(See # 1 on the sample Attachment).

**7. Three RECREATIONAL BOATING safety issues**

This is a Federal Pass-Through 'Recreational Boating Safety Grant'. The purpose of the grant is to promote boating safety and to decrease the number of accidents, injuries, and fatalities on U.S. waters. Clearly identify three BOATING safety issues that affect recreational boaters in your jurisdiction. Your answer to this question will be referenced throughout this grant application.

In Fresno County we have identified the following issues as our major safety concerns. Our first concern is an ignorance of boating laws and water safety, especially around our two rivers. We also have several lakes that offer people the opportunity to rent vessels and personal watercraft. Our county population continues to grow, we are over one million residents. Each summer our population swells from those vacationing and recreating from other jurisdictions, especially in the areas where our waterways are located. This surge results in an increased usage of our lakes and rivers. As a result, our law violations, water rescues, and accident investigations increase. Our unit works closely with our media partners in the County to educate the public on boating laws and water safety. We also maintain a social media presence across various platforms that promotes boating and water safety.

Our second concern is the unsafe speed of vessels on the Kings River and operators who are under the influence of alcohol while boating recreationally. The Kings River in our area of operations is bifurcated geographically by the Olson Bridge in the city of Reedley to primarily allow for boating traffic on the southern end of our area of operation and for swimmers and individuals who float on rafts or kayak on the northern end of the Kings River. Boating traffic is allowed north of the Olson Bridge; however, the speed is reduced to 10 miles per hour or under depending on the area. We have seen an increase in boat traffic in this area which is primarily designated for swimmers, floaters, or kayakers. This recreational boat traffic commonly travels over the posted speed limit and enforcement action is needed to keep traffic at a safe speed given the presence of people in the water or in areas that are marked "No wake/ 5MPH". A common issue seen with vessels travelling on plane, or more than 10 miles-per-hour, is that the operator is under the influence of alcohol and did not notice or just completely disregarded the speed limit in this area. This poses a significant risk to those who are floating, swimming, or kayaking down the river in this area. The current in this area is swift, the river is narrow, and there are several technical areas where precise vessel handling is needed in order to bypass natural obstacles and hazards. Due to all of these factors, recreational boaters are encouraged to operate their vessels in the area south of the Olson Bridge where the river is much wider, not as swift, allows for speeds up to 40 miles-per-hour, and is restricted from floaters, swimmers, and kayakers.

Our third concern is that we have seen an increase in the usage of our two rivers. We normally encounter boats, kayaks, rafts, and swimmers on the river. Each summer thousands of people raft float the Kings River. In addition, one of our County Parks sits on the San Joaquin River. Thousands of folks use the San Joaquin River to cool off during the summer. The river is surrounded by vegetation on both sides of the shorelines. In addition, there is vegetation under the water. The water levels of the rivers vary during the summer months. This can cause fluctuations in water speed and visible vegetation. Floaters and swimmers get caught in the vegetation, or "strainers", each summer. These water hazards are extremely dangerous and require specialized boats and equipment to successfully rescue someone.

**9. Project Type**

Are you requesting a new Patrol Boat/PWC or Misc. Equipment.?

- ☐ New Patrol Boat/PWC - see definition below
- ☒ Equipment / Repairs

**NOTE:** A "Patrol Boat" is defined as "A Department of Parks and Recreation, Division of Boating and Waterways approved, registered vessel (with or without trailer and/or outboard motor) purchased for use in boating safety and law enforcement activities." **VERIFY THAT YOUR REQUEST IS CORRECTLY CLASSIFIED.** Failure to correctly classify may result in disqualification of your grant application.

*\* All items purchased with funding provided by the Division of Boating and Waterways are for the exclusive use of the Boating Safety and Enforcement Unit.*

11. Describe what you are requesting. You may request only FIVE ITEMS TOTAL (patrol boat and equipment). You may group "like items". "Like items" are related items that work together. You need one to work with the other. Examples of "like items" include a 'FLIR and delivery', 'replacement boat seat and tax' or 'GPS and screen'.

DBW may fund up to 50% of the total cost of fire suppression equipment.

**NOTE: Supplies and consumables (i.e: rope, water bottles, cleaning supplies, hardware) are not funding priorities.**

## Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION

- 11 a. Is this equipment general all-purpose gear? NOTE: person-specific ☒ Yes ☐ No and fitted items will not be funded.
- 11 b. Describe exactly what is being requested and how this equipment will help mitigate the recreational boating safety issues you identified in Question 7. If the requested quantity is more than one for any item, explain the need for multiple items. (max. 2000 characters)

Replacement of BT06 siren and PA control gear. The current equipment cuts in and out periodically. Replacing this gear will help us with enforcement operations and rescue operations.

**11 c. Describe any negative impacts to boating safety and/or boating enforcement if your agency does not receive its requested grant award.**

If we do not receive an award to replace the gear, we will continue to have siren and PA issues which affect us when we conduct enforcement stops and rescue operations. The ability to warn the public during the response to emergencies with an audible siren and PA system is crucial for public safety and for the safety of the occupants of the responding emergency vessel.

