1. PROBLEM STATEMENT

Fresno County's Traffic Safety Problem: Impaired drivers with alcohol, drugs, or both in their system.

Fresno County is home to 1.88 million acres of the world's most productive farmland, with agricultural operations covering nearly half of the county's entire land base of 3.84 million acres. Farmers here raise more than 350 different crops, contributing directly more than \$5.6 billion to the California economy and supporting 20 percent of all jobs in the Fresno area. Many of the county's crops are not grown commercially anywhere else in the nation. [Fresno County Farm Bureau, 2017].

There are over 7,000 miles of maintained roads in Fresno County and approximately 2,500 miles of paved roadway in the city of Fresno. Vehicle miles traveled per day in Fresno County has increased from 22,498,000 in 2004 to 22,982,169 based on the most recent Office of Traffic Safety rankings. The County of Fresno is traversed by four major freeways and includes State Routes 99, 41, 168, 180 and Interstate 5. Since 2000, Fresno County's population has increased 16% from 799,407 to 952,166 [California Department of Finance]. Agriculture is still the primary industry in Fresno County. Fresno County's Ag production value exceeded \$6.58 billion in 2012 [Fresno County Farm Bureau Press Release 6/18/13], making Fresno County the number one agricultural county in the nation [USDA Economic Research Service updated 11/6/13]. About 75% of travel on Fresno County's maintained road system takes place on rural primarily two-lane undivided roads [Fresno County Department of Public Works & Planning].

Fresno County is one of California's largest and most diverse counties. Based on California Department of Finance preliminary statistics from July 1, 2016 from has an estimated population of 989,183. Fresno County covers an area of over 6000 square miles in central California and is the state's sixth largest county. The City of Fresno, which is also the county seat, was named the fifth largest city in California with a 2014 estimated population of 515,986. As of January 7, 2016, the United States Census Bureau "Quick Facts" estimates 27.5 % of Fresno County's population lives below the federal poverty level, as compared to 16.4% of all Californians. The County of Fresno's ethnic diversity is considerably different than the rest of the state. Hispanics comprise over 51.9% of the population compared to 38.6% of the state. Population totals for White, non-Hispanic or Latino is 32.7%, Asian 10.7%, African-American 5.9%, American-Indian & Native Alaskan 3.0%, Native-Hawaiian & Other Pacific Islander 0.3%.

According to the 2015 Annual Report of the California DUI Management Information System published by the California Department of Motor Vehicles, in 2013 Hispanics again represented the largest ethnic group among DUI arrestees, as they have each year for over a decade. The report continues to explain how Hispanics continued to be arrested at a rate higher than their estimated 2013 population parity of 35.4% citing the Department of Finance, Demographics Research and Census Data Center. In counties where the population of Hispanics is high, like in Fresno County, their DUI arrest rate is also high. The annual report names the seven counties with Hispanics comprising 60% or more of the DUI arrests in 2013 and places Fresno County at 62.2% for that year. [2015 Annual Report of the California DUI Management Information System, p. 25-26.]

The statistics for all filed DUI cases for 2013, 2014, and 2015 are as follows:

2013

Felony Vehicular Manslaughter while intoxicated.....	11
Felony DUI causing bodily injury.....	110

2014

2015

Alcohol & Drug Impaired Driving

In 2012, Fresno County was one of nine counties in California that participated in the nation's first "Statewide Roadside Survey of Alcohol and Drug Use by Drivers". The survey results showed 14 percent of drivers tested positive for drugs that can impair driving, while 7.3 percent of drivers tested positive for alcohol. Of the drugs, marijuana was most prevalent, at 7.4 percent, slightly more than alcohol. Over 1,300 drivers voluntarily agreed to provide breath and/or saliva samples at roadside locations set up in nine California cities. The samples were collected between 10:00 p.m. and 3:00 a.m. on Friday and Saturday nights, the peak times of impaired driving. Breath samples were examined for alcohol, while saliva samples were tested for THC (the active ingredient in marijuana); other major illegal drugs, prescription and over the counter (OTC) medications that can adversely affect driving were also tested. [Results of the 2012 California Roadside Survey of Nighttime Weekend Drivers' Alcohol and Drug, Executive Summary].

DUI Recidivism Problem Fresno County had a 5.0% rate at which first time offenders had a subsequent DUI incident within 1 year compared to 2.9% in Los Angeles. Among the larger counties in California, Fresno County had the highest rate of second offenders having a subsequent DUI incident within 1 year at 7.3% compared to Orange County which had a 3.2% rate. The rate at which first time DUI offenders had a subsequent crash within 1 year was 2.3% in Fresno County whereas Los Angeles had a 3.3% rate. [2015 Annual Report of the California DUI Management Information System, p. 63.]

2. PERFORMANCE MEASURES**A. Goals:**

7. The Grantee Agency Official further agrees by submitting this grant agreement that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
