Regarding File 47-544312

Dear Department of Alcoholic Beverage Control,

Our license that was issued November 12, 2014 for Stonehouse Tavern contained a condition that did not allow amplified or live music on our patio. We are requesting that that condition be removed so that we can allow live or amplified music on our fully-enclosed patio which is only accessible from the building.

We have had music inside the building since we took over the original license on May 1, 2014 and have had no problems during those shows. There are no businesses close by that would be open during the hours that we would have the music outside, and there are very few residences close enough to hear the music.

Thank you for your consideration.

Sincerely,

Dan Mehling
