EMS AGENCY MISSION STATEMENT

The EMS Agency is committed to the needs of the multicounty pre-hospital environment. Our mission is to inspire, educate, evaluate, direct, provide resources, and ensure that each citizen receives the highest level of care.

Our goals are to facilitate an environment of collaboration among all providers and agencies in which there is innovation, purpose, standardized care, proactive technologies, preparedness, coordination, and integration.

Our values are honesty, loyalty, equality, originality, integrity, and communication.

INTRODUCTION

The funding provided by the State of California EMS Authority greatly assists the EMS Agency in maintaining a level of commitment to each of these counties and provides a standard level of care that may not be possible without this assistance.

Daniel J. Lynch

This application to the State of California Emergency Medical Services Authority is for the continuation of State General Fund assistance for the planning, implementation, and maintenance of a multi-county EMS system. The Fresno County Department of Public Health is the designated local EMS Agency for the Counties of Fresno, Kings, Madera and Tulare Counties. Through specific agreements between each County, this integrated EMS system provides 100% paramedic coverage with consolidated resources of both public and private provider agencies. The development of regional policies and procedures assures that out of hospital care and procedures are consistent and that patients throughout the region are receiving quality patient care.

Significant changes are occurring in healthcare and the Emergency Medical Services has an increasing role in the delivery of prehospital and "out-of-hospital" care. EMS systems continue to find themselves in an awkward position of developing changes in the delivery model of prehospital care, while at the same time trying to protect the EMS system from expansion of traditional services and roles that are no longer needed. EMS systems are looking towards healthcare models that further decrease the number of patients accessing emergency departments. The CCEMSA has implemented several changes over the past few years with the sole focus of trying to keep paramedic ambulances available to the EMS system. At the same time, we have implemented processes to help reduce the number of non-urgent patients accessing the emergency departments.

This includes furthering the use of Basic Life Support ambulances to handle prehospital requests and many non-emergency requests for ambulance service that data has shown not to require the use of a paramedic ambulance. In recent years, the EMS Agency reduced code 3 responses by nearly 40% by conducting an in-depth study of responses, which resulted in reducing many lights and sirens responses to non-lights and sirens responses. Today, only 56% of EMS calls are dispatched with red lights and sirens, which is significantly below the industry averages.

The EMS agency's continuing challenge is to assure that the integrity of the EMS System remains intact. The EMS system continues to move forward, and plans are in place to further enhance the quality level of care provided throughout the EMS region. The funding provided by the State of California greatly assists the EMS Agency in maintaining this level of commitment to each of these counties and provides a standard level of care that may not be possible without this assistance.

The Central California EMS Agency is prepared to meet the challenges of the coming year. With the challenges come opportunities and the CCEMSA will be aggressively pursuing any changes that will continue to protect the citizens, continue the provision of excellent prehospital care, and expand the development of out-of-hospital care.

Daniel J. Lynch
EMS Director

Budget Detail

We are very appreciative of the BCP funding from the State. It has given us great relief and allows us to maintain service levels across the region. Funding this year continues to be allocated to the original justified areas. Priority areas have been targeted with funding allocations that are not expected to change in the subsequent years.

Communications – This cost represents the current county cost for radio access charges for EMS Communications. This amount accounts for approx. 25 radios used in the rural and partner counties at a rate of \$105.45 per radio/per month.

Software / Software Maintenance - This cost represents a portion of the ongoing computer aided dispatch software and software annual maintenance costs for partner counties and rural communities. The budgeted cost represents the EMS Communications Center annual software maintenance cost for the Central Square Dispatch System and software, which provides the primary dispatch for the EMS Region.

Data Collection and Evaluation software is currently in the process of being purchased through one-time grant funds. The pursuit of grant funds for this item was initiated once it was verified that the BCP funds would be approved. The BCP funding will be used to provide support costs for the new data collection and evaluation software.

Administrative/Indirect Cost:

Fresno County has chosen to claim the 10% overhead/indirect cost allowed by the State. The 24.426% of indirect cost rates are currently applied in Fresno County, and the cost includes administrative support, departmental support and county overhead. Since the agreement is limited to 10% indirect cost, Fresno County will assume the responsibilities of the unreimburseable 14.426% indirect costs.
