Communication can be viewable by any community resident who follows the Department's social media platforms.

**What is the public purpose of the Celebration?**

1 in 6 people worldwide experience infertility at some point in their lives. These individuals face significant challenges with their mental health. The month of June is dedicated to destigmatizing infertility, supporting those trying to conceive, and highlighting the challenges these individuals face. This month provides a unified voice to remind the public that infertility is a medical condition of the reproductive system, not a personal failure.
