The State, the State Auditor, or any duly authorized representative of the Federal government having jurisdiction under Federal laws or regulations (including the basis of Federal funding in whole or in part) shall have access to any books, records, and documents of the Contractor that are pertinent to the Agreement for audits, examinations, excerpts, and transactions, and copies thereof shall be furnished if requested.

STATE GENERAL FUND ALLOCATION FOR REGIONAL EMS AGENCIES FY 2026/27

Central California EMS Agency

A Division of the Fresno County Department of Public Health
Serving Fresno, Kings, Madera, and Tulare Counties

EMS AGENCY MISSION STATEMENT

The EMS Agency is committed to the needs of the multi-country pre-hospital environment. Our mission is to inspire, educate, evaluate, direct, provide resources, and ensure that each citizen receives the highest level of care.

Our goals are to facilitate an environment of collaboration among all providers and agencies in which there is innovation, purpose, standardized care, proactive technologies, preparedness, coordination, and integration.

Our values are honesty, loyalty, equality, originality, integrity, and communication.

INTRODUCTION

The Central California Emergency Medical Services Agency (CCEMSA) serves a multi-county region encompassing Fresno, Kings, Madera, and Tulare Counties. This region covers more than 14,400 square miles and supports a population exceeding 1.8 million residents. Located in the central San Joaquin Valley, the area features a highly diverse landscape, ranging from expansive agricultural lands and urban centers to the Sierra Nevada mountain range. Tourism plays a significant role in the regional economy, as the area serves as a primary gateway to Yosemite, Kings Canyon, and Sequoia National Parks, as well as numerous recreational destinations within the Sierra and Sequoia National Forests.

The region continues to experience consistent year-over-year growth in prehospital call volume. While emergency medical service providers generally maintain sufficient resources to respond to these incidents, significant challenges persist at receiving hospitals. Many facilities continue to face substantial overcrowding and elevated patient volumes within their emergency departments, impacting overall system efficiency and patient throughput.
