

THE COUNTY OF FRESNO

Board of Supervisors

PROCLAMATION

Whereas~ National Information Technology (IT) Professionals Appreciation Day is celebrated on the third Tuesday of every September to recognize the technical experts - who ensure our computer systems and digital frameworks run smoothly; and

Whereas~ National IT Professionals Appreciation Day was created in 2015 to show appreciation for the tech wizards who take care of the bits and bytes so that the rest of the employees and their workplaces stay connected to the organization's network and operations run flawlessly; and

Whereas~ Fresno County's IT Professionals work diligently behind the scenes to identify potential issues that impact network operations, troubleshoot, prepare technological solutions, manage, and maintain the County's applications, databases, geographic information systems, IT hardware, mobile and office communication devices, network, radio, software systems, and web solutions which serve County employees and the residents of Fresno County; and

Whereas~ when technology is running smoothly, oftentimes one can easily overlook the important role that IT professionals have in Fresno County's daily operations and the wide array of services being provided by the County. IT professionals play an important role in helping solve network system disruptions, software malfunctions, and helping the rest of us perform our daily tasks; and

Whereas~ the Information Technology Services Department (ITSD) would like to recognize and thank all IT professionals who help make modern life easier for all of us, and their commitment, expertise, and efforts in supporting Fresno County's mission and goals.

NOW THEREFORE, BE IT RESOLVED that the Fresno County Board of Supervisors hereby proclaims September 16, 2025, as Information Technology Professionals Appreciation Day, and the Week of September 15th through September 19th, 2025, as Information Technology Professionals Appreciation Week in the County of Fresno, and we extend our appreciation to all IT professionals for their crucial role in ensuring the seamless operation of the County's essential technology infrastructure and their support in helping departments and the County serve the community.
