Date	Ver.	Action By	Action	Result
7/10/2018	1	Board of Supervisors	Consent Agenda be approved	Pass

DATE: July 10, 2018

TO: Board of Supervisors

SUBMITTED BY: Steven E. White, Director
Department of Public Works and Planning

SUBJECT: Stop Sign at Amber Avenue and Rorden Street

RECOMMENDED ACTION:

Adopt Resolution designating the intersection of Amber Avenue and Rorden Street a stop intersection and authorizing a stop sign at the intersection, stopping eastbound traffic on Rorden Street, making it a one-way stop.

Approval of the recommended action will allow the installation of a stop sign at this location, improving traffic safety by requiring vehicles on Rorden Street to stop in the eastbound direction. This item pertains to a location in District 4.

ALTERNATIVE ACTION:

If the recommended action is not approved by your Board, the traffic controls at this location will remain unchanged.

FISCAL IMPACT:

There is no Net County Cost associated with the recommended action. The estimated cost for the one-way stop is \$175 for materials and \$100 for equipment and labor performed by Department of Public Works and Planning personnel. Sufficient appropriations are included in the Department's Roads Org 4510 FY 2017-18 Adopted Budget Fund 0010, Subclass 11000, Account 7260 (Special Departmental Expense).

DISCUSSION:

Amber Avenue and Rorden Street are two-lane county roads that intersect east of the City of Selma, when Rorden tees into Amber Avenue. The intersection of Amber Avenue and Rorden Street is under the County's exclusive jurisdiction. The speed limit is 55 MPH. There are no centerline stripes or other pavement markings

at this location. Traffic signs consist of the yellow double arrow sign and yellow object marker for eastbound traffic on Rorden Street. The pavement width on Amber Avenue and Rorden Street are 21-feet and 19-feet, respectively. Traffic volume on Amber is 150 vehicles per day (VPD) and 200 VPD on Rorden.

Each intersection has the potential for several different types of vehicular conflicts. Right-of-way assignment for uncontrolled intersections is defined in the California Vehicle Code (CVC). A basic rule of the road, at an intersection where no traffic-control devices are present, requires the vehicle on the left to yield to the vehicle on the right if they arrive at approximately the same time. Section 21800(a) of the CVC states that "The driver of a vehicle approaching an intersection shall yield the right-of-way to any vehicle which has entered the intersection from another highway." For intersections not controlled by yield signs, stop signs, or traffic signals, the driver of a vehicle approaching an intersection should be able to see potentially conflicting vehicles in sufficient time to stop before reaching the intersection. Stopping sight distance is provided continuously along each highway or street, including intersection approaches, is fundamental to intersection operation. Sight distance is provided at intersections to allow drivers to perceive the presence of potentially conflicting vehicles. This should occur in sufficient time for a motorist to stop or adjust their speed, as appropriate, to avoid colliding in the intersection.

One-way stop control can be useful as a safety measure at intersections where certain traffic conditions exist. When considering a one-way stop control at an intersection, the Department will conduct an engineering study. Based upon the information gathered during the engineering study, the Department will make a recommendation regarding the installation of a stop sign(s). Criteria considered in an engineering study may include the collision history, traffic volume, traffic delays, line of sight studies, or any combination of the foregoing.

Studies performed by Department staff indicate the line of sight for eastbound traffic on Amber Avenue and Rorden is limited in a manner that justifies the installation of a stop sign stopping eastbound traffic on Rorden at Amber. Studies performed by Department staff also indicated that a stop sign stopping eastbound traffic on Rorden at Amber is appropriate and will improve traffic safety at this intersection.
