

# Board Agenda Item 22

DATE: February 6, 2018

TO: Board of Supervisors

SUBMITTED BY: Jean M. Rousseau, County Administrative Officer / Emergency Services Director

SUBJECT: Continuation of Tree Mortality Local Emergency Status in Fresno County

RECOMMENDED ACTION(S):

**Adopt Resolution proclaiming continuation of the local emergency status relating to the extremely high levels of tree mortality and hazardous conditions created by the drought and request that the Governor continue to provide resources and support to mitigate risk of falling trees and increased fire hazard.**

Approval of the recommended action will ensure the local emergency status remains in effect and permit the potential recovery of eligible costs.

ALTERNATIVE ACTION(S):

No viable options are available.

FISCAL IMPACT:

The recommended action is necessary to ensure specific liability protection, emergency powers of the Emergency Services Director, and potential recovery of eligible costs, if any, from State and Federal emergency funds.

DISCUSSION:

On September 22, 2015, your Board approved a resolution requesting a state of emergency be proclaimed in the County due to the degraded forest conditions and imminent threat from catastrophic fires and extreme drought.

On May 24, 2016, your Board approved the Emergency Services Director's submittal of an Application for State financial assistance under the California Disaster Assistance Act (CDAA) to the California Office of Emergency Service (OES) to mitigate tree mortality.

On January 31, 2017, your Board approved 13 revenue agreements with the California Department of Forestry and the Fire Prevention (CAL FIRE) to receive TM (Tree Mortality) grants for the removal of dead and dying trees that are within 300 feet of permanent private structures, roadways, and public or private infrastructure. The assessment, identification, and removal of dead and dying trees is underway. Additionally, your Board increased the Purchasing Manager's previous authorization to contract for services related to tree mortality from \$2,000,000 to \$6,600,000.

In May 2017, 5,200 dead and dying trees were removed from Huntington Lake Road using CDAA funding; an

additional 2,200 trees have been identified for removal on Auberry Road.

The County's OES has coordinated an emergency response-planning meeting with all organized camps operating in the County. Additionally, the Office worked with CAL FIRE and the Sheriff's Office to conduct pre-fire evacuation planning meetings for communities in high hazard areas.

Forest degradation conditions have not improved as the tree mortality disaster has continued and escalated in eastern Fresno County. Mountain communities continue to be threatened by the potential of falling trees and wildfires.

Fresno County Ordinance Code, Chapter 2.44.060 requires your Board to review the need to continue the local emergency at least once every 30 days until terminated; state law requires the same. The local emergency must be terminated at the earliest possible date when conditions warranting proclamation have ended.
