

## Board Agenda Item 27

DATE: February 7, 2017

TO: Board of Supervisors

SUBMITTED BY: David Pomaville, Director, Department of Public Health

SUBJECT: Amendment to Agreement with the California Department of Public Health

RECOMMENDED ACTION(S):

**Approve and authorize the Chairman to execute Amendment I to Agreement No. 15-524 with the California Department of Public Health, for Sexually Transmitted Disease Prevention programs, effective February 7, 2017 with no change to the term of July 1, 2015 through June 30, 2019 and decreasing the maximum by \$80,000 to a total of \$426,780.**

Approval of the recommended action will decrease funding for sexually transmitted disease (STD) prevention activities by 16% or \$80,000. The California Department of Public Health (CDPH) STD Control Branch has amended the scope of work eliminating the chlamydia screening quality improvement (CTQI) project. The project focused on improving screening among young women within the primary care setting, the screening will be redirected by CDPH to a local community based non-profit.

ALTERNATIVE ACTION(S):

No viable options are available.

FISCAL IMPACT:

There is no increase in Net County Cost associated with the recommended action. The recommended amendment will decrease the revenue agreement from \$506,780 to \$426,780 (\$80,000 or 16%). The reductions are as follows:

- \$16,000 in FY 2016-17; from \$126,695 to \$110,695;
- \$32,000 in both FY 2017-18 and FY 2018-19; from \$126,695 to \$94,695

Sufficient appropriations and estimated revenues are included in the Department's Org 5620 FY 2016-17 adopted budget and will be requested in subsequent budgets for the duration of the term. The agreement limits indirect cost recovery to 14.674% of salaries and benefits. The Department's current indirect rate is 15.873% or \$13,105. The difference (1.199% or \$990) will be covered by Health Realignment.

DISCUSSION:

On October 13, 2015, your Board approved revenue Agreement No. 15-524 with the CDPH for funding to support STD prevention, treatment and interruption activities.

The recommended amendment makes adjustments to the County's STD scope of work by eliminating the CTQI project. The project focused on improving chlamydia screening among young women within the primary care

setting. CDPH has redirected the project from the local health department to a local community based non-profit, which fits with the ongoing developing goals of the project. The Department continues to engage with the CDPH and support CTQI project efforts in the County. The agreement's remaining STD prevention and control activities, core STD program management and chlamydia and gonorrhea screening, remain unchanged.

With your Board's approval, the agreement maximums will decrease for FYs 2016-17, 2017-18 and 2018-19. The CTQI project will be removed from the scope of work but will be redirected by CDPH to a local non-profit.
