DISCUSSION:

On March 2, 2023, the Emergency Services Director proclaimed a local emergency due to the extreme weather conditions beginning February 23, 2023. The Board ratified this proclamation on March 7, 2023. The storms caused record snowfall and rainfall, severely impacting roads, infrastructure, and power systems, particularly in the mountain and foothill communities. The County activated emergency shelters and deployed resources to address life-safety threats.

Since that time, emergency response operations have concluded, and all eligible projects have been documented and submitted to FEMA for reimbursement review. While recovery work continues, the emergency phase has ended, and conditions no longer require emergency powers or declarations.

In accordance with County Ordinance Chapter 2.44 and Government Code §8630, the Board is required to review the local emergency status at least every 60 days and terminate it as soon as conditions no longer warrant continuation. The last continuation resolution was presented to your Board on May 20, 2025. Since that time, emergency conditions have been resolved and no additional project work requiring emergency status remains. Therefore, it is recommended that the local emergency proclamation be formally terminated.
