22 Any noise measurement made pursuant to the provisions of this chapter shall be made with a
23 sound level meter using the "A" weighted network (scale) at slow meter response. Fast meter
24 response shall be used for impulsive type sounds. Calibration of a measurement equipment
25 utilizing an acoustic calibrator shall be performed immediately prior to recording any noise data.

1 The exterior noise levels shall be measured within fifty feet of the affected residence, school,
2 hospital, church or public library. Where practical, the microphone shall be positioned three to
3 five feet above the ground and away from reflective surfaces.

4 The interior noise levels shall be measured within the affected dwelling unit, at points at least
5 four feet from the wall, ceiling or floor nearest the noise source, with windows in the normal
6 seasonal configuration. The reported interior noise level shall be determined by taking the
7 arithmetic average of the readings taken at the various microphone locations.

8
9 **8.40.040 Exterior noise standards.**

10 A. It is unlawful for any person, including an owner, whether through the owner or the
11 owner's agent, lessee, sublessor, sublessee or occupant, at any location within the
12 unincorporated area of the county, to create any noise, or to allow the creation of any noise, on
13 property owned, leased, occupied or otherwise controlled by such person which causes the
14 exterior noise level when measured at any affected single- or multiple-family residence, school,
15 hospital, church or public library situation in either the incorporated or unincorporated area to
16 exceed the noise level standards as set forth in the following table:

Category	Cumulative Number of minutes in any one-hour time period	Noise Level Standards, dBA	
		Daytime 7 a.m. to 10 p.m.	Nighttime 10 p.m. to 7 a.m.
1	30	50	45
2	15	55	50
3	5	60	55
4	1	65	60
5	0	70	65

1
2 B. In the event the measured ambient noise level exceeds the applicable noise level
3 standard in any category above, the applicable standard shall be adjusted so as to equal the
4 ambient noise level.

5 C. Each of the noise level standards specified above shall be reduced by five dB(A) for
6 simple tone noises, noises consisting primarily of speech or music, or for recurring impulsive
7 noises.

8 D. If the intruding noise source is continuous and cannot reasonably be discontinued or
9 stopped for a time period whereby the ambient noise level can be measured, the noise level
10 measured while the source is in operation shall be compared directly to the noise level
11 standards.

12
13 **8.40.050 Interior noise standards.**

14 A. It is unlawful for any person, at any location within the unincorporated area of the county
15 to operate or cause to be operated within a dwelling unit, any source of sound or to allow the
16 creation of any noise which causes the noise level when measured inside a receiving dwelling
17 unit situated in either the incorporated or unincorporated area to exceed the noise level standards
18 as set forth in the following table:

Category	Cumulative Number of minutes in any one-hour time period	Noise Level Standards, dBA	
		Daytime 7 a.m. to 10 p.m.	Nighttime 10 p.m. to 7 a.m.

3 standard in any category above, the applicable standard shall be adjusted so as to equal the
4 ambient noise level.

5 C. Each of the noise level standards specified above shall be reduced by five dB(A) for
6 simple tone noises, noises consisting primarily of speech or music, or for recurring impulse

9 stopped for a time period whereby the ambient noise level can be measured, the noise level
10 measured while the source is in operation shall be compared directly to the noise level
11 standards.

12
13 **8.40.051 Property Owner's Responsibility.**

14 It is a violation of this chapter for any person who is an owner of real property at which a Noise
