure our ability to meet our goals as stated in this application. The statistics that are collected are the monthly reports, quarterly reports, and semiannual progress reports. All statistical reports will be submitted to the Office of Juvenile Justice and Delinquency Prevention (OJJDP) via the online Grants Management System.

The Fresno County Sheriff's Office and the HSI Fresno Office will continue to provide resources to insure the successful operation of the ICAC Program. These resources include building space, office furniture, investigative tools, computer equipment, forensic equipment, forensic training, investigative staff, and support personnel.

Capabilities/Competencies

The Central California ICAC Task Force will be operated by the Fresno County Sheriff's Office, who will serve as the lead agency. The Fresno County Sheriff's Office provides law enforcement and correctional services to all residents in Fresno County. The county has a charter form of government. A five-member Board of Supervisors, elected to serve four-year terms, governs it. Other elected officials in Fresno County include the Assessor, District Attorney, and the Sheriff.

The Task Force is part of the Person's Crimes Division, which operates within the Detective Bureau of the Fresno County Sheriff's Office. The day-to-day activities of the assigned Central California ICAC Detectives and Community Service Officer are supervised by a Sheriff's

Detective Sergeant who is assigned to the Central California ICAC Program. By virtue of the position within the Fresno County Sheriff's Office, the Detective Sergeant is also the Central California ICAC Assistant Commander. This Detective Sergeant insures that all investigators follow the ICAC Task Force Investigative Standards. The Detective Sergeant is responsible for case assignments, forensic assignments, and public presentation assignments. This Sergeant is also responsible for assigning requests for technical assistance and any requests for resources. On an as-needed basis, the Detective Sergeant assists with requests for technical assistance, resources, and training by other law enforcement agencies and the community. A Sheriff's Lieutenant who is also assigned to the ICAC Program supervises the Detective Sergeant. Again, by virtue of the position within the Fresno County Sheriff's Office, the Detective Lieutenant is also the Central California ICAC Commander. This Lieutenant is the Fresno County Sheriff's Office Person's Crimes Division Commander who also oversees the ICAC Program in this area. A Sheriff's Captain who oversees all Central California ICAC Task Force activities supervises the Lieutenant. The Internet Crimes Against Children Program detectives are responsible for the investigation of online criminal activity which tends to exploit minors, including, but not limited to: attempting to meet minors for sexual purposes; possessing, distributing, or manufacturing child pornography; enticing minors to engage in vice-related activities; and contributing to the delinquency of minors. Specifically, the ICAC Detectives are responsible for proactively initiating cases, investigating complaints received, interviewing witnesses, identifying and apprehending perpetrators, interrogating suspects, preparing and executing search warrants, completing crime reports, producing statistical reports, providing technical expertise, seizing digital evidence, conducting computer forensic examinations, analyzing and processing evidence, gathering intelligence, presenting thorough investigations to the prosecutor, conducting follow-up investigations as

requested by the prosecutor, testifying in court, networking with other law enforcement officers, maintaining equipment, providing presentations to the public, providing interviews to the media, and training law enforcement officers.

Based on the many years of experience operating within the Task Force model, the Fresno County Sheriff's Office is uniquely qualified to provide the services required under this application. Previous and current Task Force successes have been achieved on a national and international level. The addition of new affiliate agencies and the continued training and expansion of current task force members will enhance the current communication, cooperative effort and success that the Central California ICAC Task Force has with other ICAC task forces across the country. The personnel currently assigned to Central California ICAC from the Fresno County Sheriff's Office have over 20 combined years of experience working child exploitation cases and working within the guidelines of this grant. This is invaluable amount of experience, which is passed on to all members of the Central California ICAC Task Force and will continue to be for years to come.
