

ATTACHMENT A

ATP CYCLE 4

Valentine Avenue Pedestrian Path – The project proposes a pedestrian path starting at the community of West Park and along Valentine Avenue to West Park Elementary School, which is approximately 1.5 miles directly south. Currently, there are no pedestrian path or walkway connecting the community with school. The path will provide a safe passage for students travelling to and from the school.

Fancher Creek Bridle Trail Project – The project would reclaim an existing path that has fallen into disrepair and become overgrown with weeds and trees rendering the path unusable to pedestrians and the equestrian community. Currently, path users walk on the Fresno Irrigation District Fancher Creek maintenance easement adjacent to the path easement as it is a clear, level, and maintained pathway. The proposed project consists of making improvements to the existing 1.3 mile long Fancher Creek Bridle Path easement located within a County Island, in the Sunnyside neighborhood of City of Fresno.

Biola Avenue Walkway – The project proposes sidewalk on Biola Avenue and “C” Street within the community of Biola. Currently, the east side of Biola Avenue lacks a pedestrian path or sidewalk. It is the main road that runs through the community where the elementary school and US Post Office are located. The installation of new sidewalk on “C” street will fill in the gap on the north side of the road leading to the community center.
