SUBMITTED BY: Steven E. White, Director
Department of Public Works and Planning

SUBJECT: Award Contract No. 19-03-C, Watts Creek Bridge on Watts Valley Road Bridge Replacement Project

RECOMMENDED ACTION(S):

Adopt plans and specifications for Contract No. 19-03-C, Watts Creek Bridge on Watts Valley Road Bridge Replacement Project, Federal Project No. BRLO-5942 (248), receive verbal report on the bid opening, and award to the bidder with the lowest responsive bid.

Approval of the recommended action will authorize the award of a Federally funded Highway Bridge Program (HBP) replacement project. This item pertains to a location in District 5.

ALTERNATIVE ACTION(S):

If the recommended action is not approved, the Watts Creek Bridge on Watts Valley Road Bridge Replacement Project (Project) will be delayed or will not be constructed.

FISCAL IMPACT:

There is no increase in Net County Cost associated with the recommended action. The contract construction cost is estimated to range between \$1,357,000 and \$1,500,000. The Project is 100% Federally funded through the HBP. Sufficient appropriations and estimated revenues are included in the Department of Public Works and Planning - Road Org 4510 FY 2019-20 Recommended Budget.

DISCUSSION:

The Project consists, in general, of replacing the existing Watts Creek Bridge on Watts Valley Road and realigning the approach roadways. The existing single span timber bridge will be replaced with a cast-in-place

reinforced concrete slab bridge approximately 50 feet downstream from the existing bridge. The realignment of the approach roads will increase safety, as the winding nature of the road will be changed to allow for greater sight distance. The existing bridge will remain in place during construction to serve as an on-site detour.

Department staff will present a verbal report for a bid opening held on June 20, 2019, which will include the estimated cost of construction based on the lowest responsive bid, the list of bidders, and their respective bid amounts and Disadvantaged Business Enterprise (DBE) commitment.

Plans and specifications were prepared by the Department's project consultant, Mark Thomas Company. It is anticipated that construction will begin in August 2019 and be completed in January 2020.