**11 d. Classify this request**

**Classify this request by choosing one of the following options and present a strong justification for the request**

- ☒ "Critical" (operations would cease without it)
- ☐ "Increased efficiency" (if it would save staff time, identify how much time)
- ☐ "Convenience" (it would make life a little easier)
- ☐ "Protection" of existing equipment (ex: shade tents, hoists to get the vessels out of the water, etc. to extend longevity)

Justify your classification of this request. (max. 300 characters)

A properly functioning siren and PA are essential to enforcement and rescue operations.

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? ☐ Yes ☒ No

If yes, what percentage can you supplement?

**11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.**

We cannot borrow a siren/PA from another agency's patrol vessel.

**11 g. How and why was this particular model selected? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.**

## Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION

The replacement gear selected is what is currently in use on our patrol vessels. It is our standard model. We do not have any other source of funding right now due to our agency being in a multi-million dollar shortfall.

### 11. Item Details

11 a. Is this equipment general all-purpose gear? NOTE: person-specific ☒ Yes ☐ No and fitted items will not be funded.

11 b. Describe exactly what is being requested and how this equipment will help mitigate the recreational boating safety issues you identified in Question 7. If the requested quantity is more than one for any item, explain the need for multiple items. (max. 2000 characters)

Two **LifeSleds rescue boards** are being requested to replace old one that is deteriorated over time and use. These sleds, when attached to a PWC, allow us to rescue people are trapped in strainers on our riverways or who are in distress on our lakes. They supplement river operations when a boat is in for repairs. They allow us to also respond to areas where a boat cannot.

11 c. Describe any negative impacts to boating safety and/or boating enforcement if your agency does not receive its requested grant award.

The sleds help us patrol our rivers when a boat goes down for service. They also allow us to respond to areas without having to pull a boat off of the river. If we are not awarded, a boat will have to be pulled off the river which leaves that waterway without a rescue/enforcement boat.

11 d. Classify this request

**Classify this request by choosing one of the following options and present a strong justification for the request**

- ☐ "Critical" (operations would cease without it)

These sleds would assist our two riverboats. They would extend our capabilities.

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? ☐ Yes ☒ No

If yes, what percentage can you supplement?

**11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.**

When an emergency call for a water rescue response is broadcasted, we do not have the time to check with other agencies in the area to see if they have rescue sleds that we could borrow. Our county covers a geographical area of over 6,000 square miles and it would be untimely and ineffective to request this from another agency in an emergency situation. We need to be able to respond anywhere in the county with the proper equipment and in a timely fashion.

**11 g. How and why was this particular model selected? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.**

The model selected is a direct replacement for what we are wanting to replace. It is the perfect size for our PWC's and meets our needs. Currently our department is in a multi-million dollar shortfall and there is no other funding source available to us.

**Misc. Equipment - Informational**

- 11 h. What body(s) of water will this equipment be used on?

**Misc. Equipment Items Questions (Replacement of motor, gauges, steering, bow lights, shift and throttle, chairs, depth finder, flooring, small trolling type motor, swim step, bimini top, and engine covers)**

## 11. Item Details

- 11 a. Is this equipment general all-purpose gear? NOTE: person-specific ☒ Yes ☐ No and fitted items will not be funded.

- 11 b. Describe exactly what is being requested and how this equipment will help mitigate the recreational boating safety issues you identified in Question 7. If the requested quantity is more than one for any item, explain the need for multiple items. (max. 2000 characters)

I am requesting a new outboard jet motor and required throttle/shift parts, steering upgrade, replacement of floor, seats, gauges, fish/depth finder, bow light replacement, small motor addition, swim step replacement, new Bimini top, new engine cover. These items are old, some not working, and some are broken. The current motor on the boat is approaching the end of its normal lifecycle. The retrofitting of this vessel will allow us to provide lifesaving rescue response and will be used to conduct boating enforcement to mitigate the risk of speeding vessels and boating under the influence violations. This enforcement will ultimately reduce the amount of boating accidents and fatalities on our waterways.

- 11 c. Describe any negative impacts to boating safety and/or boating enforcement if your agency does not receive its requested grant award.

If we are unable to obtain this equipment our agency will not be able to effectively conduct lifesaving rescue operations, and the number of drownings will increase from previous years. This will also increase the amount of hours that will be needed to recover the drowned persons from the water way. Additionally, our agency will not be able to effectively enforce boating laws, primarily speed and BUI violations, in this area of operation since we cannot deploy conventional patrol vessels on this waterway for enforcement. Due to this, there is a significant risk of increased boating collisions where vessel speed and boating under the influence will be primarily collision factors.

- 11 d. Classify this request

**Classify this request by choosing one of the following options and present a strong justification for the request**

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? ☐ Yes ☒ No

If yes, what percentage can you supplement?

**11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.**

We cannot borrow this equipment from another agency and it would not be practical to request assistance from an outside agency as our county is over 6,000 square miles. A timely response would not be practical from another agency for rescue operations. Nor can we request this equipment or another vessel for day-to-day boat patrol or enforcement activity.

**11 g. How and why was this particular model selected? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.**

These items were specifically chosen to provide adequate operational capabilities given the body of water which it is operating on. Our rivers are swift, can be shallow in areas, narrow, and can be very technical to navigate with natural hazards posing a collision risk. This is considered standard equipment for this type of waterway and allows us to have enough power to effectively operate in a current with deputies on board to operate the vessel, conduct rescues and enforcement action, and allows us to transport equipment and individuals without risk of capsizing. Our agency has no other funding sources as we are in a multi-million dollar budget deficit.
